

Safety information

Read these safety and operation instructions before using the BlackBerry Smart Card Reader™ or any accessories provided with the BlackBerry Smart Card Reader. Retain these instructions for future use.

In some countries there may be restrictions on using Bluetooth® enabled devices. Check with your local authorities.

Electrical safety

Charge the BlackBerry Smart Card Reader using only the USB cable provided or accessory specifically approved by Research In Motion® (RIM®) for use with this BlackBerry Smart Card Reader. Any approval from RIM under this document must be in writing and must be from a person authorized to provide such approval. Use of any other accessory will invalidate any warranty provided with the BlackBerry Smart Card Reader and might be dangerous.

Use the charging accessories provided with the BlackBerry Smart Card Reader or any other approved charging accessories only from the type of power source indicated on the marking label. Before using any power supply, verify that the mains voltage is in accordance with the voltage printed on the power supply.

Do not overload wall outlets, extension cords, or convenience receptacles as this might result in a risk of fire or electric shock. To reduce the risk of damage to the cord or the plug, pull the plug rather than the cord when you disconnect the charging accessory from the wall outlet or convenience receptacle.

Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where the power cord connects to the BlackBerry Smart Card Reader. Unplug charging accessories during lightning storms or when unused for long periods of time.

Do not use charging accessories outside or in any area exposed to the elements.

See the documentation that came with the BlackBerry Smart Card Reader for more information about inserting the battery and connecting the power supply.

Battery safety and disposal

The BlackBerry Smart Card Reader contains a removable lithium-ion battery. Do not dispose of either the BlackBerry Smart Card Reader or the lithium battery in a fire. Dispose of the lithium battery in accordance with the laws and regulations in your area governing disposal of such cell types.

The battery might present a fire or chemical burn hazard if mistreated. Do not disassemble, crush, or puncture the battery. Do not heat the battery above 60°C (140°F). Do not allow metal objects to contact the battery terminals.

Use only the battery that RIM specifies for use with your particular BlackBerry Smart Card Reader model. Using any other battery will invalidate any warranty provided with the BlackBerry Smart Card Reader and might present a risk of fire or explosion.

Driving safety

Check the laws and regulations regarding the use of wireless BlackBerry Smart Card Readers in the areas where you drive. Always obey them.

Do not use the features of the BlackBerry Smart Card Reader while driving. Have a passenger in the vehicle use the BlackBerry Smart Card Reader for you, or find a safe location to stop your vehicle prior to using the BlackBerry Smart Card Reader.

Store the BlackBerry Smart Card Reader safely before driving your vehicle. Do not use any charging accessory as a means of storing the BlackBerry Smart Card Reader while you are in a vehicle. If your vehicle is equipped with an air bag, do not place the BlackBerry Smart Card Reader or other objects above the air bag, or in the air bag deployment area. If in-vehicle wireless equipment is improperly stored or installed, and the air bag inflates, serious injury could result.

Radio frequency (RF) signals might affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. If any equipment has been added to your vehicle, you should also consult the manufacturer of that equipment for information on RF signals.

Accessories

Use only those accessories approved by RIM. Using any accessories not approved by RIM for use with this particular BlackBerry Smart Card Reader model will invalidate any approval or warranty applicable to the BlackBerry Smart Card Reader and might be dangerous.

Antenna care

Use only the supplied integral antenna. Unauthorized antenna modifications, or attachments could damage the BlackBerry Smart Card Reader and might violate Federal Communications Commission (FCC) regulations.

Operating and storage temperatures

Situate the BlackBerry Smart Card Reader or BlackBerry Smart Card Reader accessories away from heat sources, such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.

If you are not going to use the BlackBerry Smart Card Reader for more than two weeks, turn the BlackBerry Smart Card Reader power off, remove the battery, and follow the operating and storage temperatures listed below:

BlackBerry Smart Card Reader operating	32 to 122°F (0 to 50°C)
BlackBerry Smart Card Reader storage	50 to 86°F (10 to 30°C)

Interference with electronic equipment

Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment might not be shielded against the RF signals from the BlackBerry Smart Card Reader.

Pacemakers: Consult a physician or the manufacturer of your pacemaker if you have any questions regarding the effect of RF signals on your pacemaker. If you have a pacemaker, verify that you are using the BlackBerry Smart Card Reader in accordance with the safety requirements associated with your particular pacemaker, which might include the following requirements:

- Always keep the BlackBerry Smart Card Reader more than 7 inches (20 cm) from the pacemaker when the BlackBerry Smart Card Reader is turned on.
- Do not carry the BlackBerry Smart Card Reader in your breast pocket.
- If you have any reason to suspect that interference is taking place, turn the BlackBerry Smart Card Reader radio off immediately.

