AMOI

SAFETY PRECAUTIONS

Read these brief guidelines. Failure to comply with them may be dangerous or illegal.

Road safety comes first

Do not use a hand-held mobile phone while driving; park the vehicle first. Remember that in some countries, it is illegal to use a mobile phone while driving.

Switch off on aircraft

Mobile phones can cause interference. Using them on aircraft is both illegal and dangerous. (Please also close the power-off alarm clock.)

Switch off near an explosion place

Do not use the phone near an explosion place, because it likely disturbs the remote control of the explosion.

Switch off when refueling

Do not use the phone at a refueling point (service station) or near fuels or chemicals.

Switch off in hospital

Follow any regulations or rules. Switch phone off near medical equipment.

Interference

All wireless phones may be subject to radio interference, which may affect their performance.
Accessories and batteries

Use only approved accessories and batteries.

Use sensibly

Use only in the normal position (to ear). Do not touch the antenna unnecessarily when the phone is switched on. Your package contains the following items.

Emergency Call (SOS)

By pressing the soft key SOS you can reach an emergency call on any network without a SIM card and without entering a pin (not available in all countries)

UNPACKING

Your package contains the following items.

Handset	Battery
Travel Charger	Hands-free Headset
User's Manual	Addendum to User's Manual
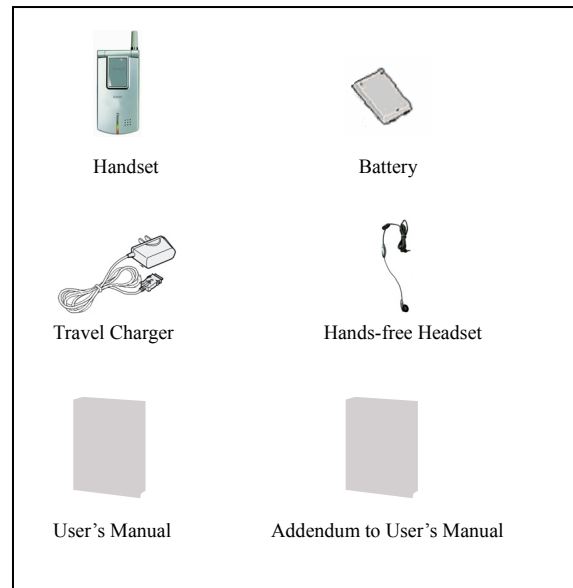

In addition, you can buy the following accessories for your phone from your AMOI local dealer:

• Standard Battery

• Hands-free Car Kit

• Car Charger

• Leather Case

• Desktop Charger

• PC Data Link Kit (PC data link cable + PC link CD)

Note: Accessory availability may vary by market.

Keys Description

Key	Description
	Two soft keys perform the functions indicated by the text above them (in the bottom line of the display).
	Navigation Keys: In the menu facility, scroll through the menu Options and Phonebook memory. In Standby mode, the ▲ key to enter the Voice Memo, the ▼ key to view the Call Lists, the ◄ key to use My Favorite and the ► key to enter Messages.
OK	**OK Soft Key:** In the menu facility, confirms your selection or entry. In editing mode, press it to enter the Input Mode Menu.
	Send Key (Call Key): Makes or answers a call. In Standby mode, recalls the last number dialed.
	Power On/ Off Key: Ends a call; hold it to switch the phone on and off. In the menu facility, returns to the Standby mode and cancels your input.
	Alphanumeric Keys: Enter numbers, letters and some special characters. In Standby mode, hold the 1 numeric key to enter the Voice Mail.
	Volume Keys (On the side of the phone): During a call, adjusts the voice volume. In Standby mode, adjusts the key tone volume.

Display

The display comprises three areas.
Area	Description
First line	Displays various icons.
Middle lines	Displays messages, instructions and any information that you enter.
Last line	Shows the functions currently assigned to the two soft keys.

Icons

	Signal Strength: Shows the received signal strength. The greater the number of bars, the better the signal strength.
	Service: Appears when there is a call incoming.
	No Service: Appears when you are not covered by the network service provider. In this case, you cannot make or receive calls.
R	**Roaming**: Appears when you are out of your home area and under another different network.

✉	**New Message**: Indicates that there is a new message received.
🎧	**Mute**: Appears when you set the Mute mode active. The phone vibrates instead of ringing when there is a call coming.
⏰	**Alarm**: Appears when you set the alarm active.
🔋	**Battery Status**: Shows the level of your battery. The more black area you see, the more power you have left.

Backlight

The display and keypad are illuminated by a backlight. When you press any key, the backlight illuminates. It turns off if no key is pressed within a given period of time, depending on the **Backlight** Option set in the **Phone Set** menu.

