PENTAX WG-3 GPS
PENTAX WG-3

Quick Q Guide

Thank you for purchasing this PENTAX digital camera.

The PENTAX WG-3 GPS / PENTAX WG-3 is waterproof, dustproof, and shockproof, as shown below, so you can use it in a wide range of outdoor activities.
Waterproof/dustproof: JIS grade 8 waterproof and grade 6 dustproof (IP68)
Shockproof: Satisfies the PENTAX drop test (2.0 m height onto a 5 cm thick plywood surface) complying with MIL-Standard 810F Method 516.5-Shock testing.
* Waterproof performance is not guaranteed if the camera is exposed to impact such as being dropped or hit.
* The camera is not guaranteed to be free of trouble or damage under every condition.

Checking the Contents of the Package

Check that your camera came complete with the items listed below.

[Battery depleted]	The camera turns off after this message appears.

---

1 Preparing the Camera for Use

**Prepare your camera for use before you start using it.**

● Attaching the Carabiner Strap

Attach the carabiner strap supplied with the camera as shown in the illustration.
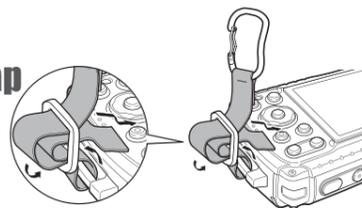

● Installing the Battery and SD Memory Card

Install the battery and SD Memory Card as shown in the illustration.
- Battery cover lock
- Release latch
- SD Memory Card socket
- Battery cover
- Battery
- Battery lock lever
- SD Memory Card

* The SD Memory Cards are sold separately.

**The inside of the battery compartment is not waterproof.**
● In places where the camera is exposed to water or dirt such as underwater, at the beach, in a kitchen, etc., make sure that the battery cover lock and release latch are firmly locked so that they won't open unexpectedly. Do not open the cover in such places.
● When removing the battery or card, avoid places where the camera may be exposed to water or dirt, and make sure that the camera, battery, card, and your hands are completely dry.

2 Turning the Camera On

● Pressing the Power Button

The camera turns on and is ready to take still pictures. Press the power button again to turn the camera off.
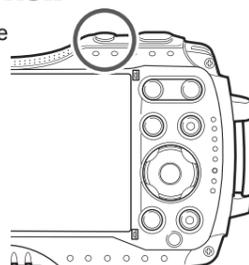

● Making the Initial Settings

The [Language/言語] screen appears when the camera is turned on for the first time. Select the desired language and then set the date and time.
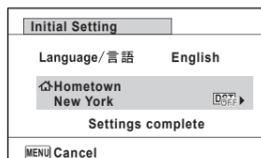

1 Use the four-way controller (▲▼◄►) to select the desired language.

**2** Press the **OK** button. The [Initial Setting] screen appears.

(Memo)
If you accidentally select the wrong language and press the **OK** button, press the four-way controller (►), use the four-way controller (▲▼◄►) to select the desired language, and then press the **OK** button. The [Initial Setting] screen appears in the selected language.

● Formatting an SD Memory Card

Use this camera to format (initialize) an SD Memory Card that is unused or has been previously used on other cameras or digital devices. Be aware that formatting deletes all the data stored in the SD Memory Card. On how to format an SD Memory Card, refer to the Operating Manual (p.168).

Aim the camera at the subject, then press the shutter release button. The flash discharges automatically depending on the brightness.

1 Frame the subject using the focus frame on the display.

2 Press the **W**/**T** button to change the captured area.

W ————— T

Widens the area that is captured by the camera.

Enlarges the subject.
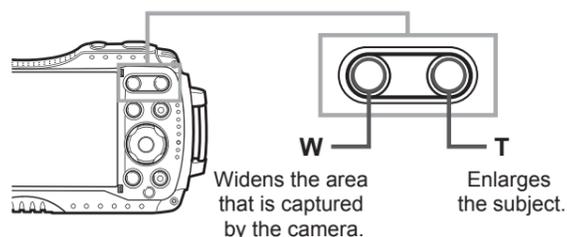

3 Press the shutter release button halfway.

The focus frame on the display turns green when the subject is in focus.

4 Press the shutter release button fully.

The picture is taken.
