Table 4 LED Indication

3 Assemble Phone

3.1 Connectors on the Phone

- 1-- Antenna Connector
- 2-- USB Connector
- 3-- Charger DC Jack

3.2 Assemble the cord line

3.3 Assemble Antenna

4 Basic Operations

4.1 Power On/Off

Hook up handset to your phone and put the handset to hang up position, then connect DC power supply to the “DC IN” port at the rear of the phone or insert the battery to the battery chamber. Then long press End Key to turn on the phone, your phone should go to idle screen and is ready to use.

You can turn the phone off with long pressing the End Key.

Note: Be sure to insert the battery before using the phone

4.2 Make a Call

While your phone is power on and at idle screen, enter a destination number you wish to call and then press **Redial** Key. (Note: To modify digits you enter, you can press **Clear** Key to delete wrong digits first and then enter new digits). Once the call is connected, the phone’s screen will display the number you have dialed, and the time duration the call has lasted.

The phone also has a speaker. To use the speaker to make a call, press **SPEAKER** Key, enter a phone number, and press **REDIAL** Key.

4.3 Answer a Call

When there is an incoming call, the phone will ring and display the Phone number of the incoming call (if the number is available). You can pick up the handset or press **SPEAKER** Key to answer the incoming call. The ring tone and ring-tone volume can be changed in the sounds menu.

4.4 End a Call

You can end a call by pressing **END** Key. If you are using the handset for a phone call, hanging up the handset will end the call automatically.

4.5 Call Waiting

If you have enabled call waiting feature, you can suspend the current call party and switch to the new incoming call by click **Answer** or **Green** key. And also, you can switch with the current caller and suspended caller by click **Green** key. You can also finish the current call by click **End** key then continue to speak with the suspended caller.

4.6 Conference call

If you wish to have more than one called party listen in to the call, you can make a conference call. When you dialed to the first party, and want to make the second call, you can directly dial the second number in the call interface (this time the first call is under hold), then you can press **Send** key to connect the three people together.

4.7 Call handling during data session

Please activate Call Waiting feature on your phone if you want to accept a voice call during the data session.

You can accept the incoming call during the Data call session, while doing so the data connection will be hold and will resume automatically after the voice call ended. There is also an option to ignore the incoming voice call while a data call is in progress.

You can also make a voice call when the data session is in dormant mode.

5 Main Menu

13 Important Information

- ✧ The product can only be installed indoors.
- ✧ Do not place the phone near high temperature objects, under direct sunlight, near source of water, near fire or near inflammable and explosive materials. Avoid using the phone in high temperature or humidity.
- ✧ The phone may interfere with heart pacemaker, hearing aid and other electronic medical devices. Therefore please follow the instructions given by your equipment suppliers or consult your doctor. Turn your phone OFF in health care centers if any regulations posted in the area instruct you to do so. Hospitals or health care centers may be using equipment that may be sensitive to external RF energy.
- ✧ Place the phone away from other electronic devices like TV and Radio to avoid interference.
- ✧ Keep the product away from magnetic field and static electricity.
- ✧ Place the phone out of the reach of small children.
- ✧ Do not attempt to reassemble the phone by yourself. Only authorized personnel could service the phone and its accessories. Faulty installation or service can be dangerous and may invalidate the warranty.
- ✧ Do not clean the phone while in operation. Before attempting to clean the phone, turn the phone off, disconnect the external power adapter and take out the battery. Use a dry, soft cloth for cleaning. Do not use liquid or aerosol cleaners.
- ✧ Do not drop, knock or shake the phone. Rough handling may break the phone body and internal circuit boards.
- ✧ Do not use the phone if the antenna is damaged. Replace the damaged antenna immediately by a qualified technician. Use only a manufacturer approved antenna. Non-approved antennas, modifications or attachments may impair call quality and damage the phone.
- ✧ Do not hold the antenna during operation. This may affect call quality and cause the phone to operate at unintended power levels.
- ✧ Keep the antenna free from obstructions and position the antenna straight up. This will ensure best call quality.
- ✧ Only use the battery and the power adapter approved by the manufacturer. If not, it may cause an explosion or result in a short circuit.
- ✧ It is highly recommended to fully charge the battery before initial use. The battery might have been discharged during storage and delivery.
- ✧ Do not throw battery. Batteries are not to be disposed off by putting them in fire. It may explode or catch fire.
- ✧ The power adapter must be used within the specified AC voltage range.
- ✧ Take out the battery if you won't use your phone for a long time and keep the battery well.
- ✧ During lightning, do not touch the power plug. It may result in an electric shock or death.
- ✧ Do not touch the plug with wet hands. Always grasp and pull the plug, not the cord. Do not put heavy things on the power cord or bend it too much.
- ✧ During daily use, do not pull out the power adapter. The battery is used for backup power, which will not cause the increasing consumption of electricity.
- ✧ Don't use the power adapter if the power cable is damaged. Contact the maintenance center immediately and replace the adapter.

4. FCC Regulations:

- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/ TV technician for help.
- Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.
- SAR Information

The SAR limit adopted by USA is 1.6 Watts/kilogram (W/kg) averaged over one gram of tissue.

This device (FCC ID: XYOAWPAE80I) was tested for the position that the back of the device at a distance of 2.5 centimeters from the flat phantom, SAR test with the antenna parallel with the device.

The highest SAR value reported to the FCC is 0.274 W/kg.

For body worn operation, this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 2.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.
