The supplied items are designed only for your device and may not be compatible with other devices.
Unapproved accessories may cause your device to malfunction.

Description of the Motion Tag

(1) Magnet

(2) Magnet position indicator

(3) Pairing indicator

(4) Pairing button

Assembling

Your Motion Tag functions with a battery Lithium cell CR 24 30.

1. Unscrew the Motion Tag.
2. Insert the battery by keeping the marked side up.
3. Screw back on.

Pairing

A Bluetooth standard BLE allows to pair your Android device with your Motion Tag.

1. On your Android device, go to Settings > Wireless & networks > Bluetooth.
2. Slide the Bluetooth switch to ON.

The Bluetooth icon is displayed in the status bar.

3. On your Motion Tag, hold the pairing button until the pairing indicator starts blinking. The Motion Tag enters the pairing mode.

4. Launch the ARCHOS@home app on your Android device and select the Motion Tag icon.

The Motion Tag is dectected. Select to start the pairing process. Once paired, you can detect movements.

You have 60 seconds to pair the devices.

Using the Motion Tag

1. Launch the ARCHOS@Home app.
2. Select the Motion Tag icon.
3. The app interface displays OPEN when the Motion Tag detects the remoteness of the magnet. When it detects the magnet close-by, the app interface displays CLOSED.

FCC Statements

Statement:
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference re-ceived, including interference that may cause undesired operation.

Warning:
Changes or modifications to this unit not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.
