ASUS Tablet

User Guide

/ISUS

Charging your device

Ensure to fully charge your ASUS Tablet before using it in battery mode for extended periods. Remember that the power adapter charges your ASUS Tablet as long as it is plugged into an AC power source. Be aware that it takes much longer to charge the ASUS Tablet when it is in use.

> IMPORTANT! Do not leave the ASUS Tablet connected to the power supply once it is fully charged. ASUS Tablet is not designed to be left connected to the power supply for extended periods of

Airplane precautions

Contact your airline provider to learn about related in-flight services that can be used and restrictions that must be followed when using your ASUS Tablet in-flight.

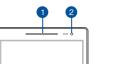

IMPORTANT! You can send your ASUS Tablet through x-ray machines (used on items placed on conveyor belts), but do not expose them to magnetic detectors and wands.

Safety precautions

This ASUS Tablet should only be used in environments with ambient temperatures between 0°C to 35°C (32°F to 95°F).

Long time exposure to extremely high or low temperature may quickly deplete and shorten the battery life. To ensure the battery's optimal performance, ensure that it is exposed within the recommended environment temperature.

Your ASUS Tablet

- Micro USB 2.0 port Speaker/Headset por
- Rear camera
- Volume button
- Power button
- Groove
- Microphone

- Audio speaker
- Front camera
- Touch screen panel

Removing the back cover

Locate the groove on the bottom-right corner and pull the back cover outwards until it is removed completely.

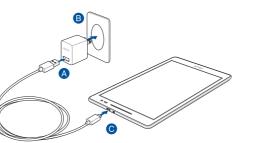

Installing a microSD card

Turn off your ASUS Tablet and remove the back cover before inserting the microSD card to the slot. Close the back cover before you turn on the device.

NOTE: The memory card slot supports microSD, microSDHC, and microSDXC card formats.

Charging your ASUS Tablet

To charge your ASUS Tablet:

- A Connect the micro USB cable to the power adapter.
- B Plug the power adapter into a grounded power outlet.
- Plug the micro USB connector into your ASUS Tablet.

Charge your ASUS Tablet for eight (8) hours before

using it in battery mode for the first time.

- Charging through the USB port of a computer may take longer time to complete.
 - If your computer does not provide enough power for charging your ASUS Tablet, charge your ASUS Tablet via the grounded power outlet instead.

IMPORTANT!

- Use only the bundled power adapter and micro USB cable to charge your ASUS Tablet. Using a different power adapter may damage your ASUS Tablet.
- Peel the protective film off from the power adapter and micro USB cable before charging the ASUS Tablet to prevent risk or
- Ensure that you plug the power adapter to the correct power outlet with the correct input rating. The output voltage of this adapter is DC 5.2 V. 1.35 Å.
- When using your ASUS Tablet while plugged-in to a power outlet, the grounded power outlet must be near the unit and easily accessible.
- Do not use or expose your ASUS Tablet near liquids, rain, or
- Do not use your ASUS Tablet near heating equipment or in connected. places where there is likelihood of high temperature.
- Keep your ASUS Tablet away from sharp objects.
- Do not place objects on top of your ASUS Tablet.

NOTES:

- Your ASUS Tablet can be charged via the USB port on the computer only when it is in sleep mode (screen off) or turned

Federal Communications Commission Statement

This device complies with FCC Rules Part 15. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation

to Part 15 of the Federal Communications Commission (FCC) rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generate uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no quarantee that interference will not occur in a particular installation. If this equipment causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by doing one or more of the following measures:

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant

Reorient or relocate the receiving antenna.

Appendices

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Label Location Declaration

We state that the label of ECC ID: MSOP022 will be put under the back cover and it is visible to the users as they install the SD card.

RF Exposure Information (SAR)

This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the ECC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions. accepted by the FCC with the EUT transmitting at the specified power level in different channels.

The highest SAR value for the device as reported to the FCC is 1.12 W/kg when placed next to the body.

The FCC has granted an Equipment Authorization for this device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this device is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on FCC ID:

Canada, Industry Canada (IC) Notices

This device complies with Industry Canada license-exempt RSS standard(s).

This Class B digital apparatus complies with Canadian ICES-003 and CAN ICES-3(B)/NMB-3(B).

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. The IC ID for this device is 3568A-P022.

Radio Frequency (RF) Exposure Information

The radiated output power of the Wireless Device is below the Industry Canada (IC) radio frequency exposure limits. The Wireless Device should be used in such a manner such that the potential for human contact during normal operation is minimized. This device has been evaluated for and shown compliant with the IC Specific Absorption Rate ("SAR") limits when installed in specific host products operated in portable exposure conditions.

Canada's REL (Radio Equipment List) can be found at the following web address:

http://www.ic.qc.ca/app/sitt/reltel/srch/nwRdSrch.do?lang=eng

Additional Canadian information on RF exposure also can be found at the following web address:
