1 Get started

1.1 SIM card information

When you subscribe to a cellular network, you receive a plug-in SIM (Subscriber Identity Module) card loaded with your subscription details, such as your PIN, and available optional services.

1.2 Install and charge the phone

Remove the battery cover and the battery

If the phone is already on, first turn it off by pressing and holding on/off key.

Insert the SIM card.

Make sure that the gold-colored contacts on the card are face down

Install the battery.

Replace the battery cover.

Plug the charger into the phone

Plug the charger into a standard AC wall outlet.

When the phone is completely charged (the battery icon becomes still), unplug the charger from the power outlet.

Remove the charger from the phone.

Switch the Phone On/Off.

Enter Your Pin (Access Codes is 1234) if it is necessary.

Dial the Phone Number Required.

1.3 For Your Safety

Please read these safety guidelines before using your mobile phone to assure the safe and proper use of the phone.

- Switch off the phone when refueling.
- Switch off in an aircraft.
- Keep your phone dry.
- Keep your phone away from small children and pets.
- Do not store the phone in hot areas.
- Do not store the phone in cold areas.
- Do not drop, knock or shake the phone.
- Do not put the phone in or on heating devices, such as a microwave oven, stove or radiator. The phone may explode when overheated.
- Do not use batteries of different specifications otherwise they will cause an explosion.
- Prohibit using any accessory without our approval, otherwise accident may occur.
- If your phone has a flash or light, do not use it too close to the eyes.
- Use only the supplied or an approved replacement antenna.
- Do not attempt to open the phone's casing.
- If the phone or any of its accessories are not working properly, take them to your nearest qualified service center.
- Using the earpieces or stereo headset for extended time can cause a serious damage to your hearing.
- Do not use the phone while charging the phone.
- Extreme heat or cold (Operating temperature): Avoid temperatures below $-10\text{ }^{\circ}\text{C}$ or above $55\text{ }^{\circ}\text{C}$.

2 Function Menu

Phone overview

*The picture is for reference only, please make the object by the standard.

2.1 File manager

Use this menu to view the stored files in the phone or the micro SD card. In the main menu interface, click “**File Manager**” to enter this submenu, menu display **Phone** and “**Memory Card:** \”(if the Memory card have insert into the mobile-phone).

STK*

Press the **left soft key** to enter the “**STK**” main menu. Here you can use the value-added services provided by your network operator.

* The company reserves the right to issue no further notice in case of upgrade or modification of this model.

FCC Regulations:

● This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

● This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

- The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

▶ **RF Exposure Information (SAR)**

This mobile phone meets the government's requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although

the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

The highest SAR value for the model phone as reported to the FCC when tested for use at the ear is 1.13 W/kg and when worn on the body, as described in this user guide, is 0.785 W/kg (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements.)

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on FCC ID: YHLBLUNEO.

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset

a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 1.5 cm from your body when the phone is switched on.
