USER MANUAL

Table of Contents

Safety Information

Please carefully read the terms below:

Use Safely

Do not use the tablet in situations where it might cause danger.

Transportation Safety

Please observe all transportation laws and regulations.

Please drive with both hands on the wheel.

DO NOT TEXT AND DRIVE

Hospital Safety

Please follow hospital rules and limitations.

Please turn off your tablet when near medical instruments.

Airport Safety

Remember to follow all airport and flight safety regulations.

Please do not use your tablet during flight.

Chemical Warning

Do not use your tablet around fuels or chemicals.

Temperature Warning

Do not subject your tablet to extreme temperature conditions.

Water Hazard

Your tablet is not waterproof. Keep it away from water and liquids.

Emergency Calls

Make sure your tablet is switched on and in a service area. In home screen, tap the phone key and dial the emergency number.

Accessories and Batteries

Use only Blu authorized batteries and accessories.

Information Backup

Remember to keep a written record of all important information.

RF Exposure

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.

During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage near the body with the separation of 0 mm. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The exposure standard for wireless employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg.

Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands.

The FCC has granted an Equipment Authorization for this model device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model device is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on: FCC ID：YHLBLUTB803G.

For this device, the highest reported SAR value for for usage near the body is 1.50 W/kg.

FCC Regulations

●This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

●This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Appearance

Introduction

Installation of the SIM Card

Please keep the SIM card out of the reach of children. The SIM card and its contact are easily damaged due to scratching or bending. Please be cautious when carrying, installing or taking out the SIM card.

SIM Slot   Memory Card

Note: *Please contact your cellular tablet service provider directly to obtain the SIM card.*

To insert SIM card:

1. Power off tablet and insert the SIM card.
2. Insert an SD card. (*For additional storage capacity*)

3. Power on the tablet.

Power On and Off

On - Please ensure the SIM card has been properly inserted into the tablet. Long press the Power key to switch on the tablet on.

Off - In standby mode, long press on Power key until an options menu appears. Select Power Off in the menu and confirm in the pop-up prompt to switch off the tablet.
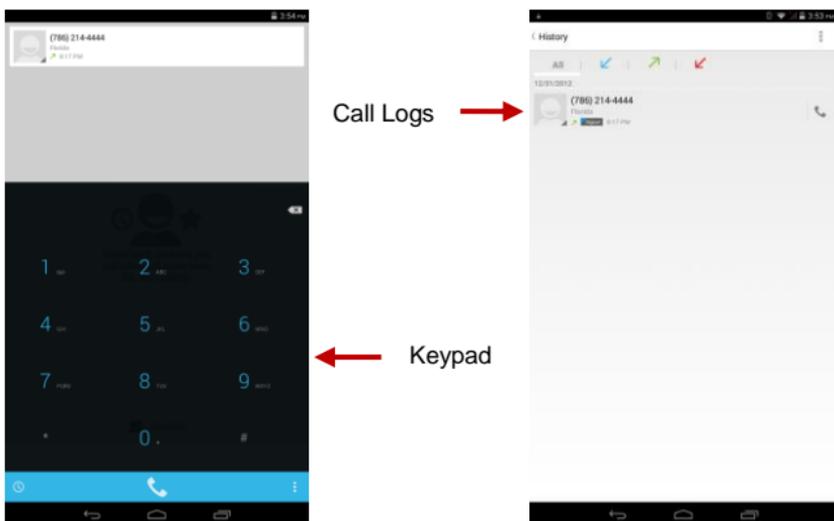

Security

You may set a security lock feature as a security measure for the

tablet. For further information regarding password locks, password revision and other functions please enter into the security option in system settings.

Call Functions

At the dial keyboard, enter the phone number and then click the dial key. If dialing an extension, you may click the dial pad icon in the bottom of the screen to open the interface and enter the number of the extension. You may also press and hold the 0 key to add a (+) sign when adding an international dialing prefix.

Call Logs

Keypad

Call Logs

Every number called and received will be saved in the call log. All numbers in the call log can be dialed directly by clicking the dial icon on the right side of the screen. When the number appears on the list,

click it to view additional details.

<u>**Call Options**</u>

There are different options that can be used in the call log and dialing interface. You may press the menu key while in the dial interface and adjust speed dial and call settings or enter contacts.
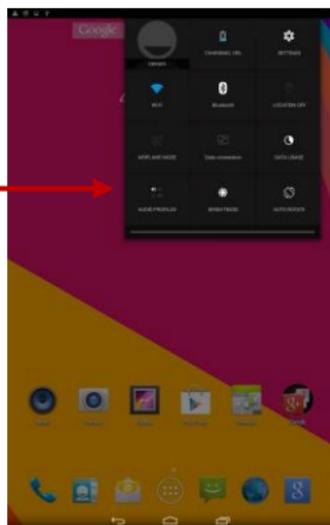

Notifications Bar

The notification bar is the status bar located on the top of the screen which contains useful and important information regarding your tablet and applications that are installed. On the notification bar, several icons will appear such as signal bar, battery indicator, data indicator, Bluetooth and Wi-Fi. You may slide the notification bar down with your finger to display any pending notifications or actions.

Pending Notifications and Applications

Quick Notification Settings

<u>**Quick Notification Settings**</u>

The notification settings window provides shortcuts to different settings for quick access. Slide down the notification bar towards the right side of the screen and click on any of the shortcut notification icons to power on or off.

Note: To remove pending notifications, drag down the notification bar on the left and click the clear notification icon on the upper right hand part of the screen (3 horizontal lines).

