Welcome to Water Gardening made easy

A product guide for everything you need when planning and building ponds, waterfalls and water features for your garden

This year Maidenhead Aquatics is celebrating 30 Years of Fishkeeping Excellence having been established in 1984. We are the UK's Leading Specialist Aquatic Retailer with over 120 stores and more to come.

Our aim is to offer a high level of customer service to promote the Aquarium and Water Garden industry as we believe that through sound advice this can be a very relaxing and rewarding hobby. We carry a vast range of livestock and accessories and our helpful, friendly staff are always on hand to offer any help that you need.

This brochure gives you all the information about water garden products, fish, food and the steps you will need to take to install your pond or water feature.

If you have any question or queries about what to buy and how to install it then please ask the staff at your local Maidenhead Aquatics store.

Our Price Promise to you

At Maidenhead Aquatics we are committed to giving you the best value through great products, at great prices, supported by great service. We know how important price really is, and that's why we put so much effort into getting these right. With regard to our growing ranges of exclusive brands & products, our goal is to make sure that we offer the best quality for the price in the marketplace.

Our commitment to value is much more than simply highly competitive prices, it's about all those extra things that are worth a lot - like expert and impartial advice, or feeling confident that the product you've just bought will last; knowing that if you were to require any after-sales service then that will be second to none too.

For these reasons we are happy to offer all our customer our 'Price Promise' pledge: We will not be knowingly beaten on price for all of our ranges of products or accessories (this excludes all livestock and plants). If you find any products cheaper at one of our competitors, we will gladly match the price.

Terms and conditions apply: Items must be in stock at competitor at time of purchase. Does not apply to damaged/second & clearance lines or eBay sellers. Proof of price must be produced at time of purchase and must be of comparable terms e.g. including any delivery charges or same guarantee. The management reserves the right to refuse a transaction at any time.

TIPS ABOUT YOUR POND

Pond Capacity

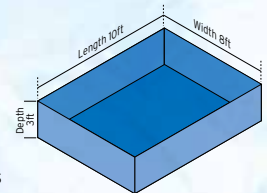

To avoid over-dosing when adding any medication or treatment to your pond, it is vital for you to know the water capacity. When installing a pre-formed pond the water capacity will be shown on the packaging but it is always a good idea to make a note of the details. For rectangular or circular shaped ponds there are a few simple calculations to work out the capacity.

Here Are A Few Final Tips For A Successful Pond

- Prepare a list of everything you need
- Find the best position for your pond, level site away from over-hanging trees
- Make sure the sun reaches your pond for at least half the day
- Remember fish are living creatures, treat them with care
- Water quality is vital!
- Always use a circuit breaker when using electrics
- Don't stock with fish that are too big for the pond
- Don't plant more than 2-3 plants per square metre
- Good planning at the beginning will pay dividends when you want to enjoy your pond

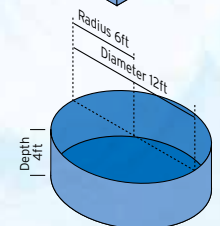

RECTANGULAR - Example

Length x Width x Depth
 10ft x 8ft x 3ft = 240ft³
 Conversion to gallons
 240 x 6.25 = 1500 gals
 Conversion to litres
 1500 gals x 4.546 = 6820 litres

CIRCULAR - EXAMPLE

$\pi r^2 \times \text{depth}$
 3.142 x 6ft x 6ft x 4ft = 452ft³
 Conversion to gallons
 452 x 6.25 = 2847 gals
 Conversion to litres
 2847 gals x 4.546 = 12942 litres

CONVERSIONS

Gallons to litres - Gallons x 4.546
 litres to Gallons - litres divided by 4.546
 Feet to Metres - Feet x 0.305
 Metres to Feet- Metres divided by 0.305

ASK INSTORE FOR A PUMP & FILTER KIT TO MATCH YOUR POND

Indestructa Damsely, Dragonfly Plus & Mayfly Ponds

Ocean	490 x 224 x 73cm	4500 litres
Nilagata	490 x 224 x 73cm	4950 litres

Atlantis Fibreglass Ponds

The Atlantis range of Professionally Designed Ponds.

- Pleasing designs for easy DIY installation giving a professional finish.
- Hand crafted in the UK with a lifetime guarantee.
- Smooth GRP finish insures minimal maintenance.
- No unsightly creases unlike pond liner.
- Many options for installation

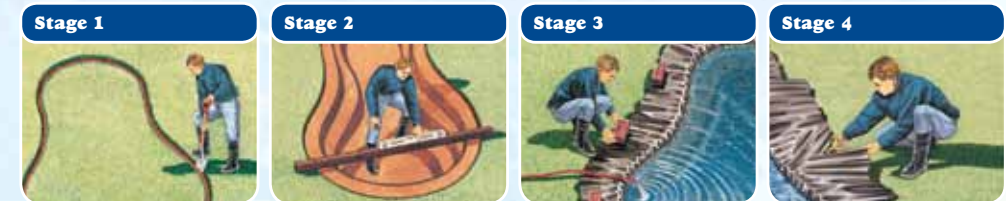

Installing your pre-formed pond

1. Place the pond in position and carefully mark out its shape with pegs or a trail of sand or flour.
2. Check the surface level and start digging down to the shelf.
3. Reposition the pond, mark out the inner deeper section and continue digging out to the bottom. Remove any loose stones or sharp objects from the hole and spread a layer of damp sand approx. 5cm (2") thick over the bottom of the hole. Check the level at the bottom.
4. Position the pond in the hole and firmly backfill with sand or soil. Your pond is now ready to fill with water and finish with your choice of edging.

Installing your flexible pond liner

1. Mark the outline of the pond and use as a guide to remove any turf and all of the soil down to the first shelf level at a depth of around 23 cm (9").
2. Use a plank and spirit level to make sure the hole is level. Check for any stones or tree roots that could puncture the liner.
3. Mark out the position of your inner, deeper section using string or wooden pegs as before and dig out the inner section making sure the bottom is level.
4. It is very important to cover the hole with liner underlay; this is a fast way of protecting the pond liner from stones or roots.
5. Position the liner evenly over the hole.
6. Place bricks or other weights around the overlap and begin to slowly fill the pond with water.
7. When the pond is full trim off any excess liner leaving an overlap of at least 15cm (6"). The surplus can be hidden beneath the rocks, turf or paving slabs bedded on water. Paving slabs should protrude slightly to hide the liner from view.

GORDON LOW Pond Liners

Gordon Low heavy duty rubber & PVC Pond Liner, recommended for all sizes of pond and aquatic projects. From 1m x 1m to 45m x 40m in a choice of materials to suit the application and budget.

If you're looking for a size that we don't stock at Maidenhead Aquatics, then we can arrange for it to be manufactured and sent direct to your address, normally next day, for no extra charge.

Box welded, circular, stepped and L shaped tailor made liners can be quoted over the phone and again can be sent to your address.

Pond Liner	Approx Size (M)

the choice of the water gardener
Aquagarden

We are very proud to be able to introduce a new and exclusive range of pond equipment for the ardent hobbyist and gardener alike - 'Aquagarden' pond products - a new range of water garden equipment.

'Enjoy water in your garden?'

Then it's easy... the 3 essentials are!

1. Water Creation:

All-you-need pond lining system

(combined pre-packed pond liner and underlay). This liner ranges from 2.5m x 3m (allows to construct a pond roughly 1.5m x 1m x 0.45m) up to 5m x 4m.

2. Water Movement:

Pond pumps for fountains, filters and waterfalls.

This range consists of 9 energy efficient pumps. The smallest pump starts at 770 LPH with 3 fountain heads, the largest is an impressive 10,120 LPH with a max head of 5.5m.

3. Water Clarity:

Pressurised and gravity pond filters

This range consists of 3 types of filters: Gravity, Pressurised and the Four-In-One: complete in-pond solution (includes Pump, Filter, UVC and LED spotlight in one neat unit) for ponds up to 1450 litres.

The Pressure Filter kits all include a suitable pump & UVC and are suitable for ponds of 2250 up to 6000 litres. The Gravity Filter kit, incorporating a UVC and pump, caters for ponds up to 3500 litres.

Pack Colour Coding:

The distinctive packaging has been designed to make the task of choosing the solution that is right for you much easier. The packs are all colour coded, Green for Very Small Ponds, Yellow for Small Ponds, Red for Medium Ponds and finally Blue for Large Ponds.

