Avant-Courier
HIGH SPEED RC RACING

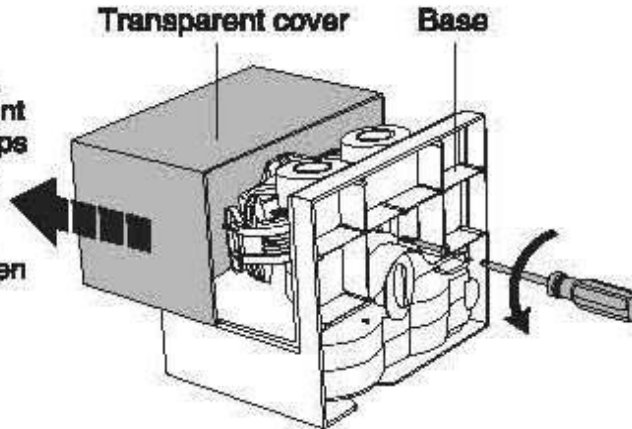

Name of product: SHEN QI WEI.

PRODUCT FEATURES:

This product has original appearance, particular structure, logical design, easy operation, convenient use, ascendant capability. It can be the toys play, and also the decoration.

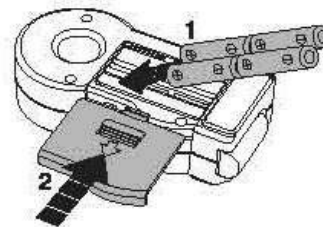

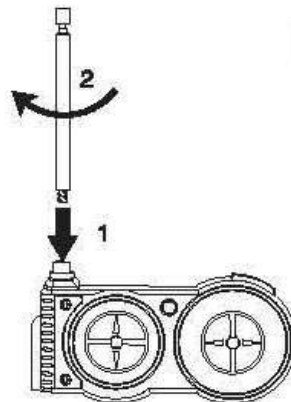

Preparation:

1. As shown in diagram, remove the transparent cover and use a phillips screwdriver to loosen the base screws by turning in the counter-clockwise, then take out the remote control car.

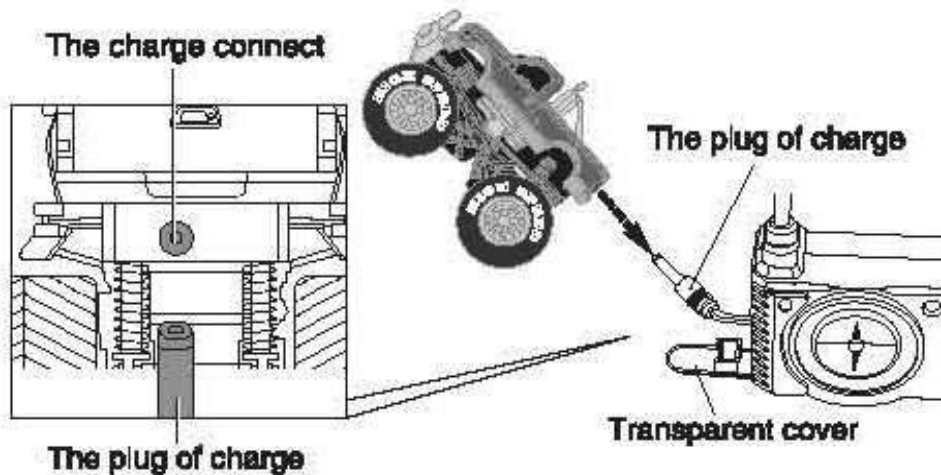

-
2. Turn the lock that under the base for 90°, and take out the controller and antenna as shown in diagram.

3. Insert the antenna into the hole at the top of the controller, and tighten it.

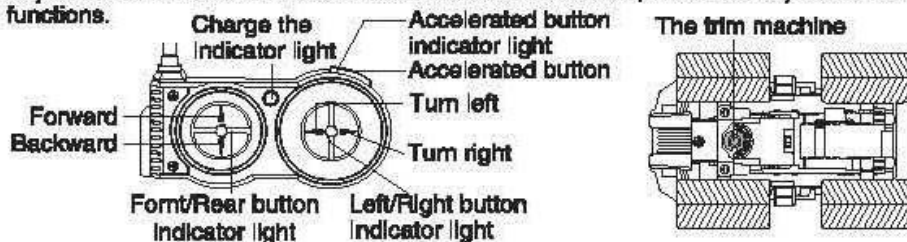

4. Push away the battery cover after the controller, install 4x "AA" batteries with the correct polarity, then replace the battery cover.

5. Open the transparent cover, take out the plug of charge from the button of transparent cover, then insert the plug of charge into the charge to connect of the car back, the indicator lamp lights. It goes out when the car was fully charged, then pull out the plug of charge. The car should be charged for about 5 minutes.

Operation:

1. Fully extend the antenna when playing; turn the power of car switch to "ON" position.
2. Press the button of the controller, the car works. The operation indicator lamp shines as pressing the button of the controller. (CAUTION: Because pressing the accelerated button, press the front and rear button invalidation, so the front and rear indicator light is not shined.) When pressing the forward/backward button, the car moves forward/backward (The car headlight lights only that the car run forward); The car may turn left/right while pressing the forward/backward button and the left/right turn button at the same time. Pressing the accelerated button when the car forward, the car rapidly will speed, when press the left/right button again, the car will automatically decelerate to decrease turns over the car is trouble.
3. Adjust the trim machine in the front of the bottom of the car, which can adjust car runs functions.

Caution:
