

User Manual For

TOUCH BOOK 7.0 LITE

Get Started

Get around

After you enter into the systems, at the bottom of the screen, you'll find three Navigation buttons. They're always available. No matter what you're doing with your tablet, you can always get back to the main Home screen or return to previous screens:

Icon	Name	Description
	Back	Open the previous screen you were working in, even if it was in a different app. Once you back up to the Home screen, you can't go back any further in your history.
	Home	Open Home. If you're viewing a left or right Home screen, opens the central home screen.
	Recent Apps	Opens a list of thumbnail images of apps you've worked with recently. To open an app, touch it. To remove a thumbnail from the list, swipe it left or right.

After a short time without getting used, these buttons may shrink to dots or fade away, depending on the current app. To bring them back, touch their location.

The All Apps icon  in the right upper corner is permanent.

Touch it to see all your apps and widgets.

The middle of your Home screen can hold app and widget icons, plus folders.

- To open an app, folder, or widget, touch its icon.
- To see additional Home screens, swipe your finger quickly left or right.

At the bottom of the screen, you'll see something like this:

Status icons on the left tell you which apps have sent you notifications; for example, that a message has arrived, or it's time for a meeting.

System icons on the right display the current wireless and network connection strength, battery level, time, and more.

Touch & type

Use your fingers to manipulate icons, buttons, menus, the onscreen

keyboard, and other items on the touchscreen. You can also change the screen's orientation.

To select or activate something, touch it.

To type something, such as a name, password, or search terms, just touch where you want to type. A keyboard pops up that lets you type into the field.

Other common gestures include:

- **Touch & hold:** Touch & hold an item on the screen by touching it and not lifting your finger until an action occurs.
- **Drag:** Touch & hold an item for a moment and then, without lifting your finger, move your finger on the screen until you reach the target position. For example, you can drag to reposition shortcuts on the Home screen.
- **Swipe or slide:** Quickly move your finger across the surface of the screen, without pausing when you first touch (so you don't drag something instead). For example, you can slide a Home screen left or right to view the other Home screens.
- **Pinch:** In some apps (such as Maps, Browser, and Gallery), you can zoom in and out by placing two fingers on the screen at once and pinching them together (to zoom out) or spreading them apart (to zoom in).
- **Rotate the screen:** On most screens, the orientation of the screen rotates with your device as you turn it. You can change this Display setting.

Settings > Device > Display

Use the lock screen

To protect personal information, you can adjust your phone's lock settings:

1. From the Home or All Apps screen, touch the Settings icon 
2. Scroll down and touch Security.
3. Touch Screen lock.
4. Touch the type of lock you'd like to use.

After you set a lock here, a lock screen displays whenever your screen wakes up, requesting the pattern, PIN, or other specified key.

Important Screen lock options are listed in the approximate order of the strength of their security, starting with None and Slide, which provide no security. Face Unlock and Pattern provide minimal security, although they can be more convenient than the stronger options.

If your tablet's playing music when the screen locks, you can continue listening or pause the selection without unlocking.

Make yourself at home

Change the wallpaper

Wallpapers are images from Super-HD Player (pictures you shot with Camera, synced from Picasa, and so on), still images included with the system, and live images (such as an animation or a map

that centers on your location). They take the place of the default background for your Home screens.

1. Touch & hold anywhere on a Home screen that's not occupied. A list of options appears.

2. Touch a wallpaper source:

Super-HD Player. Choose from pictures that you've taken with Camera or downloaded to your device.

Live Wallpapers. Choose from a scrolling list of animated wallpapers.

Wallpapers. Choose from thumbnails of default images, or touch a thumbnail for a larger version.

You can download additional wallpapers from Android Market.

3. To set a wallpaper, touch "set wallpaper" under the Gallery images or Set wallpaper.

Related settings

Settings > Device > Display > Wallpaper

Arrange & work with apps

To see all your apps, touch the All Apps icon on any Home screen.

The main All Apps screen opens. This is where you can see all your apps, including those downloaded

from Android Market. You can move app icons to any of your Home screens.

From All Apps, you can

- Move between screens: Swipe left or right.
- Launch an app: Touch its icon.
- Place an app icon on a Home screen: Touch & hold the app

icon, slide your finger, and lift your finger to drop the icon in place.

