14.4. Starting WatchEye

1. Select the '**Settings**' tab and set all the controls and settings accordingly.
2. Point the camera at your target.
3. Click on the '**Start**' button.
4. WatchEye will begin monitoring in 10 seconds. This will give you time to leave the proximity of the camera view.
5. Anytime there is motion detected, WatchEye will check its sensitivity setting. If the motion exceeds the sensitivity setting, WatchEye will save detected images on your HDD and email or call you if those options have been activated.
6. To stop WatchEye at any time, click on the flashing '**Stop**' button.

14.5. Watching Captured files

1. To access WatchEye snapshots, click on the '**Play**' button to open *WatchEye Slide Show*.
2. Choose a directory you wish to view.
3. Once you have clicked on the directory, a list of files will appear. These files are captured images. Select the first image.
4. Click on the '**Start**' button and the images will playback automatically.
5. To stop or pause the viewer, click on the '**Stop**' button.
6. When you have finished viewing the snapshots, click on '**Close**' to exit *WatchEye Slide Show*.
