

RF EXPOSURE WARNING

This remote pickup unit (RPU) contains a radio frequency (RF) transmitter. During normal operation it sends out radio frequency (RF) signals. In August 1996, the Federal Communications Commission (FCC) adopted RF exposure guidelines with safety levels for wireless devices.

CAUTION: To maintain compliance with the FCC's RF exposure guidelines, the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 6 meters from all persons during normal operation and must not be co-located or operating in conjunction with any other antenna or transmitter. When the antenna is mounted on a vehicle, a telescoping antenna tower must be used in order to maintain a 6 meter separation distance from all persons.

Unauthorized antennas, modifications, or attachments could damage the transmitter and may violate FCC regulations.
