Wireless Multimedia Desktop 250

Keyboard
Mouse

Discover easy Internet and multimedia functionality with wireless convenience

User Manual

F8E859-BNDL

Table of Contents

Congratulations and thank you for purchasing the Wireless Multimedia Desktop 250 by Belkin. We appreciate your business and we are sure you will enjoy years of reliable use with these high-quality input devices.

Although the Wireless Multimedia Desktop 250 will function out-of-the-box as a Human Interface Device (HID) or standard PS/2 keyboard and mouse, for advanced programmability and functionality, we recommend that you use the included software. This will give you added flexibility and allow you to program and customize your settings, and reassign keys to fit your preference.

Software Compatibility

Windows® OS for USB interface:	Windows XP, Me, 2000, 98 SE
Windows OS for PS/2 interface:	Windows XP, Me, 2000, 98 SE

For PS/2 Connections 🔌

1. Be sure that your computer is powered off.

2. Connect the receiver to your computer's PS/2 ports. The receiver has a two-headed connector for the keyboard and mouse connection (purple is for the keyboard and the USB connection, and the green adapter is for the mouse). There is also a diagram on the top connector for identification. Your computer will either have a matching color scheme or an illustration next to the port, or both (See Fig. 1).

Fig. 1

3. Install the batteries into your keyboard and mouse. Please make sure you follow the diagram on the inside of the battery compartment to ensure that you install them correctly.

4. Power on your computer.

The receiver automatically scans for and synchronizes the keyboard and mouse when you power on the computer. Your keyboard and mouse should now be functioning.

NOTE: If synchronizing does not occur automatically, please refer to the information on "Synchronizing" in the Troubleshooting section at the end of this User Manual.

For USB Connections ▭

6

1. Be sure that your computer is powered on. If you are running Windows 98 SE, Me, or 2000, you will need to have your old keyboard and mouse connected during the installation.

2. Install the batteries into your keyboard and mouse. Please make sure you follow the diagram on the inside of the battery compartment to ensure that you install them correctly.

3. Connect only the receiver to your computer with the USB connector. (Do not connect the green PS/2 connection as it is not necessary in a USB environment) (See Fig. 2).

Fig. 2

NOTE: When connecting the USB cable to your computer, Windows will start a New Hardware Wizard. Windows XP completes the Wizard automatically. In Windows 98 SE, Me, and 2000, you will need to go through the New Hardware Wizard setup with your old keyboard and mouse. Windows 98 SE may require you to insert your Windows 98 SE Installation CD into your computer's CD-ROM drive to complete the install.

4. The receiver automatically scans and synchronizes the keyboard and mouse. Your keyboard and mouse should now be functioning.

5. If synchronizing does not occur automatically, please refer to the information on "Synchronizing" in the Troubleshooting section at the end of this User Manual.

For Windows 98 SE, Me, 2000, and XP

NOTE: The keyboard and mouse should now be functioning for basic input. If this is not the case, carefully repeat the Quick Setup procedures in the previous pages. When the keyboard and mouse are functioning for basic input, install the software described in the following section.

NOTE: If you have previously installed any keyboard or mouse driver on your computer, you must uninstall it/them before proceeding with this installation procedure.

1. Insert your Wireless Multimedia Desktop 250 driver installation CD into your CD-ROM drive. After a few moments, the main menu will start automatically.

2. Select "Install Driver" and your computer will begin the installation process.

3. Follow the on-screen instructions to install the software.

   NOTE: If the main CD does not auto-start, click the "Start" button and select "Run". From the run dialog box, enter "<drive>:\Setup.exe" and click "OK" ("<drive>" being the letter of the drive that identifies your CD-ROM drive under "My Computer". For example, if the CD is in drive D, enter "D:\Setup.exe".).

4. When prompted, click "Finish" and restart your computer. This completes the installation process.

Product Features

The Wireless Multimedia Desktop 250 software provides a suite of tools that will enhance your experience with the Belkin Wireless Multimedia Desktop 250. It allows you to customize your hot keys and gives you quick access to your media keys, as well as other shortcuts.

For the Keyboard

Software installation is required to enable functioning of the following USB-PS/2 keyboard hot keys:

🔇	Mute	Mutes your system volume.
■	Stop	In Windows Media Player, stops music.
▶/ıı	Play/Pause	In Windows Media Player, starts or pauses music.
◄◄	Back	In Windows Media Player, moves you back one track or to the beginning of the current track.
►►ı	Forward	In Windows Media Player, moves selection forward one track.
▲▼	Volume Up/Down	Adjusts the main volume of your computer.