7 –Color LED

The 7-colors LED is on the bottom of the upper cover, you can set different flickering modes when you switch on your phone or receive an incoming call. It flickers when:

Standby: Green light flickers;
During a call: Blue light flickers;
Missed a call: Purple light flickers;
New SMS: Red/Green/Blue lights flickers alternately;
Un-read SMS: Yellow lights flickers;
Charging: Red light shines;
Full charged: Green lights shines.

GETTING STARTED

Installing a SIM Card

When you subscribe to a mobile network, you are provided with a plug-in SIM (Subscriber Identity Module) card loaded with your subscription details (PIN, Phone book information and so on).

Note: The SIM card can be easily damaged by scratching or bending, so you should be careful when handling, inserting or removing the card. Follow the instructions supplied with the SIM card. Keep all SIM cards out of the reach of small children.

1. Switch the phone off to press and hold down the key.
2. Remove the battery. To do so:
   ① Press down the catch above the battery and hold it in the position.
   ② Slide the battery and lift it away, as shown.

- 16 -

3. Insert the SIM card into the SIM card holder so that the holder locks the card in the position. Make sure that the notched corner is at the top right and the gold contacts of the card face into the phone.

4. Reinstall the battery. To do so:
    ① Place the battery back, taking care to match the tabs on the battery with the grooves on the phone.
    ② Push the battery down until it clicks into place. Make sure that the battery is properly installed before switching on the phone.

Charging a Battery

Your phone is powered by a rechargeable Li-ion battery.

You are provided with a travel charger when buying the phone. Use only approved batteries and chargers. Ask your local dealer for further details.

Note: You must fully charge the battery before using your phone for the first time. The phone can be used while the battery is charging.

Using the Travel Charger

1. Place the battery on the back of the phone, connect the lead from the travel adapter to the connector at the bottom of the phone.
2. Connect the adapter to a standard AC wall outlet.
3. When charging is finished (the full battery icon becomes solid), disconnect the adapter from the AC wall outlet, then from the phone.

Note: When disconnect the lead of the adapter from the phone, you should press the buttons on both sides of it, otherwise it's easily damaged.

Using the Desktop Charger

To charge the battery alone, use the desktop charger unit.

1. Insert the battery alone into the slot making sure that the terminals on the battery contact to the terminals on the charger.
2. Push down the battery until you hear a click.

- 19 -
3. Insert the lead of the travel adapter into the connector socket of the desktop charger.
4. Connect the adapter to a standard AC wall outlet.
5. The colour indication of the LED on the charger is as follows:
   • Red: Charging
   • Green: Fully Charged
6. When charging is finished (the LED flashes in green), unplug the power cord of the adapter from the AC outlet and remove the battery from the charger.

Low Battery Indicator

When the battery charge level gets low, you can see an empty battery icon at the top right of the display and a text notification.
If the battery level gets too low, the phone will turn off automatically. Unfortunately, if this happen, you'll lose whatever you are doing, including dropping your call. Watch the battery strength icon and make sure your battery is adequately charged.

Switching the Phone On/Off

1. Open the phone.
2. Hold the ☺⟍☎ key for more than one second to switch the phone on.
3. Enter the PIN code (if you have set to PIN check On), and press the OK soft key. Then your phone connects to the GSM network, and you'll see the following screens.
Note: If the phone is out of service, 'No Service' appear in the display. In this case, you cannot make or receive any calls. Wait a little while for a better signal or move into an open area to regain the service.

4. To switch the phone off, hold the ☺⟍☎ key for more than two seconds.

__WARNING!__

Do not switch on the phone when the mobile phone use is prohibited or when it may cause interference or danger.

Note: The unnecessary touch of the antenna when the phone is switched on may affect the call quality and cause the phone to operate at a higher power level than otherwise needed.

Your Phone's Mode

Standby Mode

Standby is the most basic state of your phone. The phone goes into Standby mode soon after you turn it on, or whenever you briefly press the ⏻☏ key. When your phone is in Standby mode, you will typically see the current date and time. If you enter a phone number, you can press the **OK** key to dial it, or press the **Save** soft key to save it in the internal Phonebook.

Press the ⏻☏ key at any time to return to Standby mode. Be careful; if you are on a call when you press the ⏻☏ key, you will return to Standby mode, but it also disconnects the call.

Talk Mode

You can place and answer calls only when your phone is turned on. During a call, the phone is in Talk mode. While you are in Talk mode, pressing the left soft key gives you a list of Options referred to as "Call Menu".

CALL FUNCTIONS

Making Calls

Before you can make or receive a call, you must turn on the phone and be within the range of a network.

1. In Standby mode, enter the area code and phone number. (If you make a mistake while dialing, use the ◄ or ► key to move the cursor to the right of the digit, press the right soft key to erase; and hold it to erase the entire number.)

Note: While entering the number, hold the # key to insert a pause (for example: between the switchboard and the extension). The number after the pause will be sent a few seconds after dialing the first number.