Contacts

Enter: Click on the applications menu and select contacts
• The default display is the tablet contacts and SIM card contacts
• The contacts are organized alphabetically by default.

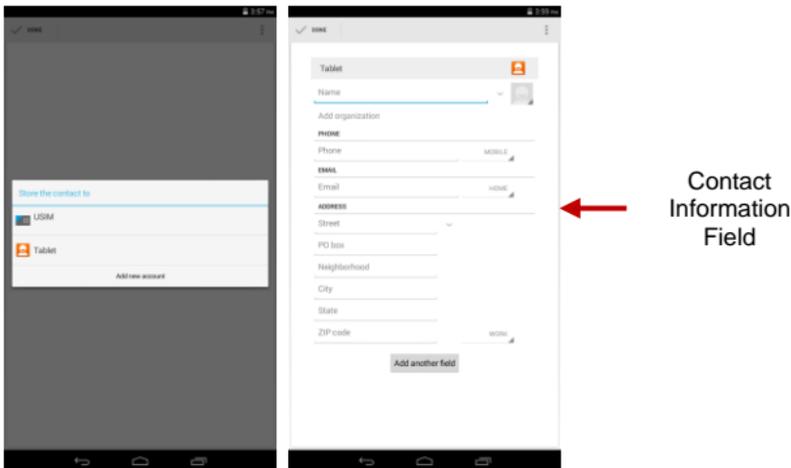

Add Contact

Search

Click the Search icon to enter the contact search interface.

• Any numbers or letters associated with any of the contacts saved in the list will be shown in the search results.

- If there were no matches for the inputted contact, the interface will display no contacts found.

Add New Contact

1. Click the (+) icon to add contact.

2. Select to save contacts to tablet, Gmail account or SIM card.

3. You may edit contact picture, name, telephone number, group, address, and email among other options.

4. Click to finish and save contact.

Settings

SIM Management

- Manage SIM and data information

Wi-Fi

- **Settings » Wi-Fi** to power on. When on, the Wi-Fi will automatically search for available networks. Any unsecured network can be used directly and any secured network requires a password or credentials prior to connection.

Bluetooth

- Press the switch to power on Bluetooth. Once on, the Bluetooth will automatically scan for any nearby open equipment.

Data Usage

- Mobile and Wi-Fi Data Usage

More… Wireless

- Airplane Mode, Default SMS, VPN
- Tethering & Portable hotspot

Note: When in airplane mode, all network connections will turn off automatically.

Audio Profiles

This option sets the tone settings for receiving calls and notifications. Some of the settings include:

- Vibrate volume, ring tones, ring tones notification, dial touchpad, haptic feedback and tones.

Display

Brightness, Auto rotating screen, Wallpaper, Sleep, Font size

Storage

- View memory usage.

🔋 Battery

- General power usage

🖼 Apps

- Manage applications - Manage and delete installed applications.
- Running services - Press Force Stop to stop any of the services listed and removes from the running applications list.

◎ Location

- High Accuracy – Use GPS, Wi-Fi and Mobile Networks.
- Battery Saving – Use Wi-Fi and Mobile Networks.
- Device Only – Use GPS only to determine location.

🔒 Security

Set up screen locks: Use slide, face/voice unlock, pattern, PIN or password to lock the screen.

- Pattern: The first time there will be simple unlock instructions and examples. Click "next step" to continue the security pattern step.
- PIN: Enter PIN number to unlock the screen.
- Password: Use password to unlock the screen

You may stop the security feature at any time.

Set up SIM card PIN lock

- SIM card PIN (Personal Identification Number) is used to prevent unauthorized use of SIM card.

To change a blocked PIN code, you will need to unlock the SIM lock then go to the Change Password screen. The tablet will automatically prompt you enter the old PIN code and ask to enter a new PIN code twice. The tablet will then prompt you that the change was successful. If you enter the PIN incorrectly three times, the SIM and PIN codes will be automatically locked. You will need the PUK code to unlock the tablet which is available through your service provider. If you enter the PUK code incorrectly 10 times, the SIM card will be permanently locked. Please see your service provider

for a new SIM card.

- Password visible – Make the password visible when it's typed.
- Use security credentials - Allow applications to visit security credentials or other credentials.
- Install the encrypted certificate.

🅰 Language and Input

- Language – Change languages.
- Custom Dictionary - Add or delete words to the custom dictionary.
- Keyboard Settings – Haptic vibration, Haptic tones, Capitalizing, Speech Input, Inputting words, Predictive text function, Auto-Text, Input keyboard method

🔄 Backup & Reset

- Backup Data – Will back up all application data, WLAN passwords, and other settings to Google's servers
- Restore to Factory Settings - Clear all data stored on the tablet.

🕐 Date & Time

- Date and Time adjustment.
- Time Zone - Select Time Zone according to where your location.
- Select Date Format - There are 3 kinds of formats you can choose from: Month-Day-Year, Day-Month-Year and Year-Month-Day, and Year-Month-Day which is the default setting

⏻ Schedule Power On & Off

- Schedule power on and off

🚶 Accessibility

- Power button ends call
- Speak Passwords

- Web accessibility

Printing

- You may print files via Wi-Fi with wireless printers

{ } Developer Options

If the tablet does not display Developer options press "Build number" seven (7) times in the about tablet tab in settings to access menu.

- The developer options gives access to USB Debugging and other developer options

About Tablet

- Information status and updates

Storage

Connect the tablet with the USB cable provided. Once connected, a connection interface will appear. Once in the connection mode interface, select MTP Media device or from the other options in the connection screen to transfer files.

Some system settings and UI options may vary depending on final SW version.
