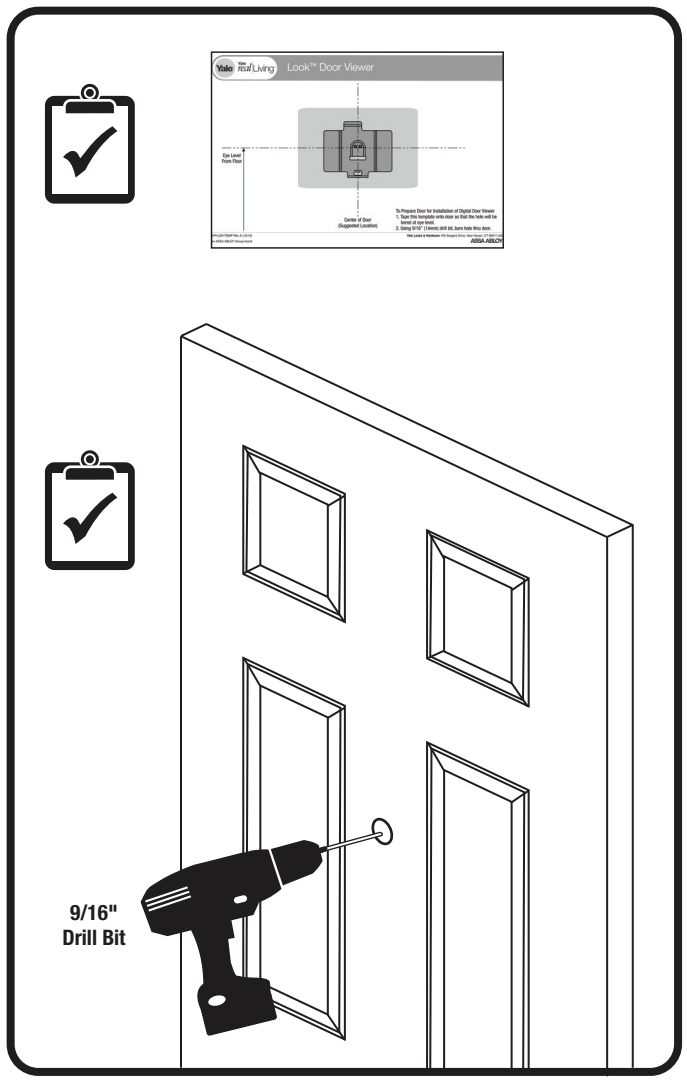
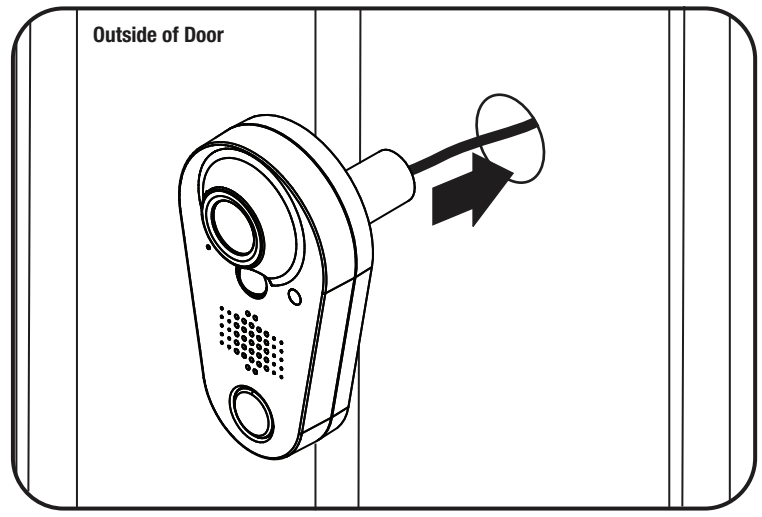
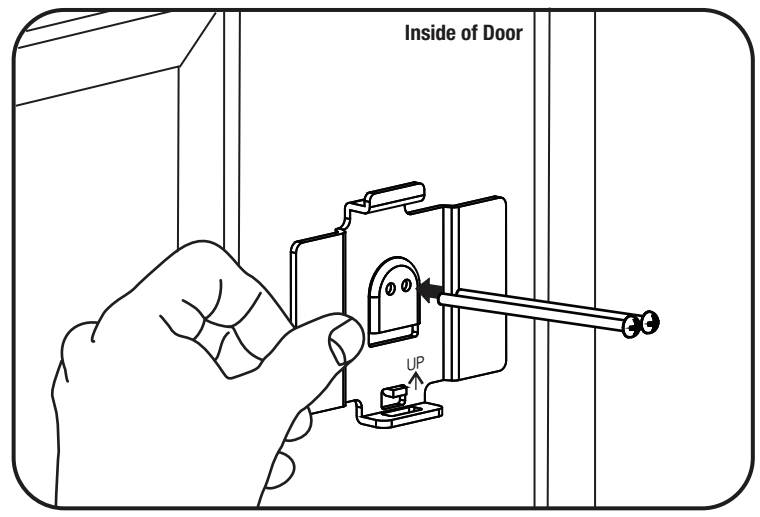
Preparing Door



