You can charge your battery using the charger or connect the USB cable (supplied with this phone) to the computer.

4

Keys and Parts

The smart phonegives you marvelous feelings to experience on Camera, Video recorder, FM radio, Music and Sound recorder. Let you install various APPs, games, and more (supports APK format) by downloading from Google Play Store.

5
1.Volume Up/Down Key	To adjust the ringer volume, adjust the voice volume during a call and adjust media volume.
2.Headset port	To connect an earphone so you can listen to music or radio, etc.
3.Receiver	To hear the voice of the other side when calling.
4.Front Camera	Allow you to take pictures while facing the screen.
5.Power Key	Switch the phone on or off. Press and hold to open phone options menu.
6.Back Key	Go back to the previous screen; Close the on-screen keypad, a dialog box, an options menu, or the notification panel.
7.Home Key	Go to home screen;Press and hold to open a window showing you most recently used applications.
8. Menu Key	Open a list of options available in the current screen or application.
9.USB jack	To connect charger or USB data cable for data exchange.
10.Back Camera lens	For taking photos.
11.Flashlight	To take photos in low-light conditions.
12. Fingerprint key	After you set fingerprint, you can use it to unlock the screen.

Fingerprint

Fingerprint function includes four parts. First, after the screen is locked, users can use a particular fingerprint to unlock the screen. Second, when accessing the encrypted file or application, users can use a specific fingerprint to unlock personal information applications, files and so on. Third, when the phone is in the sleep or locked mode, touch on the fingerprint key more than 2 seconds to quickly open the specified application or make a call. Fourth, in the most part of the interface, user can touch fingerprint key to return to the previous page.

1. Enter Settings ->Fingerprint to enter fingerprint list and add fingerprint.
2. Enter fingerprint as the animation guides.
3. Click "Done", you will find fingerprint list. You can add 5 fingerprints.
4. After you enter fingerprint successfully, you can name the fingerprint, or you can use the system name.
5. In the Fingerprint list menu, you can edit the fingerprint(s).
6. Back to main interface of fingerprint, separately set up the Screen lock, Files lock, Quick actions and Senor button.

➢ Screen lock: Before entering fingerprint, you must set up Pattern, PIN or password, or you can enter Settings >Security>Screen lock, and then set up Pattern, PIN or password. However, you cannot use None and Swipe.
➢ Files lock：When you access to the function in the first time, you should set pattern.

And then follow up the guide to set up Privacy fingerprint.

- ➢ Quick actions: This function is bundling with other applications or phone call, and it can be used, only while the screen is locked.
- ➢ Senor button：Touch slightly on the fingerprint key, back to previous menu; in the sleep mode, press the key once, to wake up the phone; in unlock mode, press it once to enter home screen, and long press it to open recent application.
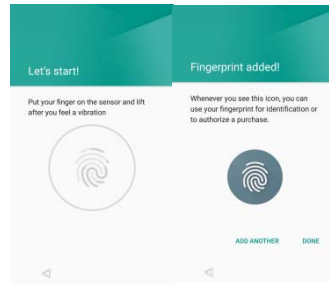

Lock and Unlock the Screen

Press power button to enter Sleep mode and meanwhile the screen will be locked; press power button again to wake up and then drag the lock to upwards to unlock.

Make it yours

a) Home screen: It is your starting point to access all the features on your phone. It displays application icons, widgets, shortcuts, and other features. b) Notification Bar: At the top of the screen, the Status bar displays the time, status, and notifications. If there is a new message, missed call or something in the notification bar, you can drag it down to open notification panel and click the desired one to have a view. When you finished, you can close it by dragging the panel up or pressing "Back". c) Launcher: Touch the Launcher icon at the bottom of the screen to view all installed applications.
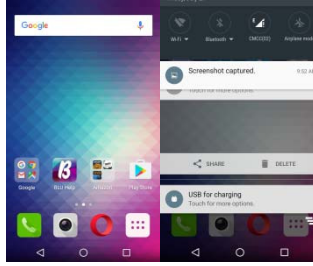

Add Widgets and more icons to Home Screen

Add widgets and icons to home screen

Enter Launcher and long press and hold an application till the app displays on the home screen, and then release your finger hold.

Rearrange or remove widgets and icons on your Home screen

Long press and hold the widget or icon you want to move. Once "App info" appears, don't release your hold on the icon and drag the widget or icon to a new location on the screen.

11

AddFolders on your Screen

Use folders to group related applications and other shortcuts to keep your Home screen tidy and organized.

Adding folder on your screen

Press and hold an application icon or a widget that you want to move. The phone then vibrates. Don't release your finger. Drag the application icon or widget and drop it on top of another application icon or widget.

Deleting folder

Drag out all the applications from the folder, then the folder will be deleted automatically.

12
Adjust Brightness

Drag the notification panel down and adjust brightness. Or enter Settings->Display->Brightness level, and adjust the brightness level here (by dragging the brightness slider to the left to decrease or to the right to increase the screen Brightness).

Note: Lower the brightness of the screen to prolong the battery life.

13
Make a Call

On the start screen choose , open dial pad then enter a complete phone number to make a call.
Call Log

Enter Phone interface,then slide your screen right to 🕐 ,you can check the call logs. In call log options, you can Make calls, add createnew contact and send message etc.

15
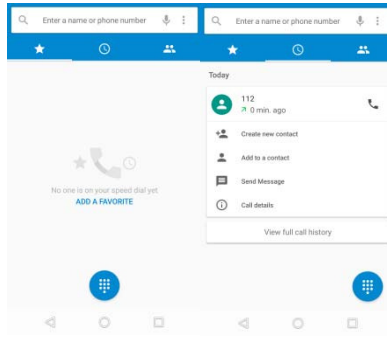

Reject a Call by Sending a Busy Message

While there is an incoming call, you are inconvenient to accept the call, and then you can send a busy message for rejecting the call. Drag the circle up to ☰, some busy messages will show on the screen, short tap any of them to send out.