- Place an app icon in the Favorites tray: Touch, hold, & slide to move one of the Favorites icons out of the tray. Then use the same technique to move another one into the same position.
- Explore your widgets: Touch the Widgets tab at the top of any All Apps screen.
- Get more apps. Touch the Market icon.
- Create an App folder: place an app in the home screen, and then place another app over it, it will place both apps in a folder in the home screen saving you space and time when searching for apps. Folders are unnamed when crated.

To remove an app icon from the Home screen, touch and hold it, slide your finger toward the top of the screen, and drop the app

over the Remove icon  .

Note: The All Apps icon  in the Favorites tray is permanent. You can't move it.

Add widgets

Widgets are like windows into your apps. They're available from an All Apps tab for you to move onto your Home screens.

To see your widgets:

1. Touch the All Apps icon  on your Home screen.
2. Touch **Widgets** at the top of the screen.

From the main Widgets screen, you can

- **Move between screens:** Swipe left or right.
- **Drag a widget to a Home screen:** Touch and hold the widget's icon, slide your finger where you want to place it, and lift your finger.

You may be asked to make further choices before the widget activates. If there isn't room where you dropped it, the widget won't get added to the Home screen.

Try some apps

Start Gmail

You can use Gmail to read and write email from any mobile device or browser. All your email is always up to date and available no matter where you check it from.

But Gmail is not just about email. Your Gmail name and password signs you into to all Google apps and services, including Calendar; People, for keeping track of your contacts; Google Reader, for keeping up with your online reading; and many more.

- To launch Gmail, touch the Gmail icon  on a Home or All Apps screen.

The first time you launch Gmail, you're asked to sign in or create an account, if you didn't already do so when you first set up your device. Then Gmail opens to the Inbox. From here, you can

- **Read email:** Touch a message to read it. Unread messages are bold.
- **Organize email:** Check the box beside a message to select it.

Then use the icons and menu along the bottom of the screen to manage the selected messages.

- Change your settings: Touch the Menu icon  to change your preferences, add an account, or get help.

Use your Camera

The Camera app is a combination camera and camcorder.

You can view photos and videos you take with Camera in the Super-HD  Play app along with movies that you rent or download.

To take pictures and videos, first touch the Camera icon  on a Home or All Apps screen.

When Camera opens, you can

- Take a picture: Touch the blue button.
- View the most recently taken picture: Touch the thumbnail near the blue button.

You can now share the picture by touching the Gmail, Google+, Messenger, or other icons displayed along one side of the image.

To view this picture and others in the Gallery app, touch the picture.

Manage downloads

Files, apps, and other items you download from Gmail, Email, Android Market, or in other ways are stored

in your device's internal storage. You can use the Downloads app to view, reopen, or delete what you've downloaded.

Some mobile networks restrict the size of the files you can download, to manage the demands on their networks or to help you avoid unexpected charges. When you try to download an oversized-file when connected to such networks, you may be required to delay downloading until your device is connected to a Wi-Fi network, when the download will resume automatically. You can view and manage these queued files in the Downloads app as well.

Downloaded files are stored in the Download directory that's visible when your device is connected to a computer. You can view and copy files from this directory.

Open Downloads and manage downloaded files

- Touch the Downloads icon  from a Home or All Apps screen.
- Touch an item to open it.
- Touch headings for earlier downloads to view them.
- Check items you want to share. Then touch the Share icon  and choose a sharing method from the list.
- Check items you want to delete. Then touch the Trash icon .
- At the bottom of the screen, touch Sort by size or Sort by date to switch back and forth.

Use the Apps screen

The Apps screen allows you to adjust several aspects of the way your device uses memory. To view these settings:

1. From a Home or All Apps screen, touch the Settings icon .

2. Under Device, touch **Apps**.

You'll see three tabs at the top of the screen, each displaying a list of apps or their components:

- **Downloaded:** Displays apps you've downloaded from Market or other sources.
- **Running:** Displays all apps, processes, and services that are currently running or that have cached processes, and how much RAM they are using.

The graph at the bottom of the Running tab shows the total RAM in use and the amount free. Below the graph, touch **Show cached processes** or **Show running services** to switch back and forth.

- **All:** Displays all apps that came with Android and all apps you downloaded from Android Market or other sources.

To switch the order of the lists displayed in the **Downloaded** or **All**

tabs, touch Menu icon  > **Sort by name** or **Sort by size**.

To view details about an app or other item listed under any tab, touch its name. The information and controls available vary among different types of apps, but commonly include:

- **Force stop button:** Stops an app that is misbehaving. Stopping an app, process, or service may cause your device to stop working correctly. You may need to restart your device after

doing this.

