THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRE OPERATION.

Federal Communications Commission Requirements

The equipment has been tested and found to comply with the limits for Class B Digital Device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

THE CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and receiver.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement

The equipment complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65. The equipment has very low levels of RF energy that it is deemed to comply without testing of specific absorption ratio (SAR).

Pair the Keyboard with "A4Tech G-Family"

1. Plug the multi-link receiver of A4Tech G3/G5/G7/G9/G10 Series to your computer.

(Note: To ensure that the wireless keyboard range among 15 meters, please connect the multi-Link receiver to your computer with USB extension cable at a far location to prevent electromagnetism interference.)

2. Install A4Tech" G-Family" software

- 1). Get A4Tech" G-Family" software from <http://www.a4tech.com/Pairing.asp> to start installation.

- 2). Follow the on-screen instructions to finish the software installation.

- 3). The shortcut icon "  " will appear on your desktop screen when you have successfully installed the software.

3. Double click on the icon "  " of your desktop screen to start ID pairing.

4. Follow the on-screen instructions to finish the ID pairing.

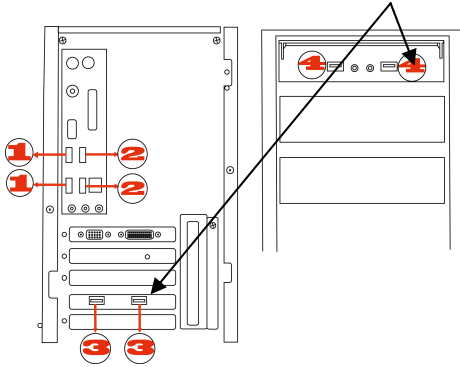

5. Press the "WINDOWS" key on the keyboard to check the paired device is your keyboard When you have successfully paired the keyboard,.

6. Now you can use your keyboard.

Notice: To ensure that your keyboard sends and receives perfectly, please read below instructions for your reference:

1 Avoid Interference from iron panel of PC.

Please plug the multi-link receiver into USB Ports.

2. Use USB extension cable to position the Multi-link receiver at a far location to prevent electromagnetism interference from devices

3. Avoid using the wireless keyboard on a metal surface. Metals such as iron, aluminum, or copper shield the radio frequency transmission and slow down the keyboard's response time or cause the keyboard to fail temporarily.

The radio frequency is 2.4GHZ, it is safe for our bodies, but please be cautious in using cardiac pacemaker or other body auxiliary instruments.

Troubleshooting

If the keyboard is not working:

1. Make sure the keyboard was paired .
2. Check battery power and battery installation.
3. Check receiver installation.
4. Try another USB port.
