USER'S GUIDE

Ver.:1.00

CAUTION: To use this product properly, please read the user's guide before installation

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Trouble Shooting Guide

- Ensure that the computer's Bluetooth technology is working. If a Bluetooth USB adapter is being used, make sure it is plugged in properly. Try un-plugging and re-plugging the USB adapter. On some Systems, a restart may be required.
- If the red LED starts blinking while the keyboard is in use, it is indicating a battery low status and it is time to change a new battery.
- On the PC, refer to the Bluetooth software help guide to ensure that Bluetooth is working properly. The PC must be running a version of Bluetooth for Windows XP that supports input devices (mice and keyboards).
- On the Mac, click on the Bluetooth icon within the system preferences pane. Refer to the Apple Bluetooth help file to ensure Bluetooth is working properly.
- Ensure your batteries are fully charged and inserted correctly.
- If the keyboard still is not discovered, ensure the correct versions of the software is installed. Mac OS10.2.8 or higher and Apple Bluetooth® software 1.5 or higher.

- Try moving the keyboard closer to the computer or to the adapter.
- Ensure that there are no other Bluetooth devices in discover mode.
