- Do not put the product placement in 55 ° to 10 ° ~ outside the temperature range of use.

·This product is not waterproof, do not put the product into water.

Intelligent voice translation machine three guarantees

After-sales service commitment of intelligent voice translation machine.: Strictly according to 《the law on consumer rights of the People's Republic of China》 , 《Product quality law of the People's Republic of China》 Carry out after sale three package service,The service is as follows:

During the three package period,You may enjoy the right to repair, replace and return the goods according to the regulations.

Name	Intelligent voice translation machine body	Charge
Performance problems	The function in the specification is invalid Voice failure	Improper charging

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