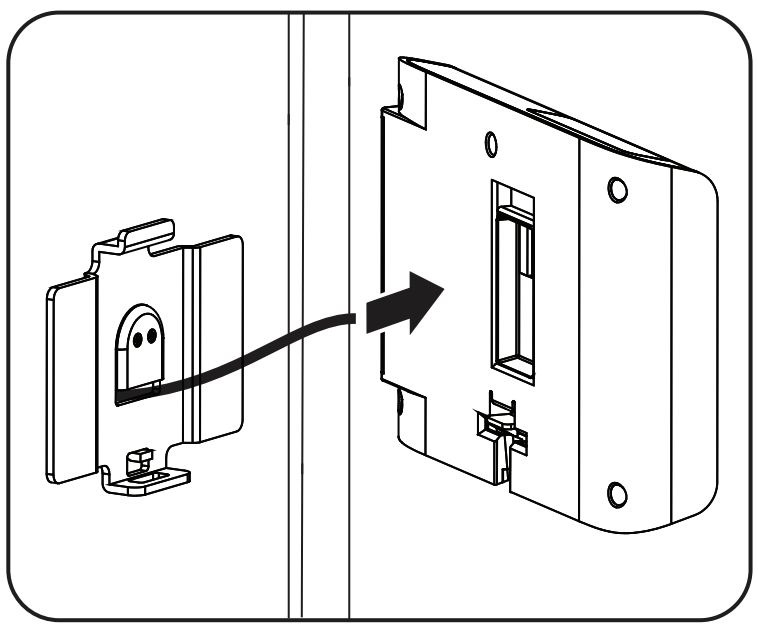
1 Installing Camera



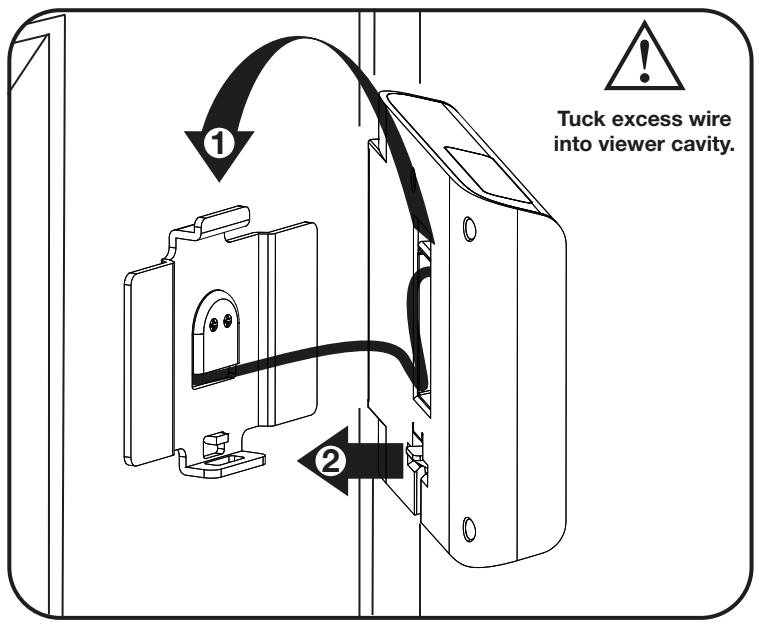
2 Installing Holding Plate

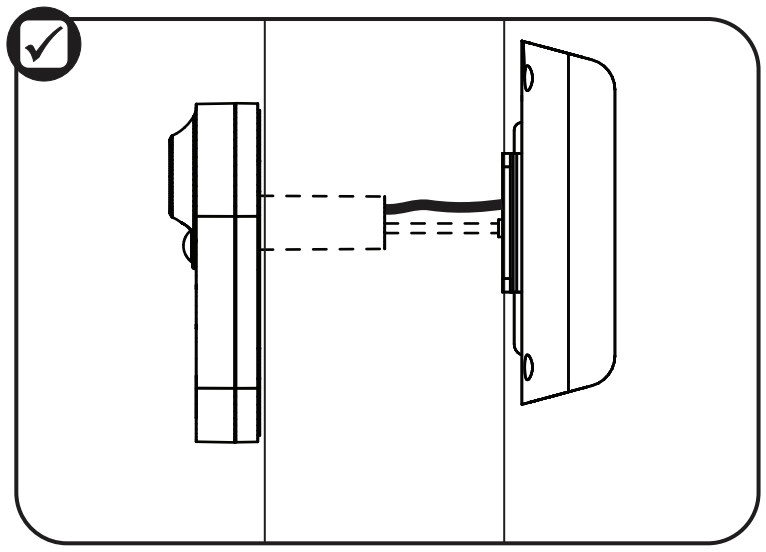


3 Connecting Camera to Viewer

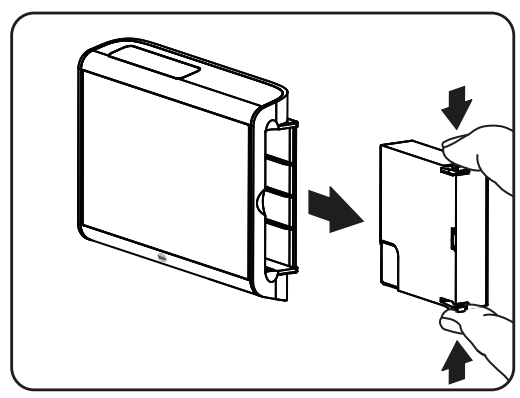


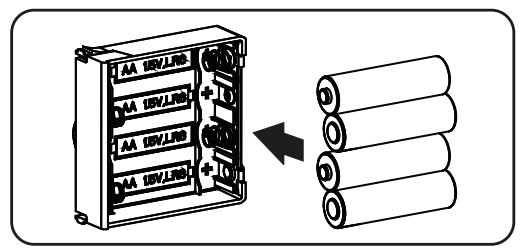
4 Mounting Viewer

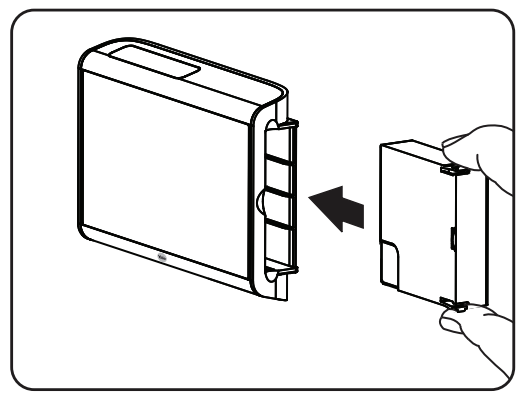




5 Installing the Batteries



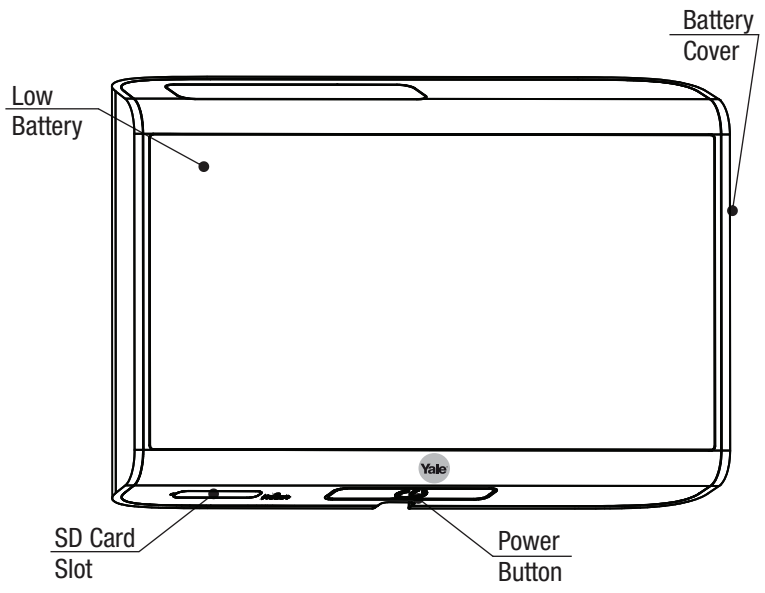


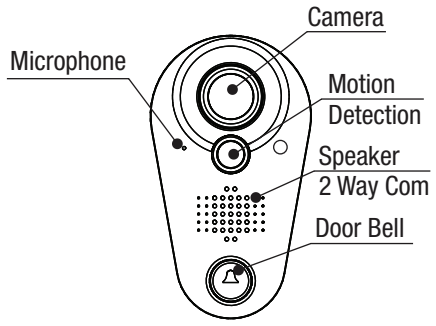


DID STICKER

Congratulations, you've installed the Yale Real Living™ Look™ Door Viewer! Turn sheet over for Programming Instructions to customize your product.

Digital Door Viewer Programming





Definitions:
*Please note all adjustments to the Digital Door viewer are made via the mobile application.

Low battery – The low battery light will flash when your Digital Door Viewer batteries are low. You will also receive a notification via your mobile app.

Motion Detection: Turn motion detection on to activate the camera as a visitor approaches the door. The motion detection distance change also be adjusted if you live in a high traffic area.

