* Boot-up: press the power button, the system will enter the starting process as shown below:

  Boot logo starting process...

* Shutdown: Press the power button and hold for a while, the equipment option will pop up. Select the shutdown button as shown below:

Click Yes to enter the safe shutdown process.

Home screen:

After the system is successfully booted up, you will see the home screen of Android 5.1 system (as shown in the picture below). The default system home screen consists of the status bar, quick search bar, the Home screen label and other icons.

The status bar gives the network status, battery power and time of the current system.

With the Quick Search Bar, you can enter the keywords and start the network search. The home screen label is placed on the right center of the screen. Click on it, the default home screen will be unfolded. At the bottom of the screen is the shortcut icon of the browser.

Buttons:

Buttons required in the use of the Android system:

Volume button: the Volume +, Volume - button in the task bar can realize the increase and decrease of the volume level

Power button: Long press the power key for boot-up or shutdown. Press the power button momentarily to enter or leave the sleep state.

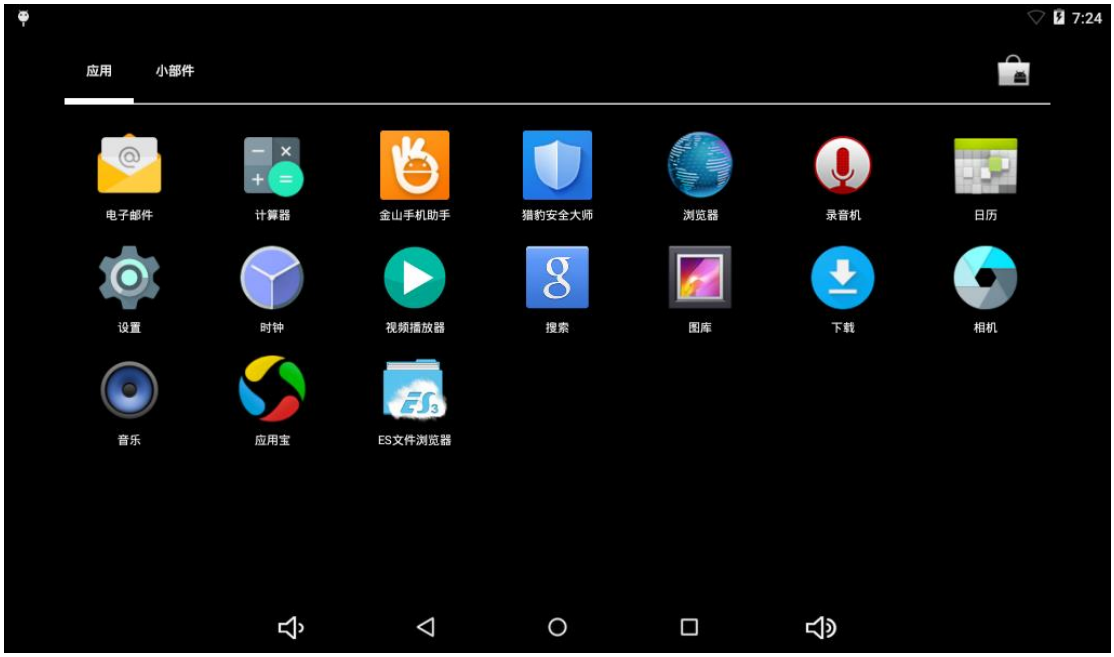
Menu button: show the menu items of the current window.

Home button: return or select the main interface.

Return button: return to the interface one level higher.

