

230

Universal Power
Procedures Table

Ritter®
by MIDMARK

The Ritter 230 satisfies your positioning needs...

Knee-Chest
Tool-less reconfigure of the foot support provides the perfect position for colon and rectal exams and procedures.

Lithotomy
Extending the stirrups and treatment pan, lowering the foot support and tilting the seat provide the perfect position for OB/GYN exams and procedures.

Flat
The table supports exams and procedures requiring supine, prone, left lateral or right lateral positioning.

Low Entry
With the increasing number of elderly and disabled patients, the low entry position makes it easy and safe for the patient to get on and off the table.

Trendelenburg
Whether better positioning for the patient, treating for shock or faintness, or increasing anesthesia onset, the Trendelenburg position offers a full 30° of tilt.

The Ritter 230 is a power procedures table with basic features, making it very affordable. Better yet, the Ritter brand has provided quality to healthcare professionals for over 50 years and is recognized as an industry leader.

**Shown with Clay upholstery*

A power procedures table is a wise investment for your practice.

There are many challenges facing you and your practice today, so choosing the right equipment is more important than ever.

More and more healthcare providers are investing in power tables when updating or constructing new facilities. This new trend is making exam and procedure rooms more efficient and safe, giving the patient a better overall healthcare experience.

Make the smart choice. Choose the Ritter 230 Power Procedures Table and experience the many benefits of a power table.

230 Universal Procedures Table

The Right Thing to Do — For Your Practice, Your Staff and Your Patients

As the practice of medicine changes, more procedures are being performed in the office than ever before, making efficiency essential.

Positioning patients can be a difficult task when dealing with less mobile, elderly and special needs patients. The Ritter 230, with its low height and multi-positioning capabilities, improves office efficiency by allowing you and your staff to easily position patients with the touch of a button; reducing the likelihood of fatigue, back and neck strain, and workplace injury.

Patients will feel more comfortable and secure when they can easily get onto a table and experience smooth and steady movement during positioning. Their anxiety will be reduced, and they will feel satisfied with the level of care you provide.

Consider the Ritter 230 Power Procedures Table a long-term investment for your practice, your staff and your patients.

The Ritter 230 with power height, back, foot and tilt allows you to effortlessly and precisely position patients for a multitude of procedures.

*Product shown with electrical outlet option & Dusty Blue upholstery

Ergonomic and intuitive standard hand control in easy-to-find location.

*Shown with Moss upholstery

Options that improve efficiency

Rotation

Exam and procedure rooms are being equipped with more and larger devices. Inefficiency results when moving these devices to the patient. Outfitting your procedure table with the rotation option simplifies this task by allowing you to move the patient instead of the device.

The simple touch of a pedal (highlighted in photo) on either side of table permits 350 degrees of rotation; touch the pedal again to lock table in place. It's that easy!

*Shown with Navy upholstery

Electrical Outlets

Optional hospital grade outlets (on each side) allow easy access to electrical power, providing a clean look to the room and floor space free of power cords.

Flat Upholstery

A 24-inch wide and flat upholstery option offers greater access to the patient. The seamless design ensures a nice look and easy-to-clean surface.

Accessories that add versatility

Adjustable Arm System

Offers patients a stable platform in accessing the table and sense of security during positioning. Arms rotate and lock into one of three possible positions and are removable, all without the use of tools.

Articulating Armboard

Comfortably supports patient's arm. Ball joint design permits multi-directional movement.

Hand Surgery Armboard

Supports patient's arm. The telescoping pole rests on the floor to provide extra stability for delicate hand surgery procedures.

24" Wide Foot Rest

Provides extra width for added support under the patient's feet.

Articulating Knee Crutch

A more ergonomic and comfortable option compared to the standard stirrups, especially for lengthier procedures.

Vision Block Screen

Blocks the patient's view of sensitive procedures performed on the lower extremities, and can make the patient feel more at ease.

Linear-Style Foot Control

Optional foot control accessory maintains sterile field and can be used in combination with hand control. Select your style... traditional linear style or more efficient disc style (linear shown).

Double Arm Instrument Tray

Provides a convenient surface to place your instruments or supplies during procedures and gives a wide range of motion for easy reach, no matter where you are standing.

Security Straps

Improve safety by securing the patient to the chair before, during and after a procedure. Security strap width and location are adjustable to accommodate different patient demographics.

Security Side Panels

Provides extra side-to-side security for the patient when side panels are in the vertical position. When in the flat position, the side panels can serve as an extra work surface.

Locking Casters

Provides mobility without sacrificing valuable floor space.

Ritter 253 LED Exam Light

Easy access controls, high intensity light and an adjustable focalspot makes the 253 the perfect complement to any procedure room. Available in table mount and mobile options.
