

TRANSMITTER BATTERY INSTALLATION

1. Press down on the battery cover and slide in the direction of the arrow to remove.
2. Install 8 pieces “AA” size alkaline batteries as indicated on the battery tray. Make sure to match the polarity (+ and -) as shown in the battery compartment or the transmitter will not function.
3. Install the battery cover in place and slide to close.

WARNING: Improper installation of transmitter batteries can cause serious damage to your system.

RECEIVER AND SERVO CONNECTIONS

Your MX-A Computer R/C system receiver is **NOT** equipped with BEC circuitry. DO NOT use more than 6.0 volts to power the receiver. Anything higher than 6.0 volts will burn-up or destroy your receiver. Only use a 4.8~6.0 volt battery pack or a speed controller that is designed to lower the voltage to the receiver. The following diagram shows a typical connection for the servos and receiver. Note that the receiver antenna should be located at least 2” (50mm) away from any servo leads and switches. In electric cars, we recommend that it be at least 4” (100mm) from the electric motor.

Extend the receiver antenna to the full length. Failure to do so will cause loss of control. Do not cut or bend the receiver antenna. Insulate the connectors with tape or use tie wraps to avoid contact with metal car chassis. Please follow the model manufactures recommendations for the correct installation of your radio system in your car or boat.

TRIGGER POSITION ADJUSTMENT

The Throttle Trigger can be adjusted to give you a more natural feel of the throttle.

To Adjust:

1. Loosen the Throttle Trigger set screw by turning counter clock-wise.
2. Turning the adjustment screw clock-wise will move the trigger out or in the (A) direction.
3. Turning the adjustment screw counter clock-wise will move the trigger in or towards the (B) direction.
4. After adjustment is made, re-tighten the Trigger Set Screw.
5. Total adjustment for the trigger is 10mm. Do Not over tighten adjustment screw, it may damage the adjuster and or the threads.

TROUBLESHOOTING GUIDE and WARNINGS

If your radio system does not operate properly, please check the following items:

1. Make sure the batteries are properly installed and fully charged. With alkaline batteries, make certain the batteries are installed in the correct direction.
2. Check that both the transmitter and receiver power switches are in the ON position.
3. Check the battery voltage by turning on the transmitter and pushing both menu buttons at the same time and releasing.
4. Make sure that the proper frequency crystals are installed in both the transmitter and receiver.
5. Make sure all the receiver and servo connections are tight.

WARNINGS:
DO NOT OPERATE YOUR SYSTEM IF SOMEONE ELSE IS ON YOUR FREQUENCY AT THE SAME TIME.

YOUR MODEL CAN CAUSE SERIOUS DAMAGE OR INJURY SO PLEASE USE CAUTION AND COURTESY AT ALL TIMES.

DO NOT EXPOSE THE RADIO SYSTEM TO WATER OR EXCESSIVE MOISTURE.

PLEASE WATER PROOF THE RECEIVER AND SERVOS BY PLACING THEM IN A WATER TIGHT RADIO BOX WHEN OPERATING R/C BOAT MODELS.

IF YOU HAVE LITTLE OR NO EXPERIENCE OPERATING R/C MODELS, WE STRONGLY RECOMMEND YOU SEEK THE ASSISTANCE OF EXPERIENCED MODELERS OR YOUR LOCAL HOBBY SHOP FOR GUIDANCE.

REGISTRATION NUMBER

The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

We appreciate your purchase of this new Airtronics MX-A Radio Control System. These instructions are intended to familiarize you with the many unique features of this modern, state of the art equipment. Please read them carefully so you may obtain maximum success and enjoyment from its operation.

MX-A

SYSTEM FEATURES

Unique and functional pistol grip transmitter design
Well balanced for precise control
Non-slip rubber steering wheel
Well placed digital trim levers
Optimum third channel switch location
Big LCD display
Adjustable (70/30) Throttle trigger
Low Battery warning
Quick access transmitter crystal
High performance micro 2 channel receiver
High torque / high speed 94102Z servo
Receiver dry battery holder
Switch harness
NiCd charger jack in transmitter
Wrist strap holder (optional wrist strap part # 99104)
Sound Beep (On / Off)

SYSTEM SPECIFICATIONS

Transmitter

Model: MX-A
Output power: 200 MW
Modulation: FM/PPM
Power supply: 8 AA alkaline dry cells DC 12V or 8 cell NiCd Pack.