Add a Contact

Tap [icon] and enter Contacts and then add a contact (see figure below). Tap [icon] to add a new contact to Phone or SIM card.

16
Messaging

Enter Messaging, and then compose new message. You touch a text field where you want to enter text, to open the keyboard.

Receive a New Message

When there is a new message comes, a new message icon will appears in the notifications area of the status bar to notify you of a new text or multimedia message.

To open the message, press and hold the status bar, and then slide the status bar down to open the Notifications panel. Or go to Messaging, read the message directly.

EditSMS and MMS

When you are composing a new text message, you can select text for cutting or copying. Touch the text field or portion that contains text. You can select all contexts, copy, cut and paste. The selected text is highlighted in Blue.

A multimedia message may contain video, pictures, audio, sideshow, etc. Thus, when you are supposed to edit a MMS, you can just add videos, pictures and more to SMS and change to MMS.

Message conversations

Text and multimedia messages that are sent to and received from acontact (or a number) are grouped into conversations or message threads in the All messages screen. Threaded SMS or MMS let you see exchanged messages (similar to a chat program) with a contact on the screen.

Browse the Web

Open the Chrome; click the URL on the screen to search or tap website address.
The browser is fully optimized and comes with advanced features that let you enjoy Internet browsing on your phone.
You must have an active data connection or Wi-Fi connection to access the Internet.

19
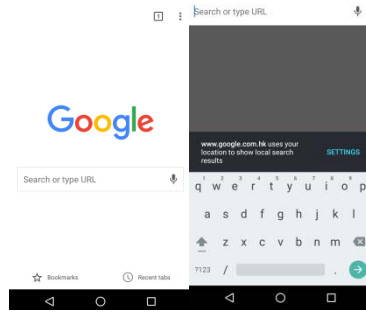

Enjoy Music

When you copy music to your Micro SD card, the Music player searches the device for music files and builds a catalog of your music, based on information about each file that is stored in the file itself.

20
Download Applications FromGoogle play™ Store

Add a Google account and then Enter Google Play Store and download apps.

Manage Applications

Enter Setting >Apps, then manage the applications. Tap any app to view the information of the applications, and you can also force the apps to stop or uninstall the apps.

To install Apps, you need switch on "Unknown sources" in Security settings.

22
System Updates

Enter System Settings->About device and access Wireless update, the device will automatically search and check new version of software.

To update your current software, you must download new software online. The device will be in Recovery mode and will start to update the system after successfully downloading the new software. Then the device will reboot once system updating is complete, a pop-up message will appear to notify that the device has been successfully updated.

Note: Ensure you switch on Wi-Fi or Data connection.

7. About device

Please read and observe the following information for safe and proper use of your phone and to prevent damage. Also, keep the user guide in an accessible place at all the times after reading it.

1.   **After sales service**

Kindly refer to the Warranty Card provided in the sales package box.

2.   **Charger and Adapter Safety**

Charger and adapter are designed for indoor use only.

3.   **Battery Information and Care**
o   Please use the specific battery, otherwise it will cause explosion.
o   Please dispose of your battery properly.
o   Do not disassemble or short-circuit the battery.
o   Keep the battery's metal contacts clean.
o   Recharge the battery after long periods of non-use to maximize battery life.
o   Battery life will vary due to usage patterns and environmental conditions.
o   The self-protection function of the battery cuts the power of the phone when its operation is in an abnormal status. In this case, remove the battery from the phone, reinsert it, and turn the phone on.

4.   **General Notice**

o   Using a damaged battery or placing a battery in your mouth may cause serious injury.

o   The suitable temperature for the phone and accessories is -10℃~45℃.

o   When charging, please place the phone in an environment that has a normal room temperature and good ventilation. It is recommended to charge the phone in an environment with a temperature under 40℃. Please ensure to use only the charger offered by the manufacturer. Using unauthorized charger may cause danger and violate the authorization of the phone and the guarantee article.

o   Do not place items containing magnetic components such as a credit card, phone card, bank book, or subway ticket near your phone. The magnetism of the phone may damage the data stored in the magnetic strip.

o   Talking on your phone for long period of time may reduce call quality due to heat generated during use.

o   When the phone is not used for a long period time, store it in a safe place with the power cord unplugged.

o   Using the phone in proximity to receiving equipment (i.e. TV or Radio) may cause interference to the phone.

o   Do not immerse your phone in water. If this happens, remove the battery and take it to an Authorized Service Center.

o   Do not paint your phone.

o   The data saved in your phone might be deleted due to careless use, repair of the phone, or upgrade of the software. Please backup your important phone numbers. (Ring

tones, text messages, voice messages, picture, and videos could also be deleted.) The manufacturer is not liable for damage due to the loss of data.
o   Do not turn your phone on or off when the phone is close to your ear.

Warning: Company will not bear any responsibility for any incompliance with the above guidelines or improper use of the mobile phone. Our company keeps the right to make modifications to any of the content here in this user guide without public announcement in advance. The content of this manual may vary from the actual content displayed in the device. In such case, the latter shall govern.

FCC Caution:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information
SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Before a new model phone is a available for sale to the public, it must be tested and

.
certified.to.the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone arce performed in positions and locations (e.g. at the ear and worn on the body)as required by the FCC.
For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 10 mm from the body. Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
