Trouble shooting

Q1. Why can't I power on the headphone?

A1.1. The earphone may have run out of the battery power. Please charge the battery using the charging cable.

Q2. Why can't I connect the earphone to my bluetooth device?

A2.1. The bluetooth function on your device may have been turned off. Please turn on the bluetooth function on your device and allow it to search for compatible devices.

A2.2. The earphone may have been connected to another device.

Please disconnect (unpair) the headphone from the previous device before connecting them to a new one.

A2.3. The earphone may not have been recognized by your device.

Please turn off the headphone, turn them back on, search for the headphone on your bluetooth enabled device, and make the connection again.

A2.4. The earphones may be too far away from your bluetooth device. Please make sure that the headphones are close enough to your device, and there is no obstacle between them.

Q3. Why aren't the earphones playing sound tracks in the bluetooth mode?

A3.1. The earphones may not have been selected as the output device.

Please adjust the settings on your bluetooth enabled device to use the earphones to play the sound tracks.

A3.2. The volume may have been adjusted to the minimum. Please press to increase the volume.

Q4. Why is the sound quality very poor in the bluetooth mode?

A4.1. The bluetooth connection may not be in its optimal condition. Please make sure that the earphones are close enough to your device, and there is no obstacle between them.

FCC NOTICE

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Hearing protection

1. This phone respects the current regulations for limiting the maximum output volume. Prolonged headset listening at high volume could lead to hearing damage!
2. Stop using the product or lower the volume if you feel your ears ringing.
3. Do not turn up the volume too high, doctors warn against prolonged exposure to high volume.
4. Excessive sound pressure from headsets and headphones can cause hearing loss.
5. To prevent possible hearing damage, do not listen at high volume levels for long periods.
6. Please only use specified headphones .