NOTE: Your Media Player may have a separate volume control.

🎵	Media	Opens your default Media Player for music only.
🔍	Search	Enables web search.
🔄	Refresh	Reloads the current web page.
⊗	Stop	Stops page from loading.
⇐	Back	Moves Internet page back.

Section

4

5

6

⇨	Forward	Moves Internet page forward.
📑	My Documents	Opens your "My Documents" folder.
🏠	Home	Opens your system's default Internet browser.
✉	Email*	Opens your default email program, such as Microsoft Exchange or Outlook.
⌨	Calculator	Opens your Widows system calculator.
🖥	Computer	Opens up "My Computer".
🌙	Sleep	Puts computer into sleep mode.
🔋	Battery	LED lights up when batteries are low.

*NOTE: If you have a web-based email account, this feature does not apply.

To program keyboard hot keys:

1. Click "Start".

2. Click "Programs".

3. Click "Belkin Multimedia Keyboard".

4. Then double-click on "Belkin Multimedia Utility Keyboard".

5. An on-screen display of the hot keys will appear. Select the button to program.

6. Then under the "Keys" tab, select "Special Function".

7. In the drop-down menu, select from:

Copy	Paste	Open	New
Cut	Redo	Save	

8. Then click "Apply".

9. Next, click "OK".

10. Repeat steps 5–9 to program other hot keys.
    To restore default settings, click "Restore All".

To program a customized hot key:

1. Follow steps 1–5 in "To program keyboard hot keys".

2. Select "Custom".

3. Then click "Set".

4. Follow on-screen instructions to complete programming.

5. Click "Apply".

6. Then click "OK".

To customize on-screen color display:

1. Select "OSD" tab.

2. In "Item", select from (Window, Frame, Text) to program.

3. Then in "Color", click drop-down menu to select color.

To customize display launch time:

1. Select "OSD" tab.

2. In "Delay", click drop-down arrow.

3. Then select from "(1-10) seconds".

4. Click "Apply".

5. Next, click "OK".

To display key status:

1. To display status of "Scroll Lock", select "Show Scroll Lock" status.

2. To display status of "Num Lock", select "Show Num Lock" status.

3. To display status of "Cap lock" key, select "Show Cap Lock" status.

4. After selection(s) are completed, click "Apply".

5. Next, click "OK"

To remove key status, uncheck all selections.

Then click "Apply".

Next, click "OK".

For the Mouse

Mouse Functions

Through your Mouse "Properties" dialog box, you can find and control the following button-function features:

Right Button
Context menu

Wheel Button
Quick/auto scroll. Wheel button lights up red when batteries are low.

Left Button
Primary mouse button

Fourth Button
Internet Explorer back (if available)

Fifth Button
Internet Explorer forward (if available)

Fig. 3

6

To program mouse buttons:

Please note that only the scroll wheel, fourth, and fifth buttons are programmable through the software. Refer to Fig. 3 of mouse for description.

1. Click "Start".
2. Click "Programs"
3. Click "Belkin Multimedia Keyboard".
4. Then double-click on "Belkin Multimedia Utility Mouse".
5. Next double-click on the mouse icon on the task bar.

To program wheel speed:

1. Under the "Wheel" tab in wheel mode, select "Enhanced scroll mode".
2. Under "Wheel speed" in drop-down menu, select a number for "scroll lines per scroll unit" or select "one page per scroll unit".
3. Click "Apply".
4. Click "OK".

To program mouse buttons:

1. Select the "Button" tab.
2. Select a button to program.
3. Choose from the following functions in Table 1.

Table 1

• System Default	• Cut	• Minimize Window
• F1 – F10	• Copy	• Drag Lock
• Esc	• Paste	• Shift Lock
• Backspace	• Internet Explorer	• Control Lock
• Enter	• Find Computer	• Horizontal Wheel
• Space	• Find File	• Launch Default Browser
• Delete	• System Help	
• Page Up	• Middle Button	• Launch Default Email
• Page Down	• Minimize All Windows	• Internet Explorer Backward
• Tab	• Run	
• Home	• Start Menu	• Internet Explorer Forward
• End	• System Property	
• Up	• Undo Minimize all Windows	• Universal Scroll
• Down		• Auto Scroll
• Left	• Control Panel	• Universal Zoom
• Right	• Close Application	• Connect to Internet
• Undo	• Double-Click	
• Redo	• Maximize Window	

4. Click "Apply".

5. Click "OK".

Synchronizing the Receiver and Wireless Multimedia Desktop 250

1. Press the connect button on top of the receiver, and then press the button on the bottom of the keyboard. It should connect within 10 seconds.

