World leader of skin & hair diagnosis system

 **aram HUVIS**
Global leader in skin diagnosis system

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference. and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Caution

Any changes or modifications (including the antenna) made to this device that are not expressly approved by the manufacturer may void the user's authority to operate the equipment.

To comply with FCC RF exposure compliance requirements, a separation distance of at least 20 cm must be maintained between the antenna of this device and all persons. This device must not be co-located or operation in conjunction with any other antenna or transmitter.

This equipment complies with FCC

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Troubleshooting Guide & FAQ

I cannot turn on the device.

- Connect and charge the device (or the battery) using the adaptor provided the supplier. (The battery charging indicator will be shown on the system main page.)

I cannot power on the device even the battery is still full.

- The battery might be dislocated on the device. Please separate the battery from the device and put it on, and then power on again.

The battery is not charging very well.

- Separate the battery from the device and put it on again.
- Check the connection among a device, a battery, and a charger.
- A battery cannot be charged if there is an alien substance on the charging port. In this case, please use the device after cleaning the charging port of the device or check whether the sticker is attached on charging port.

The using time of the battery is different from the manual.

- The battery using time will be shorten if you put the charged battery in a low or high temperature.
- The battery using time vary in service type, using environment, using period of the battery.
- The battery is consumed without using the device, and the battery using time will be shorten if you use additional functions of the device.

The device turns on but the diagnosis doesn't work.

- Check the smart card is correctly inserted (SD card slot on the button of the device).

There are dust on the device.

- Clean the dust by using a smooth fabric. Do not use benzene, alcohol, and a synthetic detergent.

The screen is frozen and the keys not working when using the device.

- Separate the battery from the device and put it on again.
If the device is still not working, please contact to the customer service center.

A "force close" message appears on the screen.

- The repetition of commands can trigger a bug. Sometimes there may be a brief delay before the command is completed. Do not repeat/multiply the tasks as the device will no longer be able to follow them.

Troubleshooting & FAQ

I cannot connect to Wi-Fi.

- Check the connection status on setting page.
- Try to connect to another Wi-Fi.
- - Bluetooth : Check the pairing status and try to re-pair the device with host device.

I cannot connect to Blue-tooth.

- Make sure to use the Bluetooth hosting devices that have Bluetooth certified with the logo. You may need an external Bluetooth dongle for those devices that do not have Bluetooth feature.
- Bring the device to closer with the Bluetooth hosting device.
- Try to re-pair the device with host device.
- The password of pairing is "0"(number).

The touchscreen doesn't react to my finger commands.

- Before using for the first time remove the protective plastic film.
- Use the stylus-pen provided from supplier.

The screen was turned off.

- The device has a power save function that turns the screen OFF after 1 minute. Press the on/off button to turn on the screen.

I can see the black screen only during measurement.

- Check the LED light inside lens on the head part when you try to measurement. If you cannot see the light, please connect the customer service center.

The image is not clear.

- Tap the screen while capturing to focus.

I cannot update the diagnosis application.

- Check the network connection, the update process can be done after connect to Wi-Fi.