Pumps to run fountains, filters, waterfalls and features

Pumps to run pressurised and gravity pond filters

Four-in-one filter runs a fountain, or waterfall and LED spotlight

- 5m suction hose
- 2.5m discharge hose
- Sludge collection bag
- 4 nozzles - wet vacuum nozzle, wide nozzle, brush nozzle for stubborn debris and string algae nozzle

Our Price Promise To give you the best price

Pond

Pond-Pressure Filter Kits

- Aqua Pond Pressure is a unique 3-step pond pressure filter.
- Step 1: Filter foam takes care of the mechanical filtering.
- Step 2: Bacteria in the bio-balls take care of the biological purification.
- Step 3: Built-in UVC combats algae and prevents diseases.

The special design has all connections on top of the lid, including a backwash system for simple filter cleaning. This allows for the almost complete burying or concealment of the filter next to the pond.

Supplied complete with filter material and UV-C lamp, directions for use and with a 2 year guarantee.

EXCLUSIVE TO MAIDENHEAD AQUATICS

Pond

Pond-Eco Pump plus

The Pond-eco pump range plus has been specifically designed to move large volumes of water using the minimum amount of power.

The range starting with the 7000, then 10500, 14500 and finally the 18500 are all extremely reliable in operation. For additional peace of mind we offer a 3 year pick up and replacement guarantee - if it breaks down we will pick up and replace with a new unit within 48 hours free of charge.

Two outlet options (top and side) makes the pump easy to install and the robust filter housing minimises the risk of blockage and makes maintenance easy.

- Professional filter pump for koi, fish and garden ponds
- Pumps large volumes of water with low electricity consumption
- Double ceramic suspension drive and gear wheel
- Vortex fan blades carry debris up to 8mm in size
- Build-in thermal overload safety device

EXCLUSIVE TO MAIDENHEAD AQUATICS

Easy Clear™ - Clearwater And Fountain Pump

The range comprises three units for ponds up to 3000, 6000 and 9000 litres. These fully integrated units combine a pump, filter and UVC and can be completely hidden in the pond. They provide clear and healthy water, easy installation and an attractive fountain and / or waterfall.

- EasyClear 3000 can run a fountain or waterfall
- 3 fountainhead options for different display choices

EASY MAINTENANCE

- Latch access for cleaning foams and Kaldnes™ bio-media
- Anti-clog fountain strainer for low maintenance
- Bayonet fitting for easy access to the UVC cleaning and changing
- Water bypass allows continued UVC and fountain operation foam is blocked

CLEAR WATER GUARANTEED

Ensure that the EasyClear™ is correctly sized to the Hozelock Cyprio guidelines and we guarantee you clear water.

EASYSUCCESS BENEFITS:

- The UVC eliminates green water
- Filter foam sieves out solid particles in the water

FOUNTAIN AND WATERFALL

- Reliable and attractive fountain and waterfall display. (EasyClear 6000 & 9000 can run a fountain & waterfall simultaneously.)

Model	Max Fountain Height	Bell Jet Diameter	Waterfall Width	Max litres (max Gallons)	Max Fish CM (Inches)

EasyClear 6000	1.60m (5'03")	0.60m (2'00")	0.13m (0' 05")	6000 litres (1320 Gals)	1.44m (4'08")
EasyClear 9000	1.90m (6'02")	0.70m (2'03")	0.25m (0' 10")	9000 litres (1980 Gals)	2.16m (7'08")

Fountain & Water Pumps

An ideal all purpose pump for small to medium displays, fountains, waterfalls or ornaments. Double outlets mean you can run 2 features from 1 pump (e.g. a fountain and waterfall) and the flow to each can be controlled independently.

- Telescopic fountain pipe
- "Quick coupling" outlet attachment for waterfall (medium & large models only)
- 3 Year Warranty

All models are supplied with a choice of 3 fountainheads.

