

Alarm Lock Network Locks Now Integrated on Lenel® Enterprise Platform

Alarm Lock Trilogy® Network™ Wireless Locks, known for easy 1-hour installation, long-life battery power, built in HID Readers, and wireless networking/programming, are ideal for any edge application, or door, inside and out. Now, as a Lenel's Open Access Alliance Partner®, the locks are certified to perform in real-time on Lenel's OnGuard® Platform, (as well as Continental Access® CA3000 enterprise IT environments.)

- Alarm Lock Trilogy® Network Wireless Access Control PIN/Prox Locks are certified with Lenel's OnGuard® Software, versions 2012 (v6.5) & 2013 (v6.6)
- Network Access Locks & Network Gateway Modules are available from your reseller of choice: locking distributor, security distributor or Lenel® VAR
- Both Network Locks & Gateways are easily added to the Lenel's OnGuard System with a firmware upload and are simply connected to the existing IT network. (No panel required.)
 - ❑ Network locks takes the place of a traditional access reader within the system, but require no wires or power. This makes them ideal edge devices for perimeter applications.
 - ❑ Integrated on the system, the Alarm Lock Network Lock supports 5,000 users (depending on the number of different HID card formats in use). It is also fully distributed with user information.
- Savings on Equipment Costs:
 - ❑ Each Network Gateway can manage 64 locks; average, coverage is over a 100' to 200' radius.
 - ❑ Up to 255 Network Gateways can be on the same system using both main and subnets managing up to 16,320 AL Network Locks
- Alarm Lock Network Locks have the industry's best battery life, and on this system average 3 years, typ.
