

# iPhone User Guide

Everything you need to  
know about iPhone

## Remember when?

Rediscover special moments with Memories

Memories takes photos and videos from special times in your life — that crazy race with your best friend, the backpacking trip through Italy, that blurry first year of your son's life — and turns them into short movies.

## Get started

Tap the Memories tab in the Photos app and choose a memory. Tap ► to play the Memory movie, or scroll down below the movie to see people, places, and other related memories.

## Make it perfect

You can add or remove specific photos and videos, change the soundtrack or title, even adjust the length of the Memory movie. Just tap a Memory movie while it's playing, then tap .

## Remember together

To share your Memory movie, tap the movie while it's playing, tap , then email it to a friend or send it with Messages. Or, if you have Apple TV, get everyone together and watch on a big screen. All your memories are available in the Photos app on Apple TV when you [use iCloud Photo Library](#).

Want to learn more? Check out [Memories](#) in Photos.

## The gang's all here

### Use iPhone to plan a night out

It's easy to keep everyone in the loop when you use your iPhone to plan a night out. From tossing around ideas, to finding a restaurant, to arranging transportation, iPhone has you covered.

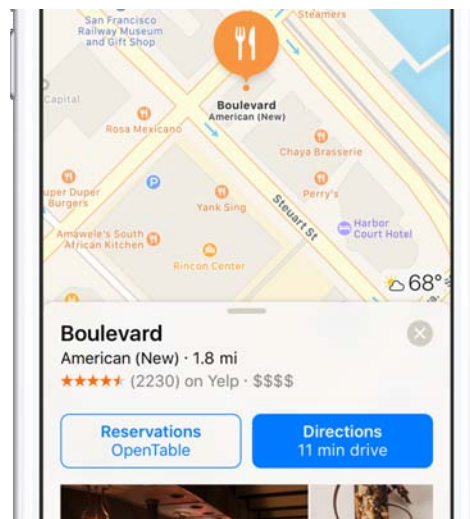

### Make a plan

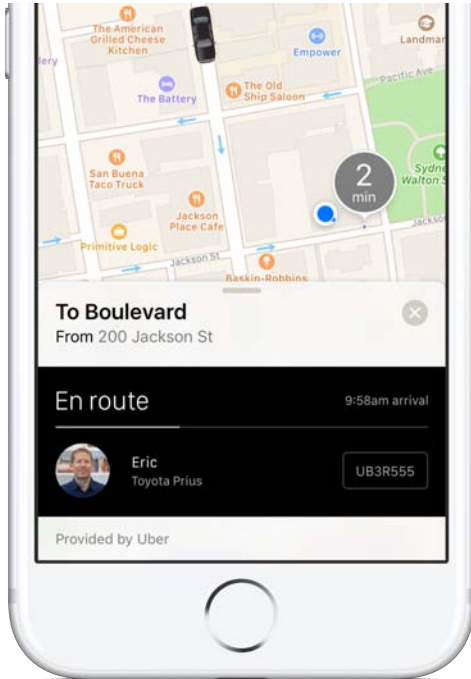

Start a group conversation in Messages and begin brainstorming potential activities. When someone hits on a plan you love, respond with a Tapback. Double-tap the message, then give it a thumbs up.

### Reserve a table

In Maps, pinch open to zoom in on the area you want to search. Tap the search field, tap Food, then tap Restaurants.

After reading up on a few spots, choose one and tap Reservations. If you don't see a reservation option, just tap  to give them a call.

## Call your ride

When it's almost time to go, choose your destination in Maps. Tap Directions, tap Ride, then request a ride through an app.

## Running late?

Share your location with your friends so they know you're on your way. In a Messages conversation, tap ⓘ, then tap Send My Current Location.

Want to learn more about what you can do in Messages and Maps? Start with [Find places](#) in Maps, or [Messages at a glance](#).

Not all features are available in all areas.

## Be well

Create habits that support your health and well-being

Move more, sleep better, or schedule some uninterrupted time. Use iPhone to support your goals for a healthier body and mind.

### Steps count

Carry iPhone with you to track how far you walk or run each day. To check your progress, open the Health app, then tap Activity. To see how many steps you've traveled over time, tap Steps, then tap Week, Month, or Year.

### Sleep better

Use Bedtime in the Clock app to help you build healthy sleep habits by consistently going to bed and waking at the same time. Tap Bedtime, then follow the onscreen instructions.

## Unwind

Enjoy a family dinner, write in your journal, or just sit quietly without interruptions from alerts or notifications. Swipe up from the bottom of the screen to open Control Center, then turn on Do Not Disturb . To schedule daily quiet time, go to Settings > Do Not Disturb.

Want to learn more about using iPhone to support your health and well-being? Start with [Your health at a glance](#).

## A quick look at iPhone

### iPhone overview

This guide describes iOS 10 for:

iPhone 5  
iPhone 5c  
iPhone 5s  
iPhone SE

iPhone 6  
iPhone 6s  
iPhone 7

iPhone 6 Plus  
iPhone 6s Plus  
iPhone 7 Plus

### iPhone 7

### iPhone 7 features

- A Volume buttons

---

- B Ring/Silent switch

---

- C Status bar

---

- D FaceTime camera

---

- E Receiver/microphone/speaker

---

- F Sleep/Wake button

---

- G SIM card tray

---

- H iSight camera

---

- I Rear microphone

---

- J True Tone Flash

---

- K Lightning connector

---

- L Speaker/microphone

---

- M Home button/Touch ID sensor

---

- N Microphone

---

### iPhone 7 Plus

### iPhone 7 Plus features

- A Volume buttons

---

- B Ring/Silent switch

---

- C Status bar

---

- D FaceTime camera

---

- E Receiver/microphone/speaker

---

- F Sleep/Wake button

---

- G SIM card tray

---

- H Dual 12MP wide-angle and telephoto cameras

---

- I Rear microphone

---

- J True Tone Flash

---

- K Lightning connector

---

- L Speaker/microphone

---

- M Home button/Touch ID sensor

---

- N Microphone

---

### iPhone SE

### iPhone SE features

- A Volume buttons

---

- B Ring/Silent switch

---

- C Status bar

---

- D FaceTime camera

---

- E Receiver/front microphone

---

- F Sleep/Wake button

---

- G SIM card tray

---

- H iSight camera

---

- I Rear microphone

---

- J True Tone Flash

---

- K Lightning connector

---

- L Speaker

---

- M Home button/Touch ID sensor

---

- N Headset jack

---

Your features and apps may vary depending on the model of iPhone you have, and on your location, language, and carrier. To learn which features are available on your iPhone, see the [Compare iPhone models website](#). To find out which features are supported in your area, go to the [iOS Feature Availability website](#).

**Note:** Apps and services that send or receive data over a cellular network may incur additional fees. Contact your carrier for information about your iPhone service plan and fees.

## Sleep/Wake button

Use the Sleep/Wake button to turn on or wake iPhone, lock it, or turn it off. Locking iPhone puts the display to sleep, saves the battery, and prevents anything from happening if you touch the screen. You can still listen to music and adjust the volume using the buttons on the side of iPhone, and you can receive phone calls and FaceTime calls, text messages, alarms, notifications, and other updates.

On iPhone 7, iPhone 7 Plus, iPhone 6s, iPhone 6s Plus, iPhone 6, and iPhone 6 Plus, the Sleep/Wake button is on the right side:

On iPhone SE, iPhone 5s, iPhone 5c, and iPhone 5, the Sleep/Wake button is on the top edge:

iPhone locks automatically if you don't touch the screen for a minute or so. To adjust the timing, go to Settings > Display & Brightness > Auto-Lock.

**Turn on iPhone.** Press and hold the Sleep/Wake button until the Apple logo appears.

**Turn off iPhone.** Press and hold the Sleep/Wake button until the slider appears, then drag the slider.

**Wake iPhone.** On iPhone 6s and later, lift iPhone, or press the Sleep/Wake or Home button to see the Lock screen. To turn Raise to Wake on or off, go to Settings > Display & Brightness. On iPhone 6 and earlier, press either the Sleep/Wake or

Home button to see the Lock screen.

From the Lock screen you can check notifications and recent app activity, take photos, and more. For more information, see [Lock screen](#).

**Unlock iPhone.** On iPhone 5s and later, wake iPhone, then press the Home button. On iPhone 5c and iPhone 5, wake iPhone, press the Home button, then enter the passcode if required.

**Set a passcode.** For additional security, you can [require a passcode](#) to unlock iPhone. If you didn't create a passcode during setup, go to Settings > Touch ID & Passcode (iPhone 5s and later) or Settings > Passcode (other models).

## Home button

The Home button takes you to the Home screen, where you can tap an app to open it. The Home button also provides other convenient shortcuts.

**Go to the Home screen.** Press the Home button.

**Choose the click that's right for you.** On iPhone 7 and iPhone 7 Plus, go to Settings > General > Home Button, then choose a click.

**See apps you've opened.** Double-click the Home button when iPhone is unlocked to show the app switcher, then swipe left or right. See [Switch between apps](#).

**Use Siri or Voice Control.** Press and hold the Home button. See [Make requests](#) and [Voice Control](#).

On iPhone 5s and later, you can use the sensor in the Home button to unlock iPhone or make purchases in the iTunes Store, App Store, and iBooks Store (instead of using your passcode or Apple ID password). On iPhone 6 and later, you can also use the Touch ID sensor when using Apple Pay (in countries where Apple Pay is supported) to make a purchase. See [Touch ID](#) and [About Apple Pay](#).

You can also use the Home button to turn accessibility features on or off. See [Accessibility Shortcut](#).

## Volume controls

When you're on the phone or listening to songs, movies, or other media, the buttons on the side of iPhone adjust the audio volume. Otherwise, the buttons control the volume for the ringer, alerts, and other sound effects. You can also use Siri to turn the volume up or down. Just say "Turn up the volume" or "Turn down the volume."

**WARNING:** For information about avoiding hearing loss, see [Important safety information](#).

**Lock the ringer and alert volumes.** Go to Settings > Sounds & Haptics (called *Sounds* on iPhone models other than iPhone 7 and iPhone 7 Plus), then turn off Change with Buttons. To limit the volume for music and videos, go to Settings > Music > Volume Limit.

**Note:** To limit the maximum headset volume, go to Settings > Music > Volume Limit. To prevent changes to the volume limit, go to Settings > General > Restrictions > Volume Limit.

**Use Control Center to adjust the volume.** When iPhone is locked or when you're using another app, swipe up from the bottom edge of the screen to open Control Center, swipe left, then adjust the volume.

You can also use either volume button to [take a picture or record a video](#).

## Lightning connector

Connect your Lightning to USB Cable to the Lightning connector to charge or sync your iPhone. For more information about charging, see [Charge and monitor the battery](#). For more information about syncing, see [Sync with iTunes](#).

On iPhone 7 and iPhone 7 Plus, use EarPods with Lightning Connector to listen to audio, or Lightning to Headphone Jack Adapter to connect headphones or other types of devices with a 3.5 mm jack.

## Ring/Silent switch

Flip the Ring/Silent switch to put iPhone in ring mode  or silent mode .

In ring mode, iPhone plays all sounds. In silent mode (switch shows orange), iPhone doesn't ring or play alerts and other sound effects (but iPhone may still vibrate).

**Important:** Clock alarms, audio apps such as Music, and many games play sounds through the built-in speaker, even when iPhone is in silent mode. In some areas, the sound effects for Camera and Voice Memos are played, even if the Ring/Silent switch is set to silent.

For information about changing sound and vibration settings, see [Sounds and silence](#).

**Use Do Not Disturb.** You can silence calls, alerts, and notifications using [Do Not Disturb](#). Swipe up from the bottom edge of the screen to open Control Center, then tap .

## SIM card

If you were given a SIM card to install, install it before setting up iPhone.

**Important:** A Nano-SIM card is required to use cellular services when connecting to GSM networks and some CDMA networks. iPhone that's been activated on a CDMA wireless network may also use a SIM card for connecting to a GSM network, primarily for international roaming. Your iPhone is subject to your wireless service provider's policies, which may include restrictions on switching service providers and roaming, even after conclusion of any required minimum service contract. Contact your wireless service provider for more details. Availability of cellular capabilities depends on the wireless network.

**Eject the SIM card tray.** Insert a paper clip or the SIM eject tool into the small hole of the SIM card tray on the right side of iPhone, then press firmly to eject and remove the tray. Place the SIM card in the tray—the angled corner determines the correct orientation—then insert the SIM card tray back into iPhone.

**Set a SIM PIN.** To protect your SIM card from others using it for phone calls or cellular data, you can use a SIM PIN. With a SIM PIN, every time you restart your device or remove the SIM card, your SIM card locks and you see “Locked SIM” in the status bar. To create one, go to Settings > Phone.

## Status icons

The icons in the status bar at the top of the screen give information about iPhone:

Status icon		What it means
•••••	<b>Cell signal</b>	You're in range of the cellular network and can make and receive calls. If there's no signal, "No service" appears.
✈️	<b>Airplane Mode</b>	Airplane Mode is on—you can't make phone calls, and other wireless functions may be disabled. See <a href="#">Travel with iPhone</a> .
LTE	<b>LTE</b>	Your carrier's LTE network is available, and iPhone can connect to the Internet over that network. (iPhone 5 and later. Not available in all areas.) See <a href="#">Cellular data settings</a> .
4G	<b>UMTS</b>	Your carrier's 4G UMTS (GSM) or LTE network (depending on the carrier) is available, and iPhone can connect to the Internet over that network. (Not available in all areas.) See <a href="#">Cellular data settings</a> .
3G	<b>UMTS/EV-DO</b>	Your carrier's 3G UMTS (GSM) or EV-DO (CDMA) network is available, and iPhone can connect to the Internet over that network. See <a href="#">Cellular data settings</a> .
E	<b>EDGE</b>	

Your carrier's EDGE (GSM) network is available, and iPhone can connect to the Internet over that network. See [Cellular data settings](#).

<b>GPRS</b>	<b>GPRS/1xRTT</b>	Your carrier's GPRS (GSM) or 1xRTT (CDMA) network is available, and iPhone can connect to the Internet over that network. See <a href="#">Cellular data settings</a> .
<b>Wi-Fi</b>	<b>Wi-Fi call</b>	iPhone is set up for Wi-Fi calling. iPhone also displays a carrier name next to the icon. See <a href="#">Make a call</a> .
	<b>Wi-Fi</b>	iPhone is connected to the Internet over a Wi-Fi network. See <a href="#">Connect to Wi-Fi</a> .
	<b>Do Not Disturb</b>	Do Not Disturb is turned on. See <a href="#">Do Not Disturb</a> .
	<b>Personal Hotspot</b>	iPhone is providing a Personal Hotspot for another device. See <a href="#">Personal Hotspot</a> .
	<b>Syncing</b>	iPhone is syncing with iTunes. See <a href="#">Sync with iTunes</a> .
	<b>Network activity</b>	Shows that there's network activity. Some third-party apps may also use it to show an active process.
	<b>Call Forwarding</b>	Call Forwarding is set up. See <a href="#">Call forwarding, call waiting, and caller ID</a> .
	<b>VPN</b>	You're connected to a network using VPN. See <a href="#">VPN settings</a> .
	<b>TTY</b>	iPhone is set to work with a TTY machine. See <a href="#">Support for TTY</a> .
	<b>Portrait orientation lock</b>	The iPhone screen is locked in portrait orientation. See <a href="#">Change the screen orientation</a> .
	<b>Alarm</b>	An alarm is set. See <a href="#">Alarms and timers</a> .
	<b>Location Services</b>	An item is using Location Services. See <a href="#">Location Services</a> .
	<b>Bluetooth®</b>	<i>Blue or white icon:</i> Bluetooth is on and paired with a device.

*Gray icon:* Bluetooth is on. If iPhone is paired with a device, the device may be out of range or turned off.

*No icon:* Bluetooth is turned off.

See [Bluetooth devices](#).

### Bluetooth battery

Shows the battery level of a paired Bluetooth device.

### Battery

*Gray icon:* Shows the iPhone battery level or charging status. See [Charge and monitor the battery](#).

*Yellow icon:* Low Power Mode is on. See [Low Power Mode](#).

## Accessories included with iPhone

The following accessories are included with iPhone:

**Apple headset.** EarPods with Lightning Connector (included with iPhone 7 and iPhone 7 Plus) or EarPods with 3.5 mm Headphone Plug (included with earlier iPhone models). Use the headset to listen to music and videos, and make phone calls. See [Use your Apple EarPods](#).

**Lightning to Headphone Jack Adapter.** Use the Lightning to Headphone Jack Adapter to connect headphones or other devices that have a 3.5 mm headphone plug.

**Connecting cable.** Use the Lightning to USB Cable to connect iPhone to your computer to sync and charge.

**Apple USB power adapter.** Use with the Lightning to USB Cable to charge the iPhone battery.

**SIM eject tool.** Use to eject the SIM card tray. (Not included in all areas.) See [Sim Card](#).

## Gestures

A few simple gestures—tap, drag, swipe, and pinch—are all you need to use iPhone and its apps.

## 3D Touch

3D Touch gives you an additional way to interact with iPhone. On supported devices, you can press the display to see previews, access useful shortcuts, and more.

3D Touch is supported on:

- iPhone 7
- iPhone 7 Plus
- iPhone 6s
- iPhone 6s Plus

For example, press a notification on the Lock screen to respond to it. In Mail, press a message in the mailbox list for a peek at the message contents, then slide up to see a list of actions. Or press a little deeper to pop the message open. In Photos, press an image to peek at it, then swipe up to share or copy it; press a little deeper to pop the image to full screen. In this document, look for other examples of 3D Touch, which are marked with .

You can use 3D Touch on the Home screen—press an app icon to see Quick Actions menus. For example, you can press the Camera icon on the Home screen, then choose Take Selfie. Quick Actions work in Control Center too. For example, press Flashlight, then choose bright, medium, or low light.

With 3D Touch you can vary the pressure when you draw to change the quality of your lines in some apps. For example, [press as you draw in Notes](#) to make a line darker. You can also use 3D Touch to [turn your keyboard into a trackpad](#) and select text when typing.

**Change 3D Touch sensitivity.** Go to Settings > General > Accessibility > 3D Touch, then set 3D Touch sensitivity to Light, Medium, or Firm.

## Apple ID

Your Apple ID is the account you use for just about everything you do with Apple—including storing your content in iCloud; downloading apps from the App Store; streaming from Apple Music; buying music, movies, and TV shows from the iTunes Store; and purchasing books from the iBooks Store.

If you already have an Apple ID, use it when you first set up iPhone, and whenever you need to sign in to use an Apple service. If you don't have an Apple ID, you can create one anyplace you're asked to sign in—for example, the iTunes Store, the App Store, and the iBooks Store. It's best to have only one Apple ID.

For more information, go to the [Apple ID account website](#).

---

# Set up iPhone

## Setup assistant

**WARNING:** To avoid injury, read [Important safety information](#) before using iPhone.

You can set up iPhone over a Wi-Fi network, or over your carrier's cellular network (not available in all areas). You can also set up iPhone by [connecting it to a computer](#) and using iTunes.

**Note:** If you're using iPhone with a company, school, or other organization, see [iPhone in the enterprise](#).

**Set up iPhone.** Turn on iPhone, then follow the setup assistant.

To make setup as smooth as possible, have this information at hand:

- The name and password (if applicable) of your [Wi-Fi network](#)
- The email address and password for your [Apple ID](#)

If you don't have an Apple ID, you can create one during setup.

- Your credit or debit card account information, if you want to add a card to Apple Pay during setup

Apple Pay is compatible with iPhone 6 and later.

- A backup of your data if you're upgrading from another device (see [Back up iPhone with iCloud Backup](#) and [Back up iPhone with iTunes](#))

You can also restore iPhone from an iCloud or iTunes backup or [migrate from an Android device](#) during setup.

**Note:** Find My iPhone—a feature you use to locate your iPhone—is turned on automatically when you sign in with your Apple ID during iPhone setup. See [Find My iPhone](#). Find My iPhone includes a feature called Activation Lock that prevents anyone else from activating and using your iPhone, even if it's completely erased. Before you [sell or give away your device](#), you should erase and unlock iPhone so that the next owner can activate it.

Some carriers let you unlock iPhone for use with their network. To see if your carrier offers this option, see [Wireless carrier support and features for iPhone in the United States and Canada](#). Contact your carrier for authorization and setup information. You need to connect iPhone to iTunes to complete the process. Additional fees may apply. For more information, see the Apple Support article [How to unlock your iPhone for use with another carrier](#).

## Move to iOS from Android

During setup you can migrate your content automatically and securely from your Android phone.

**Download the Move to iOS app.** On your device running Android version 4.0 or later, see the Apple Support article [Move from Android to iOS](#) and download the Move to iOS app.

**Move your data from Android during setup.** When setting up iPhone, on the Apps & Data screen, select Move Data from Android, turn on Wi-Fi on the Android device, open the Move to iOS app on the Android device, then follow the steps.

**Note:** You can use the Move to iOS app only when you first set up iPhone. If you've already finished setup and want to use Move to iOS, you must erase your iOS device and start over, or move your data manually. See the Apple Support article [Move content manually from your Android device to your iOS device](#).

## The Settings app

The Settings app is on the Home screen. You use it to configure many iPhone settings. For example, tap Settings, then tap Wallpaper (Settings > Wallpaper) to choose a different background for the Lock screen and Home screen. Among other things, you can use Settings to:

- Change your password
- Select sounds that play during certain events (when you receive an email message, for example)
- Configure privacy controls
- Find out how much free storage remains on iPhone
- Enable restrictions

**Search for a setting.** Open Settings, swipe down to show the Settings field, then enter a term—*alert* or *password*, for example.

## Set up other mail, contacts, and calendar accounts

iPhone works with Microsoft Exchange, and many of the most popular Internet-based mail, contacts, and calendar services.

For information about setting up a Microsoft Exchange account in a corporate environment, see the Apple Support article [Set up Exchange ActiveSync on your iPhone, iPad, or iPod touch](#).

**Set up an account.** Go to Settings, choose a setting to configure (Mail, Contacts, or Calendar), tap Accounts, then tap Add Account.

You can add contacts using an LDAP or CardDAV account, if your company or organization supports it. See [Add contact accounts](#).

You can add calendars using a CalDAV calendar account, and you can subscribe to iCalendar (.ics) calendars or import them from Mail. See [Use multiple calendars](#).

## Date and time

The date and time are usually set for you based on your location—take a look at the Lock screen to see if they're correct.

**Set whether iPhone updates the date and time automatically.** Go to Settings > General > Date & Time, then turn Set Automatically on or off. If you set iPhone to update the time automatically, it gets the correct time over the cellular network and updates it for the time zone you're in. Some carriers don't support network time, so in some areas iPhone may not be able to automatically determine the local time.

**Set the date and time manually.** Go to Settings > General > Date & Time, then turn off Set Automatically.

**Set whether iPhone shows 24-hour time or 12-hour time.** Go to Settings > General > Date & Time, then turn 24-Hour Time on or off (it may not be available in all areas).

## Language and region

Go to Settings > General > Language & Region to set:

- The language for iPhone

- The preferred language order for apps and websites
- The region format
- The calendar format
- Advanced settings for dates, times, and numbers

To add a keyboard for another language, go to Settings > General > Keyboard > Keyboards. For more information, see [Use international keyboards](#).

## Connect to the Internet

iPhone connects to the Internet whenever necessary, [using a Wi-Fi connection](#) (if available) or your carrier's cellular network.

When an app needs to use the Internet, iPhone does the following, in order:

- Connects over the most recently used available Wi-Fi network
- Shows a list of Wi-Fi networks in range and connects using the one you choose
- Connects over the cellular data network, if available

**Note:** If a Wi-Fi connection to the Internet isn't available, apps and services may transfer data over your carrier's cellular network, which may result in additional fees. Contact your carrier for information about your cellular data plan rates. To manage cellular data usage, see [Cellular data settings](#).

## Connect to Wi-Fi

If  appears at the top of the screen, you're connected to a Wi-Fi network. iPhone reconnects when you return to the same location.

**Configure Wi-Fi.** Go to Settings > Wi-Fi, then turn Wi-Fi on or off. (You can also turn Wi-Fi  on or off in Control Center.)

- *Choose a network:* Tap one of the listed networks, then enter the password, if required.
- *Ask to join networks:* Turn on Ask to Join Networks to be notified when a Wi-Fi network is available. Otherwise, you must manually join a network when a previously used network isn't available.

- *Join a closed Wi-Fi network:* Tap Other, then enter the name of the closed network. You need to know the network name, security type, and password.
- *Adjust the settings for a Wi-Fi network:* Tap ⓘ next to a network. You can set an HTTP proxy, define static network settings, turn on BootP, or renew the settings provided by a DHCP server.

**Note:** Some networks may offer different information.

- *Forget a network:* Tap ⓘ next to a network you've joined before, then tap Forget This Network.

**Set up your own Wi-Fi network.** If you have an unconfigured AirPort base station turned on and within range, you can use iPhone to set it up. Go to Settings > Wi-Fi, then look for "Set up an AirPort base station." Tap your base station, and Setup Assistant does the rest.

**Manage an AirPort network.** If iPhone is connected to an AirPort base station, go to Settings > Wi-Fi, tap ⓘ next to the network name, then tap Manage This Network. If you haven't yet downloaded AirPort Utility, tap OK to open the App Store, then download it.

## Connect iPhone to your computer

By connecting iPhone to your computer you can [sync content from your computer using iTunes](#) and [back up iPhone with iTunes](#).

To use iPhone with your computer, you need:

- A Mac with a USB 2.0 or 3.0 port, or a PC with a USB 2.0 port, and one of the following operating systems:
  - OS X v10.9 or later with iTunes 12.5 or later
  - Windows 7 or later with iTunes 12.5 or later
- iTunes, available from the [iTunes download website](#)

**Connect iPhone to your computer.** Use the included Lightning to USB Cable.

Unless iPhone is actively syncing with your computer, you can disconnect it at any time. Look at the top of the iTunes screen on your computer or on iPhone to see if syncing is in progress. If you disconnect iPhone while it's syncing, some data may not get synced until the next time you connect iPhone to your computer.

## Manage content on your iOS devices

You can transfer information and files between your iOS devices and computers, using iCloud or iTunes.

- *iCloud* stores your photos and videos, documents, music, calendars, contacts, and more. It all gets pushed wirelessly to your other iOS devices and computers, keeping everything up to date. See [iCloud](#).
- *iTunes* syncs music, videos, photos, and more between your computer and iPhone. Changes you make on one device are copied to the other when you sync. You can also use iTunes to sync files and documents. See [Sync with iTunes](#).

You can use iCloud or iTunes, or both, depending on your needs. For example, you can use iCloud to automatically keep your contacts and calendars up to date on all your devices, and use iTunes to sync music from your computer to iPhone.

You can also manually manage content from iTunes in the Summary pane. To add songs and videos, choose a song, video, or playlist from your iTunes library, then drag it to iPhone in the iTunes sidebar. This is useful if your iTunes library contains more items than can fit on iPhone. See the Apple Support article [Sync your iPhone, iPad, or iPod touch with iTunes using USB](#).

**Note:** If you have iCloud Music Library turned on, you can manually manage only video.

## iCloud

Safely store your photos and videos, documents, music, calendars, contacts, News favorites and saved stories, and more in iCloud so they're available even if you lose your iPhone.

**Set up iCloud.** Go to Settings > iCloud. Create an Apple ID if you don't have one, or use your existing one.

Content stored in iCloud is pushed wirelessly to your other devices where you're signed in to iCloud with the same Apple ID.

iCloud is available on devices with iOS 5 or later, on Mac computers with OS X v10.7.5 or later, and on PCs with iCloud for Windows 5 (Windows 7 or later is required). You can also sign in to [iCloud.com](http://iCloud.com) from any Mac or PC to access your iCloud information and features like Photos, Find My iPhone, Mail, Calendar, Contacts, iWork for iCloud, and more.

**Note:** iCloud may not be available in all areas, and iCloud features may vary by area. For more information, go to the [iCloud website](http://iCloud.com).

With iCloud you can:

- *Access your purchases:* Automatically get iTunes purchases on all your devices set up with iCloud, or download previous purchases from the iTunes Store, App Store, and iBooks Store for free, anytime.
- *Access your music:* With an Apple Music membership, any music you added from Apple Music is accessible from iPhone. With an iTunes Match subscription, music from your library, including music you imported from CDs or purchased somewhere other than the iTunes Store, can also be stored in iCloud and played on demand.

- *Store your photos and videos:* Use [iCloud Photo Library](#) to store all your photos and videos in iCloud. You can access them from any device with iOS 8.1 or later, a Mac with OS X v10.10.3 or later, a PC with iCloud for Windows 5, and on [iCloud.com](#) when you sign in with the same Apple ID. Use [iCloud Photo Sharing](#) to share photos and videos with only the people you choose, and let them add photos, videos, and comments.

**Note:** If you use iCloud Photo Library to store your photos and videos, you can't use iTunes to sync them with your computer.

- *Share with your family:* With [Family Sharing](#), up to six family members can share their purchases from the iTunes Store, App Store, and iBooks Store. With an optional Apple Music family membership, all family members can use Apple Music. Pay for family purchases with the same credit card and approve kids' spending right from a parent's device. Plus, share photos, a family calendar, and more.
- *Store and retrieve your documents:* Store PDFs in iCloud and access them in iBooks from your iPhone, iPad, iPod touch, Mac, or PC. With [iCloud Drive](#) you can safely store your presentations, spreadsheets, images, and other documents in iCloud, and access them from your iPhone, iPad, iPod touch, Mac, or PC. iCloud Drive is available on any device with iOS 8 or later and on any Mac with OS X v10.10.0 or later. If you're using an earlier version of iOS, see [Set up iCloud Drive](#).
- *Synchronize mail, contacts, calendars, and more:* Keep your mail, contacts, calendars, notes, and reminders up to date across all your devices.

**Note:** If you use iCloud to store your contacts and calendars, you can't use iTunes to sync them with your computer.

- *Keep tabs on your browsing:* With Safari tabs you can see the tabs you have open on your other iOS devices and Mac computers. See [Browse the web](#).
- *Keep News up to date across all your devices:* Access your favorite News sources and topics as well as the saved stories on all your devices with iOS 9 or later that are set up with iCloud. (News isn't available in all areas). See [Get started with News](#).
- *Back up your data:* Back up iPhone to iCloud automatically when iPhone is connected to power and Wi-Fi. iCloud data and backups sent over the Internet are encrypted. See [Back up iPhone with iCloud Backup](#).
- *Find your iPhone:* Locate your missing iPhone on a map, lock it remotely, suspend or remove the ability to pay using Apple Pay, play a sound, display a message, or erase all the data on it. Find My iPhone also includes Activation Lock, which requires your

Apple ID and password to disable Find My iPhone, erase iPhone, or reactivate your device. See [Find My iPhone](#).

- *Find your friends:* Use [Find My Friends](#) to share your location with friends and family.
- *Store and access your passwords and credit card information:* [iCloud Keychain](#) keeps passwords and credit card information up to date across all your designated devices.

With iCloud, you get a free email account and 5 GB of storage for your mail, documents, photos and videos, and backups. Your purchased music, apps, TV shows, and books don't count against your available storage space. You can increase your iCloud storage by choosing a plan for up to 1 TB of storage. You can purchase additional storage right from your device.

**Upgrade your iCloud storage.** Go to Settings > iCloud > Storage, then tap Change Storage Plan. For information about upgrading your iCloud storage, see [iCloud Help](#).

**View and download previous or shared purchases.** You can download purchases from the iTunes Store, App Store, and iBooks Store.

- *iTunes Store purchases:* Go to the iTunes Store, tap More, then tap Purchased. You can also access your purchased songs and videos in the Music and Videos apps. In Music, tap Library. In Videos, tap Movies or TV Shows.
- *App Store purchases:* Go to the App Store, tap Updates, then tap Purchased.
- *iBooks Store purchases:* Go to iBooks, then tap Purchased.

**Turn on Automatic Downloads for music, apps, or books.** Go to Settings > iTunes & App Store.

For more information about iCloud, go to the [iCloud website](#). For support information, go to the [iCloud Support website](#).

## Sync with iTunes

Syncing with iTunes copies information from your computer to iPhone, and vice versa. You can sync by connecting iPhone to your computer, or you can set up iTunes to wirelessly sync music, videos, photos, and more with Wi-Fi. For help syncing iPhone, open iTunes on your computer, choose Help > iTunes Help, then select "Add items to iPod, iPhone, or iPad." iTunes is available from the [iTunes website](#).

**Note:** If features such as iCloud Music Library, iCloud Photo Library, and iCloud calendar and contacts syncing are turned on, you can't use iTunes to sync their associated media and data.

**Sync using a USB cable.** [Connect iPhone to your computer](#) using the included cable, open iTunes on your computer, then click the iPhone button in the top-left of the iTunes window. Select a setting (Summary, Apps, or Music, for example) to configure it.

**Note:** If iPhone doesn't appear in iTunes, make sure you're using the latest version of iTunes, check that the cable is correctly connected, then try restarting your computer.

To learn more, see the Apple Support article [Sync your iPhone, iPad, or iPod touch with iTunes using USB](#).

**Set up wireless syncing.** Connect iPhone to your computer using the included cable, open iTunes, click the iPhone button in the top-left of the iTunes window, click Summary, then select Sync with this iPhone over Wi-Fi.

If Wi-Fi syncing is turned on, both iPhone and your computer are on and connected to the same wireless network, and iTunes is open on your computer, iPhone syncs when it's connected to a power source.

To learn more, see the Apple Support article [Sync your iPhone, iPad, or iPod touch with iTunes using Wi-Fi](#).

iTunes provides these syncing options:

- In the Music pane, you can sync your entire music library or just selected playlists, artists, albums, and genres.
- In the Movies, TV Shows, Podcasts, and Books panes, you can choose to sync all the media they contain, or just the media you choose.
- In the Photos pane, you can sync photos and videos from a supported app or a folder on your computer.
- In the Summary pane, you can set iTunes to automatically sync iPhone when it's attached to your computer. To temporarily prevent syncing when you attach the device, hold down Command and Option (Mac) or Shift and Control (PC) until you see iPhone appear in the iTunes window.

## Back up iPhone with iCloud Backup

When you first sign in to iCloud, iCloud Backup turns on automatically. iCloud backs up iPhone daily over Wi-Fi, when it's connected to a power source and is locked. (To lock iPhone, press the [Sleep/Wake button](#). iPhone also locks automatically if you don't touch the screen for a minute or so.)

iCloud backups are encrypted automatically so that your data is protected from unauthorized access both while it's transmitted to your devices and when it's stored in iCloud. Purchased content, iCloud Photo Sharing, and My Photo Stream content don't count against your 5 GB of free iCloud storage.

Music that wasn't purchased in iTunes isn't backed up in iCloud, but it can be restored by syncing with iTunes on your computer. See [Sync with iTunes](#).