2. Press the ⌒ key to dial the number.
3. When you finish talking, press the ⓪\☎ key or simply close the phone to end the call.

Making International Calls
1. Hold the 0 key UNTIL A '+' character apperas on the display.
2. Enter the country code, area code, and phone number, then press the ⌒ key to begin dialling.

Last Number Redialing

To redial the last number you dialed, press the ☏ key to view the outgoing call list, then choose the desired one by using the ▲, ▼ key and then press the ☏ key to dial it. Your phone can store up to 10 last numbers you dialed.

Making a Call from the Phonebook

Press the right soft key to enter the phonebook, search the desired number from it, and press ☏ the key to dial it.

Receiving Calls

When somebody calls you, the phone rings or vibrates (if you have set for that), the screen display an incoming call message. If you have subscribed the Line Identification Service (contact your service provider) and the caller's phone number displays; if you have saved the number in your phone book, the name displays.

Two modes are provided for receiving a call: Call Key & Open Mobile. Refer to Settings/ Mobile/ Answer mode for the details.

Press the ☏ key to answer the call the ☎ key to reject it when the phone is opened.

Note: You can answer a call while using the phonebook or menu features, while the current operation will be halted. If you use the

hands-free kit, hold the OK key on it for about three seconds to answer it.

Rejecting a Call

Pressing and holding down the Volume key for about 3 seconds to reject a call when the phone is closed; press the Reject soft key to reject it when the phone is opened.

Missed Calls

When an incoming call is not answered for any reason, the Missed call log displays on your screen.

1. To view the missed call immediately, press the List soft key, the number or the name (if available) displays, scroll through the desired one, press the ⌇ key to dial it.
2. Press the Option soft key, you'll enter the Missed Calls menu, the following options are available:

Edit: Edit the number. It allows you to save the number in your SIM card or Local.
Delete: Delete the number from the missed calls list.
Delete All: Delete all numbers from the missed calls list.

Note: Press the ⊙⌇ key at any time to exit the Missed Call menu, or view the missed calls at any time by entering the Call Lists.

Adjusting the Volume

During a call, use the volume key on the left side of the phone to adjust the volume of the voice. Press the Up key to increase the volume, the Down key to decrease it. In Standby mode, you can adjust the key tone volume by using the volume key.

Quick Switch to Mute Mode

You can quickly switch your phone to the Mute mode by holding the * key. In mute mode, the phone vibrates instead of ringing when there is a call coming. When the Mute mode is set to be active, an icon appears on the display. To switch back to the Normal mode, hold the * key for about three seconds.

Call Menu

Some of the features you can use during the call depend on the support of your network service.

During the call, press the Option soft key to enter Call Menu. The options may change in different conversation circumstances.
The followings are the possible options:

Record: Record the conversation during a call. It can be recorded up to 30 seconds.

Note: Recording conversation in some countries is illegal, so please first get the consent from the other party before you begin the recording.

Mute: You can switch the microphone off so that the caller can't hear you.

Hold (current call): You can hold the current call.

Resume held call: Connect the held call.

Hold current call/Dial new number: You can dial a new number while holding the current call.

Hold current call/ Answer new call: You can answer a new call while holding the current call.

Switch Call: Hold the current call and connect the held call.

Connect the held call to a conference call: You can connect the held call to a conference call.

End the current call: Select it to end the current call.

End held call: Select it to end the held call.

End current call/ Answer new call: You can end the current call and answer the new call.

End current call/ Answer held call: You can end the current call and answer the held call.

End all calls: Select it to end all the calls.

Message: Enter the Message / SMS feature.

DTMF Off: Switch the DTMF off.

Making a Conference Call

Conference Call is a network service. It allows up to six people to take part simultaneously in a call.

1. During a call, dial a phone number of the second participant, and press the ☎ key. The first participant is automatically put on hold.
2. Press the **Menu** soft key to enter **Options**.
3. Press the ▲ or ▼ key to scroll to **Conference Call** and press the **OK** soft key.
4. When **Join** is highlighted, press the **OK** soft key (or OK key) to join the first participant in the call.
5. To add more participants to the call, repeat steps 1 to 4.
6. Press the ☎ key to end the whole conference call.

ENTERING TEXT

When storing a name in the phonebook, creating your personal greetings or scheduling events in your calendar or writing any other message, you will need to enter text.

You are provided with the following eZi text input modes:

• Symbol

• English/ ENGLISH/ english

• Spanish / SPANISH/ Spanish

• Abc/ ABC/ abc

•123 (Numeric input mode)

Note: The number on the top right is a word count of the message, it points out how many characters you can enter in the edit zone. The current input mode indicates on the top left of the display.

