12.15 About Tablet

A view of tablet information (model, system, firmware version, etc)

13. FAQ

1. The device cannot connect to WiFi

- Check if the wireless network is working ok with another device.
- Make sure the device is inside the connection area of the WiFi. The walls or other obstacles can decrease the signal range.
- Make sure the password used is the correct one.

2. The device does not start

- The device will not start if the battery power is below the critical level. In this case, please recharge the battery.
- Press the RESET button and check if the product is starting.
- Check if the charger is correctly connected.

3. Heating problem

- If you are simultaneously working in more applications or when you use the display with the highest level of brightness or while charging, the device can get warm. This is normal and will not lead to other problems of functionality.

4. The system is not working correctly

- Installing third party applications can lead to system malfunctioning. Uninstall these third party applications or have a factory reset in order to have the device functioning in

normal parameters again.

5. Problems with e-mail setup

- Make sure the device is connected to a WiFi network and that this network can connect to the Internet.
- Make sure all the data for the e-mail account were correctly inserted in the application.
- Make sure the date of the system is correct.

6. Recording problems

- Press the RESET button and after restart check if the recording works well.

7. Usage time too short

- Battery usage time can be influenced by the temperatures in the working environment. If the temperature is too high or too low, the working time will be affected. It is recommended to use the device in a normal temperature environment.
- Battery usage time depends on the way you use the device. High audio volume or WiFi make the battery life shorter.
- In order to have a long lasting life for the battery, please charge it for 8 to 12 hours before the first use.

8. Headphones without sound

- Make sure the audio file you are trying to listen to is not broken. Try listening to another audio file to confirm.
- Make sure you have a good wire connection between the

headphones and the device.

9. Display color problems for photos or videos

- Press the RESET button to check this issue.

10. Errors while copying files

- Please check if the storage space is full.
- Please check if the USB cable is in good condition.

11. Other problems

- Most of the problems can be solved with restarting of the device, with the reset to factory settings from the main menu or by pressing the RESET button on the side of the case.

14. About firmware

Firmware contained in the tablets provides the control program for the device, and it is offered by the original manufacturer. Flashing firmware (refer to *rebuilding firmware into the device*) is the final solution to serious system problems. For common breakdown you can just restart the device, or run *factory reset*. If system crashes appear continuously even after you have run factory reset, you can flash firmware under professional guidance. The firmware preloaded in the device is a stable version for the tablet, please do not flash it with other versions of firmware unless absolute necessity. We DO NOT suggest any private firmware flashing without guidance of the original

manufacturer, who is not responsible for any possible breakdown of the tablet caused by user's private firmware flashing.

FCC Information and Copyright

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates,

uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference

to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does

cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF warning statement: the device has been evaluated to meet general RF exposure requirement , The device can be used in portable exposure condition without restriction.
