This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. The SAR limit is 1.6 W/kg averaged over one gram of tissue. This device (FCC ID: 2ARP4-B102, IC:24368-B102 ,Tablet) was tested against this SAR limit under 0mm test distance. The highest SAR value reported for intended use is 0.28 W/kg. Any illegal use may not comply with FCC and ISED RF exposure requirements, and should be avoided.

Note: 5150~5250MHz is Indoor use only

IC Warning

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference, and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement

Specific Absorption Rate (SAR) information:

This device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. The SAR limit is 1.6 W/kg averaged over one gram of tissue. Any illegal use may not comply with FCC and ISED RF exposure requirements, and should be avoided.

Taux de chômage spécifique (SAR) information:

cet appareil doit accepter n'importe quel motif, et il est possible que cette installation puisse provoquer une opération de sabotage de l'appareil. Ce dispositif met en ligne de compte les besoins de l'administration en matière de radiodiffusion. Les critères d'admission à la sécurité de tous les individus sont de 1,6 W/kg Averaged over one gram of tissue. This device (FCC ID: 2ARP4-B102, IC:24368-B102 ,Tablet) a été testé contre cette limite de limite de 0mm. Le rapport de valeur est de 0,28 W/kg. Taux de chômage spécifique (SAR) information: Toute infraction peut être utilisée avec la FCC et ISED RF exposant les exigences, et il convient de le faire.

Note: 5150~5250MHz is Indoor use only

Note: 5150 à 5250MHz est utilisé uniquement