- **Uninstall button:** Deletes the app and all of its data and settings.
- **Disable button:** Prevents the app from running, but does not uninstall it. This option is available for some apps and services that can't be uninstalled.
- **Clear data button:** Delete an app's settings and other data without removing the app itself.
- **Clear cache:** If the app stores data in a temporary area of the tablet's memory, lists how much information is stored, and includes a button for clearing it.
- **Launch by default:** If you have configured an app to launch certain file types by default, you can clear that setting here.
- **Permissions:** Lists the kinds of information about your tablet and data the app has access to.

Enter & edit text

Use the keyboard

You can enter text using the onscreen keyboard. Some apps open it automatically. In others, you open it by touching where you want to type.

As you type, the keyboard displays suggestions above the top row of keys. To accept a suggestion, touch it.

Basic editing

- **Move the insertion point:** Touch where you want to type. The cursor blinks in the new position, and a green tab appears below it. Drag the tab to move the cursor.

- **Select text:** Touch & hold or double-tap within the text.

The nearest word highlights, with a tab at each end of the selection.

Drag the tabs to change the selection.

The tab disappears after a few moments, to get out of your way. To make it reappear, touch the text again.

- **Delete text:** Touch to delete selected text or the characters before the cursor.
- **Cut, copy, paste:** Select the text you want to manipulate. Then

touch the Paste  , Cut  , or Copy  button :

To make the keyboard go away, touch **Done**.

Tips & shortcuts

- **Type capital letters:** Touch the Shift key  once to switch to capital letters for one letter. Or touch & hold the Shift key  while you type. When you release the key, the lower case letters reappear.
- **Turn caps lock on:** Double-tap or touch & hold the Shift key , so it changes to . Touch the Shift key  again to return to lowercase.
- **Show numbers or symbols:** Touch the ?123 key. To see more choices, touch the = \ < key.
- **Quickly access common punctuation and symbols:** Touch & hold the key to the right of the space bar (period key).
- **Type special characters:** Touch & hold the Shift key 

while you touch a key with a small gray character in its corner to enter the gray character.

Touch & hold any key to see alternative letters, symbols, or numbers, which you can then touch to type.

- **Change input language or keyboard:** Touch & hold the key to the left of the space bar (with ... in the lower-right corner), and then release it.

The Input options menu appears. Choose the option you want to adjust.

Connect to Wi-Fi networks

Wi-Fi is a wireless networking technology that can provide Internet access at distances of up to 100 meters, depending on the Wi-Fi router and your surroundings.

To use Wi-Fi, you connect to a wireless access point, or "hotspot." Some hotspots are open and you can simply connect to them. Others implement security features that require other steps to set up, such as digital certificates or other ways to ensure that only authorized users can connect.

To extend the life of your battery between charges, turn off Wi-Fi when you're not using it. You can also set your device to disconnect automatically from Wi-Fi networks when it's sleeping.

Turn Wi-Fi on and connect to a Wi-Fi network

If you're adding a Wi-Fi network when first setting up your device, Wi-Fi is turned on automatically.

1. Touch the Settings icon  on a Home or All Apps screen.
2. Touch **Wireless & networks > Wi-Fi**.
3. Slide the Wi-Fi switch to the **On** position.

The device scans for available Wi-Fi networks and displays the names of those it finds. Secured networks are indicated with a Lock icon. If the device finds a network that you connected to previously, it connects to it.

4. Touch a network name to see more details or connect to it. If the network is secured, you're prompted to enter a password or other credentials. (Ask your network administrator for details.) To modify a network's settings, touch & hold the network name.

Add a Wi-Fi network

You can add a Wi-Fi network so your device will remember it, along with any security credentials, and connect to it automatically when it's in range. You must also add a Wi-Fi network if the network does not broadcast its name (SSID), or to add a Wi-Fi network when you are out of range.

To join a secured network, you first need to learn security details from the network's administrator.

1. Turn on Wi-Fi, if it's not already on.
2. In the Wi-Fi settings screen, touch **Add Network**.
3. Enter the SSID (name) of the network. If necessary, enter security or other network configuration details.
4. Touch **Save**.

The information about the network is saved. Your device will connect to this network automatically the next time you come within range.

Configure proxy settings for a Wi-Fi network

Some network administrators require you to connect to internal or external network resources via a proxy server. By default, the Wi-Fi networks you add are not configured to connect via a proxy, but you can change that for each Wi-Fi network you've added.

Proxy settings are used by Browser but may not be used by other apps.

