

ADW200

Operating steps

1. How to connect the Antenna and power adapter to receiver.

2. How to connect video and audio cable to TV or monitor.

3. If we need receive image with computer only, just connect receiver and computer with USB cable, do not plug AV cable and power adapter.

4. Manual Channel mode: set the dip switch "L" to upward side, 1-4 to downward side, receiver set to Manual channel mode, press the channel button, the channel will switch from 1 to 4, led show the current channel.

5. Loop Mode: set the dip switch "L" and 1-4 to downward side, the receiver set to Loop mode, the receiver will auto switch channels every 5 second from channel 1 to channel 4.

6. Pairing: Press the pairing button on the receiver, channel LED flashing, then press the pairing button on the camera, receiver led stop flashing, pairing success, monitor will display the image from camera.

Notices

1. The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
2. This device complies with Part 15 of the FCC Rules. (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.
