

Set Up and Operating Instructions for Remote Control Model UR28A

Home Control - When this button is pressed, the remote control is set to RF mode. The remote can then be used to control X-10 RF home control modules.

To Setup for Home Control:

Plug in an X-10 Transceiver (sold separately) and set it to Housecode A. You can control it and other X-10 modules (set to Housecode A) as follows:

1. Press and release the Home Control button.
2. Use the number buttons to enter the Unit Code number of the chosen module. (You do not need to enter '0' first for a single digit number.)
3. Press the appropriate button for the function you require (see below).

X-10 Functions:

On: CHANNEL +

Off: CHANNEL -

Bright: VOLUME +

Dim: VOLUME -

All Lights On: POWER

All Modules Off: MUTE

Note: You cannot dim or brighten an Appliance Module. If the module was off and you press its number followed by Bright or Dim (VOLUME+ or VOLUME-) this will simply turn the module on. All Lights On only works with Lamp Modules. (Appliance Modules do not respond to this command).

Changing the X-10 House Code:

The UR28A Remote defaults to Housecode A, and in most cases you will not need to change this unless you are experiencing interference from a neighboring X-10 system.

1. Press and release the X-10 button.
2. Press and hold SETUP until the LED indicator lights steadily. Release the Setup button.
3. Use the number buttons to enter the number equivalent to the chosen Housecode (1=A, 2=B ..16=P).
4. Press the ENTER button to confirm the Housecode. The LED turns off.

Note: The Housecode you choose must match the Housecode on the Transceiver and X-10 Modules you are using it with.

F.C.C. CAUTION - THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION.

This equipment generates and uses radio frequency energy, and if not installed and used properly, that is, in strict accordance with the manufacturers instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for remote control security devices in accordance with the specifications in Sub-Part B of Part 15 of *FCC Rules*, which are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by unplugging the equipment, try to correct the interference by one or more of the following measures.

- o Reorient the antenna of the radio/TV experiencing the interference.
- o Relocate the product with respect to the radio/TV.
- o Move the product away from the radio/TV.
- o Plug the product into an outlet on a different electrical circuit from the radio/TV experiencing the interference.

If necessary, consult your local dealer for additional suggestions.

NOTE: NO CHANGES OR MODIFICATIONS MAY BE MADE TO THE UNITS. ANY CHANGES MADE TO THE UNITS WILL VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.
