**Product Overview**

1. Enter headphones into **PAIRING MODE** - Slide the Power Switch to the middle **LED** to turn on the headphones, then slide the Power Switch to the **RED** position and hold for 3s until the LED flashes **BLUE** and **RED** alternately.

2. **On your device** - Turn on Bluetooth and select "Avantree ASPPA" to connect. If you are using a Bluetooth transmitter, enter your transmitter into **PAIRING MODE** (please refer to user manual).

3. Once connected, the headphone LED will turn **SOLID BLUE**.

**Connect to a Bluetooth device**

1. Enter headphones into **PAIRING MODE** - Slide the Power Switch to the middle **LED** to turn on the headphones, then slide the Power Switch to the **RED** position and hold for 3s until the LED flashes **BLUE** and **RED** alternately.

2. **On your device** - Turn on Bluetooth and select "Avantree ASPPA" to connect. If you are using a Bluetooth transmitter, enter your transmitter into **PAIRING MODE** (please refer to user manual).

3. Once connected, the headphone LED will turn **SOLID BLUE**.

**Connect to two Bluetooth devices simultaneously**

1. Connect the ASPPA to the **FIRST** device as shown above.

2. Enter the ASPPA into **PAIRING MODE** again and repeat steps 2 & 3 above to connect to the **SECOND** device.

**Note:** This feature only works for two mobile devices, such as cellphones and tablets. It doesn't work for PCs or Bluetooth transmitters.

**Reconnect to Bluetooth device**

Normally, once powered on, wait for 5-10s, the headphones will reconnect to the last connected device. If it doesn't automatically connect, please slide the Power Switch to the **RED** position and hold for 3s until the LED flashes **BLUE** and **RED** alternately. Then select "Avantree ASPPA" from your device's Bluetooth menu to connect manually. If you're using a Bluetooth transmitter, please refer to its user manual to reconnect.

**Build the Broadcast Network**

Simultaneously share your audio with up to 100 other ASPPA headphones by using the built-in broadcast function.

**Any questions? Contact: Support@avantree.com**  
(Response Time: 1 working day)

**WARNINGS / CAUTIONS**

- Headphones having two ways result from long term exposure to avoid at high volumes.
- Do not use headphones for extended periods of time. If you experience any discomfort, stop using the headphones immediately.
- Do not use headphones for extended periods of time. If you experience any discomfort, stop using the headphones immediately.
- Do not use headphones for extended periods of time. If you experience any discomfort, stop using the headphones immediately.

**Share Music:** Audio played from your source will now be shared with all connected REEIVER headphones in your broadcast network. Please adjust the volume on the BROADCAST headphone as required.

**Share Music:** Audio played from your source will now be shared with all connected REEIVER headphones in your broadcast network. Please adjust the volume on the BROADCAST headphone as required.

Dispose of the packaging and this product in accordance with the latest provisions.

**Basic Operations**

Function	Operation
<b>General function</b>	
Power on/off	Slide the Power Switch to the middle <b>LED</b> to turn on the headphones, then slide the Power Switch to the <b>RED</b> position and hold for 3s until the LED flashes <b>BLUE</b> and <b>RED</b> alternately.
Voice prompts on	Hold <b>ON</b> + <b>+</b> simultaneously for 3 seconds
<b>Music control</b>	
Play / Pause music	Press <b>ON</b> once
Volume up / down	Press <b>+</b> or <b>-</b> (once please click or tap buttons - pressing and holding or pressing too rapidly will not work)
Next/previous track	Hold <b>+</b> or <b>-</b> for 3 seconds
<b>Call control</b>	
Project a call	Hold <b>ON</b> for 1s when receiving an incoming call
Last number redial	Double press <b>ON</b>
Mic mute on/off	Hold <b>ON</b> for 1s to toggle mic mute on/off during a call

**Bluetooth Voice** - Hold **ON** for 2 seconds on the **BROADCAST** headphone to turn the microphone ON. All audio from the microphone will now be broadcast to the connected **RECEIVER** headphones. Hold **ON** for 2 seconds again to turn the microphone OFF.

**Exit Broadcast Network** - Hold **ON** 5s to toggle the headphone function back to Bluetooth Mode.

**Note:**

1. On next use, once the headphones are powered ON again they will automatically establish the previous connection.
2. The Broadcast Network only supports the A2DP Bluetooth Profile for Music and Media/NOT for the HFP profile used for phone calls so you can't make/broadcast phone calls to the Broadcast Network (please make calls directly on your phone).
3. You can't hear your own voice on the Broadcast Network when the "Broadcast Voice" function is active.

4. Adjusting volume - this needs to be done using the BROADCAST/headphone.

**Qualcomm aptX™ Low Latency**

aptX Low Latency delivers high quality 16bit audio while minimizing audio/video syncing issues. To take advantage of this feature please ensure that the audio source device or transmitter also supports the aptX Low Latency codec. Please check your device is aptX-LL certified: [www.aptx.com](http://www.aptx.com)

We recommend any of the following Avantree Bluetooth transmitters - Audikast, Oasis or Piva 10 to ensure compatibility with the ASPPA.

**Note:** When using the Broadcast function, the headphones will always use the standard SBC codec as aptX is aptX Low Latency codes do not support Broadcast functionality.

**Status of LED indicators**

Bluetooth	Operation
Flashes <b>BLUE</b> and <b>RED</b> alternately	Ready to pair
Flashes <b>BLUE</b> quickly (once/1 second)	Reconnecting
Flashes <b>BLUE</b> slowly (once/2 seconds)	Disconnected
<b>SOLID BLUE</b>	Connected
Flashes <b>GREEN</b> quickly (5 times/1 second)	BROADCAST unit - ready to pair with Receiver
Flashes <b>GREEN</b> slowly (once/5 seconds)	BROADCAST unit - Standby mode (no audio stream)
<b>SOLID GREEN</b>	BROADCAST unit - Connected (audio stream)
Flashes <b>WHITE</b> quickly (5 times/1 second)	RECEIVER - ready to pair to BROADCAST headphones
Flashes <b>WHITE</b> slowly (once/5 seconds)	RECEIVER - Disconnected
<b>SOLID WHITE</b>	RECEIVER - Connected
Flashes <b>RED</b> / <b>SOLID RED</b>	Battery low
<b>SOLID RED</b>	Charging
<b>RED</b> turn off	Fully charged

**Use as a wired headphone**

Use the supplied 3.5mm audio cable to connect to a non-Bluetooth audio device, or if the headphone battery is depleted.

**Note:** The headphone will power off automatically once you plug in the 3.5mm audio cable

**Charging**

If the LED blinks **RED**, hold **SOLID RED** for you have heard sound, you should recharge your headphones. Please plug it into a USB wall charger (DC 5V/0.5-2A) or a powered computer USB port to include micro USB cable. Normally it will take about 3 hours to fully charge. When fully charged, the LED will turn **RED** and will turn off once charging is complete.

**Troubleshooting**

**No sound with PC**

1. Under Playback Devices select the Avantree ASPPA as the default playback device.
2. When using ASPPA to make VOP calls from an app, please select the ASPPA Hands Free for Microphone and Speaker device.

**No sound using a Bluetooth transmitter to watch TV**

1. Ensure the Bluetooth transmitter and headphones are connected properly.
2. Check that your audio OUTPUT is functioning properly.
3. AUX & RCA lead and white) outputs on TV - test audio with any wired headphones.
4. OPTICAL output on TV - set your TV audio format to "PCM/LPCM" or turn off Dolby/DTS.
5. Change your TV audio output setting to External speakers/Headset

**Clearing paired history (Bluetooth & Broadcast)**

1. Hold **ON** 5s on headphones (do not hold Broadcast function), hold **+** and **-** together for 5 seconds until the LED blinks **Blue** and **Red** together (looks PINK) for 2s.

**To restart the headphones**

If the headphones DO NOT respond, please recharge the headphones or connect the headphones with any audio device via the 3.5mm audio cable.

**Headphones do not pair with Bluetooth device**

1. Ensure the ASPPA is in Pairing mode - LED will flash **Blue** and **Red** alternately.
2. For Bluetooth transmitter, ensure the transmitter is in Pairing mode and please refer to user manual.
3. For mobile phones, tablets and PCs - Turn on Bluetooth and select "Avantree ASPPA" from your device's Bluetooth menu to connect manually. If you're using a Bluetooth transmitter, please refer to its user manual to reconnect.

**Build the Broadcast Network**

Simultaneously share your audio with up to 100 other ASPPA headphones by using the built-in broadcast function.

**Mit Bluetooth-Gerät verbinden**

1. Setzen Sie die Kopfhörer in den **PAIRUNGSMODUS** - Schieben Sie den An-/Ausschalter in die Mitte **LED** und halten Sie diesen 3 Sekunden lang gedrückt, bis die LED-Anzeige abwechselnd **BLAU** und **ROT** aufblinzelt.

2. **An Ihrem Gerät** - Schalten Sie die Bluetooth-Funktion ein und wählen Sie „Avantree ASPPA“ aus, um eine Verbindung herzustellen. Wenn Sie einen Bluetooth-Transmitter verwenden, setzen Sie den Transmitter in den **PAIRUNGSMODUS** und wählen Sie die LED-Anzeige abwechselnd **BLAU** und **ROT** auf.

3. Sobald die Verbindung besteht, leuchtet die LED-Anzeige an den Kopfhörern durchgehend **BLAU** auf.

**Mit zwei Bluetooth-Geräten gleichzeitig verbinden**

1. Verbinden Sie die ASPPA wie oben beschrieben mit dem ERSTEN Gerät.

2. Setzen Sie die ASPPA erneut in den **PAIRUNGSMODUS** und wiederholen Sie die Schritte 2 & 3, um eine Verbindung mit dem ZWEITEN Gerät zu erstellen.

**Qualcomm aptX™ Low Latency**

aptX Low Latency delivers high quality 16bit audio while minimizing audio/video syncing issues.
