PC SYSTEM

INFORMATION TO THE USER

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING

Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

Trios2000

1. Introduction

Run multiple operating system(OS) on the same PC – Win95, Win98, Win2000, Win NT, Unix, OS2, Solaris and many others according to needs.

Functions

- Share one PC with 2 or more persons with their own OS (ideal for family, room mate, business office, etc).
- Run different language – Windows98 in English, Spanish, Chinese, Korea, Japanese, etc.
- Free from shut-down and viruses – corruption of one boot drive does not impact any other boot drives.

Required environment

- IBM-Compatible PCs with Pentium or higher
- Award Bios(new AMI Bios), Phoenix Bios
- IDE System
- One HDD for each OS

- * MS-DOS, WINDOWS95, WINDOWS98, WINDOWS2000 and WINDOWS NT are Trademark of Microsoft.
- * OS2 is a Trademark of IBM

Trios2000

2. Contents

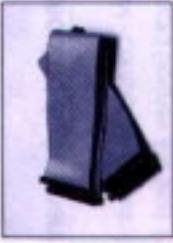

The Contents of TR05 are consisted as follow under Please check contents before loading.

Internal type

- TR05 - 1
- HDD data cable - 3
- Power cable - 1
- Power splitter - 1
- Screw - 4
- User's Manual

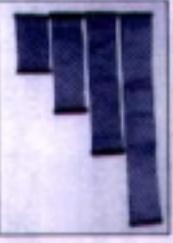

• TR05

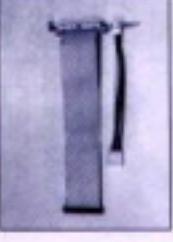

• Data cable

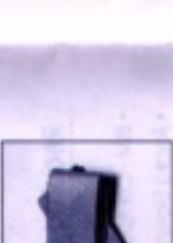

• Power cable

• Power splitter

• Screw

• User's Manual

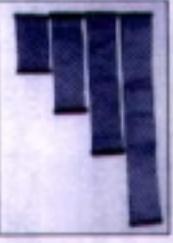

External type Cable Kit

Extend Type HDD Case

- Internal cable sets(DATA Cable+ Cable + Bracket)
- HDD data cable(PC to TR05)
- Power cable(PC to TR05)
- Power cable(TR05 to TR05)
- Power cable[10 Cm(S), 15 Cm(M), 20Cm(L)]
- HDD Power cable - 1

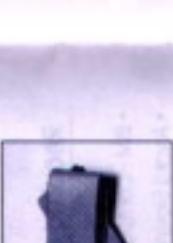

• Extend Type HDD Case

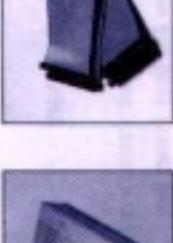

• Data Cable

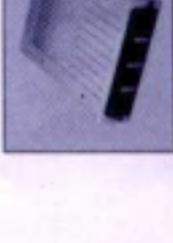

• Power cable

• Power cable

• Power cable

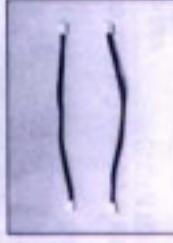

• Power cable

• Power cable

• Extend Type HDD Case

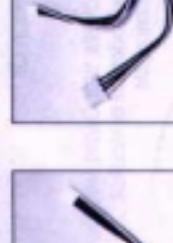

• Power cable

• Power cable

• Power cable

• Power cable

3. Identifying Components

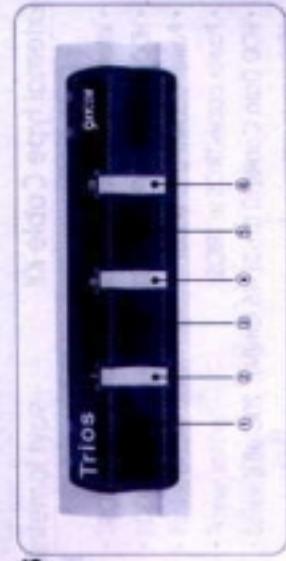

Fig.11 Trios Front

- ① Indicating lamp of H01
- ② Select button of H01
- ③ Indicating lamp of H02
- ④ Select button of H02
- ⑤ Indicating lamp of H03
- ⑥ Select button of H03

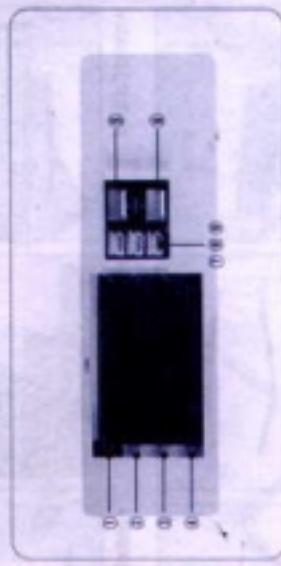

Fig.12 Trios Rear

- ① IDE Connector (HDD 1)
- ② IDE Connector (HDD 2)
- ③ IDE Connector (HDD 3)
- ④ IDE Connector to main [C:n]
- ⑤ Power Cable (OUT)
- ⑥ Power Cable (IN)
- ⑦, ⑧, ⑨ LED Connector for external type [II] (does not use in intend type)

Internal Type **Trios2000**

4. Installation Procedure

- ① Remove the system cover and 5.25 inch bay cover. RG.1
- ② Secure TRIOS into an empty 5.25 inch bay. RG2
- ③ Connect the single power cable to the "power in" slot of TRIOS. RG3

④ IMPORTANT

Set the hard disk jumper of all hard disks (including original HD) to its M5" (master select) setting. Please refer to your hard disk manufacturer's manual for instructions.

