

# INSTRUCTION MANUAL

## CallCassette with Bluetooth - ISBT38

Hands-free calling and music streaming through your car radio's cassette player!

### Installation

Charge your CallCassette by using the Micro-USB to USB charging cable included. When connected to a USB power source, LED light will glow red. When charging is complete, the light will turn off.

NOTE: When the built-in battery is low, CallCassette LED light will start flashing red about every 8 seconds.

After charging CallCassette, unplug it from the USB cable. You are ready to start pairing!

### Initial Pairing!

1. Turn on CallCassette by pushing the control button once. The LED light will begin flashing red/blue to indicate power is on and is ready for pairing.
2. Open the Bluetooth menu on your smartphone, and scan for available Bluetooth accessories.
3. Choose **CallCassette** from the list, and select "connect."
4. When connected, CallCassette LED light will confirm with a steady red light and then the light will turn off.

You are now connected to CallCassette!

### How do I set up this thing?

1. Insert CallCassette into your car radio, noting "this side up."
2. Remove adhesive backing and attach button mount to your clean, dry car dash within your reach, with wire notch opening pointed down, so it's easily accessible, and provides the best voice quality.
3. Insert the control button into the button dash mount.

### Day-to-Day Operation

1. Turn on CallCassette by pushing the power button once.
2. Open up your favorite music player on your smartphone and enjoy!
3. To power off, press the power button for 5 seconds. The LED light will flash red and then turn off. If you forget to turn it off, don't panic, CallCassette will automatically shut down after 3 minutes when out of range of your smartphone.

Your CallCassette battery life is approximately 5 hours. To preserve it, you should power off when not in use.

**WARNING!**  
This equipment may be reset by unintentional electrostatic discharge during operation. Exposure to direct sunlight or extreme heat may cause damage or malfunction. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:  
1. Re-orientate or relocate the receiving antenna.  
2. Increase the separation between the equipment and receiver.  
3. Connect the equipment into an outlet on a circuit different from that of which the receiver is connected.  
4. Consult the dealer or an experienced radio/television technical for help.  
NOTICE: Changes or modifications not expressly approved by the party responsible for compliance, could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
