## ■ Overview

The tri-band Wi-Fi 7 WF-825 is designed to provide Wi-Fi network connectivity for homes and business based on the latest 802.11be chipset design. With the WF-825, the user can utilize EasyMesh R4, which provides a self-configuring, self-healing and self-managing Wi-Fi network. It dynamically selects the most reliable Wi-Fi path and enables fast and seamless handoffs for end-users.

WF-825 is one of the best performing WiFi 7 router in the market. It supports 802.11ax on all Wi-Fi radio bands. The 2.4G radio supports 4x4 802.11b/g/n/ax MIMO. The 5G radio supports 4x4 802.11a/n/ac/ax/be MIMO. The 6G radio supports 4x4 802.11a/n/ac/ax/be MIMO WF-825 can meet the requirements for high-speed real-time traffic and high-bandwidth entertainment, such as 4K video, video game streaming and VR.

With global deployments in mind, the WF-825 utilized standard AC/DC adapter, allowing easy adaptation everywhere in every country.

## ■ Key Features

- Desktop placement
- 2.4GHz 40MHz 4x4 802.11b/g/n/ax
- 5GHz 160MHz 4x4 802.11a/n/ac/ax/be
- 6GHz 160MHz 4x4 802.11a/n/ac/ax/be
- WPA/WPA2-PSK(AES)/WPA3
- 8 x Integrated Wi-Fi antennas
- 1 x 10GbE WAN
- 1 x 10GbE LAN
- 3 x 2.5GbE LAN
- 4 x Status LED (multi-color)
- 1 x USB3.0
- 1 x WPS button
- 1 x Reset button
- 1 x DC jack
- Supports router/extender functions
- Supports TR-069 management
- Supports EasyMesh R4

## ■ Application Scenario

- Three WF-825 and WF-710G can form a Wi-Fi mesh network. One configured as the Gateway and the other two configured as the Wi-Fi Extender:

## ■ Federal Communications Commission (FCC) Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generate, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

### **RF exposure warning**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 45 cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter.

FCC regulations restrict operation of this device to indoor use only. The operation of this device is prohibited on oil platforms, cars, trans, boats, and aircraft, except that operation of this device is permitted in large aircraft while flying above 10000 feet. Operation of transmitters in the 5.925-7.125 GHz band is prohibited for control of or communications with unmanned aircraft systems.