Please use after changing every hard disk jumper to CS! hand disk can not be aware on setting Master jumper in some Main board. RG4.

- ⑤ Connect the data cable from the motherboard into "C:N" connector of TRIOS located at bottom rear. RG.5 & RG6.
- ⑥ Connect data cable to "H1" connector of TRIOS and hard disk. RG7 & RG8.
- ⑦ Connect data cable to "H2" and hard disk. "H3" & hard disk. RG7 & RG8
- ⑧ Connect the power splitter to "power out" of TRIOS and connect to HDD2 & HDD3. RG9 & RG10
- ⑨ Make sure all of the connections are secure, and close the cover

INSTALLATION

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Fig. 5

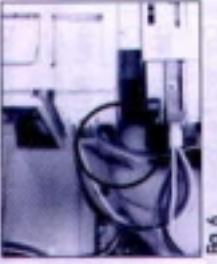

Fig. 6

Fig. 7

- ① Remove PC case cover. FG. 1
② Connect Data cable of the internal cable set to MOTHER BOARD IDE 1 (Primary). FG. 11
③ Connect power of the internal cable set to PC power unit.
④ Fix bracket of the internal cable set. FG. 12
⑤ Install TRIO5 in a safe position.
⑥ Insert HDD into HDD CASE and fix it with provided screws. FG. 13
⑦ Fix TRIO5 and HDD CASE with coupling pins. FG. 14
⑧ Connect IDE DATA cable(S) to TRIO5 H1 and connect to HDD. Connect IDE DATA cable(M) to TRIO5 H2 and connect to HDD. Connect IDE DATA cable(L) to TRIO5 H3 and connect to HDD. FG. 15
⑨ Connect HDD power cable to TRIO5 POWER OUT and connect to HDD. FG. 16
⑩ Connect LED cable to LED and HDD CASE on back of TRIO5. FG. 17
⑪ Connect extension IDE DATA cable to CIN and extension POWER CABLE to POWER IN on back of TRIO5. Then, connect to internal cable set bracket. FG. 18
⑫ Close PC case cover.

5. Selecting BIOS

- ① At the time of the initial booting of your computer, press 'Delete' key enter the 'CMOS SET UP MODE'(AMI BIOS).
- ② Select 'STANDARD CMOS SETUP'
- ③ Verify that Primary Master is set for 'AUTO' under 'type' and 'mode' and Primary Slave set for 'none' under 'type'.
- ④ Upon verification, press 'ESC' key, and select 'SAVE & EXIT SETUP'.

- ⑤ Reboot the system

- ⑥ If BIOS is PHOENIX BIOS, set Primary Master to "AUTO" and Primary Slave to "none".

STANDARD CMOS SETUP		INTEGRATED PERIPHERALS	
SOC HARDWARE SETUP		SUPERVISOR PASSWORD	
CHIPSET FEATURES SETUP		USER PASSWORD	
POWER MANAGEMENT SETUP		VIDEO AUTO-DISSECTION	
PnP/PCI CONFIGURATION		HDD LOW LEVEL FORMAT	
LOAD BIOS DEFAULTS		SAVE & EXIT SETUP	
LOAD SETUP DEFAULTS		EXIT WITHOUT SAVING	
ESC: QUIT		←→ ↑ ↓ : Select Item	
F10: Save & Exit Setup		CTRL+F2: Change Color	

Date/Time/Drive		Tue, Sep. 1999	
Time/Thermal	12:00:00	TYPE	MODE
Hard Disk	AUTO	CD/DV	CD/DV
Primary Master	None	HARD	HARD
Primary Slave	None	IDE	IDE
Secondary Master	None	IDE	IDE
Secondary Slave	None	IDE	IDE
Disk A: 1.44Mb	3.5"		
Disk B: None			

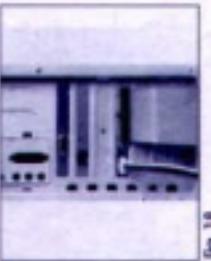

Fig. 17

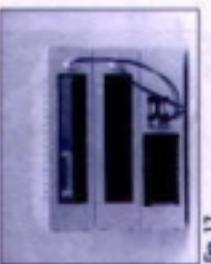

Fig. 18

Trios 2000

Ready for use after all cables are connected and CMOS SETUP is properly set.

Before powering up system, select the HDD you wish to boot from.

Then turn system on, it will automatically search for the selected HDD.

If you wish to work with another HDD, exit from the OS in use, turn off the system and select the HDD you wish to work with, then turn the power on.

Trios 2000

• **BOOTING**
The process including POWER ON, system examination and initiation of system operating software.

• **Hard Disk Drive (HDD)**

Short for Hard Disk Drive. A type of external data storage. The capacity has become greater over the years.

• **Bay**
Located in the front part of computer; space for installation of 3.5" or 5.25" floppy disk drives, HDD or CD-ROM, etc.

• **IDE**
Generally controls PC HDD and allows data I/O. Most personal computer systems adopt this control.

• **CMOS**

A type of memory that stores basic settings of the system including general hardware information.

• **BIOS**

Controls basic I/O. Bridges hardware and software. (AWARD, AMI, Phoenix, etc.)

• **Primary Master**

Maximum four HDD controllers can be installed in the system. The first HDD of the first controller is called "Primary Master" and the second hard disk drive, "Primary Slave". The first HDD of the second controller is call "Secondary Master" and the second HDD, "Secondary Slave".