Hearing aids: Some digital wireless devices may interfere with some hearing aids. In the event of such interference, consult your service provider or contact the manufacturer of your hearing aid to discuss alternatives.

Other medical devices: If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Health care facilities: Turn the BlackBerry Smart Card Reader radio off in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Aircraft: Federal Aviation Administration (FAA) and FCC regulations prohibit using the radio of the BlackBerry Smart Card Reader while in the air. Turn the BlackBerry Smart Card Reader radio off before boarding an aircraft. The effect of using the BlackBerry Smart Card Reader radio in an aircraft is unknown. Such use might affect aircraft instrumentation, communication and performance, might disrupt the network, might otherwise be dangerous to the operation of the aircraft, and might be illegal. Use any other BlackBerry Smart Card Reader applications in accordance with airline regulations for electronic devices.

Dangerous areas

Potentially explosive atmospheres: Turn the BlackBerry Smart Card Reader radio off when in any area with a potentially explosive atmosphere, and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include fueling areas such as gasoline or petrol stations; below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust, or metal powders; and any other area where you would normally be advised to turn off your vehicle engine.

Blasting areas: To avoid interfering with blasting operations, turn the BlackBerry Smart Card Reader radio off when in a "blasting area" or in areas posted: "Turn off two-way radio". Obey all signs and instructions.

Service

Only qualified service personnel should perform repairs to the BlackBerry Smart Card Reader. Disconnect the power supply cables from the computer or electrical outlet and refer the BlackBerry Smart Card Reader or charging accessory for service to qualified service personnel if any of the following situations occur:

- the power supply cord, plug, or connector is damaged
- liquid has been spilled or objects have fallen into the BlackBerry Smart Card Reader or charging accessory
- the BlackBerry Smart Card Reader or charging accessory has been exposed to rain or water
- the BlackBerry Smart Card Reader or charging accessory becomes very hot to the touch

- the BlackBerry Smart Card Reader or charging accessory has been dropped or damaged in any way
- the BlackBerry Smart Card Reader or charging accessory does not operate normally when following the instructions in the user documentation
- the BlackBerry Smart Card Reader or charging accessory exhibits a distinct change in performance

Do not attempt to disassemble the BlackBerry Smart Card Reader or any charging accessory.

To reduce the risk of fire or electric shock, adjust only those controls that are covered in the user documentation for the BlackBerry Smart Card Reader. An improper adjustment of other controls might cause damage and will often require extensive work by a qualified technician to restore the BlackBerry Smart Card Reader, charging accessory, or any other accessory to normal operation.

Failure to observe all safety instructions contained in the user documentation for the BlackBerry Smart Card Reader will void the Limited Warranty and might lead to suspension or denial of services to the offender, legal action, or both.

Additional safety guidelines

Liquids and foreign objects: Never push objects of any kind into the BlackBerry Smart Card Reader or BlackBerry Smart Card Reader accessories through openings as this action might short-circuit parts and cause a fire or electric shock. Do not use the BlackBerry Smart Card Reader or BlackBerry Smart Card Reader accessories near water (for example, near a bathtub or a sink, in a wet basement, or near a swimming pool). Never spill liquid of any kind on the BlackBerry Smart Card Reader or BlackBerry Smart Card Reader accessories.

Stability: Do not place the BlackBerry Smart Card Reader or BlackBerry Smart Card Reader accessory on any unstable surface. It could fall, thereby potentially causing serious injury to a person and serious damage to the BlackBerry Smart Card Reader or BlackBerry Smart Card Reader accessory. Take care when using the BlackBerry Smart Card Reader with any charging accessories to route the power cord in a way that reduces the risk of injury to others, such as by tripping or choking.

Cleaning: Do not use liquid, aerosol cleaners, or solvents on or near the BlackBerry Smart Card Reader or BlackBerry Smart Card Reader accessories. Clean only with a soft dry cloth. Disconnect any cables from the computer and unplug any charging accessories from the electrical outlet before cleaning either the BlackBerry Smart Card Reader or the charging accessory.

