

**NEW!**

**Flip-Top**  
For easy maintenance

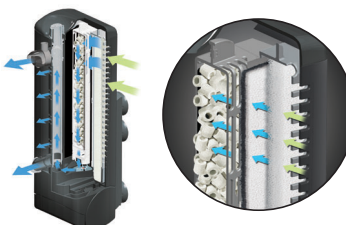

# FLUVAL® U Series

## FLUVAL U SERIES UNDERWATER FILTERS.

3 stage filtration with BIOMAX for superior aquarium water quality, Flip-Top access for quick and easy cartridge replacement and three way flow control make the new Fluval U Series the benchmark in underwater filtration. Fluval underwater filters with three stage filtration are ideal for use in fresh, marine or reptile environments.

### 3 STAGE FILTRATION

**Stage 1** foam removes large particles.

**Stage 2** poly/carbon cartridge traps fine debris, improves water clarity and removes impurities.

**Stage 3** BIOMAX provides optimal biological filtration efficiency

### FLIP TOP DESIGNED FOR QUICK AND EASY MAINTENANCE

Tilt & Flip

Pull or Replace

### ADJUSTED 3-WAY FLOW

**Top output**  
For maximum circulation and oxygenation.

**Integrated spray bar**  
Provides even, gentle flow for planted aquariums.

**Bottom output**  
For deepwater agitation.