Changing Text Input Mode

When in a text entry screen, you will see the text input mode indicator on the top left of the display. Press the **OK** key to enter the text input mode list, and press the ▲ or ▼ key to find the desired one. Or you can simply change the input mode by pressing the ✎ key in text entering mode.

Note: The text input mode may vary in different markets.

Insert Symbol

Symbols mode enables you to enter symbols into a text message.

To enter a symbol, you should:

1. When entering text, press the OK key to enter the 'eZi Menu'.

2. Enter the 'Insert Symbol' and you will see a symbol chart as below. Press the ▲ or ▼ key to select the column which includes the symbol you want to use.

3. Press the corresponding numeric key on the bottom of the chart to insert the desired symbol mark.

```
         Symbol
 . ,   :   ;   ?   !    "
 ' ( )  *   +  –   /    =
 < > # %  _   [  ]   @
 { } $ ~  ^   \   `    |
 1 2 3 4 5 6 7 8
```

eZi English Mode

This mode allows you to enter English words with only one keystroke per letter. Each key on the keypad has more than one letter. For example, when you press the **5** key **J**, **K**, or **L** may be displayed. The English mode automatically compares your keystrokes with an internal linguistic dictionary to determine the correct word, thus

requiring far fewer keystrokes than the ABC mode. For example, to enter 'hello', press the following keystrokes: 4,3,5,5,6.

If the word that appears in the display is not the word you desire, press the ▶ or ◀ key to display alternate word choices for the keys you have typed. (For example, 'of ' and 'me' both shares keystrokes 6, 3 in the same sequence) The phone displays the most commonly used choice first.

Press the ▲ or ▼ key to change the case, the ▲ key for upper case, the ▼ key for lower case.

eZi Spanish Mode

Please refer to English mode.

ABC Mode

This mode allows you to enter letters by pressing the key labeled with the required letter, once for the first letter, twice for the second letter, and so on.

For example, press the key "2" three times in succession to display the letter "C", press the key "5" two times quickly to display the letter "K".

Note: When you require the same letter twice or more in succession (or a different letter on the same key), just wait for a few seconds for the

cursor to automatically move right , and then select the next letter.

List of characters available:

Key	Characters in the Order Displayed
	. ! ' , - ? @ 1 _
	A B C 2
	D E F 3
	G H I 4
	J K L 5
	M N O 6
	P Q R S 7
	T U V 8
	W X Y Z 9
	Space 0

(Caps Lock mode)

123 (Numeric) Mode

123 Mode enables you to enter numbers into a text. You can enter your desired digits by simply pressing the key on which the digit is.

Insert Template

There are 5 daily used templates stored in the phone that allows you to insert directly when editing the message.

- 33 -

Insert Phone No.

In text entering mode, press the OK soft key to enter 'Menu/ Insert Phone No.'. Press the ▲ or ▼ key to choose the number, then press the OK soft key. The number will be inserted to the message.

Dictionary

While entering a SMS message, you can use your own dictionary which allows you to add a new word and then the word has a high priority in English mode.

Adding a word to the Dictionary
1. In the text entry mode, press the OK key to enter the 'eZi Menu'.
2. Scroll to 'Dictionary' and press the OK soft key to enter.
3. Select "New" and input the word you want to add.
4. Press 'Select' and select 'Save', then the word is saved in your dictionary.

Now, the word saved in your dictionary becomes the one with first priority for the associated key press. You can check the added words in the 'List' of 'Dictionary'.

Dictionary List
1. Enter the Dictionary in the eZi Menu, press the OK soft key.
2. Scroll to the List, and press the OK or Select soft key.

3. All the words list out, and then choose the desired one by pressing the OK soft key.

4. Press the Select soft key to choose to Save or Delete it.

3. All the words list out, and then choose the desired one by pressing the OK soft key.

4. Press the Select soft key to choose to Save or Delete it.

PHONEBOOK

You can store your phone numbers and their corresponding names in your SIM card or in your phone memory. You can store up to 150 numbers in your phone memory; the number of the entries which SIM card can store, depends on the type of the SIM card.

Storing a Phone Number in PB

1. Key in the number to be stored.
2. Press the Save soft key.
3. Enter the corresponding name up to 10 characters.
4. After that, press the **OK** soft key.
5. Press the ▲ or ▼ key to select to save in the SIM card or Local.
6. Press the **OK** soft key to store the name and number.

There are two ways provided for you to enter the Phonebook.

1. In standby mode, press the right soft key to enter it.
2. Enter the corresponding numeric key and then press the * key, you'll enter the associated entry of the phonebook.

Phonebook Menu

When you enter the phonebook, the following options are available:

Country/ Area Codes

Press the ▲or▼ key to view the country/ area codes, press the left soft key to search by name or by code.

```
┌─────────────────────┐
│      Search         │
│ ▬▬▬▬▬▬▬▬▬▬▬▬▬       │
│ [1] Search Name     │
│ [2] Search Code     │
│                     │
│                     │
│ Ok            Back  │
└─────────────────────┘
```

Smart Dial

This Option allows you to find an entry quickly in your PB.