When you back up using iCloud, you can't simultaneously use iTunes to automatically back up iPhone to your computer. However, you can use iTunes to manually back up iPhone to your computer. See [Back up iPhone with iTunes](#).

iCloud backups don't include:

- Data that's already stored in iCloud, such as contacts, calendars, notes, iCloud Shared Streams, My Photo Stream, iCloud Photo Library, and the contents of iCloud Drive
- Data stored in other cloud services, such as Gmail and Exchange mail
- Apple Pay information and settings
- Touch ID settings
- Content you didn't get directly from the iTunes Store, App Store, or iBooks Store, such as imported MP3s, videos, or CDs
- Content from the iTunes Store, App Store, or iBooks Store (if it's still available, you can tap to redownload content you purchased)

**Stop or resume iCloud backups.** Go to Settings > iCloud > Backup, then turn iCloud Backup off or on.

**Back up immediately on iCloud.** Go to Settings > iCloud > Backup, then tap Back Up Now.

**View or remove iCloud backups.** Go to Settings > iCloud > Storage > Manage Storage.

**Important:** Backups for music, movies, or TV show purchases aren't available in all countries. Previous purchases may not be restored from iCloud Backup if they're no longer in the iTunes Store, App Store, or iBooks Store.

If you replace your iPhone, you can use its backup to transfer your information to a new device. See [Restore or reset using iTunes](#).

For more information, see the Apple Support article [About backups in iCloud and iTunes](#).

## Back up iPhone with iTunes

**Connect to iTunes and back up.** Open iTunes on your computer, then [connect the device to your computer](#). Click the iPhone button, then click Summary in the sidebar. To create a manual backup, click Back Up Now. To turn on automatic iTunes backups, click "This computer." iTunes automatically backs up iPhone when you connect it to your computer.

iTunes backups don't include:

- Content from the iTunes Store and App Store, or PDFs downloaded directly to iBooks
- Content synced from iTunes, such as imported MP3s or CDs, videos, books, and photos (see [Sync with iTunes](#))
- Photos already stored in the cloud, such as in iCloud Shared Streams, My Photo Stream, and iCloud Photo Library
- Touch ID settings
- Apple Pay information and settings
- Activity, Health, and Keychain data

To back up this content, select "Encrypt local backup" in iTunes.

**View or remove iTunes backups.** Open iTunes on your computer, choose iTunes > Preferences, then click Devices. Encrypted backups have a lock icon in the list of backups.

**Encrypt iPhone backup.** In the Summary pane, select "Encrypt iPhone backup" if you want to encrypt the information stored on your computer when iTunes makes a backup. Encrypted backups are indicated by a lock icon , and a password is required to restore

the backup. If you don't select this option, other passwords (such as those for mail accounts) aren't included in the backup, and you have to reenter them if you use the backup to restore iPhone.

If you replace your iPhone, you can use its backup to transfer your information to a new device. See [Restore iPhone](#).

For more information, see the Apple Support article [About backups in iCloud and iTunes](#).

## iPhone in the enterprise

To use iPhone with your work accounts, you need to know the settings your organization requires. If you received your iPhone from your organization, the settings and apps you need might already be installed. If you're using your own iPhone, your system administrator may provide you with settings to enter, or have you connect to a mobile device management server that installs the required settings and apps for you.

You may be asked to install a configuration profile, which configures iPhone for you, and may define some settings that you can't change. For example, your organization might turn on Auto-Lock and require you to set a passcode to protect the information in the accounts you access. You can see your profiles in Settings > General > Profiles & Device Management. When you delete a profile, the settings and accounts, and everything else associated with the profile, are also removed.

If your organization wants you to have certain apps, it might provide you with redemption codes to use in the App Store. When you download an app using a redemption code, you own the app, even though your organization purchased it for you. Your organization can also purchase App Store app licenses that the organization retains but assigns to you for a period of time. An app you receive this way is removed if the organization assigns it to someone else.

Your organization might also develop custom apps that aren't in the App Store. You install them from a webpage, or you may receive a notification from your organization asking you to install them wirelessly. These apps belong to your organization, and they may be removed or stop working if you delete a configuration profile.

If you have questions about the settings, apps, or other requirements for using iPhone in your enterprise environment, contact the system administrator at your organization. For general information about using iPhone in business, go to the [iPhone in Business website](#).

## View this user guide on iPhone

**View the user guide in Safari.** Tap , then tap the iPhone User Guide bookmark. (If you don't see a bookmark, go to [the iPhone User Guide](#).)

- *Add an icon for the user guide to the Home screen:* Tap , then tap Add to Home Screen.
- *View the user guide in a different language:* Tap the language link (English, for example) at the bottom of the first page, then choose a language.

**View the user guide in iBooks.** Open iBooks, then search for “iPhone user” in the iBooks Store.

For more information about iBooks, see [Get books](#).

## Tips for using iOS 10

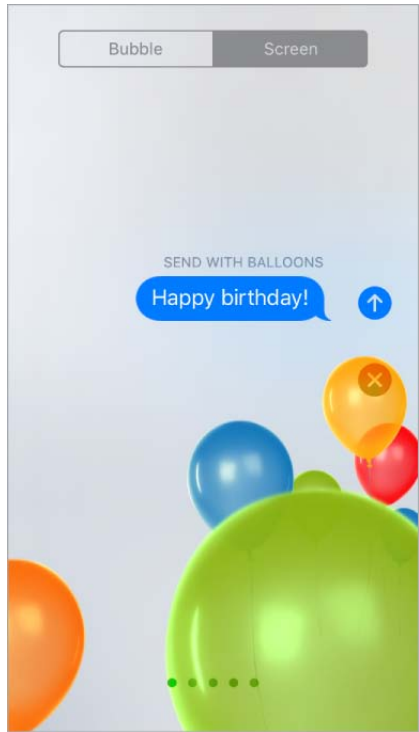

The Tips app helps you get the most from iPhone.

**Get Tips.** Open the Tips app (inside the Extras folder). New tips are added frequently.

**Get notified when new tips arrive.** Go to Settings > Notifications > Tips.

# What's new in iOS 10

**Expressive messaging.** Enhance your messages with bubble effects, invisible ink, full-screen effects, handwritten messages, Digital Touch, larger emoji, iMessage apps (including stickers), and more. See [Messages at a glance](#).

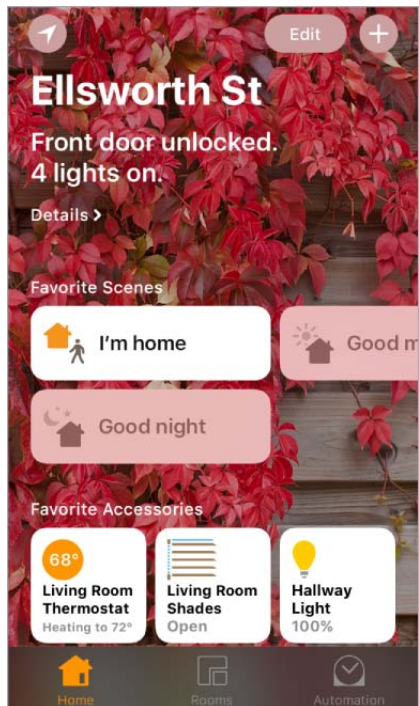

**Broader Siri capabilities.** Siri works with many of your favorite apps from the App Store. For example, you can use Siri with an app to book a ride or send money to a friend in need. See [Siri and apps](#).

**More from Maps.** Reserve a table at your favorite restaurant, order a ridesharing vehicle for a cross-town trip, search for places along your route, and more. See [Find places](#).

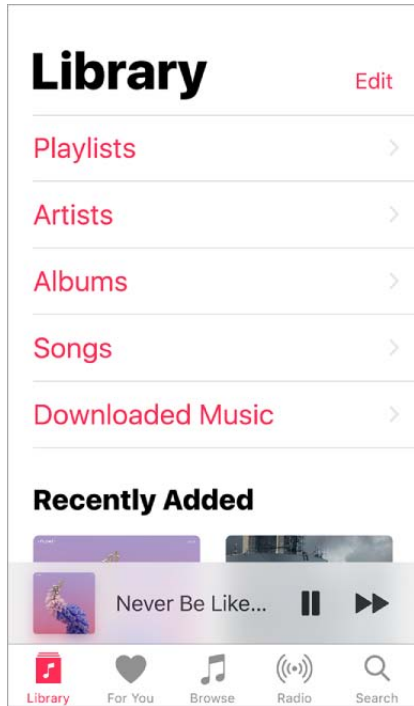

**Remember meaningful moments.** Memories, a new feature of Photos, takes the photos and videos of special moments, people, and places, and turns them into shareable Memory movies. See [Memories](#).

**Control your home.** The Home app lets you securely control Works with Apple HomeKit accessories, such as lights, locks, thermostats, smart plugs, and more, even when you're away from home. You can create automations that, for example, turn on the lights at sunset or unlock your door and dial up the heat when you return home. See [Home at a glance](#).

**Quickly find music.** Music is now simpler. Enjoy the fresh design that provides greater clarity and simplicity to every aspect of Apple Music. Plus, sing along with your favorite songs with the new lyrics feature. See [Apple Music](#).

**More ways to read News.** Easily find interesting stories with the all-new For You design, subscribe to your favorite publications, and get notifications about the day's most important stories, right on your Lock screen. See [Get started with News](#).

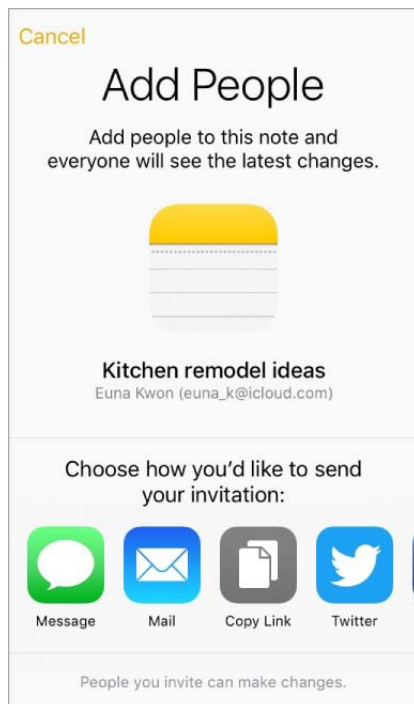

**A more powerful Lock screen.** Interact with notifications and, with an Internet connection, catch up on news, check your stocks, and get a weather report—all without unlocking iPhone. See [Today View](#) and [Notifications](#).

**Become an organ donor.** A single organ donor can save as many as eight lives. In the Health app, you can register to be an organ, eye, or tissue donor with Donate Life America. See [Register as an organ, eye, or tissue donor](#).

**Read your voicemail.** With Voicemail transcription, you can quickly scan through a long voicemail message to find just the information you need. See [Visual voicemail](#).

**Apple Pay on the web.** Shopping online is now faster, safer, and more private than ever. Just pick out the things you want, then pay in your browser. See [Pay within an app or on a website](#).

**Noteworthy collaboration.** Invite people to view and make edits to notes in your iCloud account and everyone will see the latest changes. See [Collaborate in Notes](#).

**Type in two languages.** Add a keyboard in another language, and you can type in two languages at the same time without having to switch between keyboards. See [Add or change keyboards](#).

# Basics

## Use apps

### Home screen

Tap an app to open it.

**3D Touch.** Press an app to see a Quick Actions menu. See [3D Touch](#).

Press the Home button anytime to return to the Home screen. Swipe left or right to see additional Home screens.

Some apps may include a badge on their Home screen icon, to let you know how many new items await—for example, the number of new email messages. If there's a problem—such as a message that couldn't be sent—an exclamation mark ⓘ appears on the badge. On a folder, a numbered badge indicates the total number of notifications for all the apps inside.

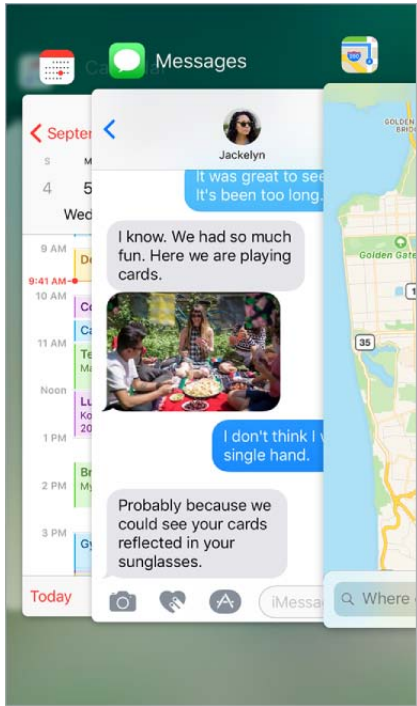

## Switch between apps

You can easily switch between the apps you're using.

**View open apps.** Double-click the Home button to reveal your open apps in the app switcher. Swipe left or right to see more. To switch to another app, tap it.

**3D Touch.** To view open apps, press the left edge of the screen, then swipe right to switch apps. See [3D Touch](#).

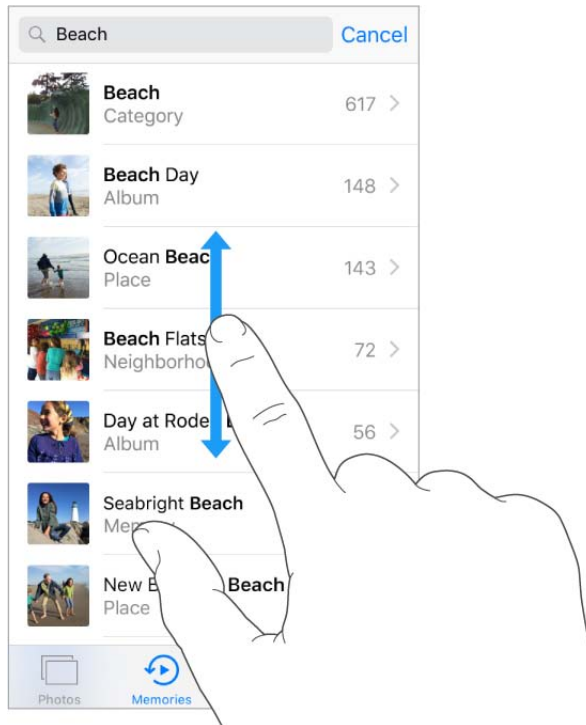

**Close an app.** If an app isn't working properly, you can force it to quit. Swipe the app up from the app switcher display. Then try opening the app again.

**Search for apps.** If you have lots of apps, you can use Search to find and open them. Swipe the center of the Home screen down to see the search field. See [Search](#).

## Look around

Drag a list up or down to see more. Swipe to scroll quickly; touch the screen to stop scrolling. Some lists have an index—tap a letter to jump ahead.

Drag a photo, map, or webpage in any direction to see more.

To quickly jump to the top of a page, tap the status bar at the top of the screen.

## Zoom in and out

Pinch open a photo, webpage, or map for a close-up—then pinch closed to zoom back out. In Photos, keep pinching to see the collection or album the photo's in.

Or double-tap a photo or webpage to zoom in, and double-tap again to zoom out. In Maps, double-tap to zoom in and tap once with two fingers to zoom out.

## Change the screen orientation

Many apps give you a different view when you rotate iPhone.

To lock the screen in portrait orientation, swipe up from the bottom edge of the screen to open Control Center, then tap .

The Portrait orientation lock icon  appears in the status bar when the screen orientation is locked.

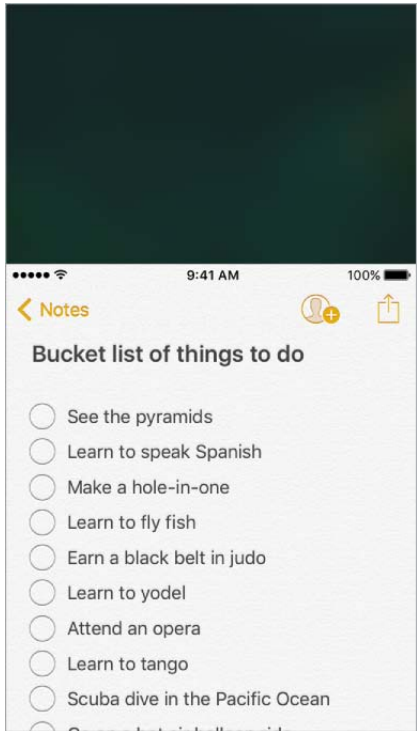

When you use iPhone 6 Plus, iPhone 6s Plus, or iPhone 7 Plus in landscape orientation, some apps have special layouts. These apps include:

- Mail
- Calendar
- Settings

**Note:** These special layouts are not available when Display Zoom is enabled.

## Reachability

If you have iPhone 6, iPhone 6 Plus, iPhone 6s, iPhone 6s Plus, iPhone 7, or iPhone 7 Plus and are using it in portrait orientation, lightly tap the Home button twice to slide the screen down so that you can reach everything with your thumb.

**Turn off Reachability.** Tap Settings > General > Accessibility, then turn off Reachability.

## Lock screen

Lift iPhone, or press the Sleep/Wake button, to see the Lock screen and quickly access the features and information you need most. You can see your most recent notifications without unlocking iPhone. You can also:

Swipe down from the top of the screen to [see all your recent notifications at once in Notification Center](#).

Swipe up from the bottom of the screen to [open Control Center](#).

Swipe right to [see Today View and get information from your favorite apps](#).

Swipe left to open Camera.

## Notifications

Notifications help you keep track of what's new. They let you know if you missed a FaceTime call, if the date of an event moved, and more. You can customize your notifications so you just see what's important to you.

**Respond when iPhone is locked.** Swipe the notification left.

**3D Touch.** Press a notification to respond to it right from the Lock screen. See [3D Touch](#).

**Open the app to respond.** Swipe the notification right.

**Respond without leaving the current app.** Pull the notification down when it appears at the top of your screen.

**Note:** This feature works with text and email messages, calendar invitations, and more.

**Open Notification Center to view all your notifications at once.** Swipe down from the top edge of any screen.

**3D Touch.** Press a notification to respond to it from Notification Center. See [3D Touch](#).

**Clear a notification.** Swipe the notification left. To clear a group of notifications, tap .

**3D Touch.** Press  to clear all notifications. See [3D Touch](#).

**Set notification preferences.** Go to Settings > Notifications. Tap an app to set its notification options. For example, choose whether to allow notifications from a specific app or turn the sound on a notification on or off.

**Choose whether to show notifications on the Lock screen.** Go to Settings > Touch ID & Passcode (iPhone 5s and later) or Settings > Passcode (other models), then choose whether to allow access when locked.

**Get government alerts.** In some areas, you can turn on alerts in the Government Alerts list. Go to Settings > Notifications.

For example, in the United States, iPhone can receive presidential alerts, and you can turn AMBER and Emergency Alerts (which includes both Severe and Extreme Imminent Threat alerts) on or off (they're on by default). In Japan, iPhone can receive Emergency Earthquake Alerts from the Japan Meteorological Agency. Government alerts vary by carrier and iPhone model, and may not work under all conditions.

**Silence all your notifications.** Go to Settings > Do Not Disturb. You can also use Siri to turn Do Not Disturb on or off. Say "Turn on Do Not Disturb" or "Turn off Do Not Disturb."

**Close Notification Center.** Swipe up, or press the Home button.

## Today View

Get information from your favorite apps, at a glance. Choose from Maps Nearby, Calendar, Notes, News, Reminders, and more.

**Open Today View.** Swipe right from the left edge of the Home screen or Lock screen.

**Add and organize Today widgets.** To choose which widgets appear, tap Edit at the bottom of the screen. Tap + or — to add or remove widgets. To arrange the order of your information, touch ≡, then drag to a new position.

**Note:** To include traffic conditions for your commute in Today, make sure Frequent Locations is turned on in Settings > Privacy > Location Services > System Services > Frequent Locations.

## Control Center

Control Center gives you instant access to the camera, calculator, AirPlay Mirroring, control and playback of currently playing audio, and other handy features. You can also adjust the brightness, lock the screen in portrait orientation, turn wireless services on or off, and turn on AirDrop.

**Open Control Center.** Swipe up from the bottom edge of any screen (even the Lock screen).

**3D Touch.** Press the Flashlight, Timer, or Camera to view a list of quick actions. See [3D Touch](#).

**Control audio.** Swipe Control Center left to quickly reach audio controls.

Change audio output.

If you set up your iPhone with Bluetooth speakers, headphones, or another device, tap  to switch the output. For information about setting up iPhone with devices using Bluetooth, see [Bluetooth devices](#).

**Open the currently playing audio app.** Tap the song title.

**Control home accessories.** Swipe Control Center right to reach accessory controls (if you've [set up accessories in the Home app](#)).

**Close Control Center.** Swipe down, tap the top of the screen, or press the Home button.

**Turn off access to Control Center in apps or on the Lock screen.** Go to Settings > Control Center.

## Search

You can search iPhone, the Internet, and apps for useful information including:

- Sports scores and schedules
- Weather forecasts
- Stock prices
- Quick conversions
- Calculations
- Places nearby
- Media, including music, TV shows, movies, and web videos
- Websites
- Content in apps (for supporting apps)

Siri provides more information even before you start to type. Siri suggests:

- Relevant people
- Suggested apps
- Places nearby
- Items in the news

**Search with iPhone.** Swipe down from the middle of the Home screen to show Search. Tap an item to get more information, or tap the search field. Results occur as you type; to hide the keyboard and see more results on the screen, tap Search. Tap an item in the list to open it.

**Choose what to search.** Go to Settings > General > Spotlight Search, then tap to deselect apps or content.

**Turn off Siri Suggestions and Suggestions in Search.** Go to Settings > General > Spotlight Search.

**Turn off Location Services for Spotlight Suggestions.** Go to Settings > Privacy > Location Services. Tap System Services, then turn off Location-Based Suggestions.

**Search in apps.** Many apps include a search field where you can type to find something within the app. For example, in the Maps app, you can search for a specific location.

---

# Siri

## Make requests

Siri lets you speak to your iPhone to send messages, schedule meetings, place phone calls, and much more. Siri understands natural speech, so you don't have to learn special commands or keywords. Ask Siri anything, from "set the timer for 3 minutes" to "what movies are showing tonight?" Open apps, and turn features like Airplane Mode, Bluetooth, Do Not Disturb, and VoiceOver on or off. Siri is great for keeping you updated with the latest sports info, helping you decide on a restaurant, and searching the iTunes Store or App Store.

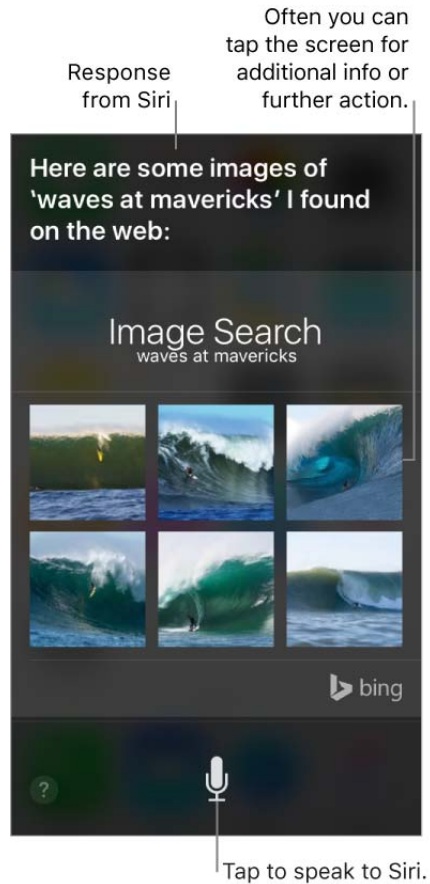

**Note:** To use Siri, iPhone must be connected to the Internet. See [Connect to the Internet](#). Cellular charges may apply.

**Summon Siri.** Press and hold the Home button, release the button, then make your request. Or, instead of waiting for Siri to notice that you've stopped talking, continue to hold down the Home button while you speak, then release it when you finish.

If you're using a headset, you can use the center or call button in place of the Home button.

**Hey Siri.** You can use Siri without pressing the Home button. Just say "Hey Siri," then make your request. (For some models, Hey Siri is only recognized when iPhone is connected to a power source.)

To turn Hey Siri on or off, and to identify if your device must be connected to a power source to use it, go to Settings > Siri > Allow "Hey Siri".

**Get Siri hints.** Ask Siri “what can you do,” or tap .

The onscreen response from Siri often includes information or images that you can tap for additional detail, or to perform some other action.

**Change the voice gender for Siri.** Go to Settings > Siri > Siri Voice (may not be available in all areas).

**Adjust the volume for Siri.** Use the volume buttons while you’re interacting with Siri. For voice feedback options, go to Settings > Siri > Voice Feedback.

**Prevent access to Siri when iPhone is locked.** Go to Settings > Touch ID & Passcode (iPhone models with Touch ID) or Settings > Passcode (other models). You can also disable Siri by turning on restrictions. See [Set Restrictions](#).

## Tell Siri about yourself

If you tell Siri about yourself—including things like your home and work addresses, and your relationships—you can get personalized service like, “send a message to my wife.”

**Tell Siri who you are.** Fill out your info card in Contacts, then go to Settings > Siri > My Info and tap your name.

To let Siri know about a relationship, say something like “Emily Parker is my wife” or “Ailish Kimber is my mom.”

**Note:** Siri uses Location Services when your requests require knowing your location. See [Location Services](#).

## Siri and apps

Siri works with many of the apps on iPhone, including Phone, Messages, Maps, Clock, Calendar, and more. For example, you can say things like:

“Call Mom at home”

“Do I have any new texts from Rick?”

“I’m running low on gas”

“Set an alarm for 8 a.m.”

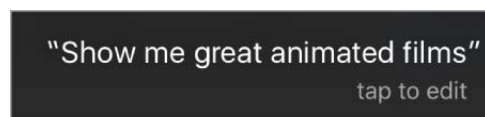

To get personalized service for requests like “FaceTime Mom,” tell Siri about yourself and your relationships. See [Tell Siri about yourself](#).

More examples of how you can use Siri with apps appear throughout this guide.

**Using Siri with third-party apps.** Some apps from the App Store also support Siri. These include apps that let you book a ride, send a message, search photos, send payments, place calls, and track your workouts. Look for apps that work with Siri in the App Store.

## Make corrections

If Siri doesn’t get something right, you can tap to edit your request.

Or tap  again, then clarify your request verbally.

**Want to cancel that last command?** Say “cancel,” tap the Siri icon, or press the Home button.

**Want to change a message before sending it?** Say “Change it.”

## Siri Eyes Free

With Siri Eyes Free, you can use iPhone features in your car without looking at or touching iPhone—you can control it completely by speaking. To talk with Siri, press and hold the voice command button on your steering wheel until you hear the Siri tone. You can ask Siri to call people, select and play music, hear and compose text messages, get directions, read your notifications, find calendar information, add reminders, and more. Siri Eyes Free is available on select automobiles.

**WARNING:** For important information about avoiding distractions that could lead to dangerous situations, see [Important safety information](#).

**Use Siri Eyes Free.** Connect iPhone to your car using Bluetooth. Refer to the user guide that came with your car.

For more information about using Siri in your car, see [About CarPlay](#).

## Enter text

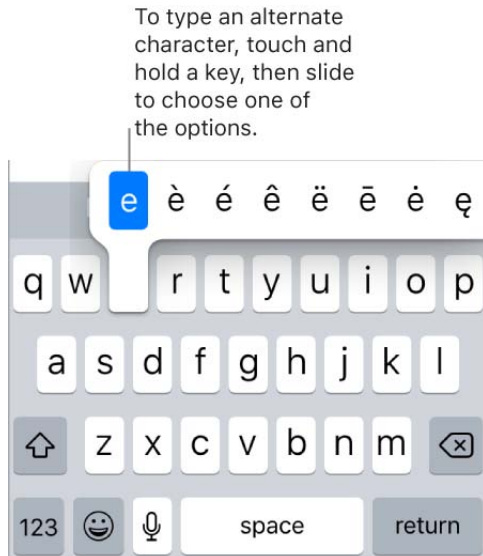

### Type and edit text

Tap a text field to see the onscreen keyboard, then tap letters to type. If you touch the wrong key, you can slide your finger to the correct key. The letter isn't entered until you release your finger from the key.

Tap Shift to type uppercase, or touch the Shift key and slide to a letter. Double-tap Shift for caps lock. To enter numbers, punctuation, or symbols, tap the Number key 123 or the Symbol key #+=. To quickly end a sentence with a period and a space, just double-tap the space bar.

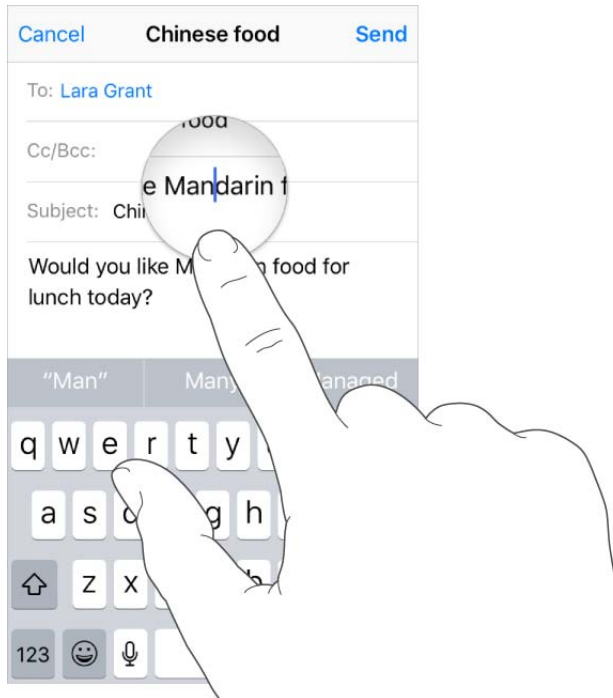

If you see a word underlined in red, tap it to see suggested corrections. If the word you want doesn't appear, type the correction.

**Set options for typing or add keyboards.** Go to Settings > General > Keyboard.

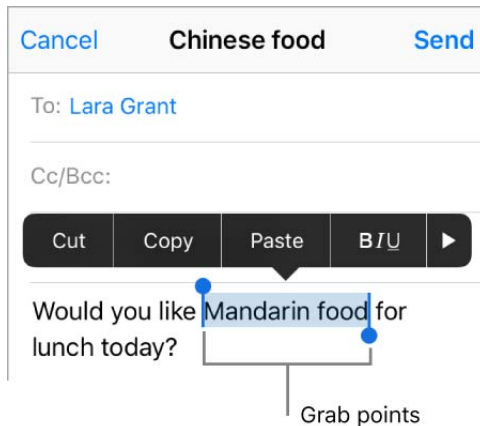

The onscreen keyboard for iPhone 6, iPhone 6 Plus, iPhone 6s, iPhone 6s Plus, iPhone 7, and iPhone 7 Plus includes additional keys you may find useful. You can see these keys when you hold iPhone in landscape orientation.

You can also use an Apple Wireless Keyboard to enter text. See [Use an Apple Wireless Keyboard](#). To dictate instead of typing, see [Dictate](#).

**Revise text.** Touch and hold the text to show the magnifying glass, then drag to position the insertion point.

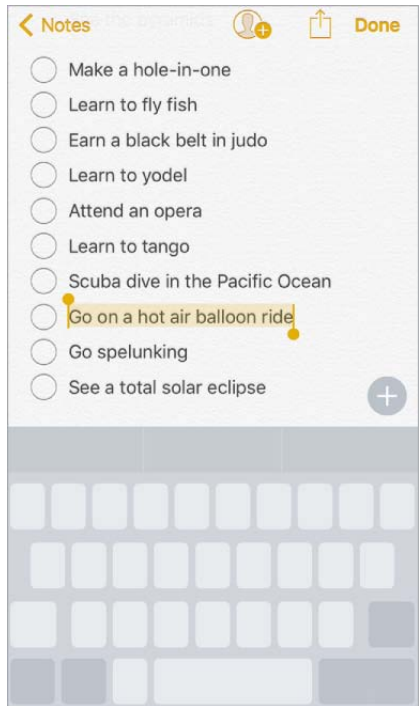

**Select text.** Tap the insertion point to display the selection options. Or double-tap a word to select it. Drag the grab points to select more or less text. In read-only documents, such as webpages, touch and hold to select a word.

You can cut, copy, or paste over selected text. With Universal Clipboard, you can also [cut or copy something on one Apple device, and paste it on another](#).

With some apps, you can also get bold, italic, or underlined text (tap B/I/U); see suggestions in Look Up; or have iPhone suggest an alternative. Tap ► to see all the options. If you choose Look Up, you see suggested information from the web and different apps. To turn off Suggestions in Look Up, go to Settings > General > Spotlight Search.

**3D Touch.** To turn your keyboard into a trackpad, press the keyboard until it turns light gray. Move the cursor by dragging around the keyboard. Without lifting your finger, press a little deeper to select a word. Press twice to select a sentence. Press three times to select a paragraph. After pressing, you can drag to select more text. See [3D Touch](#).

**Undo the last edit.** Shake iPhone, then tap Undo.

## Predictive text

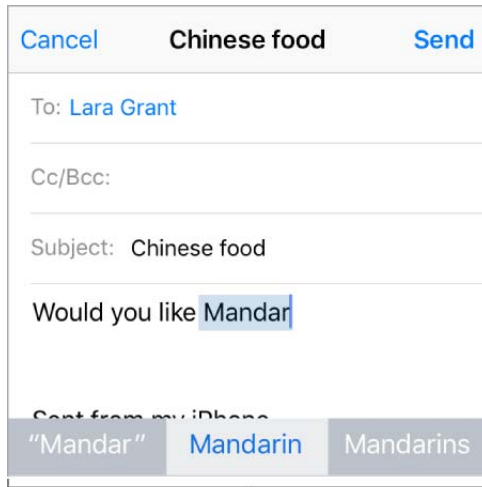

As you write, the keyboard predicts your next word, suggests emoji that could take the place of your word, and makes suggestions based on your recent activity and information from your apps (not available in all languages). For example, when you type something like:

“My number is,” your phone number appears as an option.

“I’m available at,” the free time in your calendar pops up as an option.

“I’m at,” your current location appears as an option when you’re typing in Messages.

Tap a word to choose it, or accept a highlighted prediction by entering a space or punctuation. When you tap a suggested word, a space appears after the word. If you enter a comma, period, or other punctuation, the space is deleted. Reject a suggestion by tapping your original word (shown as the predictive text option with quotation marks).

Predictive text

**Turn off predictive text.** Touch and hold 😊 or 🌐, then slide to Predictive.

If you turn off predictive text, iPhone may still try to suggest corrections for misspelled words. Accept a correction by entering a space or punctuation, or by tapping return. To reject a correction, tap the “x.” If you reject the same suggestion a few times, iPhone stops suggesting it.

## Dictate

You can dictate instead of typing. Make sure Enable Dictation is turned on (in Settings > General > Keyboard) and iPhone is connected to the Internet.

**Note:** Dictation may not be available in all languages or in all areas, and features may vary. Cellular data charges may apply. See [Cellular data settings](#).

**Dictate text.** Tap 🗣️ on the onscreen keyboard or Search field, then speak. Tap Done when you finish.

Tap to begin dictation.

**Add text.** Tap 🗣️ again and continue dictating. To insert text, tap to place the insertion point first. You can also replace selected text by dictating.

