## Welcome

You are reading the *Device Overview*.

Follow these links to learn more about the most common tasks on the Device:

- [Setting up your Device](#)
- [Browsing the Device Store](#)
- [Accessing Device Documents](#)
- [Managing your Device](#)
- [Searching](#)

To see the full contents of this guide, [include command description]. There's more assistance on the [Device support website](#) [include hyperlink], including a printable version of this overview. Also be sure to look at the documentation in the Device box.

To keep reading [include command description].  
To leave this overview, [include command description].

## *Chapter 1*

# **Getting Started**

## **Charging the battery**

If you haven't done so already, please plug your Device into a power source to charge the battery. A [symbol name] should appear on the battery icon at the top of the [screen name]. The indicator light will turn yellow while charging and green when the battery is fully charged. Charging should take less than three hours, and you can continue using the Device during that time. Charging is faster if you use a AC adapter to plug the Device directly into a wall outlet instead of charging from a computer via a USB cable.

The Device should only be charged using the USB cable included with the device, or another USB cable approved for use with the Device, with a compatible USB charger or USB port that meets the following requirements: [describe requirements]

## **Using the controls**

You need only learn a few simple controls in order to navigate around and use your Device.

On [location] of the device are the [description of relevant buttons and functionality].

At [location] of the device are a USB port, headphone jack, and [button name] button. You can use a USB cable to connect your Device to a computer for charging the battery and transferring files. An AC adapter for the USB cable lets you charge your Device from a wall outlet.

## **Setting up your Device**

If you're reading this overview, you've probably completed the Device setup process, which includes choosing a language; connecting to a wireless network; and registering your Device. If you haven't done all those steps yet, go to the [screen name] now, select [document name], and follow the onscreen prompts.

**About Wi-Fi connections** – Content is delivered directly to your Device via its built-in Wi-Fi connectivity. You can connect to networks at home, at your favorite cafés, or at Wi-Fi hotspots around the world. To view all available Wi-Fi networks, from the [screen name], press the [button name] and select [menu choice]. On the [page name], select [menu choice] next to Wi-Fi networks.

**About registration** – If you bought your Device with your Company account, or you've already gone through the Device setup process, the Device is registered and ready to use.

To verify this, press the [button name] and check whether your Company user name is in the [location] of the [screen name]. If it says “[description]” or shows the name of a previous owner instead of your own Company account name, you’ll need to register it.

### **Status Indicators**

[provide graphics and descriptions]

## *Chapter 2*

### **Acquiring Content**

#### **Using the Device Store**

The online Device Store offers you a broad offering of content. To access the store, select [menu choice] from any menu.

After purchase, the item is directly delivered to your Device wirelessly.

#### **Managing your Device**

The Device can store significant amounts of content. To display a list of content on your Device, [describe process]. Select the item you want to open, then press [describe command].

You'll probably reach a point where you have so many items that you want to group them for easier access. [describe process]

To delete an item from your Device, [describe process]

If you wish to retrieve content that you've deleted, [describe process]. See also "[Using Device with your computer](#)" for more information.

## *Chapter 3*

### **Accessing Device Documents**

#### **Customizing your text display**

The Device provides a quick way to adjust the appearance of content. To access those settings, [describe process] when you're viewing a document and select [menu option]. A dialog box will appear that lets you change the way content looks on the Device screen. You can also change the orientation when you aren't reading a document, such as from the [screen name]. Simply press the [button name] and select [menu choice].

#### **Interacting with your documents**

Because the Device is a computer, it gives you access to features that aren't available with printed materials. You can also [describe functionality].

**[Feature Name]** – [describe feature].

**Search** – [describe feature].

**[Feature Name]** – [describe feature].

**[Feature Name]** – [describe feature].

**[Feature Name]** – [describe feature].

**[Feature Name]** – [describe feature].

### **When you're finished**

Putting a Device in sleep mode or turning it off when you aren't viewing content will allow you to use it longer between battery recharges. You can further conserve battery life by turning off the wireless connection when not using it.

When you want to stop viewing content, you can let your Device go into sleep mode automatically after a few minutes, or you can press the power button briefly to initiate sleep mode immediately. To turn off the device completely, press and hold the power button for several seconds until the screen goes blank, then release the button.

## Chapter 4

# Maximizing Your Device

## Customizing your Device settings

To go to the [page name], select [menu choice] from the [screen name]. The options on this page are: [describe options].

### The Settings contextual menu

When you're on the [page name], the menu offers some important functions that aren't available from the [screen name] or content menus.

**Update Your Device** – Installs the latest software for your Device. If there are currently no software updates available on your Device, this option is [describe].

**Restart** – Restarts your Device.

**Reset to Factory Defaults** – Resets your Device to its original factory settings and restarts it. You should only select this action if instructed to do so by Customer Service. Before you reset your Device to factory defaults, you must back up certain content. Once your Device restarts, you must create a new device password if you want to continue to password-protect your Device.

**Legal** – Provides trademark, copyright, and other notices about the software installed on your Device.

## Viewing other types of files

Device can display a PDF document without losing the formatting of the original file. Just drag the PDF file to [location] on your Device via a USB connection, or [describe additional option].

## Sharing via social networks

You can connect with friends using social networks and share your thoughts.

[Describe feature]

[Describe feature]

## **Using the Device with your computer**

By connecting your Device to your computer via a USB cable, you can add content to the Device without a Wi-Fi connection. Your Device will work with any computer running Mac OS X 10.2 or later, or Windows 2000 or later.

#### **E-mail**

[include e-mail addresses]

#### **Telephone**

[include telephone numbers]

## *Appendix A*

### **Legal Information**

#### FCC Compliance Statement

This Device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This Device may not cause harmful interference; and (2) this Device must accept any interference received, including interference that may cause undesired operation.

This Device has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation.

This Device meets the FCC Radio Frequency Emission Guidelines and is certified with the FCC as the FCC ID number found on the back of the Device.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Information regarding Exposure to Radio Frequency Energy Exposure to Radio Frequency Energy Your Device is designed and manufactured not to exceed the emission limits for exposure to RF energy set by the Federal Communications Commission of the United States (FCC). Information on your Device is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/ea/> after searching on the FCC ID for your Device, which can be found on the back of the Device.