1. When Smart Dial is highlighted, press the left soft key to enter.
2. Input the corresponding numeric key of the desired name.
3. Scroll to your desired entry and press the Left soft key.
4. Press the Send key to dial it or press OK left soft key to enter "Option", the following options are available:

Edit: Edit the details of the selected entry (name, number).
Copy: Allows you to copy the selected entry from the phone memory to the SIM memory or vice versa.

Delete: Press the Left key and phone will display 'Delete? OK or Back'. Select "OK" to delete this entry. Select "Back" to cancel this operation.

Call: Press the OK key to dial this number.

Write SMS: Refer to *Messages/Write*.

Send number: Send all the numbers in this entry to the appointed number.

View

This Option allows you to find a Phonebook entry by searching from the list of all entries sorted by name.

(1) Press ▲ or ▼ key to view the entries.

(2) If the entry contains more than one item, press the ▶ or ◀ key to view the items. The cursor is right to the current item.

(2) Choose the desired one. Press the Option soft key, you'll have the following operations:

  Edit: Edit the current entry.

  Find: Find a new entry from the Phonebook.

  Copy: Allows you to copy the selected entry from the phone memory to the SIM memory or vice versa.

  Delete: Delete the selected entry.

  Call: Dial this number.

  Write SMS: Refer to Messages/Write.

  Send number: Send all the numbers in this entry to the appointed

number.

Search Name

Press the corresponding alphanumeric key(s) of the entry and you can have the same options as in the **View**.

New

It allows you to add new entries to your Phonebook. When New is highlighted, press Left soft key. Enter the name and the number of the new entry, then press the OK left soft key. When finishing entering, press the left soft key to choose the Save Local or SIM. (refer to Storing a phone number in PB)

Speed Dial

Enter the number or search an entry from the phonebook you desire for speed dial, then press the left soft key to save the option. It allows you to set up to 10 numbers for speed dial. For example, set the number of Steven as the first one in the Speed Dial list, in standby mode, hold the corresponding 1 numeric key, the number can be dialed quickly and directly.

Caller Groups

The phone allows you to group the numbers stored in the Local. (The numbers stored in the SIM card cannot be grouped.) It allows you to set 10 groups, such as Family, Friend, VIP and so on. When the number in the group dialed, the phone rings and lights in the way you've set. Enter one desired group, you'll have the following options:

Member List: List all the members stored in the group. When the Member List is empty, press the New left key to select Add From Pb or New; or choose the desired existed one, press the OK left soft key to choose Add From Pb, New or Delete.

Delete: Delete the group.

Rename: Rename the group.

Light Alert: Set the Alert light for the group. There are 10 choices, press the ◄ or ► key to choose the desired one, press the left soft key to save the option.

PhBook Manager

Own Number

Store the SIM card number of local phone for reference.

Memory Status

Check the total capacity and the amount of used entries of PB in SIM

card and Local.

Copy (Take "Local to SIM" for example)
(1) Copy One: Press ▲ or ▼ to view the phone number one by one and press left soft key to copy the desired one.
(2) Copy All: Copy all the numbers stored in phone to SIM card.

Note: If the entry already exists in target PB, the entry will not be copied.
If the space of target PB is not enough for the copy, only the front phone numbers will be copied until the target PB is full.
If the name length of target PB is less than that of original PB, the exceeded part will be lost.

Move
It allows you to move the entries from the SIM to Local or from Local to SIM. Press the OK left soft key to enter one menu, select Copy one or ALL to move the entries.

Delete All
Delete all the entries in the SIM card or in the Local.

USING MENUS

Accessing a menu function

By Scrolling

1, In Standby mode, press 'Menu' soft key.

2, Scroll with ▲, ▼,► ,◄ key through the menus and press OK to enter the one you desire.

3, If the menu contains submenus, select the one you want, for example Call settings.

4, If the selected submenu contains further submenus, repeat step 3.

5, Press the OK soft key to confirm the desired setting.

By Shortcut

The menus, submenus and setting options are numbered and can be accessed directly by using their corresponding shortcut keys.

1, In Standby mode, press the 'Menu' soft key.

2, Within three seconds, key in the corresponding number of the menu function you want to access.

Notes: The numbers assigned to each menu function are indicated on the list of the following pages. They may not match the menu number on the phone. It depends on the services supported by the SIM card.

8. STK

Note: STK is a function that must be supported by the SIM card, so please ask the provider for more details.

MESSAGES

The SMS (Short Message Service) function is network service and may not be supported by your network. You must obtain the number of the SMS center from your service provider. Mostly it is automatically available from your SIM card.

Your phone can store up to 100 incoming and outgoing messages. SIM card memory depends on the type of the SIM card.

Two message boxes are available: Personal SMS and Broadcasting SMS.

Personal SMS: It is the message for mobile users to transmit personal information.

Broadcasting SMS: If you select this option, you will receive public information from Network Operators such as Weather Broadcasting and so on.

SMS Indicator: When you receive a new message, an icon ✉ appears on the screen. If the message memory is full, ✉ continues flashing and you cannot receive any new messages. Then use the 'Delete' menu to delete obsolete messages.

Voice Mail

This menu provides you a quick way to access your voice mail (if provided by your network). In standby mode, hold the 1 numeric key

to dial the number directly. In the Voice Mail menu facility, the following options are available:

Call: Press the 'OK' soft key to listen to your messages. If there is no mailbox number, enter the number first.

Number: Allows you to input or modify the mailbox number obtained from your service provider.

SMS

Write SMS

The text message can be made up to 140 characters. Write down your own words or press the OK soft key to enter the eZi Menu, then select 'Insert Template', choose the desired one to add to your message. In editing mode, press Call key to change the text input mode, or press the OK soft key to enter the text input menu. Press the left soft key to enter the Write SMS menu, and then the following options are available:

Send: Write down your own message. When finish, press the Ok left soft key to enter the number you want to send or search the number from the Phonebook.

Save: Allows you to save the message and the number, so that you can send it whenever you want.

Outbox

Outbox stores the messages that you have already sent or unsent.

1. Scroll to the desired message by pressing the ◄ or ► key and scan

through the message by pressing the ▲ or ▼ key.

2. Press the Options left soft key to view the details of the messages. Then press the Ok left soft key to have the following options:

Send: Allows you to send the message.

Save: Allows you to save the message.

Extract Number: Allows you to extract the receiver's number from the message.

Delete: Delete the stored message.

Inbox

Inbox stores the messages you have received.

1. Scroll to the desired message by pressing the ◄ or ► key and scan through the message by pressing the ▲ or ▼ key.

2. Press the Options left soft key to enter the Options menu facility, you'll have the following options:

Reply: Reply to the sender. You can write a piece of new message and then choose 'Send', 'Save', 'Extract Number' and 'Delete'.

Forward: Allows you to send the message to others. You can edit the message and then choose 'Send', 'Save', 'Extract Number' and 'Delete'.

Extract Number: Allows you to extract the sender's number.

Delete: Delete the selected message.

Delete All: Delete all the messages in the inbox.

Status Report

In the Messages' Settings menu, set this function 'On' to require the SMS center to inform whether your message has been sent or not.

Memory Status

This menu allows you to view how many messages are currently stored in your SIM card and Phone. The phone can store up to 100 short messages; the numbers of message that SIM card can store depend on the type of the card.

Broadcast

You can receive broadcast messages with various contents via this network service, such as weather or traffic. Enter the Broadcast, you'll have the following options:

Auto Display: If you set this function to be '**On'**, messages will be displayed immediately when they are received; select 'Off' to cancel it.

Filter: Set the channel list for receiving broadcast message:

    All: Allows you to receive all the broadcast messages.

    List: Only the message sent from the list can be received. You are allowed to add or delete the channel to the list.

    None: No broadcast messages will be received.

Read: You can view the up to date broadcast message.

<u>Settings</u>

Use the function to set the special features for the SMS. You can have the following options:

Status Report: You can select 'On' to require the SMS center to inform whether your message has been sent or not.

Validity: Allows you to set the length of time for which your text messages will be stored at the message center while attempts are still made to deliver them. Max, 1 hour, 6 hours, 12 hours, 1 day, 2 days & 1 week are available.

SMS Center: Allows you to store or change the number of your SMS center while sending messages. You can obtain this number from your service provider.

Models: There are several message models stored to be edited. It allows you to send the message conveniently and quickly whenever you want.

DISPLAY

Power On/Off Display

The phone provides you 2 modes for your Power On/ Off Display. You can set the Theme or Text for it.

Standby Interface

By using this menu, you can set the Calendar, Text, Clock, Picture or Animation as your standby interface.

AMOI

AUDIO PROFILE

Beep: Allow you to select voice on/off of the game.

REFERENCE INFORMATION

Access Codes

There are several access codes that are used by your phone and its SIM card. These codes help you protect the phone against unauthorized use.

Phone Password
The security code can be used to avoid unauthorized use of your phone. The security code 0000 is usually supplied with the phone.
Change the security code before you start using your phone. Keep the new code secret and in a safe place, which is separate from the phone.

PIN Code
The PIN (Personal Identification Number) code protects your SIM card against unauthorized use. The PIN code is usually supplied with the SIM card. When the PIN code is enabled, the code is required each time the phone is switched on.