**Add punctuation or format text.** Say the punctuation or format. For example, “Dear Mary comma the check is in the mail exclamation mark” becomes “Dear Mary, the check is in the mail!” Punctuation and formatting commands include:

quote ... end quote

new paragraph

new line

cap—to capitalize the next word

caps on ... caps off—to capitalize the first character of each word

all caps—to make the next word all uppercase

all caps on ... all caps off—to make the enclosed words all uppercase

no caps on ... no caps off—to make the enclosed words all lowercase

no space on ... no space off—to run a series of words together

smiley—to insert :-)

frowny—to insert :-(

winky—to insert ;-)

## Save keystrokes

A shortcut lets you enter a word or phrase by typing just a few characters. For example, type “omw” to enter “On my way!” That one’s already set up for you, but you can also add your own.

**Create a shortcut.** Go to Settings > General > Keyboard, then tap Text Replacement.

**Have a word or phrase you use and don’t want it corrected?** Create a shortcut, but leave the Shortcut field blank.

**Use iCloud to keep your personal dictionary up to date on your other devices.** Go to Settings > iCloud, then turn on iCloud Drive.

## Add or change keyboards

You can turn typing features, such as spell checking, on or off; add keyboards for writing in different languages; and change the layout of your onscreen keyboard or Apple Wireless Keyboard.

If you've added keyboards in other languages, you can type in two languages without having to switch between keyboards. Your keyboard automatically switches between the two languages you type in most often.

**Set typing features.** Go to Settings > General > Keyboard.

**Add a keyboard for another language.** Go to Settings > General > Keyboard > Keyboards > Add New Keyboard.

**Switch keyboards.** Touch and hold , then slide your finger to the name of the keyboard.

You can also tap  to switch from one keyboard to the other. Continue tapping to access other enabled keyboards.

For information about international keyboards, see [Use international keyboards](#).

**Change the keyboard layout.** Go to Settings > General > Keyboard > Keyboards, select a keyboard, then choose a layout.

## Use an Apple Wireless Keyboard

You can use an Apple Wireless Keyboard (available separately) to enter text on iPhone. The keyboard connects via Bluetooth, so you must first pair it with iPhone.

**Note:** The Apple Wireless Keyboard may not support keyboard features that are on your device. For example, you can't enable dictation with Apple Wireless Keyboard.

**Pair an Apple Wireless Keyboard with iPhone.** Turn the keyboard on. On iPhone, go to Settings > Bluetooth and turn on Bluetooth, then tap the keyboard when it appears in the Devices list.

Once it's paired, the keyboard reconnects to iPhone whenever it's in range—up to about 33 feet (10 meters). When it's connected, the onscreen keyboard doesn't appear.

**Save your batteries.** Turn off Bluetooth and the wireless keyboard when not in use. You can turn off Bluetooth  in Control Center. To turn off the keyboard, hold down the On/off switch until the green light goes off.

## Sounds and silence

You can change or turn off the sounds iPhone plays when you get a call, text, voicemail, email, tweet, Facebook post, reminder, or other event.

**Tip:** If you're not hearing or seeing incoming calls and alerts when you expect, swipe up from the bottom edge of the screen to open Control Center and see if Do Not Disturb is on.

**Set sound options.** Go to Settings > Sounds & Haptics (called *Sounds* on iPhone models other than iPhone 7 and iPhone 7 Plus) for options such as ringtones and alert tones, vibration settings and patterns, and ringer and alert volumes.

**Set vibration patterns.** Go to Settings > Sounds & Haptics (called *Sounds* on iPhone models other than iPhone 7 and iPhone 7 Plus), then choose an item from the Sounds and Vibration Patterns list. Tap Vibration to select a pattern or create your own.

If you want to temporarily silence incoming calls, alerts, and sound effects, see [Do Not Disturb](#).

## Do Not Disturb

Do Not Disturb is an easy way to silence iPhone, whether you're going to dinner or to sleep. It keeps calls and alerts from making any sounds or lighting up the screen.

**Turn on Do Not Disturb.** Swipe up from the bottom edge of the screen to open Control Center, then tap . When Do Not Disturb is on,  appears in the status bar.

**Note:** Even if Do Not Disturb is on, calls and messages from your emergency contacts in Medical ID still come through as usual, and Alarms still sound.

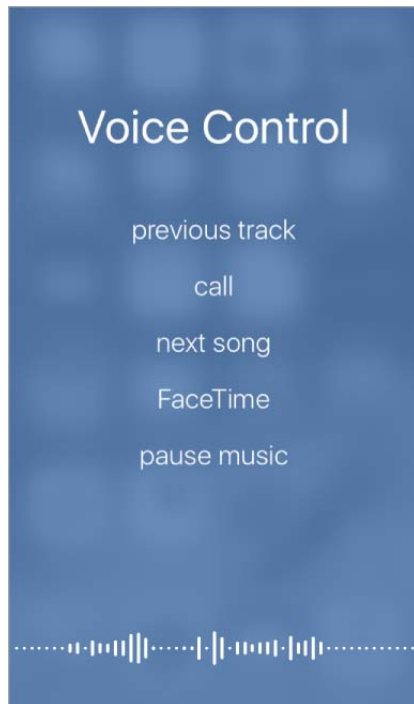

**Configure Do Not Disturb.** Go to Settings > Do Not Disturb.

**Tip:** You can schedule quiet hours, allow calls from your Favorites, and allow repeated calls to ring through for those emergency situations. You can also set whether Do Not Disturb silences iPhone only when it's locked, or even when it's unlocked.

# Voice Control

Voice Control lets you make phone calls and FaceTime calls, and control music playback, if you have Siri turned off. You may want to use Voice Control if you can't use Siri because you're not connected to the Internet. (For information about using Siri to control iPhone by voice, see [Make requests.](#))

**Note:** Voice Control and Voice Control settings aren't available when Siri is turned on.

**Use Voice Control.** Turn Siri off in Settings > General > Siri, then press and hold the Home button until the Voice Control screen appears and you hear a beep, or press and hold the center button on your headset. See [Use your Apple EarPods.](#)

For best results:

Speak clearly and naturally.

Say only Voice Control commands, names, and numbers. Pause slightly between commands.

Use full names.

**Change the language for Voice Control.** By default, Voice Control expects you to speak voice commands in the language that's set for iPhone (in Settings > General > Language & Region). To use Voice Control in another language or dialect, go to Settings > General > International > Voice Control.

Voice Control for the Music app is always on, but you can keep Voice Control from dialing when iPhone is locked. Go to Settings > Touch ID & Passcode (iPhone 5s and later) or Settings > Passcode (other models), then turn off Voice Dial.

For specific commands, see [Make a call](#) and [Siri and Voice Control](#).

## Charge and monitor the battery

iPhone has an internal, lithium-ion rechargeable battery. For more information about the battery—including tips for maximizing battery life—go to the [Apple Lithium-ion Batteries website](#).

**WARNING:** For important safety information about the battery and charging iPhone, see [Important safety information](#).

**Charge the battery.** Connect iPhone to a power outlet using the included cable and USB power adapter.

**NOTICE:** If you suspect that liquid may be present in the Lightning connector of iPhone, do not charge iPhone. For more information about exposure to liquid, see [Important handling information](#).

**Note:** Connecting iPhone to a power outlet can start an iCloud backup or wireless iTunes syncing. See [Back up iPhone with iTunes](#) and [Sync with iTunes](#).

You can also charge the battery by connecting iPhone to your computer, which also allows you to sync iPhone with iTunes. See [Sync with iTunes](#). Unless your keyboard has a high-power USB 2.0 or 3.0 port, you must connect iPhone to a USB 2.0 or 3.0 port on your computer.

**Important:** The battery may drain instead of charge if iPhone is connected to a computer that's turned off or is in sleep or standby mode.

**Show percentage of battery remaining in the status bar.** Go to Settings > Battery, then turn on Battery Percentage.

**See proportion of battery used by each app.** Go to Settings > Battery.

The battery icon in the upper-right corner shows the battery level or charging status. When syncing or using iPhone, it may take longer to charge the battery.

**Important:** If iPhone is very low on power, it may display an image of a nearly depleted battery, indicating that it needs to charge for up to ten minutes before you can use it. If iPhone is extremely low on power, the display may be blank for up to two minutes before the low-battery image appears.

Rechargeable batteries, like those found in iPhone, have a limited number of charge cycles and may eventually need to be replaced. The iPhone battery should be replaced by Apple or an authorized service provider. For more information, go to the [Battery service and recycling website](#).

## Low Power Mode

Switch to Low Power Mode when your iPhone battery is low or when you may not have access to electrical power. Low Power Mode limits background activity and tunes performance for essential tasks. Using Low Power Mode can significantly increase the life of the battery charge.

**Turn on Low Power Mode.** Go to Settings > Battery, then turn on Low Power Mode.

**Note:** If your iPhone switches to Low Power Mode automatically, it switches back to normal power mode after charging to 80%. Your iPhone might perform some tasks more slowly when in Low Power Mode.

## Proactive assistant

Based on how you use your iPhone, proactive assistant gives you suggestions for what you might want to do next. Proactive assistant might help when you:

*Listen to music:* Plug in your headphones, and proactive assistant recognizes that you might want to play an album you started earlier. Your music is ready to play from the Lock screen—or swipe the Music icon up from the lower left, and proactive assistant opens the Music app after you unlock iPhone.

*Create email and events:* When you start adding people to an email or calendar event, proactive assistant suggests the people you included in previous emails or events.

*Receive calls:* If you get an incoming call from an unknown number, proactive assistant lets you know who might be calling—based on phone numbers included in your emails.

*Leave for an event:* If your calendar event includes a location, proactive assistant assesses traffic conditions and notifies you when to leave.

**Turn off contact suggestions.** Go to Settings > Contacts, then turn off Contacts Found in Apps.

**Turn off event suggestions.** Go to Settings > Calendar, then turn off Events Found in Apps.

## Find My Friends

You can find the Find My Friends app in the Extras folder. Find My Friends is a great way to share your location with people who are important to you. Friends and family members who share their locations with you appear on a map, so you can quickly see where they are. You can set notifications for friends and family members to alert you when they leave from or arrive at various locations.

**Note:** For more information about Find My Friends, please refer to the Help in the app.

**Turn on Share My Location.** Go to Settings > iCloud > Share My Location.

**Share your location with a friend.** Open Find Friends on iPhone, then tap Add. Select a contact's name, or type a name in the To field, then tap Done. Choose how long you want to share your location.

**Share your location using AirDrop.** Tap Add, then select a friend who appears in AirDrop. Choose how long you want to share your location.

**Set a notification.** Select a friend, then tap Notify Me. Choose whether you want to be notified when a friend leaves from or arrives at a location. Choose the friend's current location, or tap Other to create a new location for the notification.

**3D Touch.** To share a location from the Home screen, tap Extras, press Find Friends, then choose the Share My Location quick action. See [3D Touch](#).

## Travel with iPhone

If you travel outside your carrier's network area, you can avoid roaming charges by turning off voice and data roaming services in Settings > Cellular. See [Cellular data settings](#).

Some airlines let you keep your iPhone turned on if you switch to Airplane Mode. You can't make calls or use Bluetooth, but you can listen to music, play games, watch videos, or use other apps that don't require network or phone connections. If the airline allows it, you can turn Wi-Fi or Bluetooth back on to enable those services, even while in Airplane Mode.

**Turn on Airplane Mode.** Swipe up from the bottom edge of the screen to open Control Center, then tap . You can also turn Airplane Mode on or off in Settings. When Airplane Mode is on,  appears in the status bar at the top of the screen.

You can also turn Wi-Fi and Bluetooth on or off in Control Center.

# Personalize your iPhone

## Arrange your apps

**Arrange apps.** Touch and hold any app on the Home screen until you see the app icons jiggle. Drag an app to move it. Drag an app to the edge of the screen to move it to a different Home screen, or drag it to the Dock at the bottom of the screen (remove another app first). Press the Home button to save your arrangement.

**Create a new Home screen.** While arranging apps, drag an app to the right edge of the last Home screen. The dots above the Dock show how many Home screens you have, and which one you're viewing.

**Start over.** Go to Settings > General > Reset, then tap Reset Home Screen Layout to return the Home screen and apps to their original layout. Any folders you've created are removed, the original wallpaper is restored, and apps you've downloaded are placed after apps that came with your iPhone.

## Remove apps

**Remove apps from the Home screen.** Touch and hold an app on the Home screen until you see the app icons jiggle, then tap  in the upper-right corner. When you finish, press the Home button.

In addition to removing third-party apps, you can remove some built-in Apple apps that come with your iPhone:

[Calculator](#)

[Calendar](#)

[Compass](#)

[Contacts](#) (contact information remains available through the Phone app)

[FaceTime](#)

[Find My Friends](#)

[Home](#)

[iBooks](#)

[iCloud Drive](#)

[iTunes Store](#)

[Mail](#)

[Maps](#)

[Music](#) (also removes the Music app from CarPlay)

[News](#)

[Notes](#)

[Podcasts](#)

[Reminders](#)

[Stocks](#)

[Tips](#)

[Videos](#)

[Voice Memos](#)

[Watch](#)

[Weather](#)

**Note:** When you remove a built-in app from your Home screen, you also remove any related user data and configuration files. Removing built-in apps from your Home screen can affect other system functionality. For more information, see the Apple Support article [Remove built-in apps from the Home screen on your iOS device](#).

**Restore an app you removed.** Go to the App Store, search for the app, then tap .

## Organize with folders

**Create a folder.** While arranging apps, drag one app onto another. Tap the name of the folder to rename it. Drag apps into or out of the folder. Press the Home button when you finish.

You can have multiple pages of apps in a folder.

**Delete a folder.** Drag out all the apps—the folder is deleted automatically.

## Change the wallpaper

Wallpaper settings let you set an image or photo as wallpaper for the Lock screen or Home screen. You can choose from dynamic and still images.

**Change the wallpaper.** Go to Settings > Wallpaper > Choose a New Wallpaper.

**Tip:** If you choose your own image as wallpaper, you can pinch open to zoom in on your selected image, then drag your finger to move the image. Pinch closed to zoom back out.

When choosing an image for new wallpaper, you may be able to tap Perspective to make your wallpaper move when you change the angle you view the screen. To turn on the Perspective option for wallpaper you already set, go to Settings > Wallpaper, then tap the image of the Lock screen or Home screen.

**Note:** The Perspective option doesn't appear if Reduce Motion (in Accessibility settings) is turned on. See [Reduce screen motion](#).

**Set a Live Photo as wallpaper for the Lock screen.** On devices with 3D Touch, go to Settings > Wallpaper > Choose a New Wallpaper. Tap Live, then choose a Live Photo. To set one of your own Live Photos as the wallpaper, choose one from one of your folders (below Photos).

**3D Touch.** When you're on the Lock screen, press to play the Live Photo. See [3D Touch](#).

## Adjust the screen brightness and color balance

Dim the screen or use Auto-Brightness to extend battery life. Use Night Shift to shift the colors in your display to the warmer end of the spectrum at night and make viewing the screen easier on your eyes.

**Adjust the screen brightness.** Go to Settings > Display & Brightness, then drag the slider. If Auto-Brightness is on, iPhone adjusts the screen brightness for current light conditions using the built-in ambient light sensor. You can also adjust the brightness in Control Center.

**Use Night Shift.** Go to Settings > Display & Brightness > Night Shift.

Turn on Night Shift manually — helpful when you're in a darkened room during the day, for example — or schedule it to turn on automatically. If you schedule Night Shift to turn on from sunset to sunrise, iPhone uses the data from your clock and your geolocation to determine when it's nighttime for you.

To adjust the color balance for Night Shift, go to Settings > Display & Brightness > Night Shift, then drag the slider toward the warmer or cooler end of the spectrum.

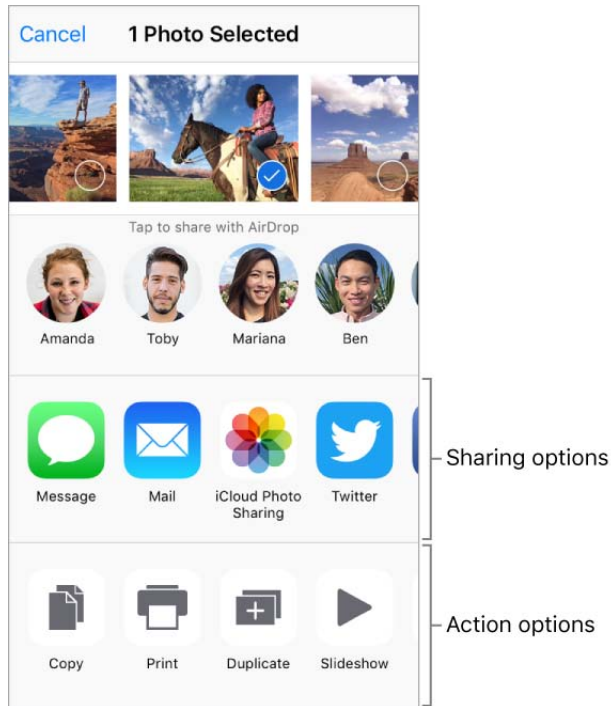

You can also turn on Night Shift in Control Center. Tap .

## Display Zoom

On supported devices, you can magnify the screen display. Go to Settings > Display & Brightness. Tap View (below Display Zoom), choose Zoomed, then tap Set. For additional zoom features, see [Zoom](#).

## App extensions

Some apps let you extend the functionality of your iPhone. An app extension may appear as a sharing option, an action option, a widget in Today View, a file provider, or a custom keyboard. For example, if you download Pinterest, Pinterest becomes another option for sharing when you click .

App extensions can also help you edit a photo or video in your Photos app. For example, you can download a photo-related app that lets you apply filters to photos.

**Install app extensions.** Download the app from the App Store, then open the app and follow the onscreen instructions.

**Turn sharing or action options on or off.** Tap , then tap More (drag options to the left if necessary). Turn off third-party sharing or action options (they're on by default).

**Organize sharing and action options.** Tap , then tap More (drag options to the left if necessary). Touch and drag  to rearrange your options.

For more information about Today widgets, see [Today View](#). For more information about Sharing options, see [Share from apps](#).

## Your iPhone name

The name of your iPhone is used by iTunes and iCloud.

**Change the name of your iPhone.** Go to Settings > General > About > Name.

# Set Restrictions

You can set restrictions for some apps, and for purchased content. For example, parents can restrict explicit music from appearing in playlists, or disallow changes to certain settings. Use restrictions to prevent the use of certain apps, the installation of new apps, or changes to accounts or the volume limit.

**Turn on restrictions.** Go to Settings > General > Restrictions, then tap Enable Restrictions. You'll be asked to define a restrictions passcode that's necessary to change the settings you make. This can be different from the passcode for unlocking iPhone.

**Important:** If you forget your restrictions passcode, you must restore the iPhone software. See [Restore iPhone](#).

---

# International keyboards

## Use international keyboards

With international keyboards you can type text in many different languages, including Asian languages and languages written from right to left. For a list of supported keyboards, go to Apple's [iPhone website](#), choose your iPhone, click Tech Specs, then scroll to Languages.

**Manage keyboards.** Go to Settings > General > Keyboard > Keyboards.

*Add a keyboard:* Tap Add New Keyboard, then choose a keyboard from the list. Repeat to add more keyboards.

*Remove a keyboard:* Tap Edit, tap  next to the keyboard you want to remove, tap Delete, then tap Done.

*Edit your keyboard list:* Tap Edit, drag  next to a keyboard to a new place in the list, then tap Done.

If you've added keyboards in other languages, you can type in two languages without having to switch between keyboards. Your keyboard automatically switches between the two languages you type in most often.

**Switch keyboards.** Touch and hold , then slide your finger to the name of the keyboard.

You can also tap  to switch from one keyboard to the other. Continue tapping to access other enabled keyboards.

**Enter accented letters or other characters.** Touch and hold the related letter, number, or symbol, then slide to choose a variant. For example:

*On a Thai keyboard:* Choose native numbers by touching and holding the related Arabic number.

*On a Chinese, Japanese, or Arabic keyboard:* Suggested characters or candidates appear at the top of the keyboard. Tap a candidate to enter it, or swipe left to see more candidates.

**Use the extended suggested candidate list.** Tap the up arrow on the right to view the full candidate list. To return to the short list, tap the down arrow.

When using certain Chinese or Japanese keyboards, you can create a shortcut (text replacement) for word and input pairs. The shortcut is added to your personal dictionary. When you type a shortcut while using a supported keyboard, the paired word or input is substituted for the shortcut.

**Create shortcuts.** Go to Settings > General > Keyboard > Text Replacement. Shortcuts are available for:

*Simplified Chinese:* Pinyin

*Traditional Chinese:* Pinyin and Zhuyin

*Japanese:* Romaji and Kana

**Reset your personal dictionary.** Go to Settings > General > Reset > Reset Keyboard Dictionary. All custom words and shortcuts are deleted, and the keyboard dictionary returns to its default state.

## Special input methods

You can use keyboards to enter some languages in different ways. A few examples are Chinese Cangjie and Wubihua, Japanese Kana, and Facemarks. You can also use your finger or a stylus to write Chinese characters on the screen.

**Build Chinese characters from the component Cangjie keys.** As you type, suggested characters appear. Tap a character to choose it, or continue typing up to five components to see more options.

**Build Chinese Wubihua (stroke) characters.** Use the keypad to build Chinese characters using up to five strokes, in the correct writing sequence: horizontal, vertical, left falling, right falling, and hook. For example, the Chinese character 圈 (circle) should begin with the vertical stroke | .

As you type, suggested Chinese characters appear (the most commonly used characters appear first). Tap a character to choose it.

If you're not sure of the correct stroke, enter an asterisk (\*). To see more character options, type another stroke, or scroll through the character list.

Tap the match key (匹配) to show only characters that match exactly what you typed.

**Write Chinese characters.** Write Chinese characters directly on the screen with your finger when Simplified or Traditional Chinese handwriting input is turned on.

**3D Touch.** Press a little deeper as you write to increase the line width of your character strokes. See [3D Touch](#).

As you write character strokes, iPhone recognizes them and shows matching characters in a list, with the closest match at the top. When you choose a character, its likely follow-on characters appear in the list as additional choices.

You can type some complex characters, such as 鱸 (part of the name for the Hong Kong International Airport), by writing two or more component characters in sequence. Tap the character to replace the characters you typed. Roman characters are also recognized.

**Type Japanese kana.** Use the Kana keypad to select syllables. For more syllable options, drag the list to the left or tap the arrow key.

**Type Japanese romaji.** Use the Romaji keyboard to type syllables. Alternative choices appear along the top of the keyboard; tap one to type it. For more syllable options, tap the arrow key and select another syllable or word from the window.

**Type facemarks or emoticons.** Use the Japanese Kana keyboard and tap the  $\hat{\_}$  key. Or you can:

*Use the Japanese Romaji keyboard (QWERTY-Japanese layout):* Tap 123, then tap the  key.

*Use the Chinese (Simplified or Traditional) Pinyin or (Traditional) Zhuyin keyboard:* Tap #+=, then tap the  key.

# Apps

## Phone

### Phone calls

#### Make a call

Making a call on iPhone is as simple as choosing a number in your contacts, or tapping one of your favorites or recent calls.

**WARNING:** For important information about avoiding distractions that could lead to dangerous situations, see [Important safety information](#).

**Add favorites.** With Favorites, you can make a call with a single tap. To add someone to your Favorites list, tap  $\oplus$ . You can also add names to Favorites from Contacts. In Contacts, tap Add to Favorites at the bottom of a card, then tap the number to add.

**Delete a name or rearrange your Favorites list.** Tap Edit.

**Return a recent call.** Tap Recents, then tap the call. Tap ⓘ to get more info about the call, or the caller. A red badge indicates the number of missed calls.

You can also reach recent and favorite people you've been in contact with from the multitasking screen—just double-click the Home button.

**Dial manually.** Tap Keypad, enter the number, then tap Call.

*Paste a number to the keypad:* Tap the screen above the keyboard, then tap Paste.

*Enter a soft (2-second) pause:* Touch the "\*" key until a comma appears.

*Enter a hard pause (to pause dialing until you tap the Dial button):* Touch the "#" key until a semicolon appears.

*Redial the last number:* Tap Keypad, tap Call to display the number, then tap Call again.

**Use Siri or Voice Control.** Press and hold the Home button, say "call" or "dial," then say the name or number. You can add "at home," "work," or "mobile." See [Make requests](#) and [Voice Control](#). For example:

"Call Emily's mobile"

"Call the fire department"

"Redial that last number"

When voice dialing a number, speak each digit separately—for example, "four one five, five five five...." For the 800 area code in the U.S., you can say "eight hundred."

**Use Wi-Fi Calling on your iPhone.** (Available with some carriers) Go to Settings > Phone > Wi-Fi Calling, then turn Wi-Fi Calling on This iPhone on.

**Tip:** Wi-Fi Calling can be helpful when your iPhone has a low cell signal, because it uses your Wi-Fi network to make the call.

## When someone calls

Tap Accept to answer an incoming call. Or if iPhone is locked, press the Home button. You can also press the center button on your EarPods.

**Silence a call.** Press the Sleep/Wake button or either volume button. You can still answer the call after silencing it, until it goes to voicemail.

**Adjust the volume.** Press the volume buttons on the side of your phone to adjust the volume during a call.

**Decline a call and send it directly to voicemail.** Do one of the following:

Press the Sleep/Wake button twice quickly.

Press and hold the center button on your headset for about two seconds. Two low beeps confirm that the call was declined.

Tap Decline (if iPhone is awake when the call comes in).

**Note:** In some areas, declined calls are disconnected without being sent to voicemail.

**Respond with a text message instead of answering.** Tap Message, then choose a reply or tap Custom. To create your own default replies, go to Settings > Phone > Respond with Text, then tap any of the default messages and replace it with your own text.

**Remind yourself to return the call.** Tap Remind Me, then indicate when you want to be reminded.

## Make and receive calls on your iPad, iPod touch, or Mac

Continuity lets you make calls on your other devices by relaying calls through your iPhone, which must be turned on and connected to a cellular network. To make calls this way, you need iOS 8 or later, and OS X v10.10 or later. You must be signed in to iCloud and FaceTime on all devices using the same Apple ID as on iPhone, and all devices must be connected to the same Wi-Fi network.

Wi-Fi Calling lets you make and receive phone calls on your iPad or iPod touch (iOS 9 or later), Apple Watch (watchOS 2 or later), or Mac (OS X v10.11 or later), as long as you're signed in to iCloud and FaceTime with the same Apple ID on the device you're using for calls. Your iPhone doesn't need to be on the same network as your other devices or even turned on.

**Note:** Wi-Fi Calling on other devices is available with some carriers, and cellular charges may apply.

You must first set up your iPhone (iPhone 5c, iPhone 5s, and later), then your other devices. If you log out of iCloud or FaceTime on iPhone, Wi-Fi Calling is disabled.

**Note:** When making calls on iPhone SE, iPhone 6, iPhone 6 Plus, and later, if the Wi-Fi connection is lost, calls switch automatically to your carrier's cellular network using VoLTE (Voice over LTE), if available and turned on. See [Cellular data settings](#). (VoLTE calls also switch to Wi-Fi when a Wi-Fi connection becomes available.) On earlier iPhone models, and on iPad, iPod touch, or a Mac, a call is dropped if you lose the Wi-Fi connection. Contact your carrier for feature availability.

**Turn on Wi-Fi Calling on your iPhone.** Go to Settings > Phone > Wi-Fi Calling, then turn Wi-Fi Calling on This iPhone on.

If you see Add Wi-Fi Calling For Other Devices, tap it to allow calls from other devices that aren't on the same Wi-Fi network as your iPhone. Otherwise, you can still use your other devices to make phone calls, but your iPhone must be turned on and on the same network as your other devices.

**Turn on Wi-Fi Calling on another iOS device.** On the device, go to Settings > FaceTime, then turn on FaceTime. If you're asked, turn Wi-Fi calling on.

**Turn on Wi-Fi Calling on your Mac.** On your Mac, open FaceTime, then choose FaceTime > Preferences > Settings. Select "Calls from iPhone." If an Upgrade to Wi-Fi Calling button appears, click it, then follow the instructions.

**Receive a call on your iPad, iPod touch, or Mac.** Swipe or click the notification to answer, ignore, or respond with a quick message.

**Make a call from your iPad, iPod touch, or Mac.** Tap or click a phone number in Contacts, Calendar, FaceTime, Messages, Spotlight, or Safari.

**Note:** Emergency calls on your iPhone are routed through cellular service when available. In the event that cellular service is not available, and you have enabled Wi-Fi Calling, emergency calls may be made over Wi-Fi, and your device's location information may be used for emergency calls to aid response efforts, regardless of whether you enable Location Services. Some carriers may use the address you registered with the carrier when signing up for Wi-Fi Calling as your location.

For more information about Wi-Fi calls, see the Apple Support article [Make a call with Wi-Fi Calling](#).

## Avoid unwanted calls

**Block unwanted callers.** On a contact card, tap Block this Caller (tap ⓘ in Favorites or Recents to see a caller's contact card). You can also block callers in Settings > Phone > Blocking & Identification. You don't receive voice calls, FaceTime calls, or text messages from blocked callers. For more information about blocking calls, see the Apple Support article [Block calls and block or filter messages](#).

**Identify spam calls.** Download a spam-blocking app from the App Store, and iPhone alerts you to potential spam calls.

To view your spam-blocking apps on iPhone, go to Settings > Phone > Call Blocking and Identification.

If you have multiple spam-blocking apps, you can change which one checks an unknown number first. Touch and hold ≡, then drag to position.

## While on a call

When you're on a call, the screen shows several call options.

**End a call.** Tap  or press the Sleep/Wake button.

**Use another app while on a call.** Press the Home button, then open the app. To return to the call, tap the green bar at the top of the screen.

**Respond to a second call.** You can:

*Ignore the call and send it to voicemail:* Tap Ignore.

*Put the first call on hold and answer the new one:* Tap Hold + Accept.

*End the first call and answer the new one:* When using a GSM network, tap End + Accept. With a CDMA network, tap End and when the second call rings back, tap Accept, or drag the slider if iPhone is locked.

With a call on hold, tap Swap to switch between calls, or tap Merge Calls to talk with both parties at once. See [Conference calls](#).

**Note:** With CDMA, you can't switch between calls if the second call was outgoing, but you can merge the calls. You can't merge calls if the second call was incoming. If you end the second call or the merged call, both calls are terminated.

## Conference calls

With GSM, you can set up a conference call with up to five people (depending on your carrier).

**Note:** Conference calls may not be available if your call is using VoLTE (Voice over LTE).

**Create a conference call.** While on a call, tap Add Call, make another call, then tap Merge Calls. Repeat to add more people to the conference.

*Drop one person:* Tap ⓘ next to a person, then tap End.

*Talk privately with one person:* Tap ⓘ, then tap Private next to the person. Tap Merge Calls to resume the conference.

*Add an incoming caller:* Tap Hold Call + Answer, then tap Merge Calls.

## Emergency calls

**Make an emergency call when iPhone is locked.** On the Enter Passcode screen, tap Emergency Call (to dial 911 in the U.S., for example).

**Important:** You can use iPhone to make an emergency call in many locations, provided that cellular service is available, but you should not rely on it for emergencies. Some cellular networks may not accept an emergency call from iPhone if iPhone is not activated, if iPhone is not compatible with or configured to operate on a particular cellular network, or (when applicable) if iPhone does not have a SIM card or if the SIM card is PIN-locked.

In the U.S., location information (if available) is provided to emergency service providers when you dial 911 or tap Emergency Call. If you tap Emergency Call or dial an emergency number outside of the U.S., your location information may also be provided to emergency providers if your carrier supports it. Please review your carrier's emergency calling information to understand the limits of emergency calling over Wi-Fi.

With CDMA, when an emergency call ends, iPhone enters *emergency call mode* for a few minutes to allow a call back from emergency services. During this time, data transmission and text messages are blocked.

**Exit emergency call mode (CDMA).** Do one of the following:

Tap the Back button.

Press the Sleep/Wake button or the Home button.

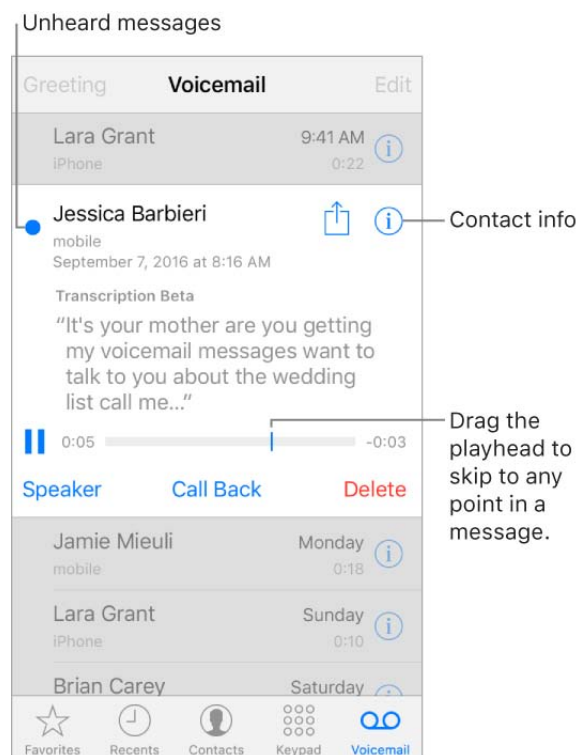

Use the keypad to dial a non-emergency number.

## Visual voicemail

Visual voicemail lets you see a list of your messages. You can choose which ones to listen to, view transcriptions of messages, or delete them, without having to wade through all of them. A badge on the Voicemail icon tells you how many unheard messages you have. The first time you tap Voicemail, you're asked to create a voicemail password and record your voicemail greeting.

**Note:** Voicemail transcription (Beta) is available in English and depends on the quality of the recording. You won't see transcriptions for voicemails you received before you upgraded iPhone to iOS 10.

**Listen to a voicemail message.** Tap Voicemail, then select a message. To listen again, select the message, then tap ►. If visual voicemail isn't available with your service, tap Voicemail and follow the voice instructions.

Messages are saved until you delete them or your carrier erases them.

**Ask Siri.** Say something like:

"Do I have any new voicemail?"

"Play the voicemail from Emily"

**Delete a message.** Swipe or tap the message, then tap Delete.

**Note:** In some areas, deleted messages may be permanently erased by your carrier. Your voice messages may also be deleted if you change your SIM card.

**Manage deleted messages.** Tap Deleted Messages (at the end of the messages list), then:

*Listen to a deleted message:* Tap the message.

*Undelete a message:* Tap the message and tap Undelete.

*Delete messages permanently:* Tap Clear All.

**Share a message.** Tap a message, then tap .

**Update your greeting.** Tap Voicemail, tap Greeting, tap Custom, then tap Record. Or, to use your carrier's generic greeting, tap Default.

**Set an alert sound for new voicemail.** Go to Settings > Sounds.

**Change the password.** Go to Settings > Phone > Change Voicemail Password. If you forgot your voicemail password, contact your wireless carrier.

## Contacts

When viewing a contact's card, a quick tap lets you make a phone call, create an email message, find the contact's location, and more. See [Use Contacts from within the Phone app](#).