KEY FEATURES;

- High efficiency motor for low running costs and long life
- Flow controls to adjust the size of fountain & waterfall independently
- Ball joint for fountain stem angle adjustment
- Anti clog foam free inlet cage for reduced maintenance

Model	Max Flow Rate (LPH)	Head (m)	Max Fountain Height (m)	Watts

Cascade 1500 Medium Fountain or Water Feature Pump	1500	1.8	1.2	33w
Cascade 4000 Large Fountain or Water Feature Pump	4000	2.1	1.6	40w

Bioforce Revolution Pressurised Pond Filter with UVC

The Bioforce Revolution features a patented, easy clean system and is combined with a 3 step filter process to offer Clear and Healthy Water Guaranteed:

- Pressurised filtration without clogging or flow loss unique Cypricube foam filters effectively remove waste but do not clog like traditional foam filters.

- Suitable for ponds up to 14000 litres
- High Powered UV Clarifier - leaving murky waters a thing of the past and guarantees the elimination of green water
- Mechanical Filtration - with Cypricube foams to remove solid particles and help reduce clogging or flow loss to guarantee crystal clear water
- Biological Filtration - using surface area Kaldnes K3 biological material to maintain healthy water.
- No fuss cleaning system - No more dirty hands simply turn the handle to activate the internal cleaning blades that separate solids from the Cypricube foams.

Revolution 14000uvc	14000	8000lph	36w

Bioforce Filter Kits

Combining the convenience of a Bioforce Revolution pressurised filter with a powerful Aquaforce pump creates a complete filtration system.

Available in 5 sizes to match your pond, the new Hozelock Cyprio Ecoclear is the combination of the Bioforce and the Aquaforce solids handling pumps, designed specifically for filtration, waterfalls or watercourses.

Due to the UVC capability and used in the in the correct size pond, Hozelock Cyprio guarantee Clearwater.

Model	Max Pond Size	Filter	Pump
Bioforce 3000 + Aquaforce Kit	6000	Bioforce 3000	Aquaforce 2500
Bioforce 4500 + Aquaforce Kit	9000	Bioforce 4500	Aquaforce 4000
Bioforce Revolution 6000 + Aquaforce Kit	121000	Bioforce 6000	Aquaforce 4000
Bioforce Revolution 9000 + Aquaforce Kit	18000	Bioforce 9000	Aquaforce 6000
Bioforce Revolution 14000 + Aquaforce Kit	28000	Bioforce 14000	Aquaforce 8000

SuperFish Pond Skim

SuperFish Pond Skim floats in the pond and sucks dirt such as leaves, dust and algae from the water's surface.

Pond Skim is easy to clean thanks to an easily removable waste basket.

- Low power consumption
- 2 year warranty.

Model	Max Pond Size	Max Flow Rate	Power
Pond Skim 2000	25m ²	2000 LPH	32 Watts
Pond Skim 3000	40m ²	3000 LPH	55 Watts

Laguna Pond Fountain Pumps

These Laguna Pond Fountain Pump Kits includes everything you need to generate powerful water circulation and beautiful water fountain displays in small ponds

The kits includes an extendible riser stem and 2 interchangeable fountainheads that create pleasing fountain displays.

The pumps have an adjustable flow control that allows you to set the water flow to meet your needs. In addition the riser stem for the PT8160 model has a 19 mm (3/4 in) water diverter valve that allows you to create a waterfall.

The pumps' impellers are protected by strainer cages that capture and prevent debris from entering the pumps. The pumps come with suction cup bases for fast, easy installation and operating stability, and feature the patented Click-Fit coupling design that allows you to make quick and secure attachments by a simple clicking action.

The Pond Fountain Pump Kits are covered by a 2-year warranty.

Model	Max Pond Size	Max Flow Rate
Laguna Fountain Pump Kit PT8150	For ponds up to 1400 ltrs	700 LPH
Laguna Fountain Pump Kit PT8155	For ponds up to 3000 ltrs	1500 LPH
Laguna Fountain Pump Kit PT8160	For ponds up to 4000 ltrs	2000 LPH

Clear-Flo Kits

For the ultimate combination in power and performance. Laguna has combined our industry leading Max-Flo solids handling pump with the Pressure-Flo UV Filter.

This perfect partnership ensures sustained performance and stunning water clarity.