Note: If you key in an incorrect PIN code three times in succession, the SIM card will be locked. To unlock the SIM card, you'd key in the PUK code and press the OK soft key, and key in a new PIN code twice.

PIN2 code
The PIN2 code, supplied with some SIM cards, is required to access

- 73 -

some functions, such as charging unit counters. These functions are only available if supported by your SIM card.

If you key in an incorrect PIN2 code three times in succession, the PIN2 will be locked. To unlock the PIN2, you'd key in the PUK2 code and press the **OK** soft key (or **OK** key), and key in a new PIN2 code twice.

PUK code

The PUK (Personal Unblocking Key) code is required to change a blocked PIN code. The PUK code may be supplied with the SIM card. If not, contact your local service provider for the code.

If you key in an incorrect PUK code ten times in succession, the SIM card cannot be used anymore. Contact your service provider for a new card.

You cannot change the PUK code. If you lose the code, contact your service provider.

PUK2 code

The PUK2 code, supplied with some SIM cards, is required to change a blocked PIN2 code.

If you key in an incorrect PUK2 code ten times in succession, you cannot use the functions requiring the PIN2 code. Contact your service provider for a new card.

You cannot change the PUK2 code. If you lose the code, contact your service provider.

AMOI

Using the Batteries

A rechargeable Li-ion standard battery powers your phone. The following batteries are also available (ask your local dealer for further details):

Type	Capacity	Talk Time	Standby Time
Li-ion	650mAh	2~3hrs	80~120hrs

Precautions When Using Batteries

▢ Never use any charger or battery that is damaged in any way.

▢ Use the battery only for its intended purpose.

▢ If you use the phone near the network's base station, it uses less power; talk and standby times are greatly affected by the signal strength on the cellular network and the parameters set by the network operator.

▢ Battery charging times depend on the remaining battery charge and the type of battery and charger used. The battery can be charged and discharged hundreds of times, but it will gradually wear out. When the operation time (talk time and standby time) is noticeably shorter than normal, it is time to buy a new battery.

▢ If left unused, a fully charged battery will discharge itself over time.

▢ Use only approved batteries; and recharge your battery only with approved chargers. When a charger is not in use, disconnect it from the power source. Do not leave the battery connected to a charger for more than a week, since overcharging may shorten its life.

▢ Extreme temperatures will affect the charging capacity of your battery: it may require cooling or warming first. Do not leave the battery in hot or cold places, such as in a car in summer or winter conditions, as you will reduce the capacity and lifetime of the battery. Always try to keep the battery at room temperature. A phone with a hot or cold battery may temporarily not work, even when the battery is fully charged. Li-ion batteries are particularly affected by temperatures below 0 °C (32 °F).

▢ Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object (coin, clip or pen) causes a direct connection between the + and - terminals of the battery (metal strips on the back of the battery), for example when you carry a spare battery in a pocket or bag. Short-circuiting the terminals may damage the battery or the object causing the short-circuit.

▢ Dispose of used batteries in accordance with local regulations. Always recycle. Do not dispose of batteries in a fire.

Care and Maintenance

Your phone is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you to fulfill any warranty obligations and allow you to enjoy this product for many years. When using your phone, battery, charger, or any accessory:

▫ Keep it and all its parts and accessories out of small children's reach.

▫ Keep it dry. Precipitation, humidity and liquids contain minerals that will corrode electronic circuits.

▫ Do not use or store it in dusty, dirty areas as its moving parts can be damaged.

▫ Do not store it in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.

▫ Do not store it in cold areas. When the phone warms up (to its normal operating temperature), moisture can form inside the phone, which may damage the phone's electronic circuit boards.

▫ Do not drop, knock or shake it. Rough handling can break internal circuit boards.

- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean it. Wipe it with a soft cloth slightly dampened in a mild soap-and- water solution.

- Do not paint it. Paint can clog the device's moving parts and prevent proper operation.

- Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications of attachments could damage the phone and may violate regulations governing radio devices.

- If the phone, battery, charger, or any accessory is not working properly, take it to your nearest qualified service facility.

- This phone features large inner & outer display screens, which are damageable. Please be most careful to avoid dropping or knocking it or scratch it with a sharp thing.

GLOSSARY

Antenna

A device for transmitting or receiving signals. The size and shape of antennas is determined, in part, by the frequency of the signal they receive. Wireless phones and the base station must have antennas.

Alarm Clock

Your pager alarm can be set for a specific time and date or can used as a daily alarm.

AMOI Smart Dial

An intelligent way to dial a number which is stored in your phonebook. Say you want to dial Steven, at idle, press st, then press *, you can find the number of Steven. Or press st when you select Smart Dial in phonebook.

Band

Range of radio frequencies between two defined limits which are used in wireless communications.

Call Barring

Enable it to restrict outgoing and incoming calls.