**See the phone number for your iPhone.** Tap Contacts, then scroll to the top of your contacts list.

**3D Touch.** To add a contact from the Home screen, press Phone, then choose the Create New Contact quick action. See [3D Touch](#).

## Call forwarding, call waiting, and caller ID

**Set up call forwarding, call waiting, or caller ID.** (GSM) Go to Settings > Phone.

*Call Forwarding:* The Call Forwarding icon  appears in the status bar when call forwarding is on. You must be in range of the cellular network when you set iPhone to forward calls, or calls won't be forwarded.

*Call Waiting:* If you're on a call and call waiting is turned off, incoming calls go directly to voicemail.

*Caller ID:* For FaceTime calls, your phone number is displayed even if caller ID is turned off.

For CDMA accounts, contact your carrier for information about enabling and using these features.

For more information, see the Apple Support article [Call forwarding, call waiting, and other call features on iPhone](#).

## Ringtones and vibrations

iPhone comes with ringtones that sound for incoming calls, Clock alarms, and the Clock timer. You can also purchase ringtones from songs in the iTunes Store. See [Purchase, rent, or redeem](#).

**Set the default ringtone.** Go to Settings > Sounds & Haptics > Ringtone. (Settings > Sounds > Ringtone on iPhone models other than iPhone 7 and iPhone 7 Plus.)

**Assign different ringtones for the special people in your life.** Go to Contacts, choose a contact, tap edit, then tap Ringtone.

**Turn the ringer on or off.** Flip the switch on the side of iPhone.

**Important:** Clock alarms still sound when the Ring/Silent switch is set to silent.

**Turn vibrate on or off.** Go to Settings > Sounds & Haptics. (Settings > Sounds > Ringtone on iPhone models other than iPhone 7 and iPhone 7 Plus.) See [Sounds and silence](#).

**Set the sound for new voicemail.** Go to Settings > Sounds & Haptics > New Voicemail. (Settings > Sounds > Ringtone on iPhone models other than iPhone 7 and iPhone 7 Plus.)

## International calls

For information about making international calls from your home area (including rates and other charges that may apply), contact your carrier.

When traveling abroad, you may be able to use iPhone to make calls, send and receive text messages, get visual voicemail, and use apps that access the Internet, depending on available networks.

**Enable international roaming.** To turn on Data Roaming and Voice Roaming (CDMA), go to Settings > Cellular. Contact your carrier for information about availability and fees.

**Important:** Voice, text message, and data roaming charges may apply. To avoid charges while roaming, turn off Data Roaming and Voice Roaming (CDMA).

You may be able to roam on GSM networks, if you have a CDMA account, and your iPhone has a SIM card installed. While roaming on a GSM network, iPhone has access to GSM network features. Charges may apply. Contact your carrier for more information.

**Set network options.** Go to Settings > Cellular to:

- Turn data roaming on or off

- Turn cellular data on or off

- Turn voice roaming on or off (CDMA)

- Use GSM networks abroad (CDMA)

See [Cellular data settings](#).

**Turn off cellular services.** Go to Settings, turn on Airplane Mode, then tap Wi-Fi and turn it on. Incoming phone calls are sent to voicemail. To resume cellular service, turn Airplane Mode off.

**Make calls to your contacts and favorites while traveling abroad.** (GSM) Go to Settings > Phone, then turn on Dial Assist. Dial Assist automatically adds the prefix or country code for calls to the U.S.

**Select a carrier network.** Go to Settings > Carrier. This setting appears on GSM networks when you're outside your carrier's network, and other local carrier data networks are available to use for your phone calls, visual voicemail, and cellular network Internet connections. You can make calls only on carriers that have a roaming agreement with your carrier. Additional fees may apply. Roaming charges may be billed to you by the other carrier, through your carrier.

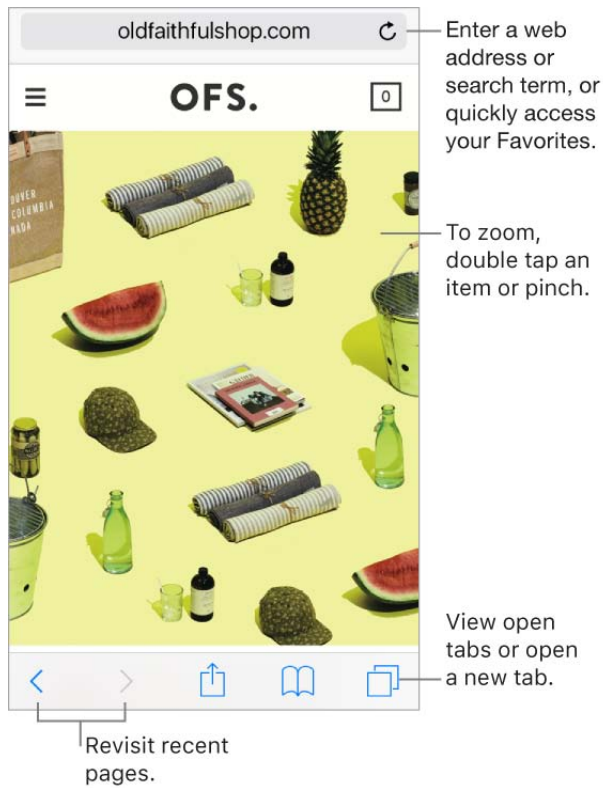

Once you select a network, iPhone uses only that network. If the network you chose is unavailable, "No service" appears on iPhone. To look for a different carrier network, go back to Settings > Carrier.

**Get voicemail when visual voicemail isn't available.** Dial your own number (with CDMA, add # after your number), or touch and hold "1" on the numeric keypad.

# Safari

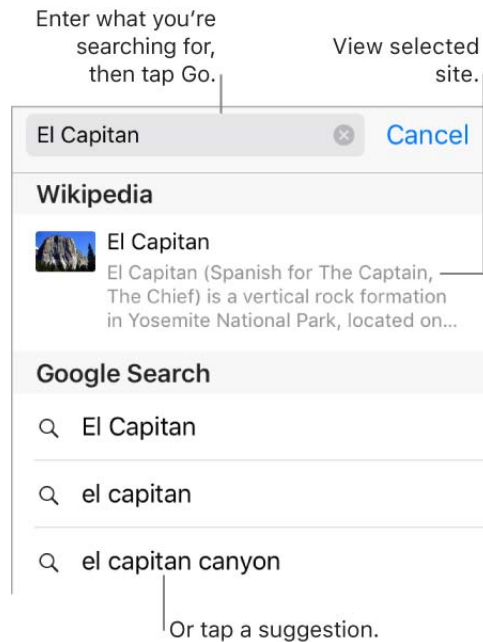

## Safari at a glance

With Safari on iPhone, you can browse the web, add webpages to your reading list to read later, and add page icons to the Home screen for quick access. If you sign in to iCloud with the same Apple ID on all your devices, you can see pages you have open on other devices, and keep your bookmarks, history, and reading list up to date on your other devices.

## Search the web

**Search the web.** Enter a URL or search term in the search field at the top of the page, then tap a search suggestion, or tap Go on the keyboard to search for exactly what you typed. If you don't want to see suggested search terms, go to Settings > Safari, then turn off Search Engine Suggestions (below Search).

**Quickly search a site you've visited before.** Enter the name of the site, followed by your search term. For example, enter "wiki einstein" to search Wikipedia for "einstein." Go to Settings > Safari > Quick Website Search to turn this feature on or off.

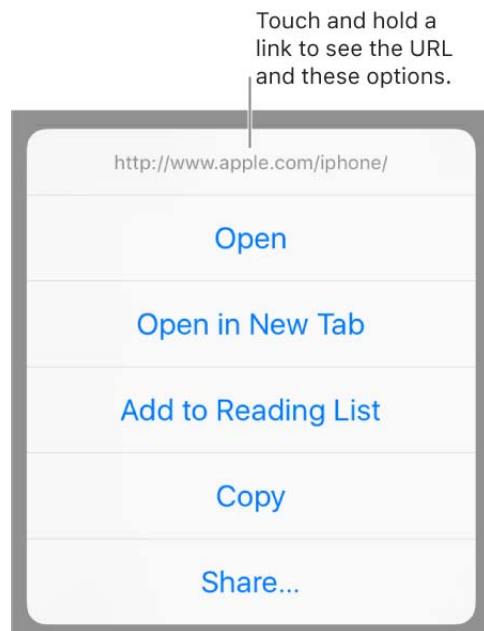

**See your favorites when you enter an address, search, or create a new tab.** Go to Settings > Safari > Favorites, then select the folder containing your favorites.

**Search the page.** To find a specific word or phrase on the current page, tap , then tap Find on Page. Enter the word or phrase in the search field to search. Tap  to find other instances.

**Choose your search engine.** Go to Settings > Safari > Search Engine.

## Browse the web

**Look before you leap.** To see the URL of a link before you go there, touch and hold the link.

**3D Touch.** To preview items, press a link to get a peek. Press a little deeper to open it. See [3D Touch](#).

**Open a link in a new tab.** Touch and hold the link, then tap Open in New Tab. If you prefer to stay on the current tab while opening a link in another tab, go to Settings > Safari > Open Links, then tap In Background.

**Browse open tabs.** Tap . To close a tab, tap  in the upper-left corner, or swipe the tab to the left.

**View tabs that are open on your other devices.** If you sign in to iCloud with the same Apple ID on all your devices, and you turn on Safari in Settings > iCloud on iPhone, you can view tabs that are open on your other devices. Tap , then scroll to the list at the bottom. To close a tab, swipe left, then tap Close.

Scroll to the bottom to see tabs open on other devices.

**View recently closed tabs.** Touch and hold  $\oplus$ .

**Get back to the top.** Tap the top edge of the screen to quickly return to the top of a long page.

**See more of the page.** Turn iPhone to landscape orientation.

**Refresh the page.** Tap  $\text{↺}$  next to the address in the search field.

**See a tab's history.** Touch and hold  $\text{<}$  or  $\text{>}$ .

**View the desktop version of a site.** To see the full desktop version of a site instead of the mobile version, tap  $\text{⌈}$ , then tap Request Desktop Site.

**Block pop-ups.** Go to Settings > Safari, then turn Block Pop-Ups on or off.

## Add bookmarks and favorites

**Bookmark the current page.** Tap  $\text{⌈}$  (or touch and hold  $\text{📖}$ ), then tap Add Bookmark.

**View and organize your bookmarks.** Tap , then tap . To create a folder for bookmarks, tap Edit.

**3D Touch.** To quickly access your bookmarks from the Home screen, press the Safari icon, then tap Show Bookmarks. See [3D Touch](#).

**Add a webpage to your favorites.** Open the page, tap , then tap Add to Favorites.

**Quickly see your favorite and frequently visited sites.** Tap the search field to see your favorites. Scroll down to see frequently visited sites. (To avoid seeing a list of these sites, go to Settings > Safari, then turn off Frequently Visited Sites.)

**Edit your favorites.** Tap , tap Favorites, then tap Edit to delete, rename, or change the order of favorites.

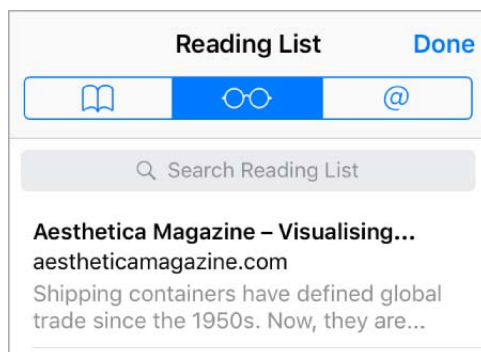

**Choose which favorites appear when you tap the search field.** Go to Settings > Safari > Favorites.

**See your Mac bookmarks on iPhone.** Go to Settings > iCloud, then turn on Safari. Bookmarks on your Mac appear in Favorites on iPhone.

**Add an icon for the current page to your Home screen.** To quickly access the page from your Home screen, tap , then tap Add to Home Screen. The icon appears only on the device where you add it.

## Save a reading list for later

Save interesting items in your reading list so you can revisit them later. You can read pages in your reading list even when you're not connected to the Internet.

**Add the current page to your reading list.** Tap , then tap Add to Reading List.

**Add a linked page without opening it.** Touch and hold the link, then tap Add to Reading List.

**View your reading list.** Tap , then tap .

**Delete an item from your reading list.** In your reading list, swipe the item to the left.

**Limit downloads to Wi-Fi connections.** To prevent reading list downloads from using cellular data, go to Settings > Safari, then turn off Use Cellular Data (below Reading List).

## Shared links and subscriptions

You can view links shared from social media, such as Twitter, and feeds you've subscribed to.

**View shared links and subscriptions.** Tap , then tap .

**Subscribe to a feed.** On a site that provides a subscription feed, tap , then tap Add to Shared Links.

**Delete a subscription.** Tap , tap , tap Subscriptions below the list of your shared links, then tap  next to the subscription you want to delete.

**Share links.** Tap .

## Fill in forms

When you sign in to a website, sign up for a service, or make a purchase, you can fill in a web form using the onscreen keyboard, or have Safari fill it in for you using AutoFill.

**Turn on AutoFill.** Go to Settings > Safari > AutoFill.

**Tired of always having to sign in?** When you're asked if you want to save the password for the site, tap Yes. The next time you visit, your user name and password are filled in for you.

**Choose a different identity.** If you use multiple identities with a site and an incorrect identity is filled in, tap Passwords above the keyboard, then select the identity you prefer.

**Fill in a form.** Tap a field to bring up the keyboard. Tap ^ or v above the keyboard to move from field to field.

**Fill it in automatically.** When you fill in contact information on a website that supports AutoFill, tap AutoFill Contact above the keyboard. Tap Customize to edit and store your information for next time. Or, tap Other Contact to fill in someone else's information.

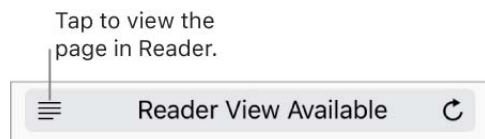

**Add a credit card for purchases.** Go to Settings > Safari > AutoFill > Saved Credit Cards > Add Credit Card. To enter the information without typing, tap Use Camera, then position iPhone so that your card appears in the frame. Also, when you make an online purchase, you can allow Safari to save the credit card information. See [iCloud Keychain](#).

**Use your credit card information.** When you fill in credit card information, tap AutoFill Credit Card above the keyboard. Enter your card's security code, which isn't stored. For greater security of your credit card information, [use a passcode](#) for iPhone.

**Submit a form.** Tap Go, Search, or the link on the webpage.

## Use Reader for distraction-free reading

Use Safari Reader to view a page without ads, navigation, or other distracting items.

**Focus on content.** Tap ≡ at the left end of the address field. If you don't see the icon, Reader isn't available for the page you're looking at.

**Share just the good stuff.** To share just the article text and a link to it, tap  while viewing the page in Reader.

**Return to the full page.** Tap  in the address field again.

## Privacy and security

Adjust Safari settings to keep your browsing activities to yourself and protect yourself from malicious websites.

**Keep a low profile.** Go to Settings > Safari, then turn on Do Not Track. Safari asks websites you visit not to track your browsing, but beware—a website can choose not to honor the request.

**Control cookies.** Go to Settings > Safari > Block Cookies. To remove cookies already on iPhone, go to Settings > Safari > Clear History and Website Data.

**Let Safari create and store secure passwords for you.** When creating a new account, tap the password field, tap Suggest Password, then tap Use Suggested Password.

**View your saved passwords.** Go to Settings > Safari > Passwords, then enter your iPhone passcode or use Touch ID.

**Erase your browsing history and data from iPhone.** Go to Settings > Safari > Clear History and Website Data.

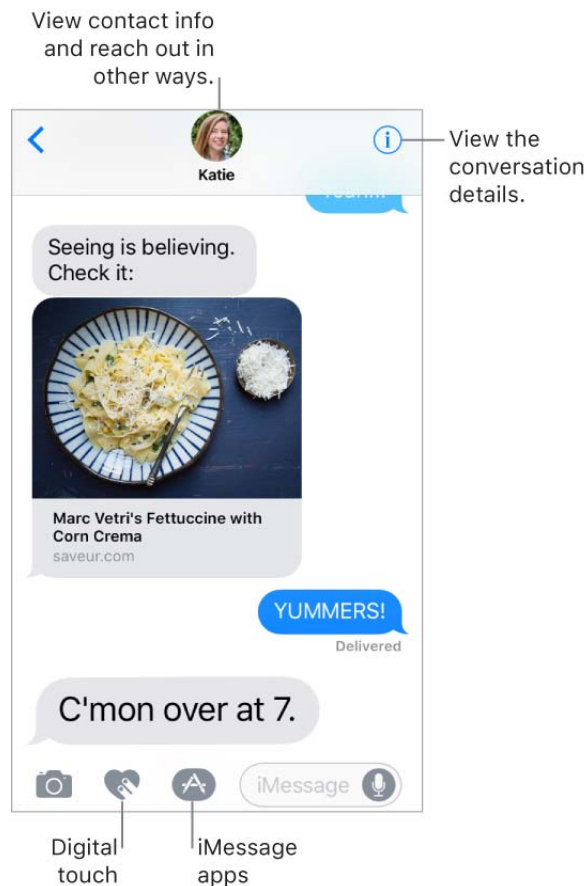

**Visit sites without making history.** Tap , then tap Private. Sites you visit aren't added to History on iPhone and don't appear in the list of tabs on your other devices. To hide the sites and exit Private Browsing Mode, tap , then tap Private again. The sites reappear the next time you use Private Browsing Mode.

**Watch for suspicious websites.** Go to Settings > Safari, then turn on Fraudulent Website Warning.

# Messages

## Messages at a glance

Use Messages to send and receive texts, photos, videos, and more through iMessage or SMS/MMS services. With the iMessage service, you can enhance your messages with bubble effects, invisible ink, full-screen effects, your own handwriting, Digital Touch, iMessage apps, stickers, and more.

**WARNING:** For important information about avoiding distractions while driving, see [Important safety information](#).

## Set up iMessage and SMS/MMS

With the Messages app, you can exchange messages with other SMS and MMS devices using your cellular connection on iPhone, and with other iOS devices and Mac computers using iMessage.

iMessage is an Apple service that sends messages over Wi-Fi or cellular connections to other iOS devices (with iOS 5 or later) and Mac computers (with OS X v10.8 or later). These messages don't count against your messaging plan. Messages sent via iMessage can include photos, videos, and other info. You can see when other people are typing, and let them know when you've read their messages. For security, messages sent via iMessage are encrypted before they're sent.

iMessage texts appear in blue bubbles, and SMS/MMS texts appear in green bubbles. For more information about SMS/MMS and iMessage, see the Apple Support article [Use Messages with your iPhone, iPad, or iPod touch](#).

**Sign in to iMessage.** Go to Settings > Messages, then turn on iMessage.

If you're signed in to iMessage with the same Apple ID on all your devices, all the messages that you send and receive on iPhone can also appear on your other Apple devices. You can send a message from whichever device is closest to you. You can even start a conversation on one device and continue it on another with [Handoff](#).

**Sign in to iMessage on your other Apple devices.**

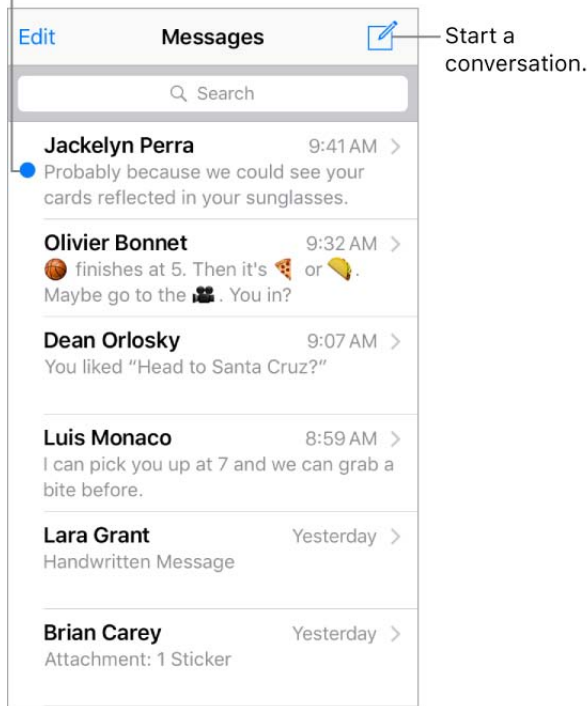

*iOS devices:* Go to Settings > Messages, then turn on iMessage.

*Mac:* Open Messages, choose Messages > Preferences, click Accounts, then select iMessage in the Accounts list. Enter your Apple ID and password, then click Sign In.

With Continuity, all the SMS/MMS messages that you send and receive on iPhone can also appear on your other iOS devices and your Mac. For more information, see the Apple Support article [Use Continuity to connect your iPhone, iPad, iPod touch, and Mac](#).

## Send and receive messages

A blue dot indicates unread messages.

**Start a conversation.** Tap . Enter the recipient's phone number or email address, or tap and choose a contact. Tap the text field, then enter your message. Tap to send.

Alternatively, to start a conversation from Mail, Calendar, or Safari, touch and hold a phone number, then tap Send Message.

**3D Touch.** To start a conversation on the Home screen, press the Messages icon, then tap New Message. See [3D Touch](#).

**Tip:** To see what time a message was sent or received, drag a bubble to the left.

**Note:** An alert appears if a message can't be sent. Tap the alert to try sending the message again.

**Send a message to a group.** Tap , then enter multiple recipients.

To manage a group conversation, tap . You can name the conversation, add someone to the conversation, or leave the conversation.

**Use emoji.** When typing a message, tap or to switch to the Emoji keyboard. To automatically replace text with emoji, tap the highlighted words. See [Use international keyboards](#).

**Resume a conversation.** Tap the conversation in the Messages list.

**3D Touch.** To preview a conversation and quickly respond, press the conversation in the Messages list, swipe up, then choose a response. See [3D Touch](#).

**Ask Siri.** Say something like:

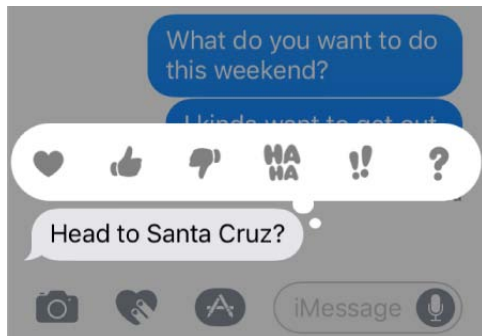

“Send a message to Emily saying how about tomorrow”

“Reply that’s great news”

“Read my messages”

“Read my last message from Bob”

**Respond with a Tapback.** To send a quick response that lets people know what you’re thinking, double-tap a message, then choose your response.

**View and manage conversation details.** Tap ⓘ. You can:

Tap a contact to view the contact card.

Perform quick actions such as making a phone call or FaceTime call.

Send your current location or share your location for a specified length of time.

Send read receipts.

View images and attachments.

**View the Messages list.** Tap < or swipe from the left edge. On iPhone 6 Plus, iPhone 6s Plus, or iPhone 7 Plus, you can see the Messages list and the selected conversation in landscape orientation.

**Search conversations.** In the Messages list, swipe down to reveal the search field, then enter the text you’re looking for. You can also search conversations from the Home screen. See [Search](#).

**Delete a conversation.** In the Messages list, swipe left on the conversation, then tap Delete.

**Note:** You can't recover a deleted conversation.

## Share photos, videos, and audio

With iMessage or MMS, you can send messages with photos, videos, and audio. Your carrier determines the size limit of attachments; iPhone may compress photo and video attachments when necessary.

**Send a photo or video.** Tap . You can:

*Quickly take a photo from within Messages:* Frame the shot in the viewfinder, then tap .

*Choose a recent photo or video:* Swipe left to browse through recent shots.

*Take a photo or video using Camera:* Swipe right, then tap Camera.

*Choose a photo or video from your Photo Library:* Swipe right, then tap Photo Library.

Then, tap  to send or  to cancel.

**Mark up a photo.** Tap the photo in the message bubble, then tap Markup. Annotate the photo with the Markup tools.

**Find and share trending photos and videos from the web.** See [iMessage apps](#).

**Send an audio message.** Touch and hold to record an audio message, then lift your finger to stop recording. Tap to listen to your message before you send it. Tap to send or to cancel.

**Note:** To save space, iPhone automatically deletes audio messages two minutes after you listen to them, unless you tap Keep. To always keep them, go to Settings > Messages > Expire (below Audio Messages), then tap Never.

**Raise iPhone to listen or reply to an audio message.** Raise iPhone to your ear to play incoming audio messages; raise it again to reply. To turn this feature on or off, go to Settings > Messages (below Audio Messages).

**Forward a message or attachment.** Touch and hold a message or attachment, tap More, select additional items if desired, then tap .

**Share, save, or print an attachment.** Tap the attachment, then tap .

**Copy an attachment.** Touch and hold the attachment, then tap Copy.

**Share items from another app.** In the other app, tap Share or , then tap Message.

**Delete a message or attachment.** Touch and hold a message or attachment, tap More, select additional items if desired, then tap .

## Digital Touch

With iMessage, you can use Digital Touch to send sketches, taps, kisses, heartbeats, and more. You can even add a Digital Touch effect to a photo or video.

**Sketch.** Tap , draw with one finger. You can change the color, then start drawing again. Tap  to send.

**Express your feelings.** Tap , then use gestures on the canvas to send a Digital Touch effect. Your feelings are sent automatically when you finish the gesture:

*Tap:* Tap with one finger to create a burst of color. You can change the color, then tap again.

*Fireball:* Touch and hold with one finger.

*Kiss:* Tap with two fingers.

*Heartbeat:* Touch and hold with two fingers.

*Heartbreak:* Touch and hold with two fingers until you see a heartbeat, then drag down to break the heart.

**Note:** If you have Apple Watch or another sensor that records heartbeat data, Messages may use the recorded data when you send a Digital Touch heartbeat.

Send the sketch.

Sketch with different colors.

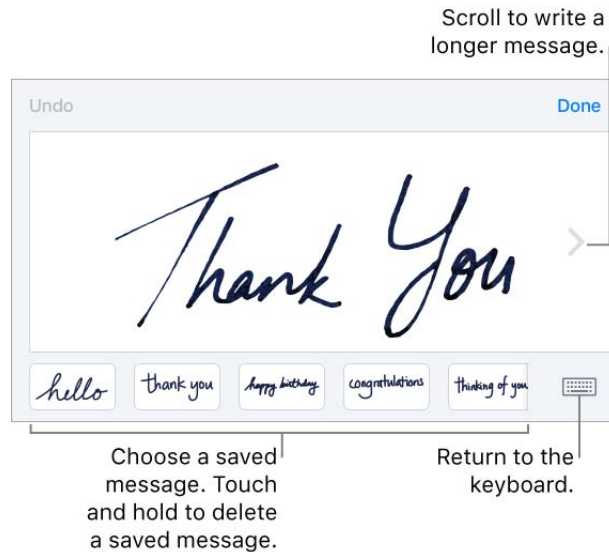

**Add a Digital Touch effect to a photo or video.** Tap , then tap . Tap  to take a photo or  to record a video. Add a Digital Touch effect, such as a sketch or kiss, to the photo or video, then tap  to send.

## Handwritten messages

With iMessage, you can send a handwritten message. The recipient sees the message animate, just as ink flows on paper.

**Create and send a handwritten message.** In landscape orientation, tap the text field, then tap . Write a message with your finger. Tap Done, then tap  to send or  to cancel.

**Send a saved message.** After you create and send a handwritten message, the message is saved at the bottom of the handwriting screen. Tap a saved message to use it again.

## iMessage apps

With iMessage apps, you can decorate a conversation with stickers, schedule dinner and a movie, send payments, share a song, and more—all without leaving Messages. Expand your options by downloading more iMessage apps from the App Store.

**Download iMessage apps.** Tap , tap , then tap Store.

**Use an iMessage app.** Tap , then swipe left or right to browse. Tap an app to add it to the conversation. Add a comment if you want, then tap  to send or  to cancel.

**Decorate with stickers.** Tap  to open the app drawer. Swipe left or right to navigate to a stickers app. Touch and hold a sticker, then drag it anywhere in the conversation. You can place it on top of a message bubble, dress up a photo, or even put it on another sticker.

**Manage iMessage apps.** Tap , tap , tap Store, then tap Manage. You can:

- Automatically add iMessage apps to the app drawer.

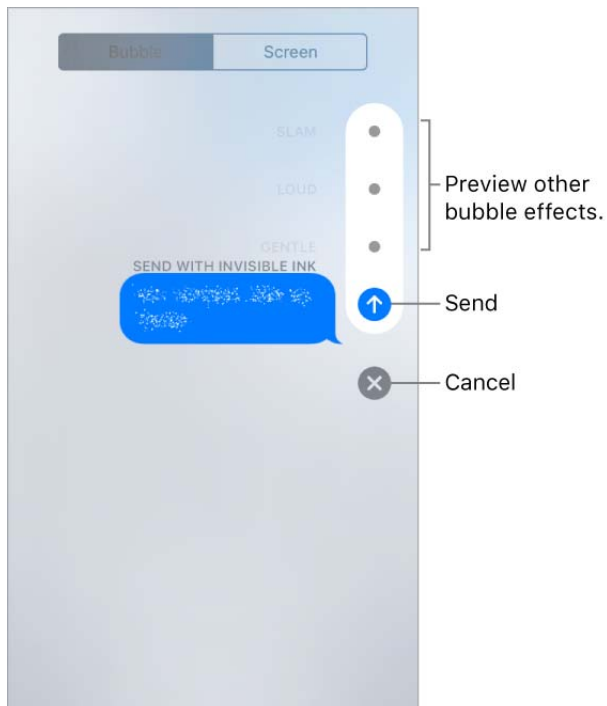

- Turn iMessage apps on or off.

**Remove an iMessage app.** Tap , tap , touch and hold an app until you see the app icons jiggle, then tap  at the top-left corner. To finish, press the Home button.

## Animate messages

With iMessage, you can animate a single message with a bubble effect or fill the entire message screen with a full-screen effect. You can even send a personal message with invisible ink.

**Use a bubble effect.** After you type a message, press  (touch and hold  on devices without 3D Touch). Tap the choices to preview different bubble effects. Tap  to send.

**Tip:** Want to send a personal message? When you use invisible ink, the message remains blurred until the recipient swipes to reveal it.

**Use a full-screen effect.** After you type a message, press  (touch and hold  on devices without 3D Touch), then tap Screen. Swipe left or right to preview different screen effects. Tap  to send.

iMessage automatically uses the following screen effects for specific text strings:

Balloons for "Happy birthday"

Confetti for "Congratulations"

Fireworks for "Happy New Year"

## Manage message notifications and privacy

**Manage notifications for messages.** Go to Settings > Notifications > Messages. See [Notifications](#).

**Set the alert sound for messages.** Go to Settings > Sounds > Text Tone. See [Sounds and silence](#).

**Set a distinctive alert tone or vibration for certain people.** In the Contacts app, tap a contact, tap Edit, then tap Text Tone.

**Mute notifications for a conversation.** View the conversation, tap ⓘ, then turn on Do Not Disturb.

**Block unwanted messages.** To block messages, voice calls, and FaceTime calls from certain people, go to Settings > Messages > Blocked. For more information, see the Apple Support article [Block phone numbers and contacts or filter messages on your iPhone, iPad or iPod touch](#).

**Filter unknown senders.** Go to Settings > Messages, then turn on Filter Unknown Senders. This turns off iMessage notifications from people who aren't in your contacts and sorts them into a separate Messages list. When you view a message from an unknown sender, tap Report Junk (below the message) to delete it and send it to Apple.

---

# Music

## Music at a glance

Use the Music app to enjoy music stored on iPhone as well as music streamed over the Internet, including Beats 1 radio, which broadcasts all day, every day from studios in Los Angeles, New York, and London. With an optional Apple Music membership, listen to millions of tracks, recommended by music experts.

**Note:** You need a Wi-Fi or cellular connection to stream music from Apple Music and Radio. In some cases an Apple ID is also required. Services and features are not available in all areas, and features may vary by area. Additional charges may apply when using a cellular connection.

**WARNING:** For important information about avoiding hearing loss, see [Important safety information](#).

## Access music

Play music on iPhone in the following ways:

*Become an Apple Music member:* With a membership and a Wi-Fi or cellular connection, stream as much music as you like from the Apple Music catalog and download songs, albums, and playlists. See [Apple Music](#).

*Listen to Beats 1:* Beats 1 radio is free to listen to live—no subscription required.

*Purchase music from the iTunes Store:* Go to iTunes Store. See [iTunes Store at a glance](#).

*iCloud Music Library:* Listen to your music on any of your devices. iCloud Music Library contains your imported music, purchased music, and music you've added and downloaded from Apple Music. iCloud Music Library is available to Apple Music members and iTunes Match subscribers. Find this music in Library. See [Library](#).

*Family Sharing:* Purchase an Apple Music Family Membership, and everyone in your Family Sharing group can enjoy Apple Music. See [Family Sharing](#).

*Sync music with iTunes on your computer:* See [Sync with iTunes](#).

## Apple Music

Apple Music is a subscription music service. As an Apple Music member, you can play and download all the music you want, and get recommendations for playlists and albums based on the music you love. You can also explore dozens of ad-free stations and thousands of playlists for any genre or activity, created by Apple music editors and expert curators with a passion for music.

Nonmembers can use the Apple Music app to listen to their own music stored on iPhone, play and download previous iTunes purchases, and listen to live Beats 1 radio shows for free.

**Join Apple Music.** You can join Apple Music when you first open Music, or later in Settings > Music > Join Apple Music.

Individual, family, or student memberships are available.

*Individual membership:* Get access to the full Apple Music library, expert recommendations, and on-demand radio stations.

*Family membership:* Up to six people can enjoy unlimited access to Apple Music on their devices.

*Student membership:* Have complete access to Apple Music, with personalized recommendations, the best new music, and more at a price designed for students.

If you're a student at a qualifying school, you can join Apple Music for a discounted membership price for up to 48 months (4 years). The time needn't be continuous. Student memberships aren't available in all locations.

**Note:** If you end your Apple Music membership, you can no longer stream Apple Music tracks or play Apple Music tracks you've downloaded.

**Show or hide Apple Music.** Go to Settings > Music, then turn Show Apple Music on or off.

**Use cellular data.** Go to Settings > Music > Cellular Data, where you can choose to stream and download music over a cellular connection. Turn on High Quality Streaming to always stream music at the highest quality.

**Note:** High Quality Streaming uses more cellular data, and songs may take longer to start playing.

## Get personalized recommendations

Apple Music can suggest songs you might enjoy, with a little guidance about your favorite kinds of music.

**Select your favorite genres and artists.** When you first tap For You, you're asked to tell Music about your preferences. Tap the genres you like. (Double-tap those you love, and touch and hold the genres you don't care for.) Tap Next, then do the same with the artist names that appear. Apple Music uses these preferences when recommending music to you.

**Update genre and artist preferences.** Tap For You, tap , then tap Choose Artists For You.

## Library

The Library tab includes any added or downloaded music from Apple Music, music and music videos synced to iPhone, iTunes purchases, and the music you make available through iTunes Match.