MAX-FLO FEATURES

- Powered by a European-engineered magnetic driven motor
- Energy efficient pumps, the energy savings often pays for the cost of the pump within two years
- Very few moving parts results in minimal maintenance
- The unique strainer cage protects the impeller and maintains a constant water flow

PRESSURE-FLO FEATURES

- Cleaning indicator takes the guess work out of maintenance intervals
- Filter backwash system enables routine cleaning in seconds
- Mechanical, biological and integrated UV filtration work in unison providing clean and clear pond water guaranteed
- Easy to install and maintain

Model	Pump	Filter	UVC	For Ponds up to
Clear-Flo Clearwater Pond Kit 2500	Max-Flo 2200	Pressure-Flo 2500	Integral 11 Watt UVC	2500 litres
Clear-Flo Clearwater Pond Kit 5000	Max-Flo 3500	Pressure-Flo 5000	Integral 11 Watt UVC	5000 litres
Clear-Flo Clearwater Pond Kit 8000	Max-Flo 6000	Pressure-Flo 8000	Integral 20 Watt UVC	8000 litres
Clear-Flo Clearwater Pond Kit 12000	Max-Flo 7500	Pressure-Flo 12000	Integral 11 Watt UVC	12000 litres

Max-Flo Filter Pumps

Laguna Max-Flo are a range of Ultra High performance filter and waterfall pumps.

ENHANCED PERFORMANCE

- Greater lift and lower power consumption
- Anti-leaf ribs to ensure continuing suction
- Cage openings from 6 - 10mm wide depending on the pump inside
- Solid, ergonomic handle to ensure a safe grip & easy transportation
- Solid, 'aggressive' look

- Spring loaded fastenings - for easy access to pump cage
- 2 level suction:
- Solids suction capability from the lowest level possible
- Solids suction capability from the upper cage surface as well, to ensure continued operation
- Click Fit fittings
- High stability thanks to flat shape (low centre of gravity)

Model	Flow LPH	Head (M)	Watts
Max-Flo 2200	2200	1.80	32
Max-Flo 4000	4000	2.00	55
Max-Flo 5000	5000	3.30	65
Max-Flo 7600	7600	3.50	75
Max-Flo 9000	9000	3.70	80
Max-Flo 11000	11000	4.20	105
Max-Flo 16000	16000	4.70	160

EazyPod Complete Filter

The EazyPod Complete is a compact mechanical & biological filter with an integrated 18 watt UV-C. It is easy to use and easy to clean, making it ideal for ponds up to 10,000 litres (2,200 gallons). The 18 watt UV-C clears green water, caused by single celled algae, while the EAZY filter combined with K1 media inside the EazyPod clears organic and biological waste produced by your pond fish. The EazyPod Complete is also supplied with an Air Pump 70 Kit.

The EazyPod Complete is now available in a choice of two colours, grey or green granite, and can be supplied with or without the 18 watt UVC.

- Ideal for garden ponds up to 10,000 litres
- In built 18 watt UV Clarifier
- Easy to install and clean
- Supplied with Air Pump 70 Kit
- Fitted with +” Slide Valve and Hosetail on Inlet and Waste
- Pump Fed Set Up Only

Nexus Eazy Filtration System

The Nexus Eazy 210 and 310 are Evolution Aqua’s award winning filtration systems for Koi. Incorporating the industry proven Kaldnes Moving Bed coupled with the exceptional Eazy mechanical filter, combined they provide outstanding water clarity and quality. Not only that, these filters are extremely ‘Eazy’ and a pleasure to clean.

The Nexus 210 and 310 are cleverly combined mechanical and biological filters creating an effective, high performance filtration system for all sizes of pond. The Nexus, combined with the Eazy, means there really is no competition regarding price and what it will achieve!

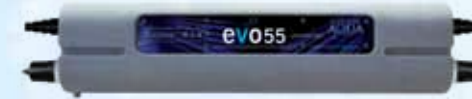

Model	Max Flow Rate	Kaldness Media	Max Capacity	Max Pond Size	Volume of water in Filter
Nexus Eazy 210	10000lph	50 ltrs bio/30 ltrs Eazy	150 ltrs bio/30 ltrs Eazy	18000 ltrs	510 ltrs
Nexus Eazy 310	13000lph	100 ltrs bio/40 ltrs Eazy	300 ltrs bio/40 ltrs Eazy	34000 ltrs	840 ltrs

All of our evoUVs have been designed using the very latest design techniques to ensure that every evoUV delivers clarity to your pond water, by killing the single cell algae that causes green water.