2. Press the connect button on the top of the receiver, and then press the button on the bottom of the mouse. Within 10 seconds, it should connect.

3. If the keyboard did not connect, please repeat step 1.

4. If the mouse did not connect, please repeat step 2.

Switching IDs

If interference occurs while using the keyboard and/or mouse, switch IDs by following the steps below:

For the Keyboard:

• Press the connect button on top of the receiver, and then press the button on the bottom of the keyboard. It should connect within 10 seconds.

• If the keyboard does not connect, please repeat step.

For the Mouse:

- Press the connect button on the top of the receiver, and then press the button on the bottom of the mouse. Within 10 seconds, it should connect.

- If the mouse does not connect the first time, please repeat.

If the keyboard and/or mouse is/are not working after installation:

Be sure the receiver's cables are plugged into either the computer's PS/2 ports or a USB port. If you are connecting it via PS/2, make sure that both plugs are being used (purple keyboard connector and the USB connection with the green PS/2 adapter). If you are connecting via USB, make sure that you only connect the USB connector.

For optimal performance

Place the receiver at least eight inches (20cm) away from the computer monitor, the computer, any external storage devices, or other electrical devices.

Make sure you have properly installed the batteries. Check to make sure the batteries you have installed are not dead (you can do this by installing them into another device).

If the keyboard does not register keystrokes, replace current batteries with high-quality alkaline batteries.

If the mouse pointer becomes choppy on-screen, replace current batteries with high-quality alkaline batteries. Be sure that the mouse is not on a reflecting surface (such as a transparent, mirrored, or glossy table). If this is the case, place an opaque or textured material—or a mouse pad—underneath the mouse. This will allow the optical mechanism to work accurately.

FCC Statement

DECLARATION OF CONFORMITY WITH FCC RULES FOR ELECTROMAGNETIC COMPATIBILITY

We, Belkin Corporation, of 501 West Walnut Street, Compton, CA 90220, declare under our sole responsibility that the product,

F8E859-BNDL

to which this declaration relates,

Complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: Exposure to Radio Frequency Radiation.

The radiated output power of this device is far below the FCC radio frequency exposure limits. Nevertheless, the device shall be used in such a manner that the potential for human contact during normal operation is minimized. When connecting an external antenna to the device, the antenna shall be placed in such a manner to minimize the potential for human contact during normal operation. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm (8 inches) during normal operation.

Federal Communications Commission Notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try and correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.

• Increase the distance between the equipment and the receiver.

• Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

• Consult the dealer or an experienced radio/TV technician for help.

Modifications

The FCC requires the user to be notified that any changes or modifications to this device that are not expressly approved by Belkin Corporation may void the user's authority to operate the equipment.

Canada-Industry Canada (IC)

The wireless radio of this device complies with RSS 210 Industry Canada.
This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B conforme á la norme NMB-003 du Canada.

Belkin Corporation Limited Lifetime Product Warranty*

Belkin Corporation warrants this product against defects in materials and workmanship for its lifetime. If a defect is discovered, Belkin will, at its option, repair or replace the product at no charge provided it is returned during the warranty period, with transportation charges prepaid, to the authorized Belkin dealer from whom you purchased the product. Proof of purchase may be required.

This warranty does not apply if the product has been damaged by accident, abuse, misuse, or misapplication; if the product has been modified without the written permission of Belkin; or if any Belkin serial number has been removed or defaced.

THE WARRANTY AND REMEDIES SET FORTH ABOVE ARE EXCLUSIVE IN LIEU OF ALL OTHERS, WHETHER ORAL OR WRITTEN, EXPRESSED OR IMPLIED. BELKIN SPECIFICALLY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

No Belkin dealer, agent, or employee is authorized to make any modification, extension, or addition to this warranty.

BELKIN IS NOT RESPONSIBLE FOR SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM ANY BREACH OF WARRANTY, OR UNDER ANY OTHER LEGAL THEORY, INCLUDING BUT NOT LIMITED TO, LOST PROFITS, DOWNTIME, GOODWILL, DAMAGE TO OR REPROGRAMMING, OR REPRODUCING ANY PROGRAM OR DATA STORED IN, OR USED WITH, BELKIN PRODUCTS.

Some states do not allow the exclusion or limitation of incidental or consequential damages or exclusions of implied warranties, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state.

*Batteries not included under warranty.