1. Touch & hold a network in the list of Wi-Fi networks you've added.
2. Touch **Modify network** in the dialog that opens.
3. Select **Show advanced options**.
4. If the network has no proxy settings, touch **None** under Proxy Settings, then touch **Manual** in the menu that opens.
5. Enter the proxy settings supplied by your network administrator.
6. Touch **Save**.

The proxy settings apply only to the Wi-Fi network you modified. To change the proxy settings for other Wi-Fi networks, modify them individually.

Connect to keyboards, mice, and other devices

You can connect a keyboard, mouse, or even a joystick or other input device to your tablet via USB and use it just as you would with a PC.

You may need an adapter to connect the keyboard or other device to your tablet's USB port. To connect more than one USB device at a time, use a powered USB hub to reduce the drain on your tablet's battery.

Keyboards

In addition to entering text, you can use your keyboard to navigate your tablet's features:

- Use the arrow keys to select items on screen. Pressing Return when an item is selected is equivalent to touching that item.
- Pressing Escape is equivalent to touching Back.
- Press Tab or Shift-Tab to move from field to field in a form or other screen with multiple text fields.

Mice

When you connect a mouse to your tablet and move the mouse, an arrow-shaped cursor appears, just as on a computer:

- Use the mouse to move the cursor.
- Clicking, pressing, and dragging with the mouse button is equivalent to touching, touching & holding, and dragging with your finger.
- Only one mouse button is supported.

Other input devices

You can other input devices to your phone. However, games and other apps must be designed to support any special features of an input device, such as dedicated buttons or

other controls, to take full advantage of them.

Connect to a Windows computer via shielded

USB Cable

You can use a USB cable to connect your phone to a Windows computer and transfer music, pictures, and other files in both directions.

When you connect your tablet to the USB port on your computer, its USB storage is mounted as a drive and appears on your computer screen. You can now copy files back and forth as you would using any other external device.

When you're finished, simply disconnect the tablet by unplugging the USB cable.

Settings > Device > Storage > Menu > USB computer connection

Manage accounts

Add or remove accounts

You can use multiple Google Accounts and Microsoft Exchange ActiveSync accounts on your device.

You may also be able to add other kinds of accounts, depending on your apps. Some you can add in the Accounts & Sync screen, as described here. Others you add using an app that works with those kinds of accounts. For example, you can add IMAP and POP3 email accounts with the Email app.

To view the Accounts & sync settings screen described here:

1. From a Home or All Apps screen, touch the Settings

icon .

2. Under Personal, touch Accounts & sync.

Add an account

To add some accounts, you may need to obtain details from system administrator about the service to which the account connects. For example, you may need to know the account's domain or server address.

1. Go to Settings > Personal > Accounts & sync.
2. Touch Add account.
3. Touch the kind of account to add.
4. Follow the onscreen steps to enter information about the account.

Most accounts require a username and password, but the details depend on the kind of account and the configuration of the service you're connecting to.

Depending on the kind of account, you may be asked to configure what kinds of data you want to sync, name the account, and other details.

When you're finished, the account is added to the list in Accounts & sync. Depending how you configured the account, email, contacts, and other information start syncing to your device.

Remove an account

You can remove an account to delete it and all information associated with it from your device, including email, contacts, settings, and so on.

1. Go to Settings > Personal > Accounts & sync.
2. Touch the account to delete.
3. Touch Menu icon > Remove account.

Secure your tablet

Set screen lock

Depending how you use your phone, you may want to set some form of automatic screen lock to prevent unauthorized access. If a screen lock has been set, the screen locks when your phone's display goes to sleep.

To adjust your tablet lock settings:

- 1 From a Home or All Apps screen, touch the Settings icon .
- 2 Touch Personal > Security > Screen lock.
- 3 Touch the type of lock you want and follow the onscreen instructions.

You can choose among these lock options, listed in approximate order of strength:

- Slide provides no protection, but lets you get to the Home screen quickly, or open Camera and start taking pictures immediately.
- Pattern lets you draw a simple pattern with your finger to unlock the phone.

- Password requires four or more letters or numbers. This is the most secure option, as long as you create a strong password. Important For best security, specify a password that is
- A least 8 characters long.
- Contains a mixture of numbers, letters, and special symbols
- Doesn't contain any recognizable words or phrases.

FCC Regulations:

●This Touch Book complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

●This Touch Book has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct

the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

RF Exposure Information

This device meets the government's requirements for exposure to radio waves.

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment.