- KEY FEATURES:**
- Eradicates green water in garden ponds
 - Features high output, digital electronics
 - Easy to maintain, easy to install
 - 3 models available; 30W, 55W and 110W

Model	Max Pond Size	Power
Evo30	30,000 litres	30 watts
Evo55	55,000 litres	55 watts
Evo110	110,000 litres	110 watts

TMC Pond Clear Advantage UV Pond Clarifiers

- KEY FEATURES:**
- Robust construction and ergonomic, green and black design.
 - Surface, filter or wall mountable and supplied with a wall mounting kit and a filter lid fixing kit.
 - Four-stage hosetails designed to take flexible hose from 1/2” to 1 1/4”.
 - Includes rigid pipe adaptors for connection to 40mm solvent weld rigid pipe.
 - Supplied with a 5 metre power cable (10m on UV16).

Model	Max Pond Size	Power
Pond Clear Advantage UV6	2,700 litres	6 watts
Pond Clear Advantage UV8	5,400 litres	8 watts
Pond Clear Advantage UV15	13,500 litres	15 watts
Pond Clear Advantage UV16	14,400 litres	16 watts
Pond Clear Advantage UV25	18,000 litres	25 watts

TMC Pro Clear UV Pond Clarifiers

Professional ultraviolet pond clarifiers suitable for larger ponds, particularly Koi ponds.

- KEY FEATURES:**
- Surface, filter or wall mountable
 - Suitable when high flow rates are needed - the UV30 has a maximum flow rate of 3,000 gal/13,500l per hour and the UV55 has a maximum flow rate of 4,000 gal/18,000l per hour.
 - Quick and easy to maintain - replacement UV lamps and spares are readily available.

Model	Max Pond Size	Power
Pro Clear Advantage UV30	27,000 litres	30 watts
Pro Clear Ultra 55	45,000 litres	55 watts

TMC Pro Pond Advantage UV Pond Clarifier

Designed for large ponds, incorporating pressure filters or pressure circuits such as sand filters & venturis.

- KEY FEATURES:**
- New ergonomic, compact design.
 - New energy efficient, electronic control gear.
 - Universal 2” and 63mm solvent weld inlet and outlet ports.
 - Can be used for pressurised systems up to 3 bar (43.5psi).
 - Individually chambered lamps for optimum efficiency and contact time.
 - Fused quartz glass sleeves which ensure that germicidal lamps are able to reach their optimum ‘burn temperature’ where the highest amount of UVc radiation is emitted.

Model	Max Pond Size	Power
Pro Pond Advantage UV110	72,000 litres	2 x 55 watts

Aquasoil

AquaSoil is ideal for all pond, bog and marginal plants such as lilies and rushes. The added grit gives weight and stability to planting pots and the compost is completely harmless to all pond life.

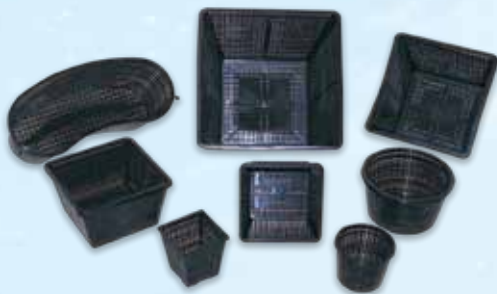

QUALITY COMPOST

This high quality growing medium provides all the necessary nutrients in the correct ratios to encourage plentiful plant flowering as well as good root growth. This strong root system in turn provides extra stability and healthy disease resistant plants.

TIPS ON USE

We strongly recommend using a correctly sized fine-mesh pond plant basket to pot your pond plants in. Avoid placing baskets in the turbulent area created by the pond pump.

Do not use a multi-purpose compost for pond planting, as the higher levels of nitrogen can lead to algal growth in the pond and the compost can become suspended in the water.

