**z Installing Bluetooth software for Windows**

**IMPORTANT: You must install the software before installing the Bluetooth device. During the software installation, you will be prompted to install the device.**

Place the installation CD into a CD-ROM drive and setup should launch automatically. If setup does not launch, use Windows Explorer to navigate to the appropriate CD-ROM drive and run "**Bsetup**".

1. InstallShield Wizard setup dialog box will automatically be displayed. If the setup program doesn't startup automatically, manually start the setup program by double clicking **Setup.exe** from the Bluetooth software folder.
2. Follow the installation wizard and complete the steps to install Bluetooth software.
3. At the *Welcome* screen, click the **Next** button.
4. Click the "**Install**" button when you are ready to install the software.
5. Click the "**Finish**" button to exit the wizard. Click "**Yes**" to restart your computer. If you plan to restart later, click "**No**".
6. Plug in your USB Bluetooth adapter securely in the USB port when the system comes back up.
7. The system will start installing the necessary drivers for the USB Bluetooth adapter. Click "**Next**" and "**Finish**" to continue.
8. Click "**Start->Program Files->Toshiba->Bluetooth->Bluetooth Settings**" to initiate the Bluetooth functions.

9. Click “**New Connection**” to start searching for the Bluetooth devices nearby and establish the connection.

**For more information about the Bluetooth software configuration, please check the User Guide Readme file or the Application Notes on the driver and software CD!**

## **Setup for Mac**

Mac O.S. X 10.2 or greater

Mac O.S. X 10.2 has built-in Bluetooth software support for USB Bluetooth. Simply plug in your USB Bluetooth in the USB port. Launch the Bluetooth software from the Control Panel and you can start working in the realm of Bluetooth. Check the Apple Help menu or the Readme file on the CD for Bluetooth support.

## **Federal Communication Commission Interference Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

FCC Caution:

1. The device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:
  - (1) This device may not cause harmful interference, and
  - (2) this device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.
