Setup for Windows 98SE/2000/ME/XP

- Installing Bluetooth software for Windows

IMPORTANT: You must install the software before installing the Bluetooth device. During the software installation, you will be prompted to install the device.

Place the installation CD into a CD-ROM drive and setup should launch automatically. If setup does not launch, use Windows Explorer to navigate to the appropriate CD-ROM drive and run "**Bsetup**".

1. InstallShield Wizard setup dialog box will automatically be displayed. If the setup program doesn't startup automatically, manually start the setup program by double clicking **Setup.exe** from the Bluetooth software folder.
2. Follow the installation wizard and complete the steps to install Bluetooth software.
3. At the **Welcome** screen, click the **Next** button.
4. Click the "**Install**" button when you are ready to install the software.
5. Click the "**Finish**" button to exit the wizard. Click "**Yes**" to restart your computer. If you plan to restart later, click "**No**".
6. Plug in your USB Bluetooth adapter securely in the USB port when the system comes back up.
7. The system will start installing the necessary drivers for the USB Bluetooth adapter. Click "**Next**" and "**Finish**" to continue.
8. Click "**Start->Program Files->Toshiba->Bluetooth->Bluetooth Settings**" to initiate the Bluetooth functions.
9. Click "**New Connection**" to start searching for the Bluetooth devices nearby and establish the connection.

For more information about the Bluetooth software configuration, please check the User Guide Readme file or the Application Notes on the driver and software CD!

Setup for Mac

Mac O.S. X 10.2 or greater

Mac O.S. X 10.2 has built-in Bluetooth software support for USB Bluetooth. Simply plug in your USB Bluetooth in the USB port. Launch the Bluetooth software from the Control Panel and you can start working in the realm of Bluetooth. Check the Apple Help menu or the Readme file on the CD for Bluetooth support.

FCC RF Radiation Exposure Statement

The equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