PLANTING

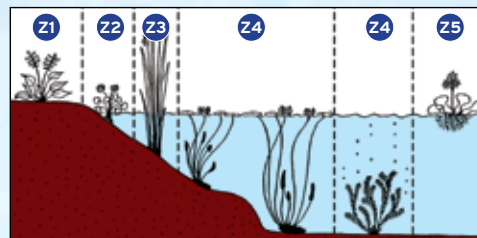

Remove plants in pots with care. Ideally line the new fine mesh basket with a suitable material, such as hessian. Half fill the fine mesh pond plant basket with the compost. Place plant carefully into the compost. Fill with more compost around the roots. Firm gently, adding more compost if necessary to bring the level to just below the rim of the basket. Finish off the basket by dressing with a layer of suitable gravel; this will keep the compost in place and prevent fish from disturbing the plant roots and muddying the pond water.

Thoroughly water the planted basket before placing in the pond. To improve the plants' vigour and flowering we recommend feeding with a pond plant fertiliser and repotting the plants regularly so they do not become root bound.

A Guide to Placing you Plants

Take care to plant your aquatic plants in the correct part of your pond. Water lilies grow in deeper water and send up leaves that float on the surface.

Marginal plants grow in the shallow water around the sides of the pond, and bog plants like moist conditions at the pond edge. Each plant has the 'planting depth' (depth of water above pot) stated on the back of the pot label; as a quick reference the Zone diagram below shows the various water depths in zones and each plant will have its growing zone stated on the label.

Marginal Pond Plants

To bring your pond to life - Zones 2 & 3

Marginal plants provide life and colour around the pond margins; low growing, rafting types have pretty flowers and fine roots ideal to hide baby fish and tadpoles; tall plants like irises should be planted at the far side of the pond where they will form striking clumps and be used by emerging dragonflies and other wildlife.

Group together species that require the same planting depth (see pot labels). Plant firmly and top off with aquatic gravel.

Water Lilies & Marginal Plants

Water Lilies and deep marginals grow in the deeper part of the pond, but young lilies should be started in shallow water and lowered gradually over several weeks for best results. The pot label on each lily states optimum planting depth. Their lovely blossoms bring beauty to the pond and the floating leaves give shade and cover to fish and other aquatic life.

Water lilies prefer still water - plant away from waterfalls or fountains. Plant water lilies and marginals to shade the water surface - cutting out sunlight in the water cuts down algae.

1. Cut off leading shoot with good growth on the tip.
2. Plant aquatic soil in a mesh container with fertiliser. Keep growing tip above soil.
3. Top off with aquatic gravel and place in bottom of pond.

Oxygenating plants

Oxygenating plants grow up from the bottom of the pond, their leaves giving off bubbles of oxygen helping the ecology of the pond; bunches can be thrown in to root in natural ponds but should be planted in containers in ponds without soil in the bottom.

Balance your pond with the right plants to minimise green water algae and blanket weed growth. Plant at least 10 bunches of oxygenating plants per square metre; these produce oxygen and absorb mineral salts otherwise used by algae.

Floating plants

Floating plants are just floated on the water surface; their fine roots are used by spawning fish and provide habitat for aquatic insects.

Fertilizer Pond Spikes

Laguna Plant Grow Once-A-Year Fertilizer Pond Spikes supply important nutrition to aquatic plants for one full year.

Once activated, the spikes slowly release a well-balanced feeding formula that maximizes the size and color of all potted aquatic plants.

AquaRattan

This two-tiered patio pond features a sheer-descent waterfall with a spillway that lights up. The (blue or white) LED light and water feature can be turned on independently of one another so you can create the perfect mood.

Not only does this unique pond make a great water feature, the upper tier also doubles as a planter! The intricately woven wicker finish allows this sophisticated design to pair with a variety of outdoor furniture designs.

- Stylish self contained water feature
- Planter incorporated in design
- Marine grade stainless steel
- Moulded liner with plug
- Easily assembled

Model	Length:	Width:	Height:	Volume:
Aqua Rattan Square Pond	78cm	78cm	37cm	120 litres
Aqua Rattan Square Pond	99cm	78cm	63cm	145 litres

Affinity Living Feature Pools

These brand new and innovative terrace ponds from Blagdon contain everything you need to easily set up and maintain a feature pond in your garden. Ideal for patios, decks, garden or conservatories. They do not require any prior aquatic knowledge and do not need any digging. The pools are safer for children due to being raised, and the window feature makes the pools accessible and interesting for all the family.