**Browse and play your music.** Tap a category, such as Playlists or Albums, touch and hold the album art, then tap  to play. Tap the MiniPlayer to show the Now Playing screen.

**3D Touch.** Press the album art, then tap  to play. See [3D Touch](#).

**Sort albums and songs.** Go to Settings > Music to sort albums or songs by artist or title.

**View more categories.** In the Library tab, tap Edit, then select additional categories.

**View only music stored on iPhone.** In the Library tab, tap Downloaded Music.

**Play music shared on a nearby computer.** If a computer on your network shares music through iTunes Home Sharing, tap the Library tab, tap Home Sharing, then choose a shared library.

**Remove Apple Music tracks from iCloud Music Library.** Go to Settings > Music, then turn off iCloud Music Library to remove Apple Music tracks from iPhone (it remains in iCloud). Music you purchased or synced, and music identified by iTunes Match that you downloaded, remains.

## Add Apple Music

**Add music from Apple Music to your library.** Do one of the following:

Touch and hold a song, album, playlist, or video, then tap Add to Library.

**3D Touch.** Press the item, then choose Add to Library. See [3D Touch](#).

When viewing the contents of an album or playlist, tap Add to add it, or tap + to add individual tracks.

**3D Touch.** Press the MiniPlayer, then choose Add to Library.

On the Now Playing screen, tap +.

Music you add to iPhone is also added to other devices where you're signed in to iCloud using the same Apple ID.

**Note:** You must turn on iCloud Music Library (go to Settings > Music) to add Apple Music to your library. Apple Music that you add to your library plays only when you have a Wi-Fi or cellular connection. To play music when you're not connected to the Internet, you must download it to iPhone. See [Download music](#).

**Add music to a playlist.** Touch and hold an album, playlist, track, or music video. Tap Add to a Playlist, then choose a playlist.

**3D Touch.** Press the album, playlist, track, or music video. Tap Add to a Playlist, then choose a playlist. See [3D Touch](#).

The first time you tap Add to Playlist, you can choose to automatically add songs to your library when you add them to a playlist. If you do this, the songs are also added automatically to your library on devices where you're signed in with the same Apple ID. Go to Settings > Music > Add Playlist Songs to turn this setting on or off.

**Delete music from Library.** Touch and hold the song, album, playlist, or music video, then tap Delete from Library.

**3D Touch.** Press the album or song, then tap Delete from Library. See [3D Touch](#).

## Download music

**Download music from Apple Music.** After adding a track, album, or playlist, tap . See [Add Apple Music](#).

**Note:** You must turn on Settings > Music > iCloud Music Library to add and download Apple Music to your library.

**Always download Apple Music.** Go to Settings > Music, then turn on Automatic Downloads.

**Download iTunes Match music.** If you have an iTunes Match subscription, your iTunes Match library is available in your library; you don't need to add it. To download it, tap Library, choose a category, select an album, playlist, or song, then tap .

**See download progress.** On the Library screen, tap Downloaded Music > Downloading.

**Limit music storage.** If iPhone is low on storage space, you can automatically remove downloaded music that you haven't played in a while. Go to Settings > Music > Optimize Storage, then choose a minimum amount of music storage.

**Remove music stored on iPhone.** Touch and hold the song, album, playlist, or music video. Tap Remove, then tap Remove Downloads. The item is removed from iPhone, but not from iCloud Music Library.

**3D Touch.** Press the song or album, then tap Remove. See [3D Touch](#).

To remove all songs or certain artists from iPhone, go to Settings > Music > Downloaded Music, tap Edit, then tap  next to All Songs or the artists whose music you want to delete.

## Search for music

**Search Apple Music.** Tap Search, then tap a recent or trending search. To search for specific music, tap the search field, tap Apple Music, then enter a song, album, playlist, artist, compilation, or genre. Tap a result to play it.

**Search your library.** Tap Search, tap the search field, tap Your Library, then enter a song, album, playlist, or artist. Tap a result to play it.

## Play music

**Control playback.** Tap a song to play it and show the MiniPlayer. Tap the MiniPlayer to show the Now Playing screen, where you can do the following:

Tap ►► to skip to the next song.

Tap ◀◀ to return to the song's beginning.

Double-tap ◀◀ to play the previous song in an album or playlist.

**Skip to any point in a song.** Drag the playhead.

**Share music.** Tap ●●●, then tap Share Song.

**Shuffle.** Swipe up, then tap  to play your songs in random order. Tap again to turn off shuffle.

When viewing the contents of a playlist or album, tap Shuffle All.

**Repeat.** Swipe up, then tap  to repeat an album or playlist. Double-tap  to repeat a single song.

**Add the song to your library.** Tap .

**See lyrics.** Swipe up to see Lyrics, then tap Show to see them. Tap Hide to hide them.

**More.** Tap  for additional options.

**See what's up next.** Swipe up. Tap a song to play it and the songs that follow. Drag  to reorder the list.

**Get audio controls from the Lock screen or when using another app.** Swipe up from the bottom edge of the screen to open Control Center, then swipe left. See [Control Center](#).

**Stream music to a Bluetooth or AirPlay-enabled device.** Tap  in Now Playing, then choose a device. See [Bluetooth devices](#) and [AirPlay Mirroring](#).

**Quickly navigate to the album.** Tap the track, artist, or album name in Now Playing.

**Hide Now Playing.** Tap  at the top of Now Playing.

**3D Touch.** On the Home screen, press the Music icon, then choose a quick action. See [3D Touch](#).

## For You

Discover expertly selected playlists and albums based on your tastes.

**Play music selected for your tastes.** Tap For You, touch and hold an album or playlist, then tap  to play it. Tap an album or a playlist's album art to view its contents.

**3D Touch.** Press an album or playlist, then tap  to play it. See [3D Touch](#).

**Tell Apple Music what you love.** Touch and hold an album or playlist, then tap Love or Dislike. On the Now Playing screen, or when viewing the contents of an album or playlist, tap , then tap Love or Dislike. Telling Music what you do and don't like improves future recommendations.

**Reorder a playlist.** Play the playlist, tap the MiniPlayer to show the Now Playing screen, swipe up to show Up Next, then drag  to rearrange the song order.

**Quickly identify an album's most-played tracks.** Some albums have a ★ next to the most popular tracks.

**Do more with your music.** Touch and hold an album or playlist to play it, add it to your library, love or dislike it, and more. Touch and hold an album to create a station based on its contents.

**3D Touch.** Press an album or playlist to see options. See [3D Touch](#).

## Playlists

**Create playlists to organize your music.** Tap Library, tap Playlists, then tap New Playlist. Enter a title and description, tap Add Music, then select music to add to the playlist.

You can also tap  in a track list or, on the Now Playing screen, tap Add to a Playlist, then tap New Playlist.

**Customize your playlist's artwork.** Tap Edit, tap , then take a photo or choose an image from your photo library.

**Share a playlist.** Touch and hold a playlist, then tap Share Playlist.

**3D Touch.** Press a playlist, then tap Share Playlist. See [3D Touch](#).

**Create a public playlist.** Select a playlist, tap Edit, then turn on Public Playlist.

**Edit a playlist you created on iPhone.** Select the playlist, then tap Edit.

*Add more songs:* Tap a playlist, tap Edit, tap Add Music, then choose music from your library.

*Delete a song:* Tap a playlist, tap Edit, tap , then tap Delete. Deleting a song from a playlist doesn't delete it from iPhone.

*Change the song order:* Drag .

New and changed playlists are added to iCloud Music Library and appear on all your devices if you're an Apple Music member or iTunes Match subscriber. If you're not a member or subscriber, they're copied to your music library the next time you sync iPhone with your computer.

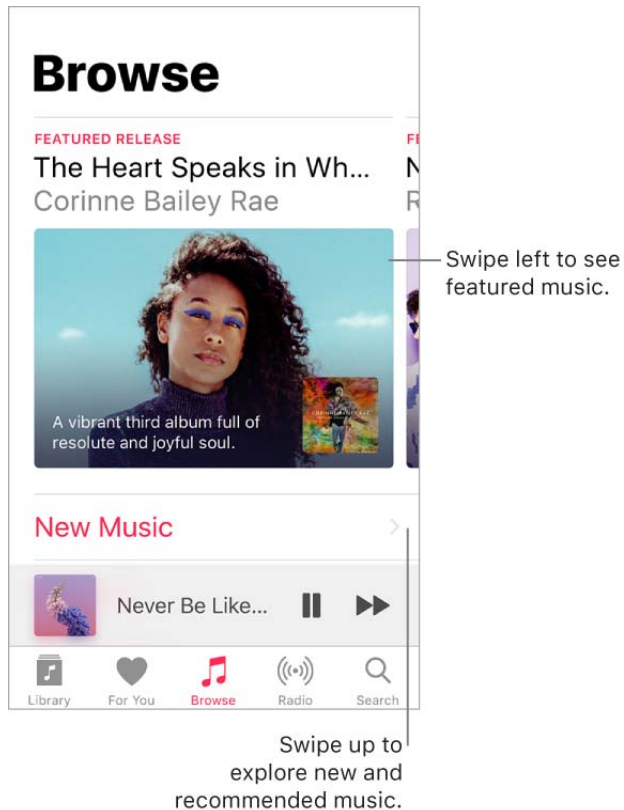

**Delete a playlist you created on iPhone.** Touch and hold the playlist, then tap Delete from Library.

**3D Touch.** Press a playlist, then tap Delete from Library. See [3D Touch](#).

## Browse

Get recommendations for today's best music from music experts.

**Explore new music.** Tap the Browse tab, then tap New Music.

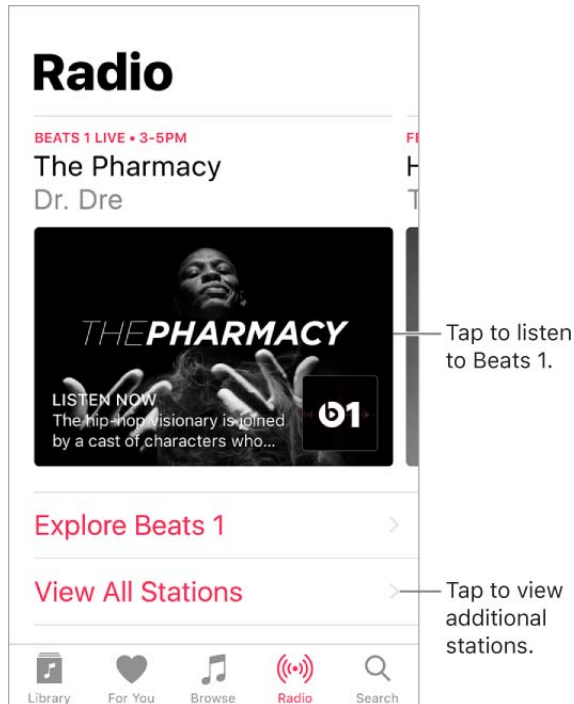

**Browse expert recommendations.** Tap Curated Playlists, then choose a playlist, activity or mood, curator, or genre.

**See what's hot.** Tap Top Charts, then choose a song, album, or music video.

**Browse your favorite genres.** Tap Genres, choose a genre, then tap a featured album, song, artist, playlist, or music video to enjoy music handpicked by music experts.

## Radio

Radio offers the always-on Beats 1, featuring world-class radio programming, the latest music, and exclusive interviews with popular artists. You can listen to featured stations created by music experts in virtually every genre. And you can create custom stations from songs or artists of your choosing.

Tap to listen to Beats 1.

Tap to view additional stations.

**Listen to live radio.** Tap the currently playing Beats 1 program.

**Note:** Because Beats 1 is live radio, you can't pause, rewind, or skip tracks.

**Listen to past shows and find out when your favorite shows are on.** Tap Explore Beats 1, then tap a show or DJ.

**Listen to your favorite music genre.** Tap View All Stations, then tap a genre or featured station. If you already listened to a station, tap a recently played station on the Radio screen.

**Create a station.** Touch and hold an artist or song, then tap Create Station.

**3D Touch.** Press an artist or song, then tap Create Station. See [3D Touch](#).

## iTunes Match

With an iTunes Match subscription, all your music can be stored in iCloud—even songs you've imported from CDs. You can access your music from all your devices and listen to your entire library wherever you are. To learn more about iTunes Match, see the Apple Support article [Subscribe to iTunes Match](#).

**Subscribe to iTunes Match.** Go to Settings > Music > Subscribe to iTunes Match.

**Turn on iTunes Match.** Go to Settings > iTunes & App Store. Sign in if you haven't already. Go to Settings > Music, then turn on iCloud Music Library.

## Siri and Voice Control

You can use Siri or Voice Control to control music playback. See [Make requests](#) and [Voice Control](#).

Siri can also help you find music in the iTunes Store. See "Find it with Siri" in [Browse or search](#).

**Use Siri.** Press and hold the Home button. In addition to the commands available through Voice Control, you can use Siri to do the following:

*Play an album, artist, song, playlist, or radio station:* Say "play" followed by the name of the artist, album, song, playlist, or station that you want to play. If Siri doesn't find what you asked for, be more specific. For example, say "play the radio station 'Pure Pop'" rather than saying "play 'Pure Pop.'"

*Play music in random order:* Say "play (artist or album) shuffled."

*Play similar music:* While music is playing, say "play more songs like this one" or "create a radio station based on this song."

*Browse Apple Music:* You can play any Apple Music track by title ("play 'Smooth Sailing' by Leon Bridges"), by artist ("play M. Ward"), and by chart ("play the top song from March 1991").

*Choose music by mood:* Say something like "play something happy" or "play some upbeat music."

*Make personalized requests:* Say something like "be my DJ," "play something that I would like," "play recommended music," "play a Mutemath album that I'd love," or "play my daily playlist."

*Ask for more information:* Ask something like “when was this album released,” “what is Santigold’s most popular album” or “who sings ‘Used To.’”

*Add music from Apple Music to your collection (Apple Music membership required):* Say, for example, “add ‘This is Acting’ by Sia to my Library” or, while playing something, say “add this to my collection.”

*Correct Siri:* If Siri doesn’t play what you expect to hear, say something like “no, the album” or “no, the version by David Bowie.”

**Use Voice Control.** Press and hold the Home button. Voice Control only works when Siri is disabled.

*Play or pause music:* Say “play music.” To pause, say “pause,” “pause music,” or “stop.” You can also say “next song” or “previous song.”

*Play an album, artist, or playlist:* Say “play album,” “play artist,” or “play playlist” followed by the name of the artist, album, or playlist you wish to play.

*Find out more about the current song:* Say “what’s playing,” “who sings this song,” or “who is this song by.”

## Sound Check, EQ, and volume limit settings

**Turn Sound Check on or off.** Go to Settings > Music > Sound Check. Sound Check normalizes the volume level of your audio.

**Choose an equalization (EQ) setting.** Go to Settings > Music > EQ. EQ settings generally apply only to music played from the Music app, but they affect all sound output.

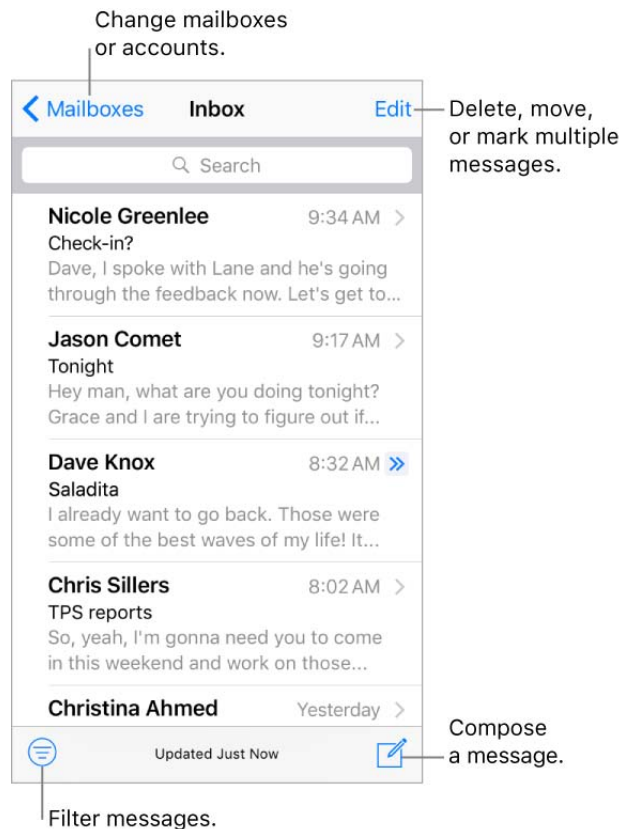

**Set a volume limit.** Go to Settings > Music > Volume Limit.

**Note:** To prevent changes to the volume limit, go to Settings > General > Restrictions > Volume Limit, then tap Don’t Allow Changes.

# Mail

## Write messages

**WARNING:** For important information about avoiding distractions that could lead to dangerous situations, see [Important safety information](#).

**Create a message.** Tap . Touch and hold to view draft messages you've saved.

**3D Touch.** To create a new message from the Home screen, press Mail, then choose the New Message quick action. See [3D Touch](#).

**Ask Siri.** Say something like:

"New email to Jonah Schmidt"

"Email Simon and say I got the forms, thanks"

**Add attachments.** Double-tap in the message body, tap Add Attachment, then select files from iCloud Drive.

**Insert a photo or video.** Double-tap in the message body, then tap Insert Photo or Video.

**Quote some text when you reply.** Tap the insertion point, then select the text you want to include. Tap ↩, then tap Reply. To turn off the indentation of the quoted text, go to Settings > Mail > Increase Quote Level.

**Send a message from a different account.** Tap the From field to choose an account.

**Change a recipient from Cc to Bcc.** After you enter recipients, you can drag them from one field to another or change their order.

**Mark addresses outside certain domains.** When you're addressing a message to a recipient that's not in your organization's domain, Mail can color the recipient's name red to alert you. Go to Settings > Mail > Mark Addresses, then define the domains that you don't want marked. You can enter multiple domains separated by commas, such as "apple.com, example.org."

**Add additional mail accounts.** Go to Settings > Mail > Accounts, then tap Add Account.

**Change your mail signature.** Go to Settings > Mail > Signature. If you have more than one mail account, you can set a different signature for each of them.

**Automatically send a copy to yourself.** Turn on Settings > Mail > Always Bcc Myself.

## Preview your messages

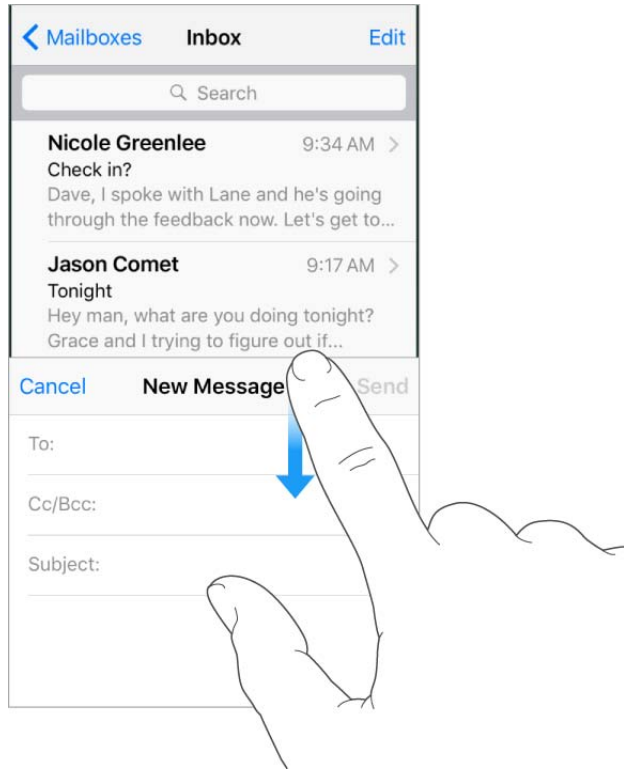

**3D Touch.** Press a message to peek at it, then swipe up, left, or right to use quick actions. Press a little deeper to pop the message open. See [3D Touch](#).

**See a longer preview.** Go to Settings > Mail > Preview. You can show up to five lines.

**Is this message for me?** Go to Settings > Mail, then turn on Show To/Cc Label. If the label says Cc instead of To, you were just copied. You can also use the To/Cc mailbox, which gathers all mail addressed to you. To show or hide it, tap Mailboxes, then tap Edit.

## Finish a message later

**Look at another message while you're writing one.** Swipe down on the title bar of a message you're writing. When you're ready to return to your message, tap its title at the bottom of the screen. If you have more than one message waiting to be finished, tap the bottom of the screen to see them all.

**Save a draft for later.** If you're writing a message and want to finish it later, tap Cancel, then tap Save Draft. To get it back, touch and hold .

With OS X v10.10 or later, you can also hand off unfinished messages with your Mac. See [Continuity](#).

## See important messages

**Get notified of replies to a message or thread.** While reading a message, tap , then tap Notify Me. While you're writing a message, tap  in the Subject field. To change how notifications appear, go to Settings > Notifications > Mail > Thread Notifications.

**Gather important messages.** Add important people to your VIP list, so all their messages appear in the VIP mailbox. Tap the sender's name in a message, then tap Add to VIP. To change how notifications appear, go to Settings > Notifications > Mail > VIP.

**Ask Siri.** Say something like: "Any new mail from Natalia today?"

**Flag a message so you can find it later.** Tap  while reading the message. To change the appearance of the flagged message indicator, go to Settings > Mail > Flag Style. To see the Flagged mailbox, tap Edit while viewing the Mailboxes list, then tap Flagged.

**Search for a message.** Scroll to or tap the top of the message list to reveal the search field. Searching looks at the address fields, the subject, and the message body. To search multiple accounts at once, search from a smart mailbox, such as All Sent.

**Search by timeframe.** Scroll to or tap the top of the messages list to reveal the search field, then type something like “February meeting” to find all messages from February with the word “meeting.”

**Search by message state.** To find all flagged, unread messages from people in your VIP list, type “flag unread vip.” You can also search for other message attributes, such as “attachment.”

**Junk, be gone!** Tap  while you’re reading a message, then tap Move to Junk to file it in the Junk folder. If you accidentally move a message, shake iPhone immediately to undo.

**Make a mailbox a favorite.** Favorite mailboxes appear at the top of the Mailboxes list so you can access them easily. To designate a mailbox as a favorite, tap Edit while viewing the Mailboxes list. Tap Add Mailbox, then select the mailboxes to add.

**Show draft messages from all of your accounts.** While viewing the Mailboxes list, tap Edit, tap Add Mailbox, then turn on the All Drafts mailbox.

## Delete messages

**View then delete a message.** Tap a message to open it. To delete it, tap . To turn the confirmation of deletion on or off, go to Settings > Mail > Ask Before Deleting.

**Delete a message with a swipe.** While viewing a list of messages, swipe a message to the left to reveal a menu of actions, then tap Trash. Or, to delete a message in a single gesture, swipe it all the way to the left.

**Delete multiple messages at once.** While viewing a list of messages, tap Edit, select some messages, then tap Trash. If you change your mind, shake iPhone immediately to undo.

**Recover a deleted message.** Go to the account’s Trash mailbox, open the message, then tap  and move the message. Or, if you just deleted it, shake iPhone to undo. To see deleted messages across all your accounts, add the Trash mailbox. To add it, tap Edit in the mailboxes list, then select it in the list.

**Archive instead of delete.** Instead of deleting messages, you can archive them so they're still around, in the Archive mailbox, if you need them. To turn this option on, select Archive Mailbox in Settings > Mail > Accounts > [account name] > Advanced. Then, to delete a message instead of archiving it, touch and hold , then tap Delete.

**Stash your trash.** You can set how long deleted messages stay in the Trash mailbox. Go to Settings > Mail > Accounts > [account name] > Advanced > Remove. Some email services might override your selection; for example, iCloud doesn't keep deleted messages longer than 30 days, even if you select Never.

## Attachments

**Preview an attachment.** Touch and hold an attachment, then tap Quick Look.

**3D Touch.** Press an attachment to preview it, press deeper to open it using Quick Look. See [3D Touch](#).

**Save a photo or video to Photos.** Touch and hold the photo or video, then tap Quick Look. Tap , then tap Save Image.

**Mark up attachments.** You can use Markup to annotate an image or PDF attachment. Touch and hold the attachment, then tap Markup (if it's an attachment you're sending) or "Markup and Reply" (if it's an attachment you've received).

**Open an attachment with another app.** Touch and hold the attachment until a menu appears, then tap the app you want to use to open the attachment. Some attachments automatically show a banner with buttons you can use to open other apps.

**See messages with attachments.** Tap  to turn on filtering, then tap “Filtered by” and turn on “Only Mail with Attachments.” You can also use the Attachments mailbox, which shows messages with attachments from all accounts. To add it, tap Edit while viewing the Mailboxes list.

**Add an attachment.** See [Write messages](#).

**Send large attachments.** Mail Drop lets you send files that exceed the maximum size allowed by your email account. Tap Send when you’re ready to send a message with large attachments, then follow the onscreen instructions to use Mail Drop.

## Work with multiple messages

**Move or mark multiple messages.** While viewing a list of messages, tap Edit. Select some messages, then choose an action. If you change your mind, shake iPhone immediately to undo.

**Manage a message with a swipe.** While viewing a list of messages, swipe a message to the left to reveal a menu of actions. Swipe all the way to the left to select the first action. You can also swipe a message to the right to reveal another action. Choose the actions you want to appear in the menus at Settings > Mail > Swipe Options.

**Organize your mail with mailboxes.** Tap Edit in the mailboxes list to create a new one, or rename or delete one. (Some built-in mailboxes can’t be changed.) There are several smart mailboxes, such as Unread, that show messages from all your accounts. Tap the ones you want to use.

**See the whole conversation.** Go to Settings > Mail, then turn on Organize by Thread. Swipe left or right on a message in a thread to reveal actions. To change how threads are displayed, go to Settings > Mail. To change the swipe settings, go to Settings > Mail > Swipe Options.

**Filter messages.** Tap  to hide messages that don’t match the current filter. Tap again to turn the filter off. To set up the filter, tap  to turn on filtering, then tap “Filtered by.” You can filter by read or flagged status, by messages addressed to you, messages from VIPs, and other criteria.

## See and save addresses

**See who received a message.** While viewing the message, tap More in the To field.

**Add someone to Contacts or make them a VIP.** Tap the person's name or email address, then tap Add to VIP. You can also add the address to a new or existing contact.

## Print messages

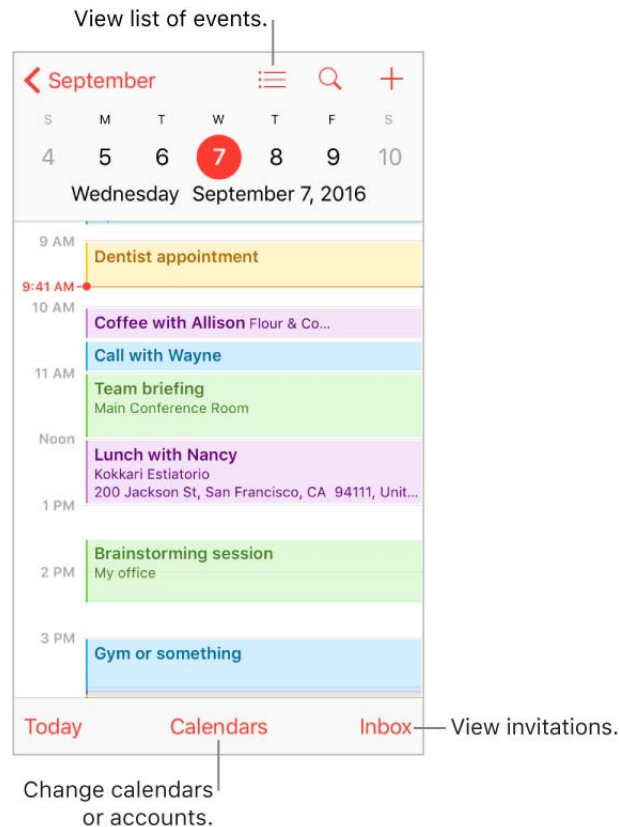

**Print a message.** Tap , then tap Print.

**Print an attachment or picture.** Tap to view it, tap , then choose Print.

See [AirPrint](#).

# Calendar

## Calendar at a glance

**Ask Siri.** Say something like:

“Set up a meeting with Barry at 9.”

“Do I have a meeting at 10?”

“Where is my 3:30 meeting?”

**Add an event.** In day view, touch and hold a time until a new event appears, then fill in the event details. If you add the address of the event’s location, you’re reminded in time to leave from your current location, based on traffic conditions.

**3D Touch.** Press Calendar, then choose the New Event quick action. See [3D Touch](#).

**Search for events.** Tap , then enter text in the search field. The titles, invitees, locations, and notes for the calendars you’re viewing are searched.

**Ask Siri.** Say something like: “What’s on my calendar for Friday?”

**View a weekly calendar.** Rotate iPhone sideways.

**Change your view.** Tap a year, month, or day to zoom in or out on your calendar. In week or day view, pinch to zoom in or out.

**3D Touch.** In the monthly calendar, press a date to peek at that day's schedule. Then press deeper to pop open the schedule.

**View a list of events.** In month view, tap  to see a day's events.

**Change the color of a calendar.** Tap Calendars, tap  next to the calendar, then choose a color from the list. For some calendar accounts, such as Google, the color is set by the server.

**Adjust an event.** Touch and hold the event, then drag it to a new time, or adjust the grab points.

**Ask Siri.** Say something like: "Reschedule my appointment with Barry to next Monday at 9 a.m."

**Set a default calendar.** Go to Settings > Calendar > Default Calendar. When you add an event using Siri or using other apps, it's added to your default calendar.

**Fine-tune Calendar.** Go to Settings > Calendar where you can set which day of the week calendar starts with, display week numbers, use Hebrew dates, override the automatic time zone, and more.

## Invitations

iCloud, Microsoft Exchange, and some CalDAV servers you can send and receive meeting invitations. (Not all calendar servers support every feature.)

**Invite others to an event.** You can invite people to an event, even if you're not the one who scheduled it, with Exchange and some other servers. Tap an event, tap Edit, then tap Invitees. Type names, or tap  to pick people from Contacts. If you don't want to be notified when someone declines a meeting, go to Settings > Calendar, then turn off Show Invitee Declines.

**RSVP.** Tap an event you've been invited to, or tap Inbox and tap an invitation. If you add comments (which may not be available for all calendars), your comments can be seen by the organizer but not by other attendees. To see events you declined, tap Calendars, then turn on Show Declined Events.

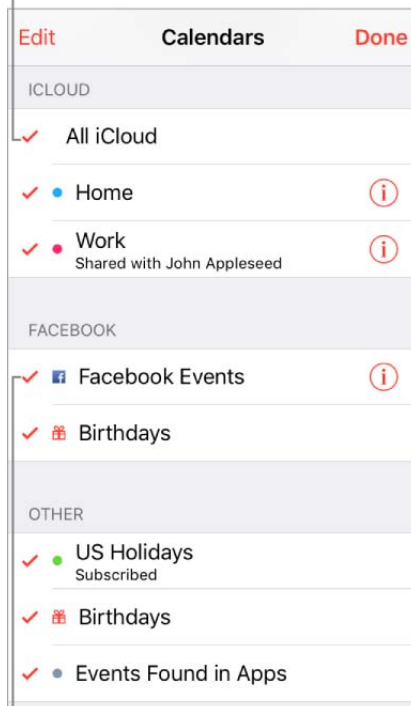

**Schedule an event without blocking your schedule.** Tap the event, tap Availability, then tap “free.” Or if it’s an event you created, tap Show As, then tap “free.” The event stays on your calendar, but the timeframe doesn’t appear as busy to others who send you invitations.

**Quickly send an email to attendees.** Tap the event, tap Invitees, then tap .

**Suggest a different meeting time.** You can suggest a different time for a meeting invitation you’ve received. Tap the meeting, then tap Propose New Time. Depending on the capabilities of your calendar server, the organizer will receive either a counter-proposal or an email with your suggestion.

## Use multiple calendars

Select which calendars to view.

Turn on Facebook Events in Settings > Facebook.

**See multiple calendars at once.** Tap Calendars, then select the calendars you want to view.

**Turn on iCloud, Google, Exchange, or Yahoo! calendars.** Go to Settings > Calendar, tap Accounts, then turn a calendar on or off.

**Subscribe to a calendar.** Go to Settings > Calendar > Accounts > Add Account > Other, then tap Add Subscribed Calendar. Enter the server and filename of the .ics file to subscribe to. You can also subscribe to an iCalendar (.ics) calendar published on the web, by tapping a link to the calendar.

**Add a CalDAV account.** Go to Settings > Calendar > Accounts > Add Account > Other, then tap Add CalDAV account.

**Add a macOS Server account.** Go to Settings > Calendar > Accounts > Add Account > Other, then tap Add macOS Server Account.

**View the Birthdays calendar.** Tap Calendars, then tap Birthdays to include birthdays from Contacts with your events. If you set up a Facebook account in Settings, you can also include your Facebook friends' birthdays.

**View the Holidays calendar.** Tap Calendars, then tap Holidays to include national holidays with your events.

**View events sent to you in Mail or other apps.** Tap Calendars, then tap Events Found in Apps.

**Change how Calendar notifies you.** Go to Settings > Notifications > Calendar. You can change notification styles for invitations, events found in apps, upcoming events, and more.

**Move an event to another calendar.** Tap the event, tap Edit, tap Calendars, then select a calendar to move it to.

## Share iCloud calendars

With Family Sharing, a calendar shared with all the members of your family is created automatically. See [Family Sharing](#). You can also share an iCloud calendar with other iCloud users so they can view, add, and change events, and share a read-only version that anyone can view.

**Create an iCloud calendar.** Tap Calendars, tap Edit, then tap Add Calendar in the iCloud section.

**Share an iCloud calendar.** Tap Calendars, tap Edit, then tap the iCloud calendar you want to share. Tap Add Person, then enter a name, or tap  to browse your Contacts. Those you invite receive an email invitation to join the calendar.

**Change a person's access to a shared calendar.** Tap Calendars, tap Edit, tap the shared calendar, then tap the person. You can turn off their ability to edit the calendar, resend the invitation to join the calendar, or stop sharing the calendar with that person.

**Turn off notifications for shared calendars.** When someone modifies a shared calendar, you're notified of the change. To turn off notifications for shared calendars, go to Settings > Notifications > Calendar > Shared Calendar Changes.

**Share a read-only calendar with anyone.** Tap Calendars, tap Edit, then tap the iCloud calendar you want to share. Turn on Public Calendar, then tap Share Link to copy or send the URL for your calendar. Anyone can use the URL to subscribe to the calendar using a compatible app, such as Calendar for macOS.

