

Position the handset clip onto the top of the docking station, securing it with the 2 screws.

- 2) Once the handset clip has been attached the PRC-2090 transceiver can be docked into the docking station.

Position the transceiver so that the green capstans align with the ridge on the bottom track in the docking station.

Push the PRC-2090 into the docking station firmly until a good connection between the transceiver and docking station is established.
