Installing the Software

If you want to customise the use of the middle button, you need to install the software that accompanied the mouse. Please proceed to proper installation based on the version of Operating Software installed on your Computer:

Installing software under Windows 95 or 98

Insert the software disc in your floppy disc drive, click the Start button, choose Run and type "a:\setup", click OK and follow the instructions on screen.

Installing software under Windows NT 4.0:

Log in as Administrator or as a user who has Administrator privileges. Follow the same procedure as outlined for installation under Windows 95.

Installation software under Windows NT 3.5x and Windows 3.1x:

From the File menu in Programme Manager, Choose Run. In the dialogue box, type "a:\setup", and click OK, then follow the instructions on screen.

Installing software under DOS:

Refer to "readme" file on the software disc.

Installation Instructions

Upon completion of software installation

PS/2 users – When the mouse is connected to the PS/2 port, the ValuMouse Wireless software will automatically enable the middle button functionality (specific to the application being used) under Win 3.1x, Win95 and Win98, WinNT 3.5x and WinNT 4.0x.

Trouble Shooting

Trouble Shooting

Symptom: No mouse movement.
Possible Causes: (1) Make sure the mouse is securely plugged in the PS/2 or USB port.
(2) Make sure you have installed Kensington ValuMouse Wireless software or the standard Microsoft mouse drivers included with your Windows operating system.

Symptom: The cursor on the screen remains at one spot or moves erratically.
Possible Causes: Check the mouse cable for any breaks or sharp twists. Examine the cable closely where it connects to the mouse.

Symptom: Mouse movement does not produce corresponding cursor movement or there is a brief pause during movement.
Solution: Clean the silicone rubber-coated ball and rollers.