# Photos

## Photos at a glance

With the Photos app you can view, organize, share, and edit photos and videos:

Taken with Camera on iPhone

Stored in iCloud (see [iCloud Photo Library](#))

Shared by others (see [iCloud Photo Sharing](#))

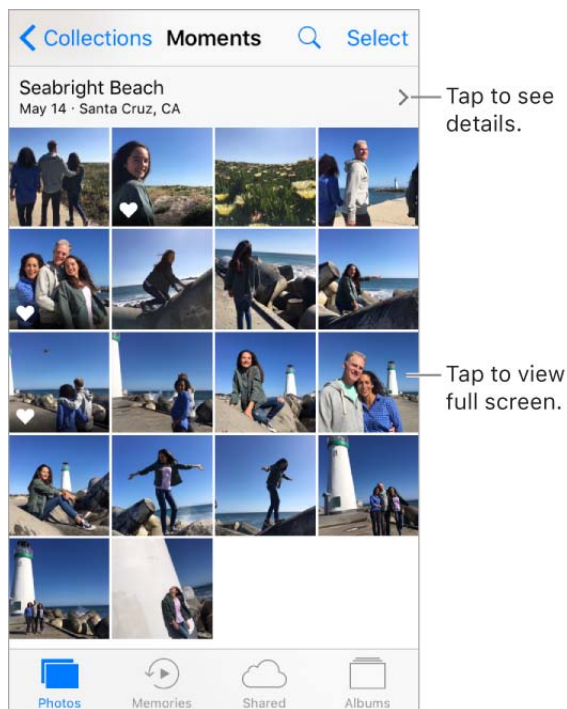

Synced from your computer (see [Sync with iTunes](#))

Saved from an email, text message, webpage, or screenshot

Imported from your camera

You can also have Photos create quick movies from the photos and videos in your library (see [Memories](#)).

Memories isn't available on iPhone 5.

The Photos app includes Photos, Memories, Shared, and Albums. Use the tabs at the bottom of Photos to view and work with your photos:

Tap Photos to see all your still photos, Live Photos, and videos, organized by Years, Collections, and Moments. To quickly browse the photos in a collection or year, touch and hold a thumbnail, then drag.

Tap Memories to view photos and videos based on related dates, places, people, and more. See [Memories](#).

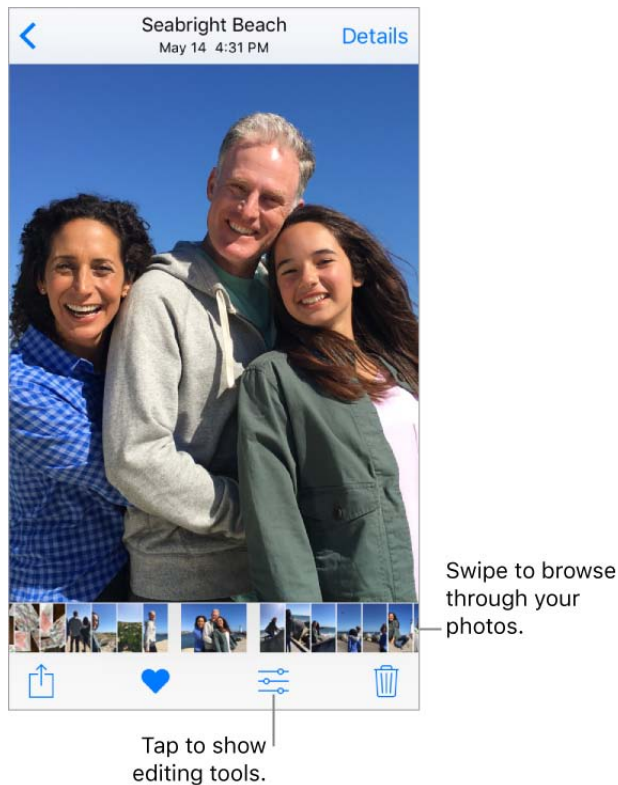

Tap Shared to see photos and videos you shared with others or that others shared with you. See [iCloud Photo Sharing](#).

Tap Albums to create and view your albums. See [Organize photos and videos](#).

## View photos and videos

**Browse your photos and videos.** Tap Photos, then tap a photo. While viewing a photo, swipe the thumbnails to browse photos, then tap a thumbnail to view a photo. Drag down the photo to continue browsing Moments or Albums.

**Note:** By default, Photos displays a representative subset of your photos when you view by year or by collection in the Photos tab. To see all your photos and videos, go to Settings > Photos & Camera, then turn off Summarize Photos.

**3D Touch.** Press the thumbnail in a collection or album to peek at a photo or video. Swipe up to see a list of quick actions, or press a little deeper to pop open the photo or video to full screen. See [3D Touch](#).

**Play a Live Photo.** If you take a Live Photo on iPhone 6s and later, or if you receive a Live Photo via iMessage, iCloud Photo Sharing, or AirDrop, you can bring it to life on your iPhone (iOS 9 or later required). In full screen, press the Live Photo (touch and hold on devices without 3D Touch). See [3D Touch](#).

If someone shares a Live Photo with you via email, you receive it as a 12 MP still image. (A Live Photo, which can be taken on some models of iPhone and iPad, captures the moments just before and after a picture is taken.)

**Note:** On devices that support 3D Touch, you can also use a Live Photo as the wallpaper on the Lock screen. See [Change the wallpaper](#).

**Make a still photo from a Live Photo.** View the Live Photo, tap , tap , then tap Duplicate as Still Photo.

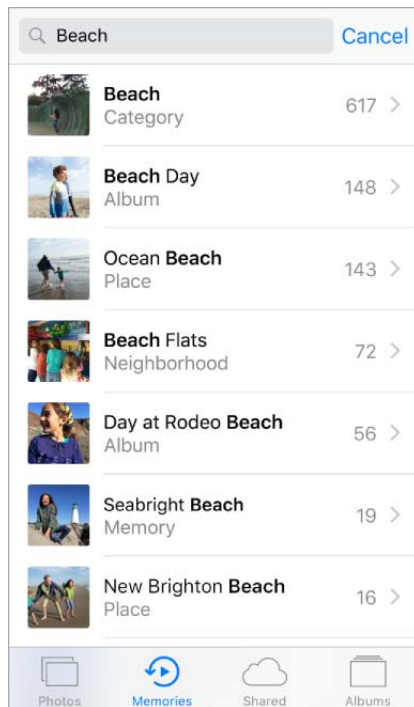

**View photo and video details.** Tap a photo or video, then tap Details, or swipe up, to see:

Related memories. See [Memories](#).

People identified by Photos. See [People](#).

If available, the location where the photo or video was taken and a link to photos and videos taken nearby. See [Places](#).

**Search photos.** From Photos, Memories, or Albums, tap  to search by date (month and year), place (city and state), category (beach or sunset, for example), or person (Addie or Jules, for example).

**Ask Siri.** Say something like:

“Show me photos from July”

“Show me photos of California”

“Show me photos of the beach”

“Show me photos of Alex”

**Zoom in or out.** Double-tap or pinch a photo open or closed. Drag to see other parts of the photo.

**Play a video.** Tap ►. To toggle between full screen and fit-to-screen, double-tap the screen.

**Play a slideshow.** While viewing a photo or video, tap ↗, then tap Slideshow. To stop the slideshow, tap the screen, then tap Options to specify a slideshow theme, music, and more.

To stream a slideshow or video to a TV, see [AirPlay Mirroring](#).

## Organize photos and videos

The Albums tab includes albums you create yourself and albums that are created for you, depending on how you use Photos. For example, photos you take with the FaceTime camera are automatically added to the Selfies album. Other albums that Photos creates include People, Places, Videos, Panoramas, Slo-mo, Bursts, and Screenshots.

If you use iCloud Photo Library, all your photos in iCloud are in the All Photos album (see [iCloud Photo Library](#)). Otherwise, you see the Camera Roll album, which includes photos and videos you took with iPhone and from other sources.

If you use iCloud Photo Library, albums are stored in iCloud. They're up to date and accessible on devices where you're signed in to iCloud with the same Apple ID—iOS devices with 8.1 or later, Mac computers with OS X v10.10.3 or later, and on [iCloud.com](#).

**Create a new album.** Tap Albums, tap +, enter a name, then tap Save. Select photos and videos, then tap Done.

**Add items to an existing album.** While viewing photo thumbnails, tap Select, select items, tap Add To, then select the album.

**Manage albums.** While viewing your album list, tap Edit.

*Rename an album:* Tap the album name, then enter a new name.

*Rearrange albums:* Touch to enlarge the album's thumbnail, then drag it to another location.

*Delete an album:* Tap .

**Note:** You can't delete albums that Photos creates for you, such as People, Places, and Selfies.

**Mark your favorites.** While viewing a photo or video, tap  to add it to the Favorites album. A photo or video can be part of another album as well as Favorites.

**Hide photos or videos you want to keep but not show.** While viewing thumbnails, tap Select, then select the photos or videos you want to hide. Tap , then tap Hide. The photos or videos are moved to the Hidden album.

Photos and videos are hidden from Moments, Collections, Years, and Memories, but are still visible in Albums.

**Delete a photo or video from Photos.** Tap Photos, tap the photo or video, tap , then tap Delete Photo or Delete Video. Deleted photos and videos are kept in the Recently Deleted album on iPhone, with a badge showing the remaining days until the item is permanently removed from iPhone. To delete the photo or video permanently before the days expire, tap the item, tap Delete, then tap Delete Photo or Delete Video. If you use iCloud Photo Library, deleted photos and videos are permanently removed from all your devices using iCloud Photo Library with the same Apple ID.

**Recover a deleted photo or video.** In the Recently Deleted album, tap the photo or video, tap Recover, then tap Recover Photo or Recover Video to move the item to the Camera Roll or, if you use iCloud Photo Library, to the All Photos album.

To recover multiple photos and videos, tap the Recently Deleted album, tap Select, tap the photos and videos you want to recover, then tap Recover.

**Remove a photo or video from an album.** Tap the photo or video, then tap . You can choose to remove it from the album or delete it from your iCloud Photo Library on all your devices.

## Memories

Photos scans your library to create collections of photos and videos called *memories*. Memories also include Memory movies, which are set to music. You can keep them and share them with others. (Memories created from albums that don't have enough photos and videos won't generate a Memory movie.) You can also make a Memory movie from albums you create. Memories can focus on:

Locations, such as a favorite vacation spot or your neighborhood

Special events, such as birthdays and holidays

Scenes, such as the beach or forest

Pictures of family and friends

**Play a Memory movie.** Tap Memories, tap a memory, then tap ►. To pause, tap the Memory movie, then tap ||.

**Scrub through a Memory movie.** Tap a Memory movie while it's playing to show the controls, then swipe left or right through the scrubber.

**3D Touch.** To open recent memories from the Home screen, press Photos, then tap a memory. See [3D Touch](#).

**View an album's memory.** Tap an album you created, then tap ►. To add it to Memories, swipe up, then tap Add to Memories.

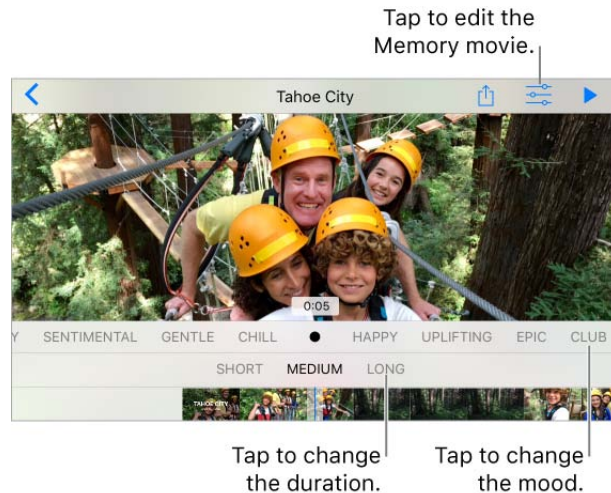

**Save a memory to the Favorite Memories album.** Touch and hold a memory, then tap Add to Favorite Memories.

**3D Touch.** Press a memory, swipe up, then tap Add to Favorite Memories.

**Create memories from holiday events.** Go to Settings > Photos & Camera, then turn on Show Holiday Events.

**Change the mood.** Tap a Memory movie while it's playing, then tap a mood or swipe the moods left or right to choose a new one. (Each mood includes a distinct title, soundtrack, and editing style.)

**Change the duration.** Tap a Memory movie while it's playing, then tap a duration, or swipe to choose short, medium, or long. All durations may not be available for every movie.

**Customize a Memory movie.** Tap a Memory movie while it's playing, then tap  to do the following:

*Edit the title:* Tap Title, tap the title and subtitle to edit them, then choose a title style.

*Choose different music:* Tap Music, then choose music from a soundtrack or from your music library (only music you own that's stored on iPhone is available).

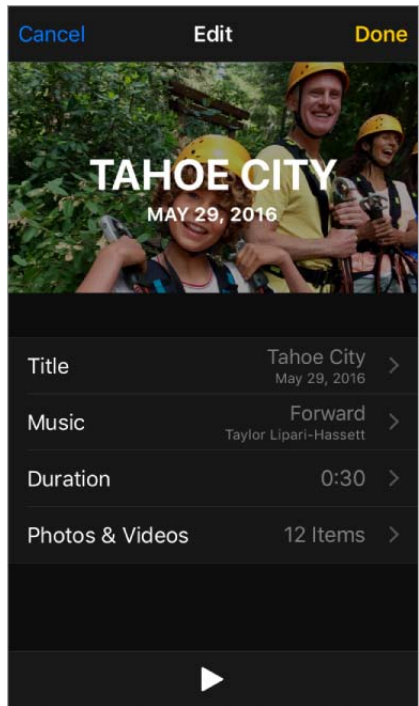

*Choose a custom duration:* Tap Duration.

*Choose photos and videos:* Tap Photos & Videos, tap , then tap the photos and videos you want in the movie. Deselect photos and videos currently in the Memory movie to remove them.

*Delete a photo or video from the Memory movie:* Tap Photos & Videos, tap a photo or video in the timeline, then tap  to remove it from the movie.

*Trim a video in the Memory movie:* Tap Photos & Videos, tap a video in the timeline, then trim the video. See [Edit photos and trim videos](#).

## People

Photos scans your photo library for people's faces and adds the most frequently found faces to the People album. You can assign names to the people Photos finds, add people who appear less frequently, mark people as favorites, and view memories that contain specific people. The more photos you have, the longer the first scan takes.

People are synced among devices where you're signed in with the same Apple ID.

**Note:** The People feature isn't available on iPhone 5.

**Add more people.** Tap Albums, tap People, tap Add People, select people to add, then tap Add.

**Merge people.** If the People album shows one person identified as two or more people, tap Select, tap each instance of the person, then tap Merge.

**Remove a misidentified person.** Tap a person in the Photos album, then tap Show All to see all photos they appear in. Tap Select, tap Show Faces, tap the misidentified face, tap , then tap Not This Person.

**Name a person.** Tap Albums, tap People, tap a person, tap Add Name, then enter the name, or tap it in the list if you see it (names in the list are from your Contacts app).

**View photos that contain a person.** Tap Albums, tap People, then tap the person.

**Mark people as favorites.** In the People album tap Select, tap one or more people, then tap Favorite. You can also drag a person to the Favorites area.

To remove favorites, tap Select, tap the people who you want to remove, then tap Unfavorite.

**Hide and unhide people.** Tap Albums, tap People, tap Select, tap the people you want to hide, then tap Hide. To unhide people, tap Show Hidden People, tap Select, tap people, then tap Unhide. Photos that contain hidden people don't appear in Moments, Collections, Years, and Memories but are visible in albums.

**Show hidden people.** Tap Albums, tap People, swipe up, then tap Show Hidden People. To view all photos with hidden people, tap Albums, then tap Hidden.

## Places

The Places album creates collections of your photos and videos based on where they were taken. Collections are displayed on a map within the album. Only pictures and videos that have embedded location information (GPS data) are included.

**View by location.** Tap Albums, tap Places, then tap a collection. Zoom in on the map to see more specific locations.

**See a list of locations.** While looking at the map, tap Grid.

**View a location in the Maps app.** While viewing a photo or video that contains location information, tap Details, then tap the location's name or address.

**View a location-based Memory movie.** Tap Albums, tap Places, tap a location that has several images, tap >, then tap ▶.

## iCloud Photo Library

iCloud Photo Library automatically uploads the photos and videos you take and stores them in their original format at full resolution in iCloud. You can access your photos and videos in iCloud Photo Library from any device where you're signed in using the same Apple ID.

Use the Photos app on iOS devices and Mac computers to open and edit your photos and videos. Any changes you make are updated on all your devices. See [Edit photos and trim videos](#).

To use iCloud Photo Library, you need a device with iOS 8.1 or later, a Mac with OS X v10.10.3 or later, or a PC with iCloud for Windows 5.

**Note:** If you turn on iCloud Photo Library, you can't use iTunes to sync photos and videos to iPhone.

**Turn on iCloud Photo Library.** Go to Settings > iCloud > Photos, or Settings > Photos & Camera.

**Optimize your storage or keep all your photos and videos in full-resolution on iPhone.** If your iCloud storage plan is over 5 GB, Optimize iPhone Storage is on by default. It manages space on your iPhone by automatically keeping your full-resolution photos and videos in iCloud and lightweight versions on your iPhone, as needed. To keep the full-resolution originals on your iPhone, go to Settings > iCloud > Photos, then tap Download and Keep Originals. Your originals are always stored in iCloud.

**Download a full-resolution photo or video.** If you're not storing full-resolution versions on iPhone, pinch to zoom in to 100%, or tap .

**Note:** To upload photos and videos to iCloud Photo Library, iPhone must be connected to Wi-Fi. Using a cellular connection, you can download up to 100 MB at a time.

If your uploaded photos and videos exceed your storage plan, you can upgrade your iCloud storage. Go to Settings > iCloud > Storage > Change Storage Plan to learn about the options.

## My Photo Stream

My Photo Stream automatically uploads your most recent photos to iCloud, so you can import them to devices that aren't using iCloud Photo Library. (My Photo Stream doesn't upload Live Photos or videos.)

Photos in My Photo Stream don't count against your iCloud storage, and they're kept for 30 days in iCloud (up to 1000 photos). Download photos to your computer or iOS device if you want to keep them permanently. For more information, see the Apple Support article [My Photo Stream FAQ](#).

**Turn My Photo Stream on or off.** Go to Settings > iCloud > Photos, or go to Settings > Photos & Camera.

**Use My Photo Stream without iCloud Photo Library.** Photos you take with iPhone are added to the My Photo Stream album when you leave the Camera app and iPhone is connected to Wi-Fi. Any photos you add—including screenshots and photos saved from

email, for example—also appear in your My Photo Stream album. Photos added to My Photo Stream on your other devices appear in your My Photo Stream album on iPhone.

**Manage My Photo Stream contents.** In the My Photo Stream album, tap Select.

*Save your best shots on iPhone:* Select the photos, then tap Add To.

*Share, print, or copy:* Select the photos, then tap .

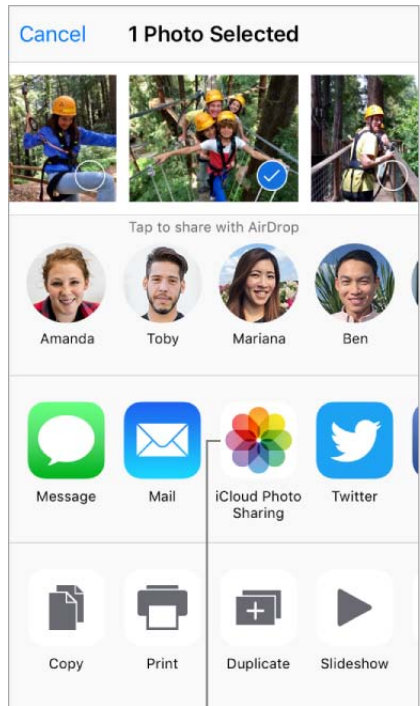

*Delete photos:* Select the photos, then tap .

**Note:** Although deleted photos are removed from My Photo Stream on all your devices, the original photos remain in Photos on the device on which they were taken. Photos that you save to another album on a device or computer also aren't deleted. See the Apple Support article [My Photo Stream FAQ](#).

## iCloud Photo Sharing

With iCloud Photo Sharing, you can invite others who are using iCloud Photo Sharing to view your photos and videos. If they're using iCloud Photo Sharing on a device with iOS 6 or later or on a Mac with OS X v10.8 or later, they can view your albums and leave comments. If they're on iOS 7 or later or OS X v10.9 or later, they can add their own photos and videos. You can also publish your album to a website for anyone to view. iCloud Photo Sharing works with or without iCloud Photo Library and My Photo Stream.

**Note:** To use iCloud Photo Sharing, iPhone must be connected to the Internet. iCloud Photo Sharing works over both Wi-Fi and cellular networks. Cellular data charges may apply. See [Cellular data settings](#).

Create new shared albums or add photos to existing ones.

**Turn on iCloud Photo Sharing.** Go to Settings > iCloud > Photos. Or go to Settings > Photos & Camera.

**Share photos and videos.** While viewing a photo or video, or after selecting multiple photos or videos, tap , tap iCloud Photo Sharing, add comments, then share to an existing shared album or create a new one. You can invite people to view your shared album using the email address or the mobile phone number they use to receive text messages.

**Enable a public website.** Tap Shared, tap an album, tap People, then turn on Public Website. Tap Share Link if you want to announce the site.

**Add items to a shared album.** Tap Shared, tap an album, tap , select items, then tap Done. You can add a comment, then tap Post.

**Delete photos from a shared album.** Tap Shared, tap an album, tap Select, select the photos or videos you want to delete, then tap . You must be the owner of the shared album or the photo.

**Delete comments from a shared album.** Tap the photo or video that contains the comment. Tap the comment area at the bottom of the screen, touch and hold the comment, then tap Delete. You must be the owner of the shared album or the comment.

**Rename a shared album.** Tap Shared, tap Edit, then tap the name and enter a new one.

**Add or remove subscribers, or turn Notifications on or off.** Select the shared album, then tap People.

**Subscribe to a shared album.** When you receive an invitation, tap the Shared tab , then tap Accept. You can also accept an invitation in an email.

**Add items to a shared album you subscribed to.** Tap Shared, tap an album, then tap . Select items, then tap Done. You can add a comment, then tap Post.

**See your Family album.** When Family Sharing is set up, a shared album called *Family* is automatically created in Photos on all family members' devices. Everyone in the family can contribute photos, videos, and comments to the album, and be notified whenever something new is added. For more information about setting up Family Sharing, see [Family Sharing](#).

## Other ways to share photos and videos

You can share photos and videos in Mail or Messages, or using other apps you install.

**Share or copy a photo or video.** View a photo or video, then tap . If you don't see , tap the screen to show the controls.

Tap More in Sharing to turn on the apps you want to use for sharing.

You can share a Live Photo using iMessage, iCloud Photo Sharing, AirDrop, and more. A shared Live Photo plays in Photos on any iOS device with iOS 9 or later or Mac with OS X v10.11 or later. For devices or services that don't support Live Photos, a Live Photo is shared as a still photo.

The size limit of attachments is determined by your service provider. iPhone may compress photo and video attachments, if necessary.

You can also copy a photo or video, then paste it into an email or text message (MMS or iMessage).

**Share a Memory movie.** Tap a Memory movie that's playing, tap , then choose a share option. See [Memories](#).

**Share or copy multiple photos and videos.** While viewing by Moment, tap Share.

**Save or share a photo or video you receive.**

*Email:* Tap to download the item if necessary, then touch and hold it to see sharing and other options.

*Text message:* Tap the item in the conversation, then tap .

Photos and videos that you receive in messages or save from a webpage are saved to your Photos tab. They can also be viewed in the Camera Roll or, if you're using iCloud Photo Library, the All Photos album.

## Edit photos and trim videos

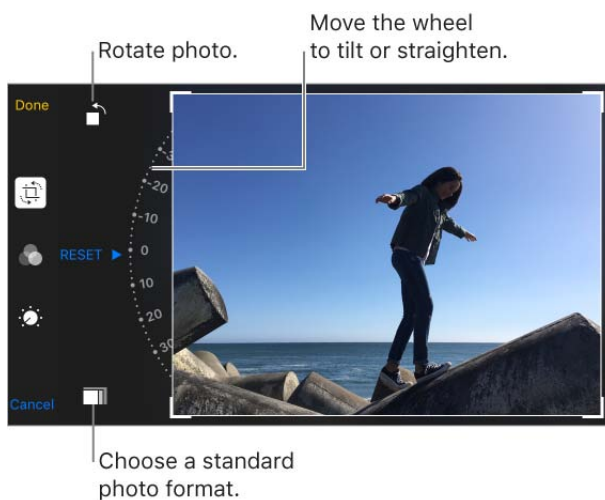

You can edit still photos and Live Photos right on iPhone. If your photos are stored in iCloud, your edits are updated across all your devices set up with iCloud, and both your original and edited versions are saved. If you delete a photo, it's deleted from all your devices and iCloud. Photo app extensions can provide special editing options. See [App extensions](#).

**Edit a photo or Live Photo.** View the photo full screen, tap , then tap a tool. To edit a photo not taken with iPhone, tap the photo, tap , then tap Duplicate and Edit.

Auto-enhance  improves a photo's exposure, contrast, saturation, and other qualities.

With the Remove Red-eye tool , tap each eye that needs correcting.

To crop the photo, tap . Photos suggests an optimal crop, but you can drag the corners of the grid tool to set your own crop. Move the wheel to tilt or straighten the photo. Tap Auto to align the photo with the horizon, and tap Reset to undo alignment changes. Tap  to rotate the photo 90 degrees. Tap  to choose a standard crop ratio, such as 2:3 or Square.

With photo filters  you can apply different color effects, such as Mono or Chrome.

Tap Adjustments  to set Light, Color, and B&W (black & white) options. Tap the down arrow, then tap  next to Light, Color, or B&W to choose the element you want to adjust. Move the slider to the desired effect.

**Compare the edited version to the original.** Touch and hold the photo to view the original. Release to see your edits.

**Don't like the results?** Tap Cancel, then tap Discard Changes. Tap Done to save changes.

**Revert to original.** After you edit a photo and save your edits, you can revert to the original image. Tap the image, tap , then tap Revert.

**Trim a video.** Tap  to display the controls, drag either end of the frame viewer, then tap Done. Tap Save as New Clip to save the new video clip in your Videos album.

**Set the slow-motion section of a video shot in Slo-mo.** (iPhone 5s and later) Tap , then use the vertical bars beneath the frame viewer. (See [Shoot video](#) for information about Slo-mo.)

## Print to an AirPrint-enabled printer

**Print photos:** Tap , then tap Print.

To print multiple photos while viewing a photo album, tap Select, select the photos, tap , then tap Print. See [AirPrint](#).

## Import photos and videos

You can import photos and videos directly from a digital camera, an SD memory card, or another iOS device that has a camera. Use the Lightning to USB Camera Adapter or the Lightning to SD Card Camera Reader (both sold separately).

---

1. Insert the camera adapter or card reader into the Lightning connector on iPhone.
2. Do one of the following:

*Connect a camera:* Use the USB cable that came with the camera to connect the camera to the camera adapter. Turn on the camera, then make sure it's in transfer mode. For more information, see the documentation that came with the camera.

*Insert an SD memory card into the card reader:* Don't force the card into the slot on the reader; it fits only one way.

*Connect an iOS device:* Use the USB cable that came with the iOS device to connect it to the camera adapter. Turn on and unlock the iOS device.

3. Unlock iPhone.
4. The Photos app opens and displays the photos and videos available for importing.
5. Select the photos and videos to import.

*Import all items:* Tap Import All.

*Import just some items:* Tap the items you want to import (a checkmark appears for each), tap Import, then tap Import Selected.

6. After the photos and videos are imported, keep or delete them on the camera, card, or iOS device.
7. Disconnect the camera adapter or card reader.

A new event in the Last Import album contains all the photos you just imported.

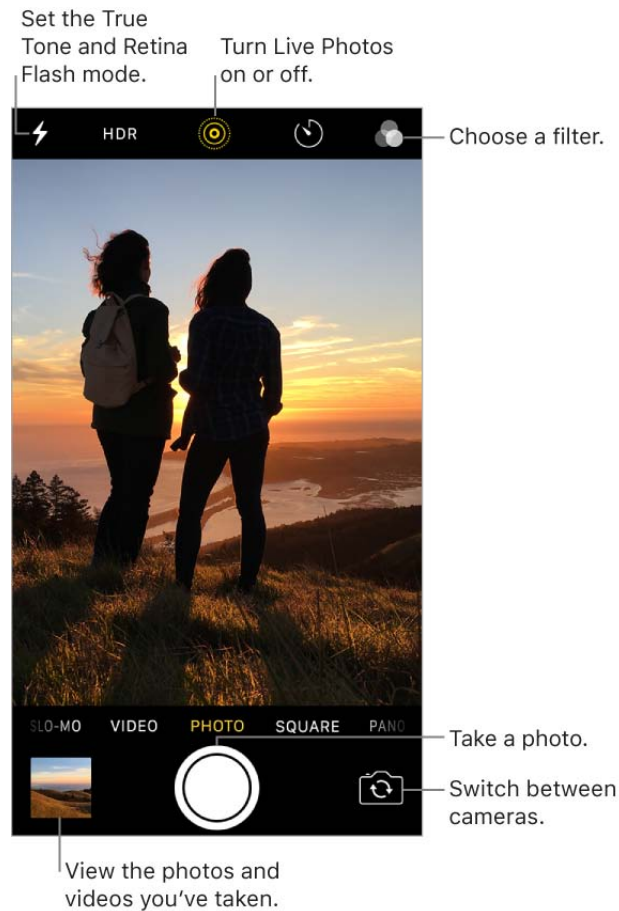

To transfer the photos to your computer, connect iPhone to your computer and import the images with a photo app such as Photos or Adobe Elements.

---

# Camera

## Camera at a glance

You can take photos and videos with the iSight camera on the back of iPhone and the FaceTime camera on the front. On iPhone 7 and iPhone 7 Plus, you can take even better photos in low light and capture photos and Live Photos that take advantage of the Retina HD display with wide color gamut. With the Dual 12MP wide-angle and telephoto cameras on iPhone 7 Plus, you can zoom closer at higher resolution.

## Take a photo

**Choose a photo mode.** Camera has several photo modes, so you can shoot stills, square-format photos, and panoramas. To choose a mode, drag the screen left or right, or tap the mode labels to choose Photo, Square, or Pano.

**Take a photo.** There's more than one way to take a photo:

Open Camera, choose Photo or Square, then tap the Shutter button, or press either volume button.

Swipe left on the Lock screen to make the camera screen appear, then take the picture.

Press the Home button to return to the Lock screen.

**3D Touch.** In Control Center or on the Home screen, press the Camera icon, then choose a quick action. See [3D Touch](#).

**Note:** Adjust the volume of the shutter sound using the Ringer and Alerts settings in Settings > Sounds & Haptics (called *Sounds* on iPhone models other than iPhone 7 and iPhone 7 Plus). Or mute the sound using the Ring/Silent switch. (In some countries, muting is disabled.)

**Ask Siri.** Say something like:

“Open Camera”

“Take a photo”

**Keep it straight.** To display a grid that can help you align shots, go to Settings > Photos & Camera, then turn on Grid.

**Zoom in or out.** (Dual 12MP cameras) The Dual 12MP wide-angle and telephoto cameras on iPhone 7 Plus capture full-resolution stills at 1x and 2x zoom. To quickly switch, toggle  or . You can also zoom at higher resolution to 10x for photos and 6x for videos. For finer zoom and to zoom beyond 2x, touch and hold the zoom control, then slide left or right to adjust zoom. You can also pinch the screen to zoom in and out. On other iPhone models, pinch the screen to zoom in and out.

**Take a Live Photo.** Live Photos goes beyond snapshots to capture life the way it happens—in movement and sound. On devices that support Live Photos, make sure Live Photos is turned on, then tap the Shutter button. The camera records what happens just before and after you take your photo, along with the audio. The screen indicates the duration of the exposure. You can edit Live Photos and add filters to them in the Photos app.

Live Photos works with the iSight and FaceTime cameras. To turn it on or off, tap . (Yellow is on.)

**Take Burst shots.** With the iSight or FaceTime camera in Photo or Square mode, touch and hold the Shutter button to take rapid-fire photos in bursts. The shutter sound is different, and the counter shows how many shots you've taken. Lift your finger to stop. To see the suggested shots and select the photos you want to keep, tap the burst thumbnail, then tap Select. The gray dots below the thumbnails mark the suggested photos. To copy a photo from the burst as a separate photo, tap the circle in the lower-right corner of the photo. To delete the burst of photos, tap the burst thumbnail, then tap .

To choose which burst photos to upload to your Photo Stream, go to Settings > Photos & Camera.

**Take a selfie with Retina Flash.** On devices that support Retina Flash, use the Retina HD display as a flash for your selfies. Turn on the flash, switch to the FaceTime camera, then tap the Shutter button (the display flashes on exposure).

**Take a panorama photo.** (iSight camera) Choose Pano, tap the Shutter button, then pan slowly in the direction of the arrow. To finish the pan, tap the button again. To pan in the other direction, first tap the arrow. To pan vertically, rotate iPhone to landscape orientation. You can reverse the direction of a vertical pan, too.

On iPhone 7 Plus, toggle between  and  to shoot a Panorama at 1x and 2x zoom at full resolution.

**Use the capture timer.** Use the capture timer to give yourself time to be in the shot. First stabilize iPhone, then frame your shot. Tap , tap 3s or 10s, then tap the Shutter button.

**Take a screenshot.** To capture what's displayed on your screen, simultaneously press and release the Sleep/Wake and Home buttons. The screenshot is added to the Photos tab in Photos, and you can also view it in the Screenshots album or All Photos album (if you're using iCloud Photo Library).

## Adjust for the perfect shot

**About auto exposure and face detection.** When you're taking a photo, a rectangle may briefly appear to indicate where the automatic exposure is set. When you photograph people, face detection balances the exposure across many faces. A rectangle appears for each face detected.

**Lock the focus and exposure.** Exposure is automatic, but you can set the exposure manually for the next shot by tapping an object or area on the screen. To lock the exposure and focus, touch and hold until the rectangle pulses. The screen indicates when exposure and focus are locked. Take as many photos as you want. When you tap the screen again, exposure and focus unlock, and the automatic settings and face detection turn back on.

**Note:** Tapping the screen sets the focus and the exposure, and face detection is temporarily turned off.

**Adjust the exposure.** Tap to see  next to the exposure rectangle, then slide up or down to adjust the exposure.

**Turn the flash on or off.** Tap . The True Tone flash on the back of iPhone also provides extra light when you need it. To use it as a flashlight, swipe up from the bottom of any screen, then tap the Flashlight button in Control Center. See [Control Center](#).

**Make it better.** You can edit photos and trim videos, right on iPhone. See [Edit photos and trim videos](#).

## Shoot video

With Camera you can shoot video, including slow-motion and time-lapse videos.

**Record a video.** Choose Video, then tap the Record button, or press either volume button, to start and stop recording. By default, video records at 30 fps (frames per second). Other video modes include:

1080p 60 fps (iPhone 6 and later)

4K 30 fps (iPhone 6s and later)

To change video recording settings, go to Settings > Photos & Camera > Record Video.

