INTRODUCTION

The WLL (Wireless Local Loop) phone operates through a wireless connection instead of a phone wire, linking the subscribers of the general wire phone and the phone office.

AXW-P800 & AXW-P1900, a CDMA2000 Fixed Wireless Phone has an elegant design with advanced features. A large 3-line dot matrix liquid crystal display provides user-friendly interface for quick and easy information display. AXW-P800 provides rich services to customers such as basic voice, value added data, caller ID, three-way calling and short message etc. The keypad is back lit for easier dialing. Integrated external microphone and speaker enable users to make calls and talk without the hassle of picking up the handset.

SAFETY PRECAUTIONS

1. Avoid placing the phone in a dusty location, or near a source of gas or fire.
2. Don't shake, hit or drop the phone.
3. If you clean the outside of the phone, use only a soft, dry cloth. The chemicals in alcohol, benzine or acetone can damage the surface of the phone.
4. Do not twist or pull the cord out of the phone.
5. Do not disassemble the phone.
6. **DO NOT** use the power adapter if:
 - The power cord is damaged.
 - The phone has been dropped or damaged in any way.
7. Use only the AXESSTEL provided adapter. Do not use the AXESSTEL adapter for any other purpose.
8. Use only the AXESSTEL provided antenna. Do not use the antenna for any other purpose.
9. Frequency and length of use can affect the life of the self-charging battery.
Contact your customer service if the battery is not operating properly.
10. Use only the designated self-charging battery. Dispose of exhausted batteries properly.
Never discard a battery in or near fire or flame.
11. Do not use the telephone near water, for example, near a bathtub, sink, wet basement, or swimming pool.

NOTE: The input voltage and the shape of the plug on this phone may vary from country to country.

CHECKING THE PARTS

Once you have unpacked your phone, make sure that you have all the parts shown below. If any piece is missing or broken, please call your customer service.

- 1. Main Unit
- 3. AC/DC Adapter
- 5. Antenna
- 7. Stand / Wall mount bracket

- 2. Handset
- 4. User's Manual
- 6. Battery

SETTING UP YOUR PHONE

Installing the phone

This phone operates by receiving DC power from the AXESSTEL power adapter, which is connected to electrical outlet. The phone is equipped with a rechargeable battery to back up AC power failure.

Desktop installation

Attach the handset

1

Connect the antenna

2

Stand/wall mount bracket

3

Plug AC/DC adapter into an appropriate wall outlet

4

SETTING UP YOUR PHONE

Wall mount installation

1. Mark two mounting hole locations on the wall.
2. Drill two holes at the marked location.
3. Attach the wall mountable bracket.
4. Tighten the screws firmly.
5. Plug in power connector and route the cords in a groove.
6. Install the phone onto the wall mount bracket hook.
Push the phone against the wall and pull it down to lock.
7. Screw the antenna into antenna connector.
8. Pull out the handset hanger and reinsert it in the reverse way.

NOTE : The input voltage and the shape of the plug may vary from country to country. The input and output voltages are indicated on the adapter (Input: AC 100~240V, 50~60Hz, Output: DC 9V, 1A).

SETTING UP YOUR PHONE

Service Status Check

Display in service area

When the power cord is connected properly, all segments in the LCD window will turn on briefly and Power LED will light.

The number of bars of signal strength indicator (antenna icon) indicates the strength of service signal of the area.

The display will show the greeting (AXESSTEL as default), time and date.

You can change the greeting. (See page 34.)

Display in area with no service

When there is no service signal detected in your area, no antenna bar appears. Contact your service provider.

SETTING UP YOUR PHONE

Installing the battery

1. Remove screws with a screw driver and remove the battery cover on the bottom of the phone.
2. Plug in battery connector.
3. Replace the battery cover and screws.

CETTING TO KNOW YOUR PHONE

1 Antenna: Adjusting the antenna improves the sound quality of the call.

2 MENU: Press to access the phone's menus.

3 CLEAR: Lets you clear your last entry.

- 3 Press .

Setting/Releasing Message Lock

- 1 Press , (5) (MSG Option), (4) (MSG Lock).
- 2 Select ON or OFF with  or (*), (#).
- 3 Press .

While message lock is set, the phone will ask Lock Code whenever you try to retrieve messages.

Setting/Releasing Message Alert

- 1 Press , (5) (MSG Option), (2) (MSG Alert).
- 2 Select ON or OFF with  or (*), (#).
- 3 Press .

While the message alert is set, the phone goes off alert when messages arrive.

DATA Call Service

AXW-P800V and AXW-P1900V do not support data call.

Data Call Service is network dependent feature and is available only when your service provider supports it. Check your service provider is providing message service before using this function.

Connecting to your PC

- 1 Connect the phone to your PC with the Axess-tel data cable. The cable is sold separately. You can choose one of the two cables; USB cable or 9pin serial cable according to your PC configuration.

TO be added in Korea.

Specifications

MEMU OPTION TABLE

I	II	III	Explanation	
1:CALL HISTORY	1: OUTGOMING		Stores ten phone numbers called most recently	
	2: INCOMING		Stores ten phone numbers of calls received most recently	
2:PHONE BOOK	1: SEARCH	SEARCH OPTION NAME / NUMBER / MEMORY	Used when searching for a phone number in the phone book by name/number/ stored memory number	
	1: STORE		Used when storing a phone number and name in the phone book	
	1: ERASE	SEARCH OPTION NAME / NUMBER / MEMORY	Used when erasing a phone number in the phone book	
3:TIME	1: ALARM	RELEASE / SET	Set/Release alarm	
	2: CALL TIME		Shows the time of last call made	
	3: AIR TIME	1: OUTGOMING		Shows accumulated outgoing call time
		2: INCOMING		Shows accumulated incoming call time
	4: CLR AIR TIME	CLEAR AIR TIME YES / NO		Resets accumulated call time
5: TIME MODE	TIME MODE AM/PM / 24 H		Selects time display mode	
4:SOUND	1: RING	RING ON/OFF	Determines whether the phone alerts the incoming call with sound or only with message.	
	2: RING TYPE	RING TYPE STANDARD + 8 TYPES	Selects ring type	
	3: RING VOLUME		Adjusts the ring volume	
	4: 1 MIN ALERT	1 MIN ALERT ON / OFF	On/Off beep at one minute intervals when you're on conversation.	
	5: SVC ALERT	SERVICE ALERT ON / OFF	On/Off beep when the phone is getting out of or entering service area	
	6: ALARM TYPE	ALARM TYPE STANDARD + 8 TYPES	Selects alarm sound	
5:AUTO SET UP	1: TONE LENGTH	TONE LENGTH NORMAL / LONG	Sets length of tone (when DTMFnumber is sent) to short or long	
	2: BACK LIGHT	BACK LIGHT 8 SEC / ALWAYS OFF	Sets LCD and keypad lights on or off	
6:SECURITY	1: GREETING		Used to change greeting	
	2: CHANGE CODE	TIME MODE AM/PM / 24 H	Used to change lock code	
	3: RESTRICT	1. INT'L CALL		Used to limit international call
		2. LONG DIST.		Used to limit long distance calls
	4: CLR MEMORY	CLEAR PHONE BOOK NO/YES		Erases all numbers in memory
	5: RESET PHONE	RESET PHONE NO/YES		Returns the phone to factory setting
	6: AUTO LOCK	AUTO LOCK OFF/ON		Used to lock the phone
7: MY PHONE #			Used to check your phone number	

	8: ERASE LOGS	ERASE HISTORY? NO/YES	Erases numbers in outgoing or incoming call history.
	9: LANGUAGE	DISPLAY LANGUAGE ENGLISH/SPANISH	Selects user interface language.
7:DATA SERVICE	1: DATA PORT	DATA PORT SERIAL/USB	Selects data port configuration
	2: DS SPEED	DS SPEED 115.2Kbps/19.2Kbps	Selects data service speed
	3: RECEIVE MODE	RECEIVE MODE VOICE ONLY/ASYNC/PC FAX	Select incoming call receive mode

* The lock code is preset to 0000 at the factory.

* At MENU, press "CLEAR" to return to the previous menu.

CONVERSATION AND MESSAGE MENU

During Conversation MENU

- 1: MUTE
- 2: SILENT KEY
- 3: SEND MY #

Message Menu

- 1: VOICE MAIL
- 2: TEXT MAIL

- 5: MESSAGE OPTION

SPECIFICATIONS

Frequency Range	AXW-P800 AXW-P1900	Tx: 824 ~ 849 MHz Tx: 1850 ~ 1910 MHz	Rx: 869 ~ 894 MHz Rx: 1930 ~ 1990 MHz
Channel Bandwidth	CDMA 1.25 MHz		
Stability of frequency	0.4 ppm		
External appearance(mm)	205(L) x 180(W) x 87(H)		
Weight	740g (without battery)		
Sending output	maximum 0.23W E.R.P		
Temperature of operation	-20°... ~ +50°...		
Relative humidity	5% ~ 90%		
Adapter	Input: AC 100~240V 50~60Hz Output: DC 9V/1A		
Battery	Standby	16mA (Slot Cycle Index: 2) 72 hours	
	Talk	405mA (at +10dBm) 2 hours	

Safety Information

1 . SAFETY INFORMATION FOR FIXED WIRELESS TERMINALS

.POTENTIALLY EXPLOSIVE ATMOSPHERES

Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

INTERFERENCE TO MEDICAL DEVICES

Certain electronic equipment may be shielded against RF signal from your wireless phone. (pacemakers, Hearing Aids, and so on)

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so.

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles.

.EXPOSURE TO RF ENERGY

Use only the supplied or an approved replacement antenna.

Do not touch the antenna unnecessarily when the phone is in use.

Do not move the antenna close to, or touching any exposed part of the body when making a call.

SAR INFORMATION

THIS MODEL PHONE MEETS THE GOVERNMENT 'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. *Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure.

The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when worn on the body, as described in this user guide, is **0.843W/kg**. (Body worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on **FCC ID : PH7AXWP1900B**.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) web-site at <http://phonefacts.net>. *In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

FCC Compliance Information

This device complies with Part 15 of FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received.

Including interference that may cause undesired operation.

Information to User

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ tv technician for help.

FCC RF EXPOSURE INFORMATION

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

To comply with FCC RF exposure requirements, a minimum separation distance **of 25mm** must be maintained between the user/bystander and the back of the unit, including the antenna.

For more information about RF exposure, please visit the FCC website at www.fcc.gov

WARNING! Read this information before use

U.S.A.

U.S.FEDERAL COMMUNICATIONS COMMISSION
RADIO FREQUENCY INTERFERENCE STATEMENT

INFORMATION TO THE USER

NOTE : This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful Interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if Not installed and used in accordance with the instructions, may cause harmful Interference to radio communications. However, there is no guarantee that interference will not occur in a particular Installation. If this equipment does cause harmful interference to radio or television reception, Which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet of a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for assistance.

Changes or modification not expressly approved by the party responsible for Compliance could void the user' s authority to operate the equipment. Connecting of peripherals requires the use of grounded shielded signal cables.