The Blagdon Affinity Feature Pool is available in five sizes and they all include:

- PE Rattan panels that simply screw together
- Fibre reinforced liner
- Shatter proof windows
- Waterfall hose and fittings
- Low voltage pump and filter
- Automatic night time feature with pivoting LED spot light
- One planting basket
- 3 fountain displays
- Water conditioner/filterstarter
- Green water treatment
- Window cleaning pads
- Step by step set up and 'how to' guide

The low maintenance Affinity Feature Pools come with the Blagdon Life Support System, an efficient pump and filtration package.

Model	Length:	Width:	Height:	Volume:
Affinity Rectangle	91cm	61cm	61cm	260 litres
Affinity Square	91cm	91cm	61cm	350 litres

Enhance Pond & Garden Lighting Range

- Create atmosphere and drama in your garden with Enhance versatile lighting
- Enjoy your pond at night with creative lighting effects
- Ideal for spotlighting features, fountains and waterfalls
- Ideal for up lighting trees and shrubs
- Illuminate paths and walkways
- Includes three contemporary lenses

PowerGlo Submersible 40 LED Pond Lights

PowerGlo Submersible 40 LED Pond Lights are extremely compact and can be used almost anywhere, in or out of the water, to produce stunning lighting effects.

The use of LED technology results in a longer lasting and a more energy efficient light. The lights are pre-wired to make installation easy, simply place in the desired location and connect to the electrical outlet.

- Includes 2 lights and a low voltage transformer (12V) with automatic light sensor
- Each light contains 40 LED bulbs for maximum light output
- Can be angled in the desired position
- Suitable for use in/out of water 39" (2.5m) wire between each light

Aqua-Glow LED Lights

LED lights are becoming increasingly fashionable in home and garden design. LED lights emit a very powerful distinctive clear and direct light to illuminate the pond or fountain.

They can either sink to the bottom of the pond, float on the surface or attach to the Cascade fountain pump to light up a fountain. Each pond light includes 10 LEDs for maximum light output.

- Interchangeable colour lenses
- Lead length on each light: 2 metres
- 12 Volt supply for low running costs
- Low voltage cable length: 7.5 metres

AND FINALLY...

Interest Free Credit now available at participating stores

We are delighted to be able to offer our customers the option of purchasing any aquatic goods on an interest free credit facility (0% APR representative). This is available in all participating stores for all purchases over £350 in value and up to a total credit value of £2500.

All you need to do* is make a minimum payment of 25% deposit on the purchase, fill out some very quick and simple forms, bring in a proof of ID, have a UK landline telephone number, and subject to approval of the credit agreement, you could be taking home those aquatic goods you've been hankering after straight away! Then it's just 12 easy monthly direct debit payments at no interest to pay whatsoever- simple!

Get your pond started, you could buy all this and more today!

Subject to credit agreement.

Terms and conditions apply.

Applicants must be aged 18 or over.

Please ask a member of staff for further details

For example if you were to buy*:

* prices correct at time of print March 2013. All products may not be available in all stores, prices may vary.

Maidenhead Aquatics Gift Cards

Puzzled about what to buy someone as a present. How about a Maidenhead Aquatics Gift Card. There are 4 great designs to choose from and once you've picked the card you like from your local store, send the gift and let the recipient choose what they really want.

Terms & Conditions

1. Once activated the value on this Maidenhead Aquatics Gift Card can be used as full or part payment at any Maidenhead Aquatics store in the United Kingdom.
2. The card can be loaded with any value between £10 and £500. The maximum value stored on the card is £500.
3. The monies on this card cannot be exchanged for cash. Any remaining balance will be stored on the card and may be used to pay for future purchases.
4. All monies on the card must be used by the expiry date which is 2 years from the date of purchase. Any balance left on the card after this date will be deducted.
5. Please protect this card and treat it as cash, the balance cannot be returned if lost or stolen.
6. To check the remaining balance on your card visit www.fishkeeper.co.uk or contact 0844 412 1720.
7. This card is not a credit, debit or cheque guarantee card.
8. Maidenhead Aquatics reserves the right to amend these terms and conditions at any time or withdraw the card on reasonable notice. Your statutory rights are not affected.
9. To benefit from special offers and promotions from Maidenhead Aquatics register your gift card at www.fishkeeper.co.uk.