**Snap a still while recording** Tap the white Shutter button.

**Take it slow** (iPhone 5s and later) Choose Slo-mo to capture slow-motion video. When you edit the video, you can set just a portion of it to play back in slow motion, and the rest plays back at regular speed. On iPhone 6 and later, you can choose between 1080p video at 120 fps and 720p at 240 fps. To change Slo-mo recording settings, go to Settings > Photos & Camera > Record Slo-mo.

**Set the slow-motion section of a video.** Tap the thumbnail, then tap Edit. Use the vertical bars beneath the frame viewer to set the section you want to play back in slow motion.

**Zoom in or out when shooting video.** (iSight camera) Pinch the image on the screen open to zoom in, and pinch closed to zoom out.

The Dual 12MP wide-angle and telephoto cameras on iPhone 7 Plus capture zoom up to 6x for video. Toggle between 1x and 2x to zoom in and out, or use the dial for zoom up to 6x.

**Capture an experience with time-lapse.** (iSight camera) Choose Time-Lapse, set up iPhone where you want, then tap the Record button to start capturing a sunset, a flower opening, or other experiences over a period of time. Tap the Record button again to stop recording. The time-lapse photos are compiled into a short video.

With the Dual 12MP wide-angle and telephoto cameras on iPhone 7 Plus, toggle between 1x and 2x to zoom in and out.

With iOS 9 and later, time-lapse videos have video stabilization, which minimizes the effect of camera movement during capture.

## HDR

*HDR* (High Dynamic Range) helps you get great shots in high-contrast situations. When shooting with the iSight camera, iPhone takes multiple photos in rapid succession, at different exposure settings—and blends them together. The resulting photo has better detail in the bright and midtone areas.

**Use HDR.** (iSight camera and the FaceTime camera on iPhone 5s and later) Tap the HDR button. For best results, keep iPhone steady and avoid subject motion.

On iPhone 5s and later, you can choose HDR Auto so iPhone uses HDR when it's most effective.

**Keep the normal photo and the HDR version.** Go to Settings > Photos & Camera > Keep Normal Photo. Both the normal and HDR versions of the photo appear in Photos. In your albums, HDR versions of photos are marked with "HDR" in the corner.

## View, share, and print

Photos and videos you take are saved in Photos. With [iCloud Photo Library](#) turned on, all new photos and videos are automatically uploaded and available in Photos on all your devices with iOS 8.1 or later that are set up with iCloud Photo Library. When iCloud Photo Library is turned off, you can still collect up to 1000 of your most recent photos in the [My Photo Stream](#) album from your devices set up with iCloud.

**Note:** If Location Services is turned on, photos and videos are tagged with location data that can be used by apps and photo-sharing websites. See [Location Services](#).

**View your photos.** In Camera, tap the thumbnail image in the lower-left corner, then swipe left or right to see the photos you've taken recently. Tap All Photos to see everything in the Photos app.

Tap the screen to show or hide the controls.

**View sharing and printing options.** While viewing an image, tap . See [Share from apps](#).

**Upload photos and videos.** Use [iCloud Photo Library](#) to upload photos and videos from your iPhone to iCloud. You can access them on your devices with iOS 8.1 or later where you're signed in to iCloud using the same Apple ID. You can also upload and download your photos and videos from the Photos app on [iCloud.com](#).

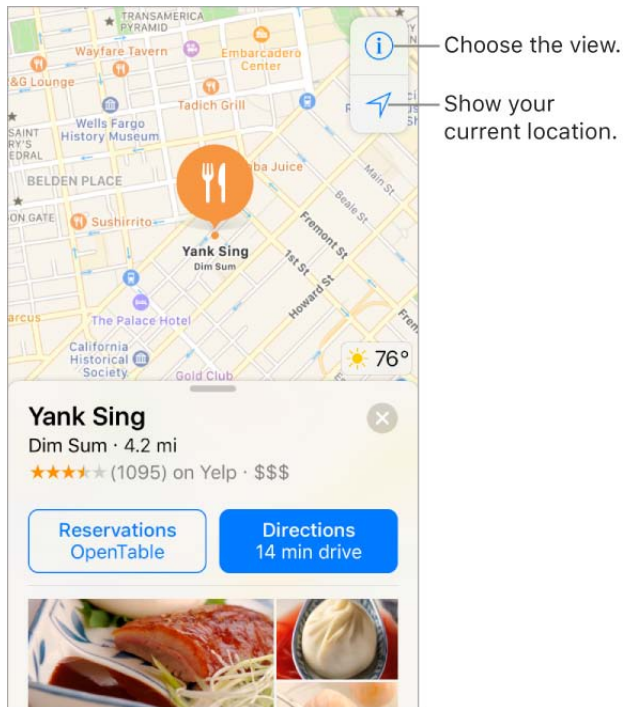

**Sync photos and videos to iPhone from your Mac.** Use the Photos settings pane in iTunes on your computer. See [Sync with iTunes](#).

# Maps

## Find places

**WARNING:** For important information about navigation and avoiding distractions that could lead to dangerous situations, see [Important safety information](#).

Move around Maps by dragging the screen. To face a different direction, rotate with two fingers. To return to north, tap .

**Ask Siri.** Say something like:

“Find coffee near me”

“Show me the Golden Gate Bridge”

**Zoom in or out.** Double-tap with one finger to zoom in; tap with two fingers to zoom out—or pinch open or closed. The scale appears in the upper left while zooming. To change how distance is shown (in miles or kilometers), go to Settings > Maps.

**Find nearby attractions, services, and more.** Tap the search field, then tap a category such as Food or Shopping. (For feature availability, see the [iOS Feature Availability website](#).)

**3D Touch.** To find nearby places from the Home screen, press Maps, then choose the Search Nearby quick action. See [3D Touch](#).

**Search for a location.** Tap the search field. You can search for a location in different ways. For example:

Intersection (“8th and Market”)

Area (“Greenwich Village”)

Landmark (“Guggenheim”)

Zip code (“60622”)

Business (“movies,” “restaurants San Francisco CA,” “Apple Inc New York”)

Maps may also list recent locations, searches, or directions that you can choose from.

**Change the search area.** Zoom in or out, or drag the screen to another area, then tap Search Here.

**Get info about a location.** Tap a location, then swipe up to view all of the information about it. Swipe to peek at the map, or tap  to close the info display.

**Add a favorite location.** While viewing info about a location, scroll to the bottom of the information then tap Add to Favorites.

**Book a table and other actions.** If you’ve installed apps that have Map extensions, you may be able to do things like make a reservation at a restaurant or order a ridesharing vehicle to take you to the location. Visit the App Store to find apps that work with Maps.

**Choose your view.** Tap , then choose Map, Transit, or Satellite.

If transit information is unavailable, tap View Routing Apps to use an app for public or other modes of transportation.

**3D Touch.** To mark your location from the Home screen, press Maps, then choose the Mark My Location quick action. See [3D Touch](#).

**Mark a location.** Touch and hold the map until a marker appears.

## Share a location

Tap a location or marker to display its info, then tap  and choose an option such as Mail or AirDrop. See [Share from apps](#).

**3D Touch.** Press a location, then choose the Share Location or Send My Location quick action. You can also press Maps on the Home screen, then choose a quick action. See [3D Touch](#).

## Get more info

**3D Touch.** Press a location, then choose the Open Homepage or Call quick action. See [3D Touch](#).

**Find out about traffic conditions.** From the map or satellite view, tap ⓘ, then turn on Traffic. Orange shows slowdowns, and red shows stop-and-go traffic. To see an incident report, tap an incident marker.

**Help improve Maps.** To report an incorrect label, a missing location, or other issue, tap ⓘ, then tap Report an Issue.

## Get directions

**Note:** To get directions, iPhone must be connected to the Internet. To get directions involving your current location, Location Services must also be on. (See also [Location Services](#).)

**Ask Siri.** Say something like:

“Give me directions home”

“Transit directions to my dad’s work”

“What’s my ETA?”

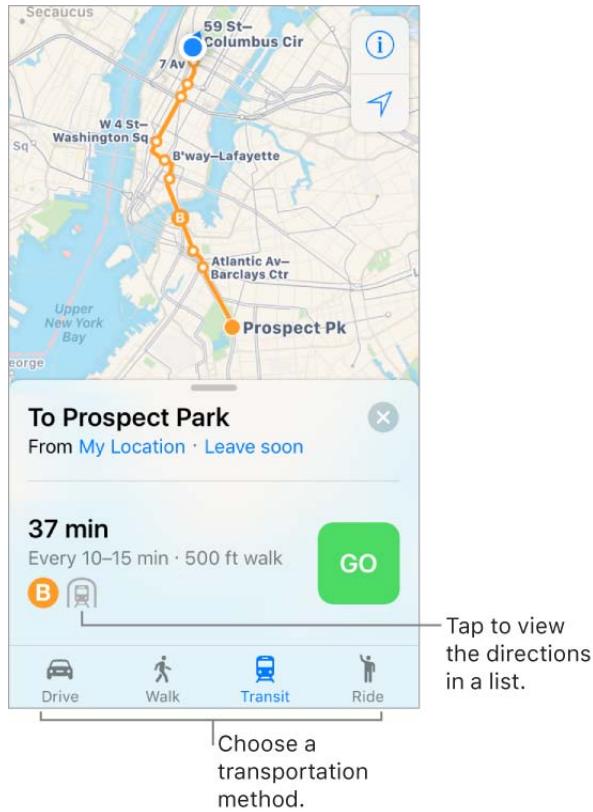

“Find a gas station”

**Find a route to a location.** Tap a location to display its info, then tap Directions. Directions are from your current location. To get other directions, tap My Location, then enter a different location.

**Choose a different route.** If multiple routes appear, tap the one you want to take.

**Show a driving, walking, or transit route.** Tap Drive, Walk, or Transit.

In select cities, Maps provides public transportation information and multimodal routing, from walking to a bus stop or train station to hopping off at your destination.

If transit routes are unavailable in your area, tap View Routing Apps to use an app for other modes of transportation.

**Choose a transit time or date.** Find a transit route, then tap Leave Soon to select a time or date for departure or arrival. Tap Transit Options to choose which transit vehicles to consider.

**Hear turn-by-turn directions for a route.** Find a route, then tap Go.

Maps follows your progress and speaks turn-by-turn directions to your destination. If iPhone auto-locks, Maps stays onscreen and continues to announce directions.

*See the route overview:* Tap the route card, then tap Overview. To return to turn-by-turn directions, tap Resume.

*View directions as a list:* Tap the the route card, then tap Details.

*Choose a faster route:* If you get an alert that suggests a faster route, tap Go to use that route. Or, ask Siri something like "Take the faster route" or "Don't change my route."

Maps may reroute you automatically in case of road closure. Maps may also alert you to heavy traffic, construction, an accident, or other incidents ahead.

Even if you open another app, Maps continues to give you turn-by-turn directions. To return to Maps, tap the banner across the top of the screen. To automatically pause spoken audio (such as a podcast or an audio book) when Maps speaks a turn-by-turn instruction, go to Settings > Maps > Driving and Navigation, then turn on Pause Spoken Audio.

**Make a quick detour.** To make a stop along your route, swipe up on the route card then tap one of the suggested services, such as Gas Stations. Tap Go to add one to your route.

**Stop turn-by-turn directions.** Tap End.

**Ask Siri.** Say something like: "Stop navigating."

**Use Maps on your Mac to get directions.** Open Maps on your Mac (OS X v10.9 or later), get directions for your trip, then choose File > Share > Send to [*your device*]. Your Mac and iPhone must both be set up with iCloud using the same Apple ID.

You can also use Handoff to pick up directions on another device. See [Handoff](#).

## Find your car

When you disconnect iPhone from your car's Bluetooth or CarPlay system and exit your parked vehicle, Maps drops a Parked Car pin so you can easily navigate back to where you left it.

**Find where you left your car.** Tap the Search field, then choose Parked Car from the suggestions list.

**Turn Parking Location on or off.** Go to Maps > Settings > Show Parked Location.

## Get a ride

After you [find a destination](#), you can request a ride from a ride sharing company, if you have a ridesharing app installed. (Not available in all areas.)

**Request a ride.** Search for your destination, tap Get Directions, then tap Get a Ride. If you don't have a ridesharing app installed, tap Find Ride Hailing Apps to download one from the App Store.

**Get a ridesharing app for Maps.** Visit the App Store to find ridesharing apps that work with Maps.

## Remove markers and routes

**Remove a marker.** Tap the marker, tap Edit Location, then tap Remove Marker.

**Delete a route.** Past routes are listed below the Search field. To remove one, swipe it to the left, then tap Remove.

## 3D and Flyover

With 3D and Flyover, you can see three-dimensional views of, and even fly over, many of the world's major cities.

**View a 3D map.** Drag two fingers up. (Zoom in for a closer look if the 3D map doesn't appear.) For best effect, use the satellite view. Tap ⓘ, then tap Satellite.

**Adjust the angle.** Drag two fingers up or down.

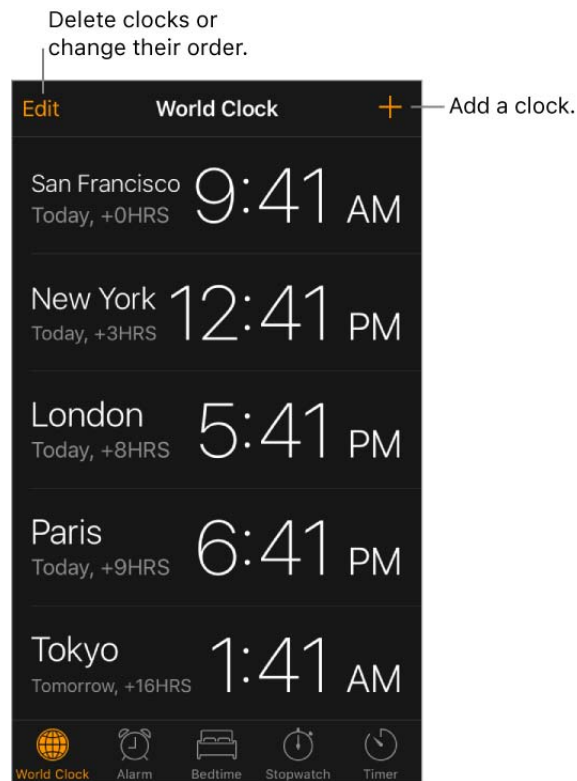

**Take a 3D tour with Flyover.** An aerial tour is available for select cities and locations, indicated by 3D next to the city name. (Zoom out if you don't see any 3D markers.) Tap the name of the city to display its banner, then tap Tour to begin the tour.

To stop the tour, tap the screen to display the controls, then tap End Flyover Tour. To return to standard view, tap ⓘ, then tap Map.

# Clock

## Clock at a glance

Use Clock to view times around the world, set a timer or alarm, use a stopwatch, or set sleep reminders and wake alarms on a daily basis.

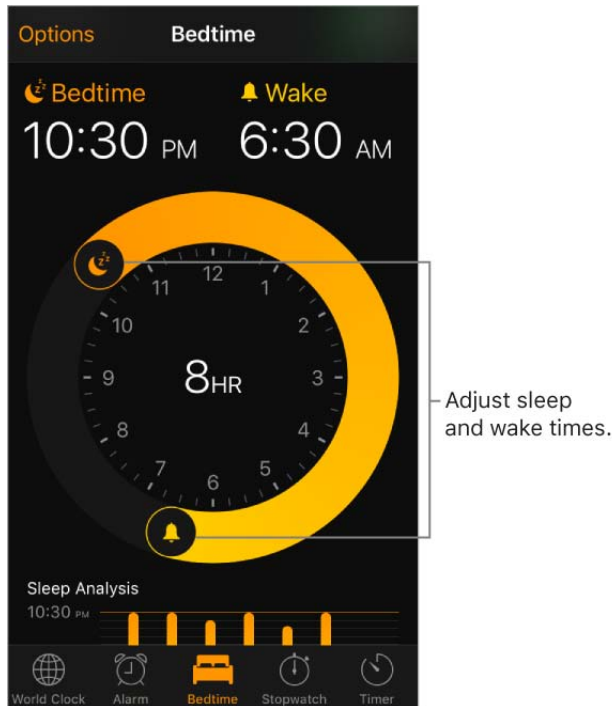

**Ask Siri.** Say something like:

“What time is it?”

“What time is it in London?”

## Bedtime

Set the number of hours you want to sleep each night and Clock can remind you to go to sleep, and sound an alarm to wake you up.

**Set a bedtime reminder and alarm.** Tap Bedtime, then follow the onscreen instructions to set your reminder and alarm. After you've done the initial setup, you can slide 🌙 and 🕒 to adjust your reminder and alarm times.

**See your sleep history.** The Sleep Analysis portion of the Bedtime tab shows your sleeping period for the past several days, based on your use of iPhone during those hours. Your sleep history is automatically provided to Health, too, where you can view more data.

**Set alarm days, tone, and volume.** Tap Options.

**Suspend the alarm.** Tap Bedtime, then drag the screen down to reveal the Bedtime switch.

## Alarms and timers

**3D Touch.** To set an alarm from the Home screen, press Clock, then choose a quick action. See [3D Touch](#).

**Create an alarm.** Tap Alarm, then tap +. Set the time and other options, then give the alarm a name (like "Water the plants").

**Use the stopwatch or timer.** You can use the stopwatch to keep time, record lap times, or set a timer to alert you when time's up.

**Fall asleep to music or a podcast.** Tap Timer, tap When Timer Ends, then choose Stop Playing at the bottom.

**Get quick access to clock features.** Swipe up from the bottom edge of the screen to open Control Center, then tap . You can access Timer from Control Center even when iPhone is locked.

**Ask Siri.** Say something like:

“Set the timer for 3 minutes”

“Wake me up tomorrow at 7 a.m.”

“What alarms do I have set?”

## Weather

Get the current temperature and 10-day forecast for one or more cities around the world, with hourly forecasts for the next 12 hours. Weather uses Location Services to get the forecast for your current location.

**Ask Siri.** Say something like:

“What’s the weather for today?”

“How windy is it out there?”

“When is sunrise in Paris?”

**See the local weather.** Swipe to the leftmost screen (available only when Location Services is turned on in Settings > Privacy > Location Services).

**View the current hourly forecast.** Swipe the hourly display left or right.

**See a detailed forecast.** Swipe up.

**Add a city.** Tap ☰, then tap ⊕. Enter a city or zip code, then tap Search.

**See the weather in another city.** Swipe left or right to see weather for another city, or tap ☰, then choose a city from the list.

**3D Touch.** To choose a forecast from the Home screen, press Weather, then choose a location. Tap Add to add a location. See [3D Touch](#).

**See all your cities at once.** Pinch the screen or tap ☰.

**3D Touch.** To preview a city’s weather, press a city in your list of locations to peek at the weather forecast, then press a little deeper to open it. See [3D Touch](#).

**Delete a city.** Tap ☰, swipe the city to the left, then tap Delete.

**Rearrange the order of cities.** Tap ☰, touch and hold a city, then drag it up or down.

**Choose Fahrenheit or Celsius.** Tap ☰, then tap °F or °C.

**Turn off local weather.** Go to Settings > Privacy, then turn off Location Services. See [Location Services](#).

**Use iCloud to push your list of cities to your other iOS devices.** Go to Settings > iCloud, then turn on iCloud Drive. See [iCloud](#).

---

# News

## News overview

News collects all the stories you want to read, from your favorite sources, based on the topics that interest you most. You can explore recommended publications (called *channels* in News), be notified of important stories from favorite channels, search for specific channels or topics, save and share your favorite stories, and subscribe to receive premium stories from select publishers.

**Note:** You need a Wi-Fi or cellular connection to use News. News isn't available in all areas.

## Get started with News

The first time you open News, you can personalize it based on your interests.

**Add channels and topics.** Open News, then add your preferred channels (publications, such as magazines, newspapers, or news-based websites). You can also add topics such as Sports and Entertainment. To see more channels and topics, swipe up. The stories that appear in For You are influenced by your choices.

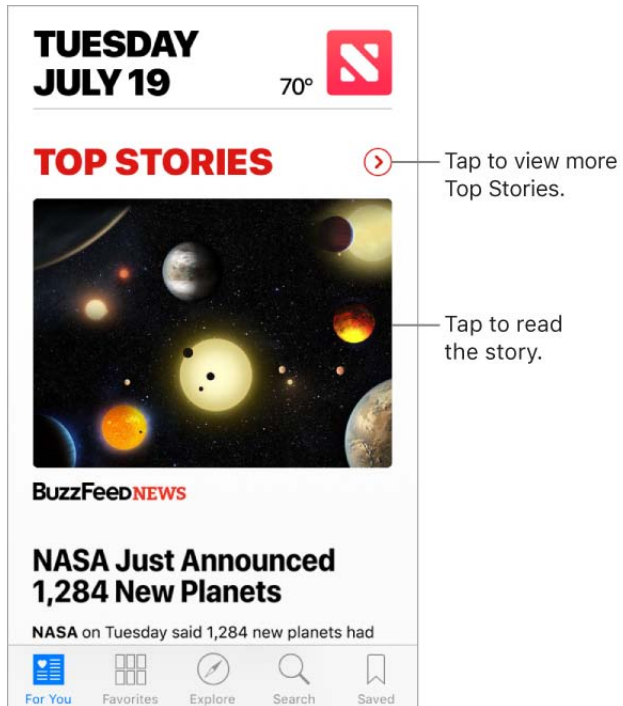

**Add notifications.** Tap Customize Notifications, then choose the publications you want to deliver the most important stories of the day to your Lock screen.

**Receive stories by email.** To receive an email with the best Apple News stories selected by Apple's editors, tap Sign Me Up on the Get News in Your Inbox screen.

**Seek out additional channels and topics.** After you set up News, tap Explore to browse suggested channels and topics. Or tap a topic such as Travel, Arts, or Sports to browse it. To add a channel or topic to the Favorites tab, tap .

## For You

For You presents the best stories from the publications and topics you add to Favorites. For You also highlights Top Stories of the day, Trending Stories that are popular with other News readers, and Featured Stories selected by Apple editors.

**Read more stories within a specific group.** Tap > next to Top Stories or next to a topic such as Technology or Entertainment.

**3D Touch.** To access stories and recently viewed channels from the Home screen, press News, then choose a quick action. See [3D Touch](#).

**Play a video in the story list.** Tap ▶.

**Get newer stories.** Pull down to refresh For You with the latest stories.

**Love, save, or share a story.** Tap , or swipe a story left, then choose Love, Save, or Share.

**Dislike a story, mute a channel, or report a concern about a story.** Tap , or swipe a story right, then choose Dislike, Mute Channel, or Report.

To remove a dislike, tap , or swipe the disliked story right, then tap Remove Dislike.

**Mute a channel.** To prevent a channel's stories from appearing in For You or in a list of topics, swipe a story right, then tap Mute Channel. To see stories from that channel again, tap the channel in Favorites, then tap Don't Mute near the top of the screen.

To unmute a channel that isn't a favorite, tap Search, search for the channel, tap the channel in the search results, then tap Don't Mute near the top of the screen.

**3D Touch.** Press a channel in Favorites, or press a story, swipe up, then tap Mute Channel. See [3D Touch](#).

## Read stories

**Read a story.** Tap a story to read it. Web stories delivered through an RSS feed show a preview. To view an RSS story in full, swipe up. To always view the full story, go to Settings > News, then turn off Show Story Previews.

**3D Touch.** Press a story to take a peek at it. Swipe up to see options such as Love, Save, Share Story, and Mute Channel. Press deeper to pop open the story. See [3D Touch](#).

**Read the next story.** When viewing a story, swipe left to read the next story, or swipe right to read the previous story. Swipe from the left edge to return to the list of stories.

**Tell News what you do and don't love.** When viewing a story, tap  to love the story; tap  to dislike the story. Tap an icon again to return to a neutral setting. News takes your feedback into account when picking new stories in For You.

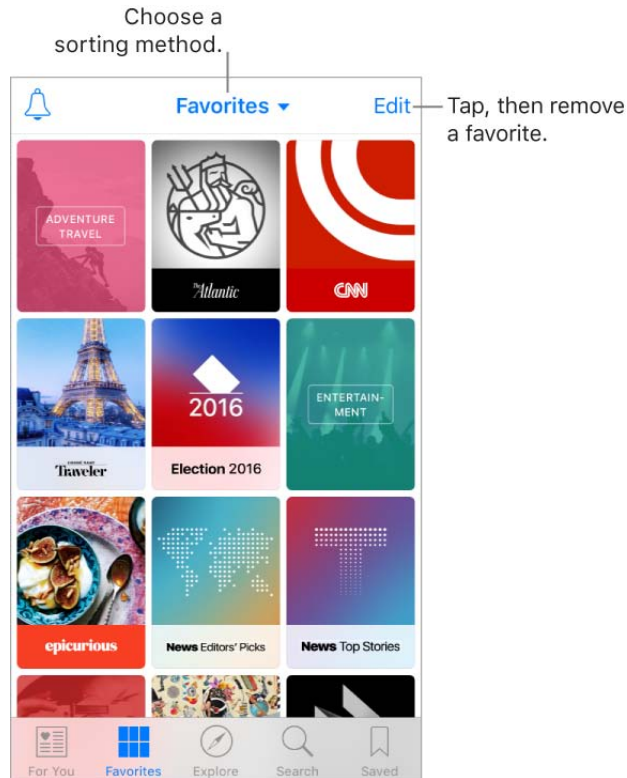

**Change the text size.** Tap , then tap the smaller or larger letter to change the size. (Not available in all stories.)

**Share stories.** When viewing a story, tap , then choose a sharing option such as Message or Twitter. To share a story in your list of stories, swipe the story left, tap Share, then choose a sharing option.

**Report a concern.** If you believe a story you're viewing is mislabeled, inappropriate, offensive, or doesn't display properly, swipe right, then tap Report.

## Favorites

The channels and topics you select when you first open News appear in Favorites. Favorites also includes channels and topics you add later.

**Browse a channel's stories.** Tap a channel or topic to see the most recently published stories. In some channels, you can browse sections, such as Politics, Sports, or Entertainment.

**3D Touch.** Press a channel or topic to peek at its current stories. See [3D Touch](#).

**Edit your favorites.** Tap Edit, then tap  to delete a channel or topic that you no longer wish to follow.

**3D Touch.** Press, swipe up, then tap Remove from Favorites. See [3D Touch](#).

**Dig deeper into a topic.** Tap a topic to see recent related stories.

**Sort favorites.** Tap Favorites at the top of the screen, then choose Sort by Name, Sort by Most Recent, or Sort by Most Visited.

**Manage notifications.** Tap , then turn notifications on or off for your favorite channels.

## Search

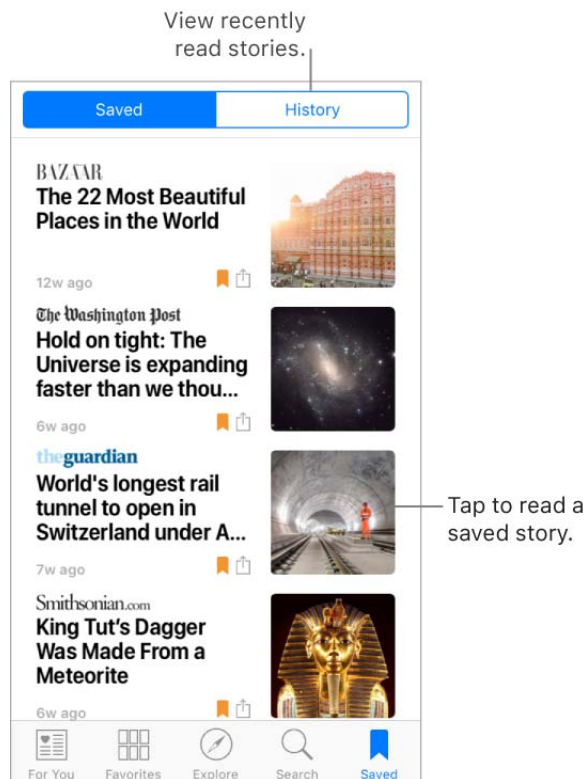

News keeps track of a wide variety of topics, which makes it easy to find the stories that interest you.

**Search for channels and topics.** Tap Search, then enter the name of a channel (*CNN* or *Wired*, for example) or a topic (*fashion*, *business*, or *politics*, for example). In the results list, tap  to add an item to Favorites.

**View trending topics.** Search shows trending topics to get you started. Tap a topic to see related stories, then tap  to add a topic to Favorites.

## Save stories

In News you can save stories to read later, online or offline.

**Save a story.** When viewing your list of stories, swipe a story left, then tap Save. When reading a story, tap  to save it. To read a saved story, tap Saved, then tap the story.

**Delete a saved story.** Tap Saved, then swipe a story left.

**Check your reading history.** Tap the History tab to see what you've read. Swipe a story left to delete it. To clear your News history or the information used to create recommendations, tap Clear, then choose one or both options.

## Subscriptions in News

**Subscribe to channels.** With News you can read premium stories from select publishers. There are three ways to access subscriptions in News:

*Subscribe within News:* You can purchase a subscription directly in News. In a channel that offers subscriptions, tap a story that requires a subscription to read, then tap Subscribe Now.

*Access an existing subscription purchased from iTunes or the App Store:* News checks your iTunes Store account for subscriptions you bought as in-app purchases in publishers' apps. If any subscriptions you've purchased are also available in News, you're automatically granted access in News. See the [About in-app purchases website](#).

*Access an existing subscription purchased from a publisher:* If you've purchased a subscription directly from a publisher's website, the publisher may allow you to sign in to your account in News, and access your subscription in News.

When you subscribe to a channel, it's automatically added to Favorites.

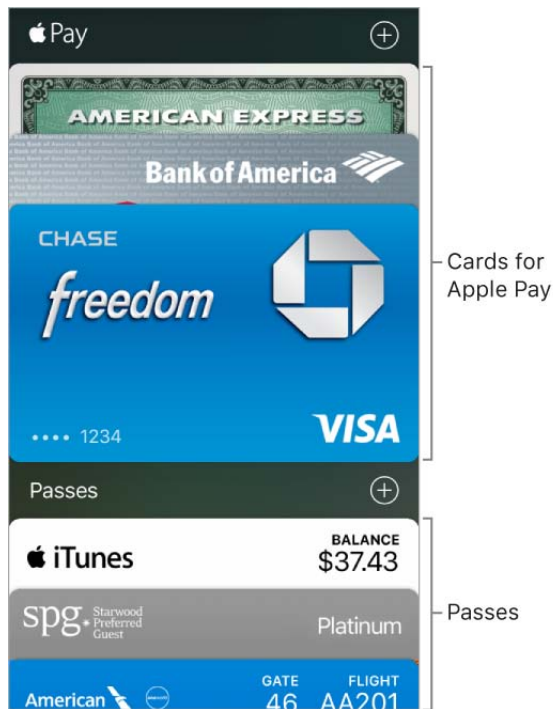

# Wallet

## Wallet at a glance

Use Wallet to keep cards and passes in one place for easy access:

*Cards for Apple Pay:* Credit, debit, store, and prepaid cards (not available in all areas)

*Passes:* Boarding passes, movie tickets, coupons, reward cards, and more

# Apple Pay

## About Apple Pay

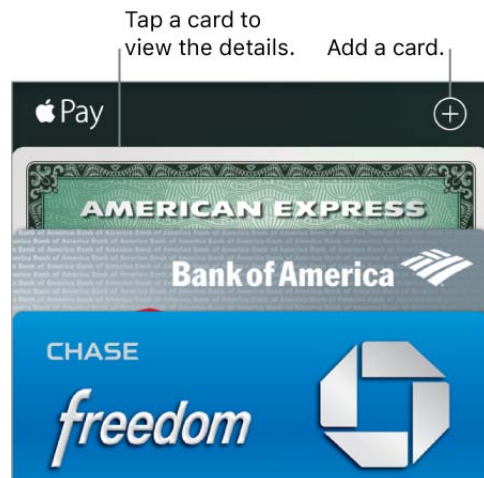

On supported devices, you can use Apple Pay (not available in all areas) to make purchases in stores that accept contactless payments, as well as within apps and websites that support Apple Pay. Wallet holds credit and debit cards, which appear at the top of your Wallet stack, for Apple Pay transactions.

For more information about how Apple Pay works, go to the [Apple Pay website](#).

## Set up Apple Pay

**Sign in to iCloud.** Go to Settings > iCloud, and sign in with your Apple ID. Then scroll down and turn on Wallet. See [iCloud](#).

**Add a credit or debit card.** Tap  $\oplus$  next to Apple Pay. The first time you add a credit or debit card to Wallet, you may be asked to use the card you use with iTunes. Tap Next, then position iPhone so that your card appears in the frame.

The card issuer determines if your card is eligible for Apple Pay, and may ask you for additional information to complete the verification process. See the Apple Support article [Apple Pay participating banks](#).

You can add up to eight credit and debit cards, including store cards.

**Note:** If you sign out of iCloud at Settings > iCloud, all the credit and debit cards you added to Apple Pay on iPhone are removed. You can add the cards again the next time you sign in to iCloud.

**Set your default card.** The first card you add to Wallet becomes your default card for payments. To set a different card as the default, touch and hold the card in Wallet, then drag it to the front of the stack.

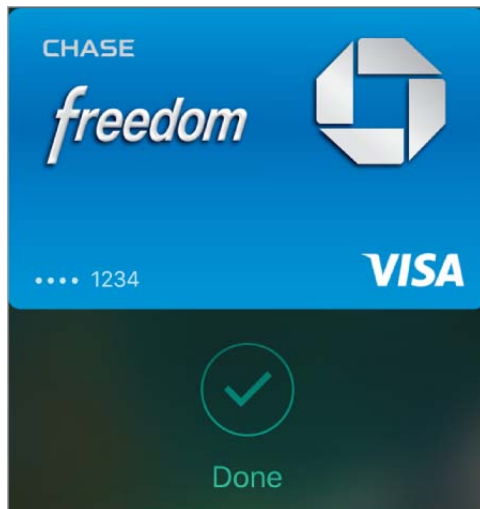

## Pay at a store

You can use Apple Pay at contactless readers with one of the following symbols.

**Pay using your default card.** Place your finger on Touch ID, then hold iPhone about an inch (2.5 cm) from the symbol on the reader, until iPhone vibrates. A checkmark on the screen and an audible beep confirm that the payment information has been sent.

Or, if iPhone is locked, double-click the Home button and keep your finger lightly on the Home button. Hold iPhone near the reader until iPhone vibrates.

**3D Touch.** To quickly access your default card, press the Wallet icon on the Home screen. See [3D Touch](#).

**Use another card.** When the default card appears, tap it to display all your cards, then tap the card you want to use.

**Tip:** When you use Apple Pay at some locations, you may receive a notification that allows you to easily add a rewards card for that merchant.

**Set up a store card for Automatic Selection.** To automatically use a store card (rather than the default card) with the associated merchant, tap the store card, tap [i](#), then turn on Automatic Selection.

**Note:** If you have Location Services turned on, the location of your iPhone at the time you make a purchase may be sent to Apple. See [Location Services](#).

## Pay within an app or on a website

When shopping within an app or on a website in Safari, look for the Buy with Apple Pay button or the Apple Pay payment option.

A black rounded rectangular button with the text "Buy with Apple Pay" in white. The Apple logo is positioned between the words "with" and "Pay".