Home screen operation

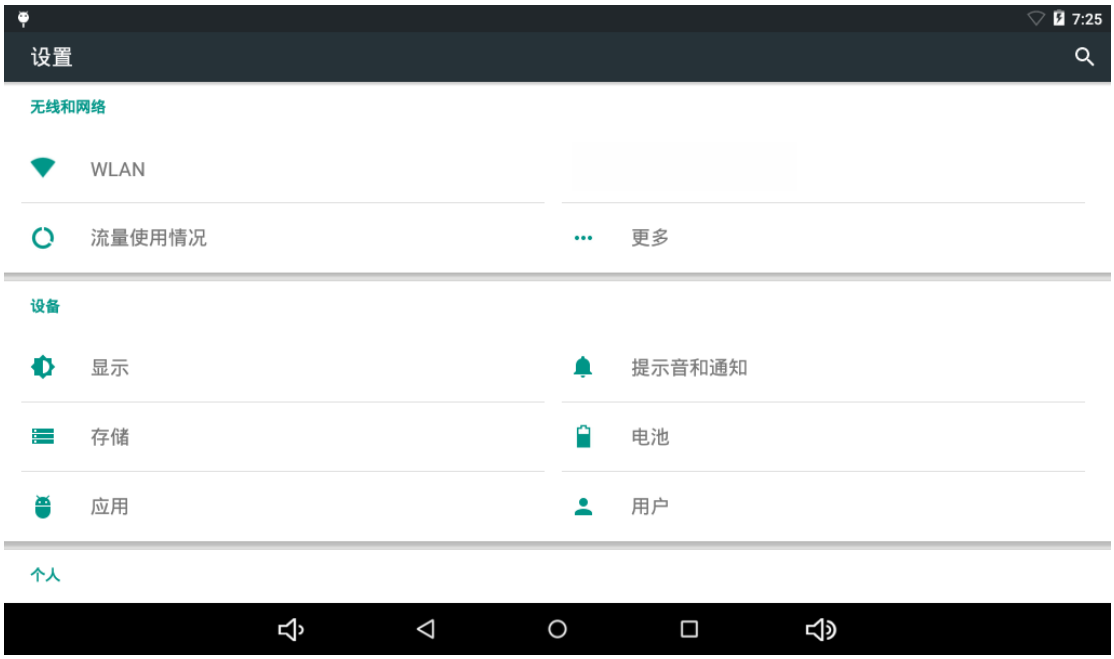
Click the home screen label on the main interface, as shown below:



In the home screen, you can set up the system, run existing applications, install new applications, ~~file browserbuscador~~ touch screen alignment, play music and videos, browse web pages and conduct other operations.

System setting:

Click the "Setting" icon in the Home screen interface to open the system setting interface as shown below:



Select related item for corresponding operation, for example:

* WLAN and network:

* Sound and display

* Date and time setting

* About the equipment

etc.

*** Time and Date setting:**

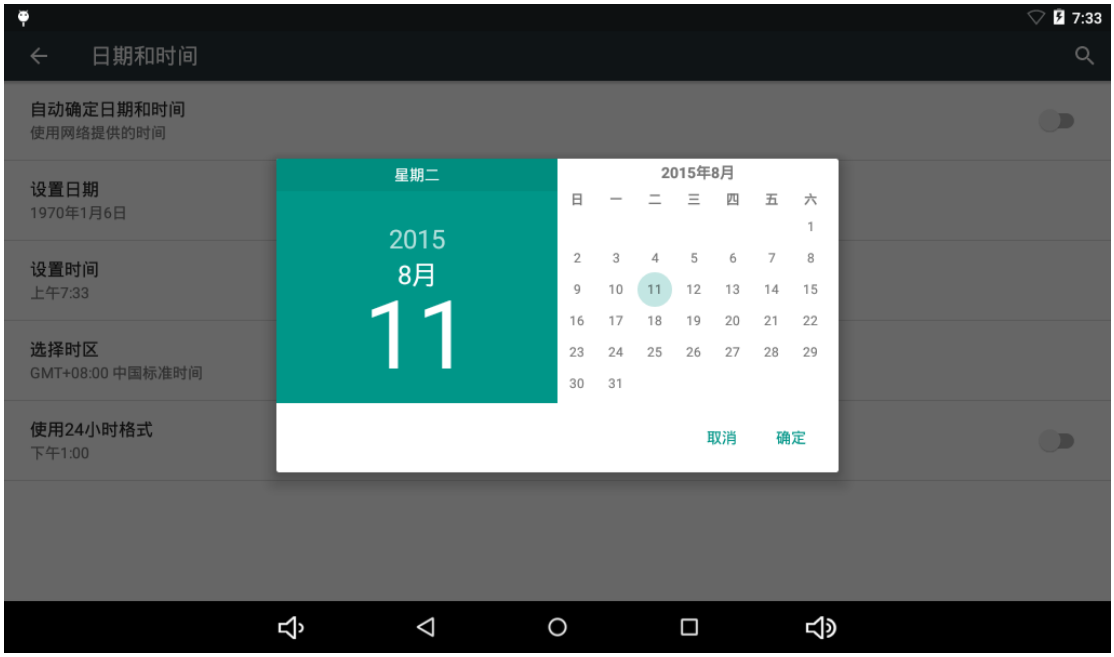
Select the "Time and date setting option" in the setting interface to enter the time and date setting interface:

You can choose "Set automatically": use the network time.

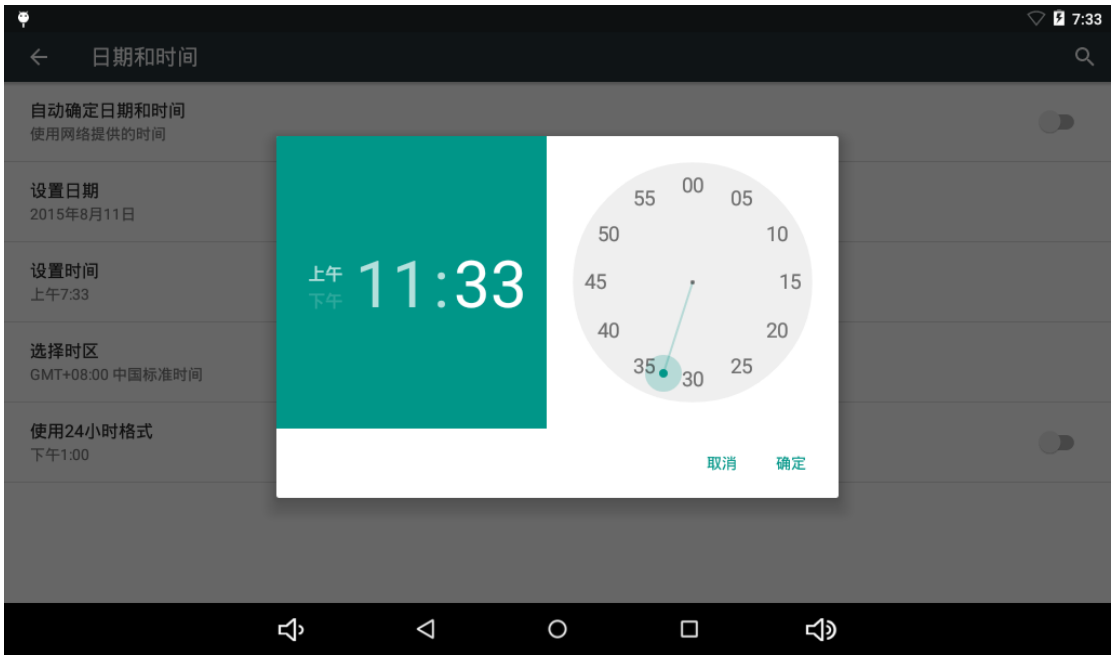
Or you can choose to set the date manually. Select the time zone, set up

the time, time format, date format, etc.

For example, you can choose to set up the date as shown below:



By cancelling the automatic setting of time and date, you can set the date and time required by yourself, and then select "Complete". As shown below:



Select "setting". Scroll to select the "AM" or "PM", and click the Hr to

set the hour, and click the Min to set the minute.

*** Screen brightness**

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