Call Divert

Allows you to set your phone to forward calls to an alternate phone number. (network and subscription dependent feature -- not available in all areas).

Call Holding

You can put callers on hold. (network and subscription dependent feature -- not available in all areas).

Call Waiting

While making a call, the phone will alert you that another person is trying to call you. You can choose to answer the call or it will forward to your voice mail. (Network and subscription dependent feature -- not available in all areas).

Conference Calling

Able to establish a conference call involving up to five additional parties.

DTMF (Dual-Tone Modulated Frequency)

You send DTMF signals when you enter numbers by pressing the digit keys.

GPRS—General Packet Radio Service

GSM (Global System for Mobile Communication)

GSM is the pan-European standard for digital cellular telephone service. It is also one of the technologies available in the Americas. GSM was designed for markets to provide the advantage of automatic, international roaming in multiple countries. The SIM (Subscriber Identification Module) card is a vital component in GSM operation. The user can store all relevant data for the phone on a removable plastic card. The card can be plugged into any GSM compatible phone and the phone is instantly personalized to the user.

GSM850--The digital GSM network used in America

GSM1800--The digital GSM network used in Europe and Asia.

GSM1900

The digital GSM network of GSM1900 is widely used in North America and Latin America.

Hands-Free

A feature that permits a driver to use a wireless phone without lifting or holding the handset - an important safety feature for automobiles, tractors and most other motorized vehicles.

LCD (Liquid Crystal Display)

It is commonly used to refer to the screen display on the wireless phone.

LED (Light Emitting Diode)

It is commonly used to refer to a small light on the wireless phone or on the desktop charger. The LED lights on the phone to indicate an incoming call. The lights on the charger indicate that battery charging is taking place.

Line Identification Services

Service allowing subscribers to view or block the telephone numbers of callers.

Mobile Phone

The term that can be inter-changed with cellular phone or wireless

phone.

PIN (Personal Identification Number)

Security code that protects the phone against unauthorized use. The PIN is supplied by the service provider with the SIM card. It may be a four to eight-digit number and can be changed, if required.

PUK (PIN Unlocking Key)

Security code used to unlock the phone when an incorrect PIN has been entered three times in succession. The eight-digit number is supplied by the service provider with the SIM card.

Roaming

A service offered by most cellular service providers that allows subscribers to use cellular service while traveling outside their home service area. When they are outside their home service area and come within range of another cellular system, the ROAM indicator on the cellular phone will light to show that they are in range.

SIM (Subscriber Identification Module)

Card containing a chip with all the information required to operate the phone (network and memory information, as well as the subscriber's personal data). The SIM card fits into a small slot in the back of the

phone and is protected by the battery.

SMS (Short Messaging Service)

Network service that allows you to send and receive messages to and from another subscriber without speaking to the correspondent. The message created or received (up to 160 characters) can be displayed, received, edited or sent.

Soft Keys

Keys marked • and **o** on the phone, the purpose of which:
• Varies according to the function that you are currently using
• Is indicated on the bottom line of the display just above the corresponding key.

Standby Time

The time a battery can power a phone in the standby mode, ready to make or receive a call, without being used for an actual call. The longer a phone is in standby mode, the less standby time remains in the battery.

Talk Time

The total time a battery can power a phone for cellular calls. As the phone drains the battery during a call, the talk time left in the battery

diminished until the phone is turned off or the battery is recharged.

Tri-Band

Wireless phone that operates on any of the three digital GSM frequencies-typically, 850 MHz, 1800 MHz and 1900 MHz-to increase service coverage. (1800 MHz is a GSM digital network used in Europe. This frequency allows for global roaming, where roaming agreements are in place.)

Voice Mail

Computerized answering service that automatically answers your calls when you are not available, plays a greeting (Optionally in your own voice) or records a message.

TROUBLESHOOTING

If the phone does not work properly, please check the following troubleshooting and find a solution. If you can't solve the problems, please contact your local dealer for help.

Questions	Solutions
Cannot make or receive calls.	● Check whether the phone is powered on or not. ● Check if the battery is lack of power. ● Check if the signal is strong enough. ● Check if you've set 'Call Barring', SDN or the other options in Call Set menu. ● Check if you've set the 'Call Divert'. ● Check if you've placed the SIM card properly.
Conversation volume is low.	● Check if you've set the Voice Volume too low.
Does not ring when an incoming calls comes in.	● Check if you've set 'Silent' or 'Vibrator' modes. ● Check if the ring volume is set too low. ● Check if the surrounding noise is too loud. ● Check if you've set the 'Call Divert'.
LCD is not clear.	● Check if you've set the LCD contrast too low.
The keypad doesn't work.	● Check if you've locked the keypad.
The one on the other part of the line cannot hear you.	● Check if you've set 'Mute'. ● Check whether you speak near the MIC.

For body worn operation this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines."
