## **Install and Remove the Keyboard Driver**

### **Install the Keyboard Driver**

Please complete the following steps:

- 1).Check the part “ Before Installation “ first
- 2) Install the driver and then launch the software
- 3) Connect the keyboard to Palm device.

### **Before Installation**

Please disable any other keyboard applications that you have installed on your Palm device to prevent conflicts

Make sure there is at least 100 Kb of free memory to install the driver.

### **Step1: Install the Driver**

1. Connect the Palm device to a computer through the cradle or cable.
2. Establish connection between the computer and Palm device by using Palm HotSync.

3. Insert the CD Disk into the CD-ROM/ Floppy drive.
4. Tap twice on the **My Computer**  icon , and then choose your CD-ROM drive  .
5. Choose the directory which contains the just language version of driver that you want to install.
6. Execute **Setup.exe** inside the directory. Please follow the on-screen procedure step by step.

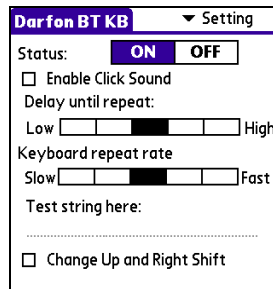

### Step 2: Launch the Software

1. Turn on the Palm PDA.
2. Tap  , see all applications .

3. Tap the  icon, and add a check mark in the check box in front of the **ON**.

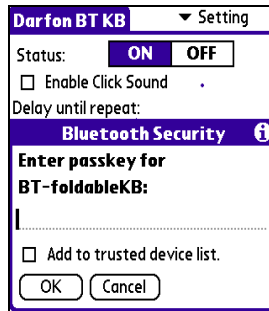

### Step 3: Connect Keyboard to Palm Device

1. Now PDA will inquiry Bluetooth Keyboard.

2. At first time, you need to key-in Bluetooth Passkey (default value: 0000.) by Palm graffiti.

3. Put the Palm PDA on the Holder of keyboard.

### **Disconnect the Keyboard**

Tap the connect/disconnect Bottom, Keyboard has been disconnected. You will see orange light sparkle.

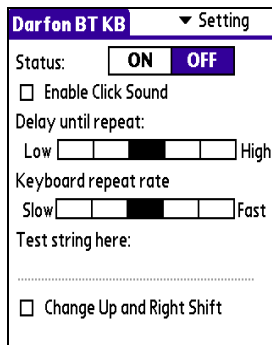

## **Customize Your Keyboard**

### **Configuring the Keyboard**

You can have several kinds of typing feeling on your foldable Keyboard by customizing your keyboard:

1. On your Palm PDA, tap the BT KB icon and launch it.

2. Select the **Setting** tab.

3. Tap the **Enable Sound** check box to hear a click every time you press a key.

Select the **Delay until repeat** indicator to lengthen or shorten the time the keyboard waits before repeating a pressed key. The right side of the scale specifies a shorter delay time.

Select the **Keyboard repeat rate** indicator to speed up or slow down the rate at which the keyboard repeatedly displays a pressed key. The right side of the scale specifies a faster repeat rate.

Tap in the **Test string here:** field to enter characters from the keyboard.

2. Select the **Cmdkeys** tab.

3. In the list, select the application you want to assign to the

Cmdkey combination. Then, you have finished the assignment of Cmdkeys.

## Frequently Asked Questions

### A) How do I uninstall the driver?

In Main Menu, select > **Delete**

Select **Darfon BT Keyboard** from the list of applications. Then press the **Delete** button the Palm for several seconds so your new settings can take effect.

### B) I pressed a key on the keyboard, but the letter did not register.

Be sure the keyboard is connected to the Palm device via Bluetooth (the connection light will turn off). If the connection is secure, remove the keyboard driver from the Palm device, and then reinstall

it.

**C) My Palm will not sync through my serial cradle since installing the Bluetooth Keyboard driver.**

It is necessary to disable the Bluetooth Keyboard driver prior to syncing through a serial connection. Please refer to "Launch the Software", page 7 of this manual. Once you have completed syncing data, you must re-enable the driver to operate the keyboard.
