Connect the Gateway to a Computer

▶ Step 1 Get the Wireless DSL Gateway from your DSL Quick Start Kit.

▶ Step 2 Get the Power Cord from your DSL Quick Start Kit

▶ Step 3 Plug the smaller end of the **Power Cord** into the Black Port on the back of the Gateway.

> Step 4 Plug the larger end of the **Power Cord** into a **Power** Outlet.

▶ Step 5 Make sure the Power Switch is ON.

▶ Step 6 Confirm the Power Light on the Gateway is SOLID

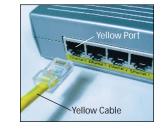

Power Light on Wireless DSL Gateway

▶ Step 7 Get the Yellow Cable.

Note: The DSL light may blink.

> Step 8 Plug one end of the Yellow Cable into one of the Yellow Ports on the back of the Wireless DSL Gateway.

▶ Step 9 Make sure that your computer is turned on. Then, plug the other end of the Yellow Cable in the Ethernet Port on the back of the computer.

> An **Ethernet Port** looks similar to a regular Phone Jack, but is slightly larger.

Your Computer May Look Slightly Different

Note: If the Ethernet Light does **NOT** turn green, make sure the Yellow Cable is properly connected on both ends.

- ▶ Step 11 Get the Black or Gray **DSL Cable** from your DSL Quick Start Kit.
- ▶ Step 12 Plug one end of the **DSL Cable** into the **Gray Port** on the back of the Gateway.

> Step 13 Plug the other end of the **DSL Cable** into the **Phone Jack** closest to your computer.

▶ Step 1 Unplug your Telephones

Note: If the DSL Light continues to blink, make sure you received notification from your DSL Internet Service Provider that your DSL service is **On**.

What are Phone Filters? Phone Filters separate the DSL signal from the voice signal, allowing you to talk on the telephone and be online at the same time.

All Devices with the same phone number as your DSL Line require Phone Filters. This includes telephones, fax machines, caller ID boxes, satellite TV receivers and answering machines.

(or other devices) from their current Phone Jacks.

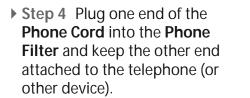

▶ Step 2 Open the Clear Bag and remove the **Phone Filters** from the bag.

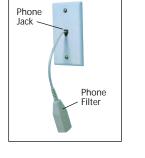

Note: The number and type of Phone Filters included in this kit may vary.

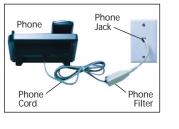

▶ Step 3 Plug a Phone Filter into every **Phone Jack** in your house with the same phone number as your DSL Line, and a telephone (or other device) connected to it.

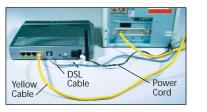

If you need additional Phone Filters, contact your DSL Internet Service Provider.

▶ Step 5 Make sure you did NOT put a Phone Filter on the Black DSL Cable. Make sure your setup looks EXACTLY like the picture to the right.