Weight: 14.46 ounces
Frequencies: 27 MHz (6) frequencies
75 Mhz (30) frequencies

Receiver

Model: 92727Z (27 MHz) or 92726Z (75 MHz)

Modulation: AM
Intermediate frequency: 455 KHz
Power supply: DC 4.8 ~6.0V
Weight: 0.67 ounces
Dimensions: 1.44"(L) x 1.00"(W) x 0.63"(H)

Please note that the MX-A is designed for comfort and precise control of all types of model cars and boats. We wish you the best of success with your radio system. ***Enjoy and have fun.***

Screen Display

Digital Trim indicators (throttle and steering)
Battery Fuel Tank
Dual Rate Steering
EPA Steering, Throttle, AUX
ARC Steering, Throttle
Model Memory (12)
Sub-Trim Steering, Throttle
Servo Rev Steering, Throttle, AUX
Battery Voltage Display
Audio On / Off

Servo

Model: 94102Z Heavy duty standard servo
Power supply: DC 4.8 ~ 6.0V
Dimensions: 1.54"(L) x 0.79"(W) x 1.42"(H)
Weight: 1.59 ounces
Speed: 0.16 sec. At 6.0V for 60 deg rotation
Torque: 53 in/oz at 6.0V

Accessories

97001Z switch harness
Frequency flag
Receiver dry battery holder
instruction manual

Options

95046Z Transmitter NiCd Battery Pack (700mah)
95033Z NiCd Dual Battery Charger TX and RX
96317Z F3000 speed controller (no reverse)
99104 Deluxe wrist strap

LCD DISPLAY SCREENS

Battery

Pressing both menu buttons simultaneously, will automatically move the cursor to the battery voltage screen. Low battery warning beep will come on when battery reaches 9.1V

Servo Reverse

Press the left menu key to move the cursor to the REV screen. The screen will now display AUX. Change the servo direction by pressing (INC or DEC) key for the AUX channel. By pressing the left menu key again, you can change the TH and ST directions.

Default

ST NOR
TH NOR
AUX NOR

Sub Trim

Press the left menu key to move the cursor to the SUB-T screen. The screen will now display TH. Adjust the sub-trim by using the (INC or DEC) key. Press the left menu key to display the ST and adjust using the (INC or DEC) key.

Default

ST 0
TH 0

Range +15 ~ -15

Model Select

Press the left menu key to move the cursor to MODEL. The screen will now display the model number you are currently using. To change models, press the (INC or DEC) key to select model 1 ~ 5.

Range 1 ~ 12

Arc

Press the left menu key to move the cursor to ARC. The screen will now display TH. Adjust the ARC by pressing the (INC or DEC) key. Press the left menu key to adjust the ST. (NOTE) Steering ARC will work in both left and right directions. Throttle ARC only works in forward direction.

Default

ST 0
TH 0

Range - 100 ~ 100

End Point Adjustment

Press the left menu key to move the cursor to EPA. The screen will now display AUX (L) or (R). By moving the AUX channel lever, you will see the (L or R) change. EPA can be set for both directions. To set TH, move trigger forward or back to see (H or L). Move steering wheel to see (L or R)

Default

ST 100%
TH 100%
AUX 100%

ST: Range 0% ~ 120%
TH-L: Range 0% ~ 160%
TH-H: Range 0% ~ 140%
AUX: Range 0% ~ 150%

Steering Dual Rate

Press the left menu key to move the cursor to EPA. The screen will now display ST. This will display your current Steering Dual Rate setting. You can change this setting by using the (INC or DEC) keys or, by moving the D/R lever located above the steering wheel.

Default

ST 100%

Range 0% ~ 120%

AUDIO ON / OFF

Beep

Audio off icon

By default the audio sound beep is in the on position. This beep will sound out every time you press any of the input or trim keys. You can turn the audio off by:

1. Turn radio power switch to the off position
2. Press the INC key down and hold.
3. Turn power switch to the on position
4. Release the INC key.

To turn the audio sound on, repeat steps 1 ~ 4.

NOTE: When audio sound is "ON", there will be no icon displayed in the lower left of the display screen.

Audio off icon

ARC Steering

ARC Throttle