Compliance information

Exposure to radio frequency signals

The BlackBerry Smart Card Reader is a low-power radio transmitter and receiver. When the BlackBerry Smart Card Reader radio is on, it receives and also sends out RF signals. The BlackBerry Smart Card Reader complies with U.S. Federal Communications Commission (FCC), Industry Canada (IC), and European Union (EU) guidelines respecting safety levels of RF exposure for wireless BlackBerry Smart Card Reader devices, which in turn are consistent with the following safety standards previously set by Canadian, United States, and international standards bodies:

- ANSI/IEEE C95.1, 1999, IEEE Standard for Safety Levels with Respect to Human Exposure to Radio Frequency Electromagnetic Fields, 3 kHz to 300 GHz
- National Council on Radiation Protection and Measurements (NCRP) Report 86, 1986, Biological Effects and Exposure Criteria for Radio Frequency Electromagnetic Fields
- Health Canada, Safety Code 6, 1999, Limits of Human Exposure to Radio Frequency Electromagnetic Fields in the Frequency Range from 3 kHz to 300 GHz
- EN 50360, 2001, Product standard to demonstrate the compliance of mobile phones with the basic restrictions related to human exposure to electromagnetic fields (300 MHz to 3 GHz)
- International Commission on Non-Ionizing Radiation Protection (ICNIRP), 1998, Guidelines for limiting exposure to

time-varying electric, magnetic, and electromagnetic fields (up to 300 GHz)

- Official Journal of the European Union, 1999, Council Recommendation of 12 July 1999 on the limitation of exposure of the general public to electromagnetic fields (0 Hz to 300 GHz)

To maintain compliance with FCC, IC, and EU RF exposure guidelines when carrying the BlackBerry Smart Card Reader on your body, use only RIM-supplied or approved accessories. Use of accessories that are not approved by RIM might violate FCC, IC, and EU RF exposure guidelines and might void any warranty applicable to the BlackBerry Smart Card Reader.

Specific absorption rate data

THIS BLACKBERRY SMART CARD READER MEETS GOVERNMENT REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

The BlackBerry Smart Card Reader is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government, Industry Canada of the Canadian Government (IC), and recommended by The Council of the European Union. These limits are part of comprehensive guidelines and establish permitted

levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for BlackBerry Smart Card Readers employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC/IC is 1.6W/kg*. The SAR limit recommended by The Council of the European Union is 2.0W/kg**.

Tests for SAR are exempted due the low transmit power of the BlackBerry Card Reader.

As per FCC 2003 TCB Training, no SAR evaluation is needed if the transmit power of a transceiver is below low threshold of 60 / f (GHz) mW.

* In the United States and Canada, the SAR limit for mobile BlackBerry Smart Card Readers used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue for the body or head (4.0 W/kg averaged over 10 grams of tissue for the extremities - hands, wrists, ankles, and feet). The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

** In Europe, the SAR limit for mobile BlackBerry Smart Card Readers used by the public is 2.0 Watts/kg (W/kg) averaged over 10 grams of tissue for the body or head (4.0 W/kg averaged over 10 grams of tissue for the extremities - hands, wrists, ankles, and feet). The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

The long-term characteristics or the possible physiological effects of Radio Frequency Electromagnetic fields have not been evaluated by Underwriters Laboratories Inc. (UL).

FCC compliance statement (USA)

FCC Class B Part 15

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer's instructions, may cause interference harmful to radio communications.

There is no guarantee, however, that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio or TV technician for help.

Industry Canada certification

This device complies with Industry Canada RSS 133 and RSS 210, under certification number 2503A-RBB10BW.

Class B compliance

This device complies with the Class B limits for radio noise emissions as set out in the interference-causing equipment standard entitled "Digital Apparatus," ICES-003 of Industry Canada.

EU regulatory conformance

Research In Motion Limited hereby declares that this BlackBerry Smart Card Reader device is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

C E 0168

The Declaration of Conformity made under Directive 1999/5/EC is available for viewing at the following location in the EU community:

Research In Motion UK Limited
36 Station Road, Egham, Surrey
TW20 9LF
United Kingdom

Additional regulatory conformance

Specific details about compliance to the following standards and regulatory bodies may be obtained from Research In Motion:

- Underwriters Laboratories UL60950 requirements for Canada and the United States
- Radio and Telecommunications Terminal Equipment (R&TTE) Directive 1999/5/EC

Product information

Mechanical properties

Weight	approximately 2.52 oz (71.3 g) including battery
Size (L x W x H)	103.2 x 58.5 x 20.56 mm (4.06 x 2.3 x 0.81 in.)
Memory	4-MB flash memory, 4-MB SRAM

Power

Battery	removable, rechargeable lithium-ion cell
Port	USB-compatible port for data synchronization and charging

Radio specifications

Bluetooth radio

Single-band support	ISM 2.4 GHz
---------------------	-------------

Radio specifications

Power class	Bluetooth class 2 (2.5 mW)
-------------	----------------------------

Transmitting and receiving frequency	2402 to 2480 MHz