**Pay within an app or on a website.** During checkout, tap the Apple Pay or Buy with Apple Pay button, then review the payment information. Make any changes before you use Touch ID or your passcode to complete the payment.

## Shop on your Mac and pay on iPhone

Using the Safari web browser on your Mac, you can shop and begin checkout on websites that support Apple Pay, then complete the payment with Apple Pay on your iPhone.

### Set up your Mac and iPhone for Apple Pay.

[Set up Apple Pay](#) on iPhone.

Sign in to iCloud with the same Apple ID on both devices.

Turn on Bluetooth on both devices.

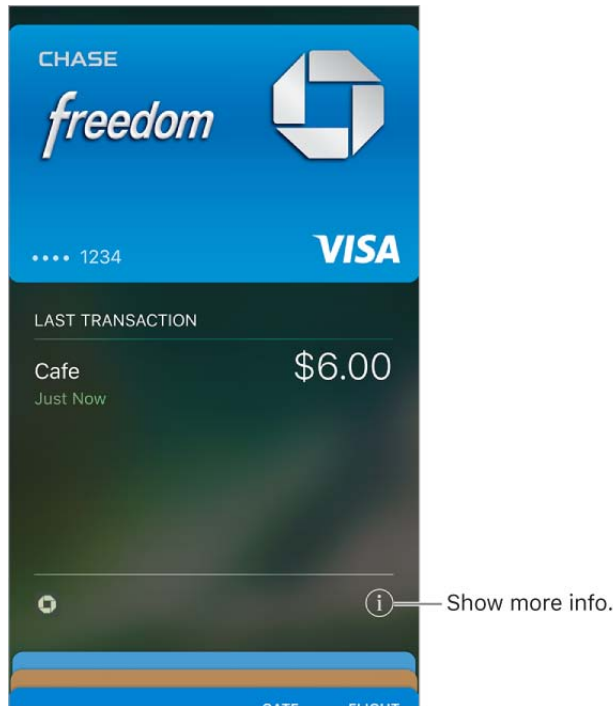

Ensure that iPhone is nearby and connected to a cellular or Wi-Fi network.

**Checkout.** On your Mac, choose the Apple Pay payment option, then review the payment information. Make any changes to the shipping and billing information, or choose a different card. Then on iPhone, review the payment summary, and use Touch ID to complete the payment.

**Prevent iPhone from confirming payments on your Mac.** If you don't want to use Apple Pay on your iPhone to confirm payments on your Mac, go to Settings > Wallet & Apple Pay, then turn off Allow Payments on Mac.

## View card activity and manage cards

**View a card.** Tap a card in the Wallet stack. The last transaction may appear.

**View and manage the card information.** Tap ⓘ. You can:

- View the last four digits of the card number and Device Account Number—the number transmitted to the merchant.

- Change the billing information.

- Remove the card from Wallet.

**View your Apple Pay activity.** Tap ⓘ, then tap Transactions to view the transactions made on this iPhone. To hide this information, turn off Transaction History.

**Note:** The authorized amount may differ from the amount of the payment charged to your account. For example, a gas station may request an authorization of \$99, even though you only pump \$25 worth of gasoline. To see the final charges, see your card statement, which includes all Apple Pay transactions.

**Change the shipping address and contact information for purchases.** Go to Settings > Wallet & Apple Pay.

**Prevent cards from appearing on the Lock screen.** Go to Settings > Wallet & Apple Pay. Below Allow Access When Locked, turn off Double-Click Home Button.

**If your iPhone is lost or stolen.** If you enabled [Find My iPhone](#), you can use it to help locate and secure your iPhone—including suspending or removing the ability to make purchases using your cards in Apple Pay. To do this, sign in with your Apple ID on [iCloud.com](#), then go to Settings > My Devices. You can also call the issuers of your cards.

## Passes

Use passes in Wallet to check in for a flight, get into a movie, or redeem a coupon. Passes can include useful information, such as the balance on your coffee card, a coupon's expiration date, or your seat number for a concert.

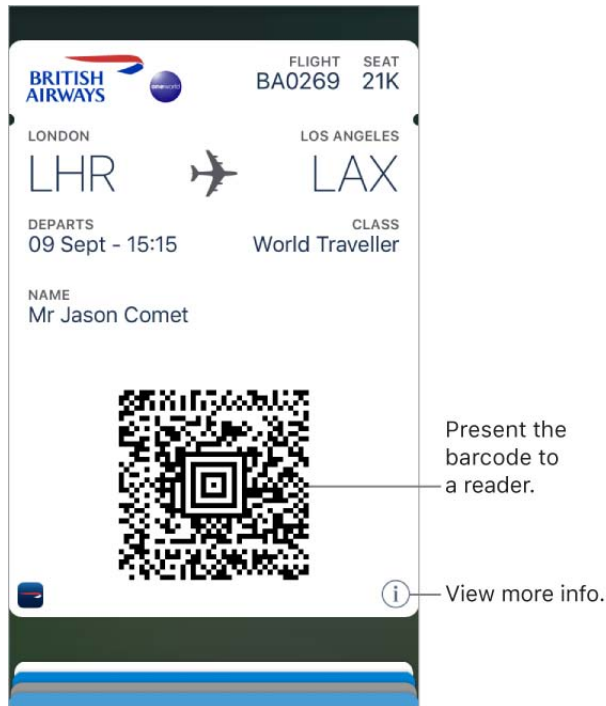

**Find apps that support Wallet.** Tap (+) next to Passes, then tap Find Apps for Wallet.

You can also [find apps for Wallet in the iTunes Store on your computer](#).

**Add a pass by scanning a code.** Tap (+) next to Passes, then tap Scan Code to Add a Pass. Point your iPhone at the code and frame it to add the pass.

**Add a pass from an app, email, message, or website.** Tap the pass or the link, then tap Add.

**Use a pass.** If an alert for a pass appears on the Lock screen, swipe up to open Wallet and display the pass, then present the barcode to the reader. Otherwise, open Wallet, select the pass, then present the barcode to the reader.

**Add funds to your Apple ID account.** At Apple Stores and select retailers in most countries, you can add funds to your Apple ID account using iTunes Pass. For information about creating an iTunes Pass, see the Apple Support article [About iTunes Pass](#).

**Share a pass.** You can share a pass using Mail, Messages, or AirDrop. Tap the pass, tap ⓘ, then tap Share Pass. See [Share from apps](#).

**Refresh a pass.** Passes are usually updated automatically. To refresh a pass manually, tap the pass, tap ⓘ, then pull the pass down.

**Display a pass based on location.** A pass can appear on the Lock screen when you wake iPhone at the right time and place—for example, when you reach the airport for a flight you're taking. Make sure Location Services is turned on in Settings > Privacy > Location Services. Then on the pass, tap ⓘ, and turn on Suggest on Lock Screen.

**Prevent passes from appearing on the Lock screen.** Go to Settings > Wallet & Apple Pay. Below Allow Access When Locked, turn off Double-Click Home Button. For passes with notifications, to prevent a specific pass from appearing on the Lock screen, tap the pass, tap ⓘ, then turn off Suggest on Lock Screen.

On iPhone 5 and iPhone 5c, go to Settings > Passcode, tap Turn Passcode On, then turn off Wallet. Pass notifications continue to appear, but you must enter a passcode to view the pass.

**Include passes on your other iOS devices.** You can have passes that you add to one iOS device appear on your other iOS devices. Go to Settings > iCloud, then turn on Wallet.

**Note:** This setting applies only to the passes in Wallet, not to the credit and debit cards.

**Rearrange passes.** Drag a pass in the stack to move it to a new location. The pass order is updated on all your devices (iOS 7 or later).

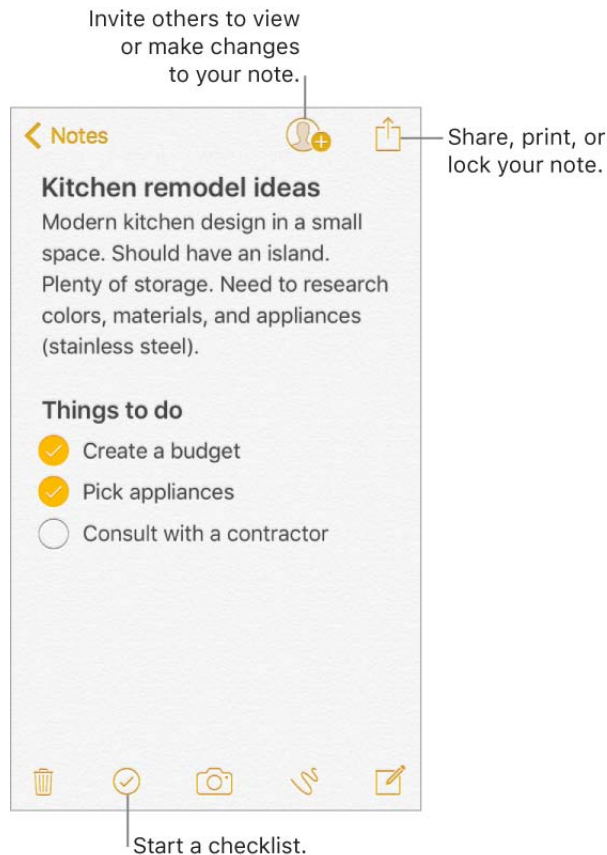

**Set notification options.** Go to Settings > Notifications > Wallet.

**Done with a pass?** Tap the pass, tap ⓘ, then tap Remove Pass.

# Notes

## Take notes

Use Notes to jot down important information, add attachments—like photos, web links, or maps—sketch ideas, and keep things organized. You can lock a note to keep it private, add people so friends can view and edit a note, and more.

**Turn on Notes in your iCloud account.** Go to Settings > iCloud, then turn on Notes. Your iCloud notes appear on all your iOS devices and Mac computers where you're signed in to iCloud with the same Apple ID.

**Note:** If you've been using an earlier version of Notes, you may need to upgrade your iCloud notes to use all the features—sketching, checklists, paragraph styles, password protection, adding people, and more. See the [Upgrade your notes](#) website.

**Turn on an On My iPhone account.** Go to Settings > Notes, then turn on On My iPhone. Notes in this account appear only on your iPhone.

**3D Touch.** To start a new note from the Home screen, press Notes, then choose a quick action. See [3D Touch](#).

**Create a new note.** Tap . The first line of the note becomes the note's title.

**Ask Siri.** Say something like: "Create a new note."

**Add a photo or video to your note.** Tap , then tap . Take a new photo or video, or tap Photo Library to select and add existing photos and videos.

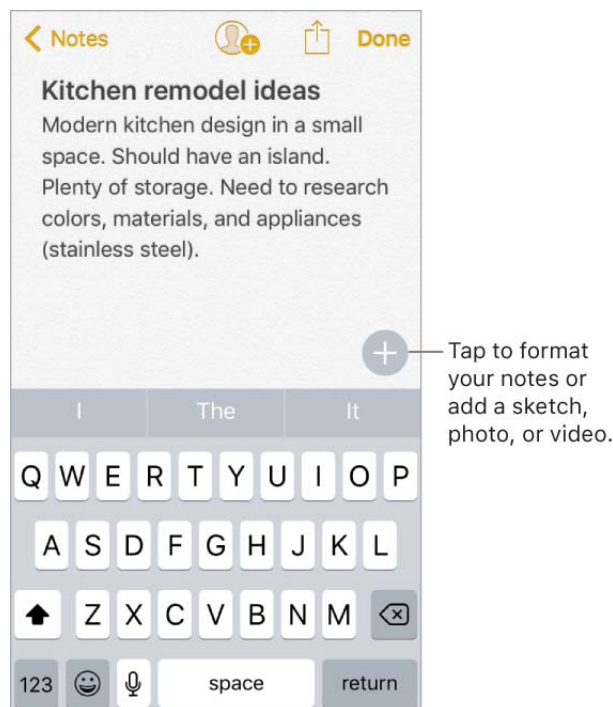

If you want photos or videos you take in Notes to be automatically added to the Photos app, go to Settings > Notes, then turn on Save Media to Photos.

**Set the default account for when you start new notes with Siri or from the Today screen.** Go to Settings > Notes > Default Account.

**Tip:** To create and view Notes right from Today View, tap Edit at the bottom of the [Today screen](#), then add the Notes widget.

## Format and edit notes

Create checklists, change paragraph styles, and add attachments.

**Start a checklist.** Tap a line in your note, tap , then tap . Tap  again to remove the checklist format.

**Change the text style.** Tap , tap , then select the style.

**Set a default formatting style for the first paragraph.** Go to Settings > Notes, then tap New Notes Start With. Choose Title, Heading, or Body.

**Add an attachment.** When you're in another app and find something that you want to add to Notes (like a location in Maps or a webpage in Safari), tap Share or , then tap Add to Notes. You can create a new note or add the attachment to an existing one.

**Mark up an image or PDF.** For an image, tap it in your note, tap , then tap Markup. For a PDF, tap it in your note, then tap .

**Change the preview size of attachments.** Touch and hold an image, sketch, or PDF attachment in a note, then choose a size for the preview.

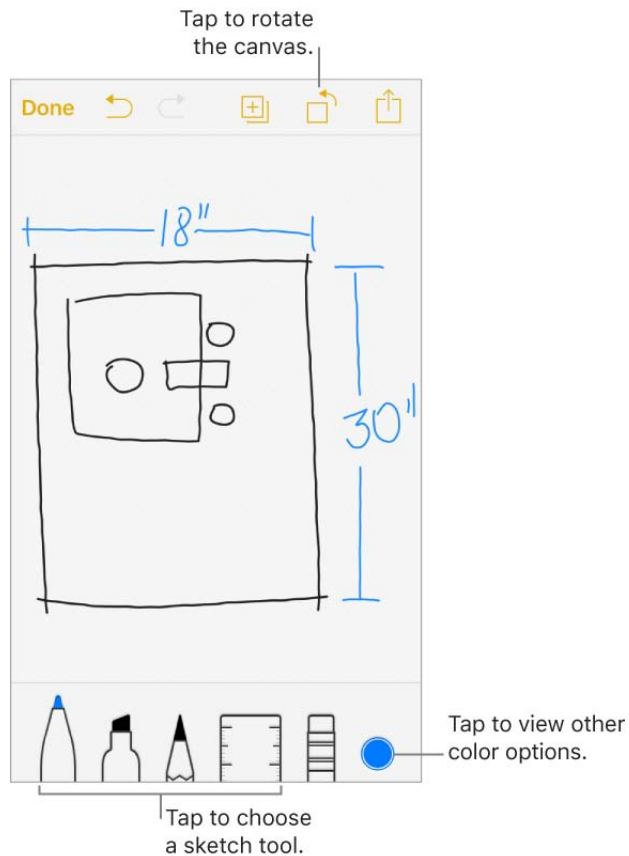

## Delete notes

**Delete a note.** In a note, tap . Or in the notes list, swipe the note left.

**Didn't mean to delete that note?** If you change your mind, open the Recently Deleted folder. Tap the note you want to keep, tap in the note, then tap Recover.

## Create a sketch

Sometimes you may want a sketch to help you capture an idea or plan. Start a sketch using the pencil, marker, or pen tool. Switch to the eraser if you make a mistake.

**Sketch in your note.** Tap , tap , use your finger to sketch, then tap Done. Your sketch appears in your note. Tap the sketch to edit it.

**3D Touch.** If you press a little deeper as you draw, the pencil and marker leave a darker line, and the pen tool leaves a wider line. Press a little deeper as you erase to increase the area you erase. See [3D Touch](#).

**View more color choices.** Tap the current color to view a color palette. Swipe the palette left or right to see more colors. Or, hold iPhone in landscape orientation.

**Draw straight lines.** Tap the ruler tool to make it appear on your canvas. Draw a line along the edge of the ruler. Tap the ruler tool again to make it disappear.

**Move the ruler without changing its angle.** Drag the ruler with one finger.

**Adjust the angle of the ruler.** Touch and hold the ruler with two fingers, then rotate your fingers.

**Mask a part of your sketch.** Place the ruler along the edge of the area you want to cover, then start your sketch. Draw lines that start away from the ruler's edge, then come toward it.

**Hide the toolbar.** Swipe the toolbar down to hide it and see just the tool you're using. Tap the tool you're using to see the toolbar again.

**Zoom in.** Pinch open so you can sketch the details, then pinch closed to zoom back out.

**Tip:** Drag two fingers to navigate when you're zoomed in.

**Scroll through all your sketches in a note.** Swipe a sketch left or right with two fingers.

**Add another sketch to your note.** Tap . Or, if you already have multiple sketches, swipe your last sketch left with two fingers.

**Edit a sketch.** Open the note that contains a sketch, then tap the sketch.

**Start over.** Touch and hold the eraser tool, then tap Erase All.

## Organize your notes

**3D Touch.** To preview a note, press a note in the notes list to get a peek; press a little deeper to open it. See [3D Touch](#).

**Search for a note.** Scroll to the top of the notes list to reveal the search field. If a note is locked, only its title appears in the search results.

**Ask Siri.** Say something like: "Show notes from today."

**Sort your notes.** Go to Settings > Notes, then choose to sort notes by date edited, date created, or title.

**Search for a specific attachment.** Tap  in the lower-left corner of the notes list to see thumbnails of sketches, photos, links, documents, and other attachments. (You don't see attachments from locked notes.) To go to the note with a specific attachment, touch and hold the thumbnail of the attachment, then tap Go to Note.

**Create a folder to organize your Notes.** From the Notes list, tap < to view your folders. Tap New Folder (at the bottom of the folders list), then name your folder.

**Delete a folder.** From the Notes list, tap < to view your folders. Swipe a folder left, then tap Delete.

**Print a note.** Tap  at the top of the note. For more information about printing, see [AirPrint](#).

**Move notes from one folder or account to another.** Swipe the note left in the notes list, tap Move, then choose the folder or account.

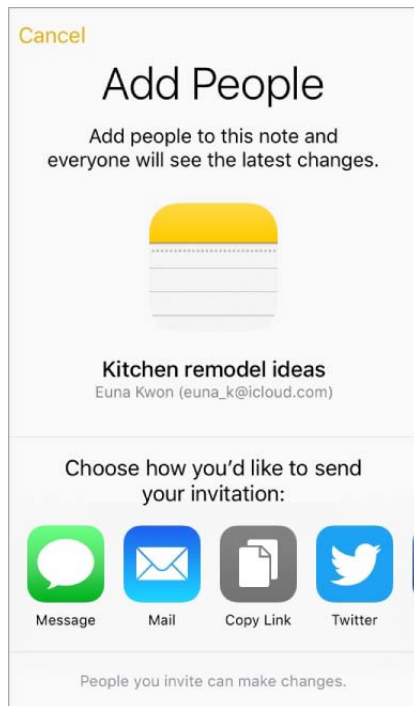

To move several notes from one folder or account to another, tap Edit in the upper-right corner of the notes list, tap the notes you want to move, then tap Move To.

## Collaborate in Notes

Invite people to view and make edits to notes in your iCloud account, and everyone will see the latest changes.

**Note:** You can't share a locked note.

**Invite friends to share.** In a note, tap , then choose how to send your invitation.

**Add people, remove them, or stop sharing a note.** In a note you've shared, tap .

## Use notes in multiple accounts

**View and edit notes from other accounts (such as Google, Yahoo!, or AOL).** Go to Settings > Notes > Accounts, then add your account. These notes appear in Notes on all your other iOS devices and Mac computers where you're also signed in to that account.

Notes from these accounts can't use many the Notes app features.

## Lock notes

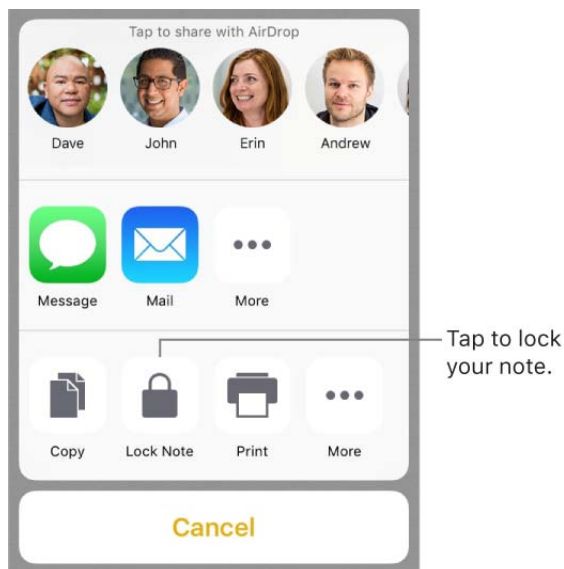

Use a single password to lock and unlock notes in your iCloud account or in your On My iPhone account. On iPhone 5s and later, you can also lock and unlock your notes with Touch ID (if it's enabled).

You can view locked notes that are in your iCloud account on your iOS devices with iOS 9.3 or later and Mac computers with OS X v10.11.4 or later.

You can lock notes that include images, sketches, maps, and web attachments, but not other types of attachments like PDFs and iWork documents. You can't lock notes that you've shared.

**Set Touch ID to unlock your notes.** Go to Settings > Notes > Password, then turn on Use Touch ID (iPhone 5s and later).

**Add a lock to a note.** In the note, tap , then tap Lock Note.

When a note is locked, the title remains visible in the notes list.

**Unlock your notes.** Tap a locked note, tap View Note, then follow the onscreen instructions.

Unlocking one note unlocks all of your notes until one of the following happens: your session times out, you tap the lock icon at the top of the screen, you tap Lock Now at the bottom of the notes list, or you lock your iPhone.

**Remove a lock from a note.** Tap , then tap Remove Lock.

**Change your password.** Go to Settings > Notes > Password, then tap Change Password.

**Forgot your password?** Go to Settings > Notes > Password, then tap Reset Password. You can't access your locked notes if you forget your password and haven't turned on Touch ID. However, you can set a new password for any notes you want to protect going forward. For more information, go to the Apple Support article [Keep your notes secure with password-protection](#).

## Import notes from another app to Notes

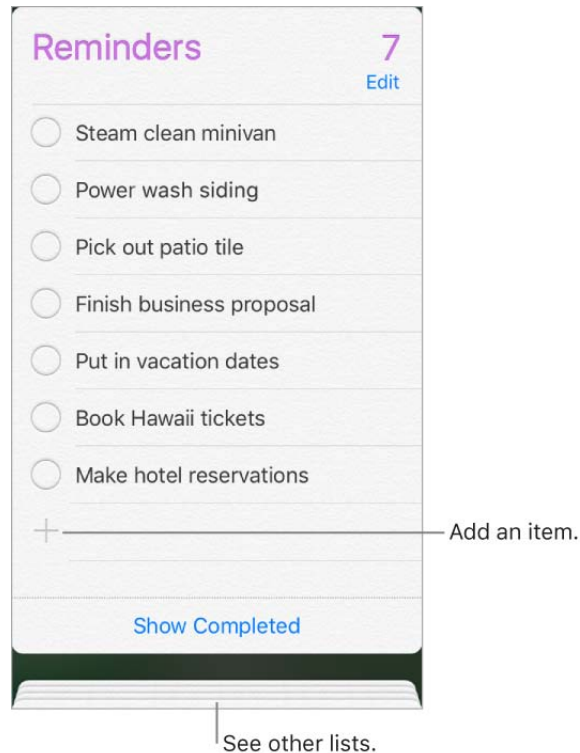

**Import notes from another app.** Export the notes from a supported app. Then, with an Evernote file, for example, touch and hold the exported file attachment (it has a .enex filename extension) in Mail, then choose Add to Notes. After you import notes, you can find them in the Imported Notes folder.

For more information, see the Apple Support article [Import your notes and files to the Notes app](#).

# Reminders

## Reminders at a glance

With Reminders you can keep track of all the things you need to do.

**3D Touch.** To add a reminder from the Home screen, press Reminders, then choose a quick action. See [3D Touch](#).

**Add a reminder.** Tap a blank line in a list.

**Share a list using iCloud.** While viewing a list, tap Edit, tap Sharing, then tap Add Person. The people you share with also need to be iCloud users. Anyone who accepts the invitation can add, delete, and mark items as completed. Family members can also share a list. See [Family Sharing](#).

**Ask Siri.** Say something like:

"Remember to take an umbrella"

"Add artichokes to my groceries list"

"Read my work to-do list"

“Remind me to call my mom at 5”

**Set a default list for new reminders.** Go to Settings > Reminders.

**Delete a list.** While viewing a list, tap Edit, then tap Delete List. All of the reminders in the list are also deleted.

**Delete a reminder.** Swipe the reminder left, then tap Delete.

**Change the order of lists.** Touch and hold the list name, then drag the list to a new location. To change the order of items in a list, tap Edit.

**What list was that in?** Scroll to the top to see the search field. All lists are searched by the reminder’s name.

**3D Touch.** To set an reminders’s options, press a reminder, then choose a quick action. See [3D Touch](#).

**Keep your reminders up to date on other devices.** Go to Settings > iCloud, then turn on Reminders. Some other types of accounts, such as Exchange, also support Reminders. You can change how reminders in the past are synced in Settings > Reminders.

With OS X v10.10 or later, you can [hand off reminders](#) you’re editing between your Mac and iPhone.

## Scheduled reminders

Scheduled reminders notify you when they’re due.

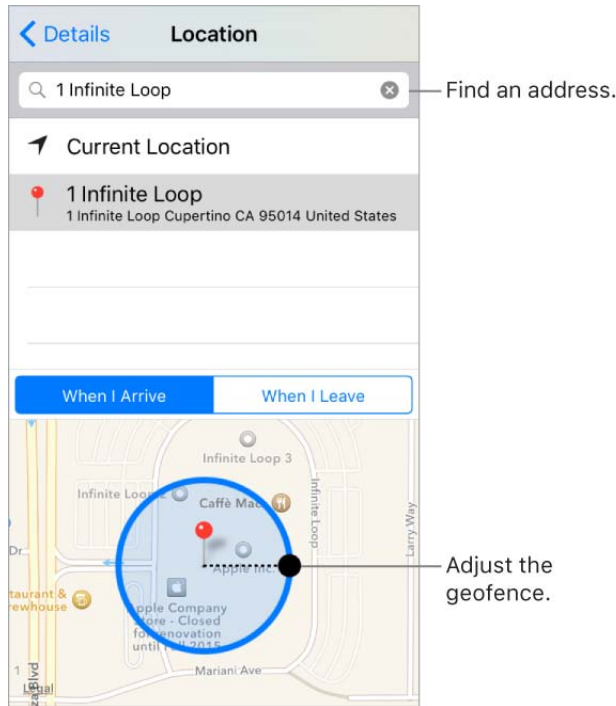

**Ask Siri.** Say something like: “Remind me to take my medicine at 6 a.m. tomorrow.”

**Schedule a reminder.** Swipe a reminder to the left, tap More, then turn on “Remind me on a day.” Tap Alarm to set the date and time. Tap Repeat to schedule the reminder for regularly occurring intervals.

**Don’t bother me now.** You can turn off Reminders notifications in Settings > Notifications. To silence notifications temporarily, turn on Do Not Disturb.

## Location reminders

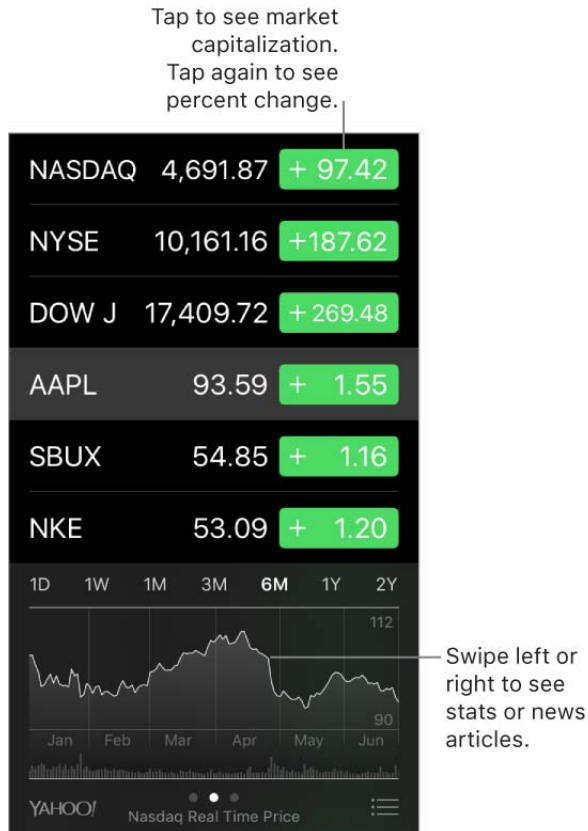

**Be reminded when you arrive at or leave a location.** Swipe a reminder to the left, tap More, then turn on “Remind me at a location.” Tap Location, then select a location in the list, or enter an address. After you define a location, you can drag to change the size of the geofence on the map, which sets the approximate distance at which you want to be reminded. You can’t save a location reminder in Outlook or Microsoft Exchange accounts.

**Ask Siri.** Say something like: “Remind me to stop at the grocery store when I leave here.”

**Add common locations to your My Info card.** When you set a location reminder, locations in the list include addresses from your My Info card in Contacts. Add your work, home, and other favorite addresses to your card for easy access in Reminders.

## Stocks

Keep track of the major exchanges and your stock portfolio, see the change in value over time, and get news about the companies you’re watching.

**Manage your stock list.** Tap .

*Add an item:* Tap . Enter a symbol, company name, fund name, or index, then tap Search.

**3D Touch.** Press Stocks on the Home screen, then choose Search. See [3D Touch](#).

*Delete an item:* Tap .

*Rearrange the order of items:* Drag  up or down.

While viewing stock info, you can tap any of the values along the right side of the screen to switch the display to price change, market capitalization, or percentage change. Swipe the info beneath the stock list to see the summary, chart, or news for the selected stock. Tap a news headline to view the article in Safari.

On iPhone 6 Plus, iPhone 6s Plus, or iPhone 7 Plus, use landscape orientation to see your stock list with news, or with the summary and chart, all at the same time.

You can also see your stocks in Notification Center. See [Notifications](#).

**Note:** Quotes may be delayed 20 minutes or more, depending upon the reporting service.

**Add a news article to your reading list.** Touch and hold the news headline, then tap Add to Reading List. To add all news articles to your reading list, tap Add All to Reading List.

**Ask Siri.** Say something like:

“How are the markets going?”

“How’s Apple stock today?”

**Find out more.** Tap YAHOO!

**View a full-screen chart.** Rotate iPhone to landscape orientation. On iPhone 6 Plus, iPhone 6s Plus, and iPhone 7 Plus, rotate to landscape orientation, then touch the chart to expand it to full-screen view. Swipe left or right to see your other stock charts.

*See the value for a specific date or time:* Touch the chart with one finger.

*See the difference in value over time:* Touch the chart with two fingers.

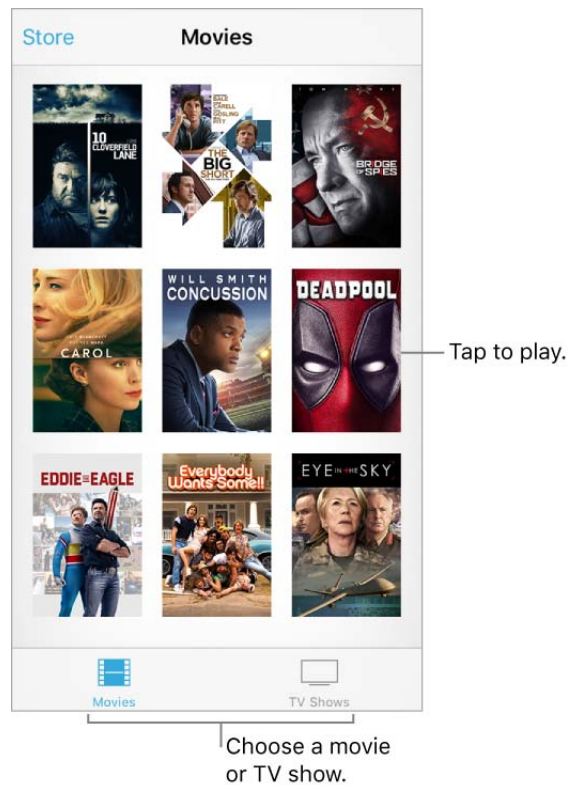

**Use iCloud to keep your stock list up to date.** Go to Settings > iCloud, then turn on iCloud. See [iCloud](#).

# Videos

## Videos at a glance

Use Videos to watch movies and TV shows on iPhone. In Videos you can also purchase movies and TV shows from the iTunes Store that can be played on your other devices where you're signed in to iCloud with the same Apple ID.

Use the Music app to watch music videos, and use the Podcasts app to watch video podcasts. To watch videos you record using your iPhone camera, open the Photos app.

**WARNING:** For important information about avoiding hearing loss, see [Important safety information](#).

**Watch a video.** Tap the video in the list of videos.

**Choose where to resume playback.** Go to Settings > Videos, tap Start Playing, then choose From Beginning or Where Left Off.

**Choose playback quality.** Go to Settings > Video, tap Playback Quality for Wi-Fi (and for cellular, if you've turned on Use Cellular Data), then choose Best Available or Good.

**Note:** High-quality playback requires a faster Internet connection and uses more data.

**Stream or download?** If  appears on a video thumbnail, you can watch the video without downloading it to iPhone, if you have an Internet connection. To download the video to iPhone so you can watch without using a Wi-Fi or cellular connection, tap  in the video details.

To show only the videos that are downloaded to iPhone, go to Settings > Videos, then turn off Show iTunes Purchases.

**Looking for podcasts or iTunes U videos?** Open the Podcasts app, or download the free iTunes U app from the App Store.

**Stop playing video automatically.** If you often fall asleep while a video plays, open the Clock app and tap Timer, then swipe to set the number of hours and minutes. Tap When Timer Ends and choose Stop Playing, tap Set, then tap Start.

## Add videos to your library

**Buy or rent videos from the iTunes Store.** Tap Store in the Videos app, or open iTunes Store on iPhone, then tap Movies or TV Shows. The iTunes Store isn't available in all areas. See [iTunes Store at a glance](#).

**Transfer videos from your computer.** Connect iPhone, then sync videos from iTunes on your computer. See [Sync with iTunes](#).

**Stream videos from your computer.** To configure video streaming from your computer to iPhone, turn on Home Sharing in iTunes on your computer. On iPhone, go to Settings > Videos, then enter the Apple ID and password you used for Home Sharing on your computer. Open Videos on iPhone, then tap Shared.

**Convert a video for iPhone.** If you try to sync a video from iTunes on your computer to iPhone and a message says the video can't play on iPhone, you can convert the video. Select the video in iTunes on your computer, then choose File > Create New Version > Create iPod or iPhone Version. Then sync the converted video to iPhone.

**Delete a video.** Tap Edit in the upper right of your collection, then tap  on the video thumbnail. If you don't see the Edit button, look for  on your video thumbnails—those videos haven't been downloaded to iPhone, so you can't delete them. To delete an individual episode of a series, swipe left on the episode in the Episodes list.

Deleting a video (other than a rented movie) from iPhone doesn't delete it from the iTunes library on your computer, and you can sync the video back to iPhone later. If you don't want to sync the video back to iPhone, set iTunes to not sync the video. See [Sync with iTunes](#).
