ERROR MESSAGES

remove the batteries, re-program the device as necessary and test. If the fault cannot be corrected, contact your distributor.

FCC INFORMATION

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

In cases where the manual is provided only in a form other than paper, such as

on a computer disk or over the internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the capability to access information in that form. This equipment has been tested and found to comply with the limits for a Class B

digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference with radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver.

- Consult the dealer or an experience radio/TV technician for help.

the receiver is connected.

- Connect the equipment into an outlet on a circuit different from that to which

the following two conditions: (1) This device may not cause harmful interference and (2) thus device must accept any interference received, including interference that may cause undesired operation.

USING MED-TIME FOR THE FIRST TIME

1. Open the battery door and

remove the plastic strip to turn

2. Open the lid as illustrated to

template (1 to 4X daily) on the tray and load your pills accordingly.

access and remove the Med-Tray. Insert the appropriate dosage

on Med-Time.

NOTE: Unit complies with Part 15 of the FCC rules. Operation is subject to

1. Turn Med-Time over as if you were removing the medications.

HOW TO EARLY DOSE:

- 2. After you hear the beep, turn the device back over the normal resting position. 3. Repeat again. The tray rotates one step, and the next dose
- becomes available. 4. Turn Med-Time over to dispense your medications (as you
- normally would) and to reset the alarm.

TESTING Med-Time has a built-in function to test the device. To enter the test mode,

press button 1 for at least 10 seconds. The CH message should appear on the display. To exit the test mode, press button 3. CH TEST MODE - To exit the test mode, press button 3. When the display

press button 2. The unit will proceed through the following system test modes. **CH 1 DISPLAY TEST**

shows CH, Med-Time is ready to be tested. To perform a system function test,

The display shows CH 1. All segments on the display shall light up.

CH 2 ROTATION TEST The display shows CH 2. The motor shall rotate the tray one compartment.

CH 3 ALARM SIGNAL TEST

The display shows CH 3. The alarm should sound. Turn the Med-Time over to test reset function (as to dispense medicine). The signal should stop. The CH 4 message

will appear on the display if Med-Time is not turned over within 30 seconds.

If the dispenser does not rotate properly the motor will stop after a few seconds and display the error message "CH 6". After a few seconds, Med-Time will return to CH Stand by mode. Exit the test mode by pressing button 3.

Contact e-pill or AMAC if you encounter any problems with your Med-Time unit.
