THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION.

Federal Communications Commission Requirements

The equipment has been tested and found to comply with the limits for Class B Digital Device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

●Reorient of relocate the receiving antenna.

●Increase the separation between the equipment and receiver.

●Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

●Consult the dealer or an experienced radio/TV technician for help.

THE CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and receiver.

(2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement

The equipment complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65. The equipment has very low levels of RF energy that it is deemed to comply without testing of specific absorption ratio (SAR).

1

1. Hardware Installation

1). Connect the Multi-link receiver

 Take out the Multi-link receiver from bottom of the mouse and connect it to your computer.

2). Insert the batteries

Open the battery cover and insert the supplied batteries.

Note: Make sure the positive (+) and negative (-) ends of the battery match the polarity indicators inside the battery compartment.

3). Turn on your Mouse

Push the power switch to ON position and turn on your mouse. >>Then LED light at the bottom of the mouse is on immediately.

4). Position the wireless mouse and Multi-link receiver within 15m operating range (Note: The actual distance depends on the environment.)

Note: For more functions such as RF Channel Lock, Gesture 16-in-1, 4-way Wheel and so on, please install the G9 16-in-1(enclosed in the CD) software first!

2

2. Software Installation (Note: The software is applicable to Windows 2000/ XP/ 2003/ Vista/ Windows 7)

1). Uninstall previous installed mouse software.

2). Insert the enclosed CD to start installation and follow the on-screen instructions to finish the software installation.

3). The shortcut icon " " will appear on your desktop screen, and then you have successfully installed the software. (Otherwise, installation is failed and you have to remove the software and re-install.)

To remove the software, follow the steps:

Go to Start >> Programs >> A4TECH Software >> G9 16-in-1 >> Uninstall G9 16-in-1

Notice

To ensure that your mouse sends and receives perfectly, please read below instructions for your reference:

1. Avoid Channel Confliction from Auto Channel Hopping

1). Left-click on the icon " " at the right-down corner of your system tray and select "RF Channel Setting".

Select "Channel-lock" to define a private channel to secure better wireless communication quality.

2. Avoid Interference from iron panel of PC.

3

Please plug the Multi-link receiver into 3、4 to avoid shielding wireless signal when placing at 1、2.

1,2,3,4 USB Ports

3. Use USB extension cable to position the Multi-link receiver at a far location to prevent electromagnetism interference from devices
4. Avoid using the wireless mouse on a metal surface. Metals such as iron, aluminum, or copper shield the radio frequency transmission and slow down the mouse's response time or cause the mouse to fail temporarily.
5. The radio frequency is 2.4GHz, it is safe for our bodies, but please be cautious in using cardiac pacemaker or other body auxiliary instruments.

Troubleshooting & FAQ
If the mouse is not working:
1. Make sure the mouse power is on.
2. Try another USB port.
3. Ensure the Multi-link receiver is inserted.
4. Check battery and battery installation.