Night Vision: Turn night vision on to capture images of visitors at night.

Door Bell: When the door bell is active and image/video will be captured once it is pressed.

SD Card: Use the included SD card to store images and videos locally. Each image and/or video will be time and data stamped.

Photo: If the photo setting is chosen as the standard setting, an image will be taken each time the camera is activated. The images will be time and date stamped.

Video: If the video setting is chosen as the standard setting, a video will be taken each time the camera is activated. The video length can be adjusted from 1 seconds – 30 seconds.

Delay to Capture: Delay the image capture between 1 seconds – 10 seconds. This setting would be used to ensure you capture the best image of the visitor.

Two Way Communication: Easily communicate to visitors of your home while you are not home.

Users: Invite users to have access to the mobile application to receive notifications.

Mobile Application

Download the mobile application from the Android Play store or Apple App store.

Available on the App Store

Available on the App Store

Setting Up Your Device

After downloading the application follow the on-screen instructions. Have a small tool available to assist in pressing the Reset button.

Setting Up Z-Wave

Enrolling/Unenrolling the Network Module:
It is recommended that the Look™ Door Viewer is programmed through the centralized user interface (PC or hand-held device) to ensure communication between the lock and the controller unit. The network controller first needs to be in enrollment or exclusion mode for the lock to be enrolled or unenrolled from network.

FCC Compliance Statement: This device complies with Part 15 of the FCC rules. Operation is subjected to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IC Compliance Statement: This device complies with Industry Canada's licence-exempt RSSs.Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
