# **1 Instruction**

## **1.1 General Description**

This camera, a digital scouting camera with MMS function, is a digital infrared surveillance camera, triggered by any movement of human or animal monitored by a high sensitive Passive Infrared (PIR) motion sensor, and then automatically captures high quality pictures (up to 10M pixels) or records video clips (720P HD). It sends pictures instantly to your mobile device or e-mail via GSM/GPRS/MMS network. You'll be alerted just when the camera is triggered or per custom settings.

It takes color pictures or videos under sufficient daylight. While at night, the built-in infrared LEDs can help to take clear pictures or videos (monochrome).

There is a 3" color LCD display screen on the camera and a sound recorder embedded in the camera. A laser pointer is used to help target the photo area of the camera.

It is resistant against water and snow. The camera can also be used as a portable digital camera.

## **1.2 Application**

This camera can be used as an automatic surveillance device for guarding and recording unexpected intrusion to homes, shops, schools, depots, offices, taxis, work sites, etc. It can also be used as a trail camera for hunting or monitoring animals by recording the traces of wild animals. It can be left alone for weeks and months and it will save event records automatically in digital format.

## **1.3 Camera Overview**

Take a few moments to familiarize with the camera controls and displays. It is helpful to bookmark this section and refer to it when reading through the rest of the manual.

Figure 1 Diagram of camera functional indicators

Figure 2 Inner panel view

Figure 3 Diagram of camera interfaces

## 1.4 Shooting Information Display

When the camera is turned on (the power switch is slid to **TEST** position), the current settings will be displayed on screen.

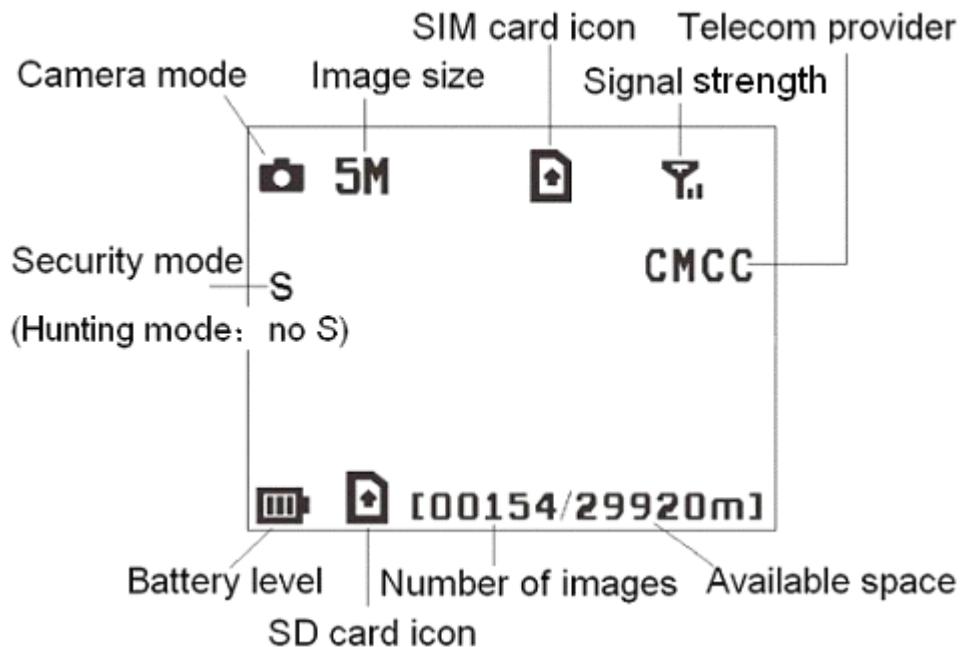

Figure 4 Shooting information display

 is the correct SIM card status and the available space of SD card should be a none zero value.

## 1.5 Two Way Communication

When in **Hunting mode**, you can set **SMS control** submenu as **ON** to open the two way communication function. Under this setting, the camera can receive and respond to your SMS command or the Android APP command. And you can retrieve live pictures in this mode.

When in **Security mode**, the two way communication function is enabled by default. Taking into account the power consumption, we recommend to use the power adapter.

## 2 Cautions

- **The working voltage of the camera is 6V.** The camera is supplied by the power adapter or 8 AA batteries.
- Please install batteries according to shown polarity.
- **Please insert the SD card before power on camera.** The camera has no internal memory for saving images or videos. **The camera will not work if there is no SD card.**
- **Please make sure that your SIM card supports the GPRS data business.**
- **When going into the SETUP mode, allow approximately 10-20 seconds for the camera to acquire a signal.**
- Please unlock the write-protect switch before inserting the SD card.
- Please do not insert or take out the SD card when the power switch is at ON position.
- It is recommended to format the SD card by the camera when used for the first time. Many other SD cards formatted by other cameras have poor compatibility with different brands of cameras. So it is best to format the SD card with this camera or on a computer.
- **In the SETUP mode, the camera will shut down automatically after 3 minutes if no operation is done.** Please turn on the power again if you want to continue to work with the control.

## 3 Quick Start Guide

### 3.1 Power Supply

**Hunting mode or outdoor use: use 8 or 4 AA batteries.** High-density and high-performance alkaline or lithium batteries are recommended.

**Security mode or indoor use: use 6V/2A high quality power adapter.** The battery can be just a backup for emergency use. Otherwise, the battery will be quickly consumed.

### 3.2 Insert SD card and SIM card

Insert an unlocked SD card and an available GPRS enabled SIM card.

### 3.3 Do the Camera Settings

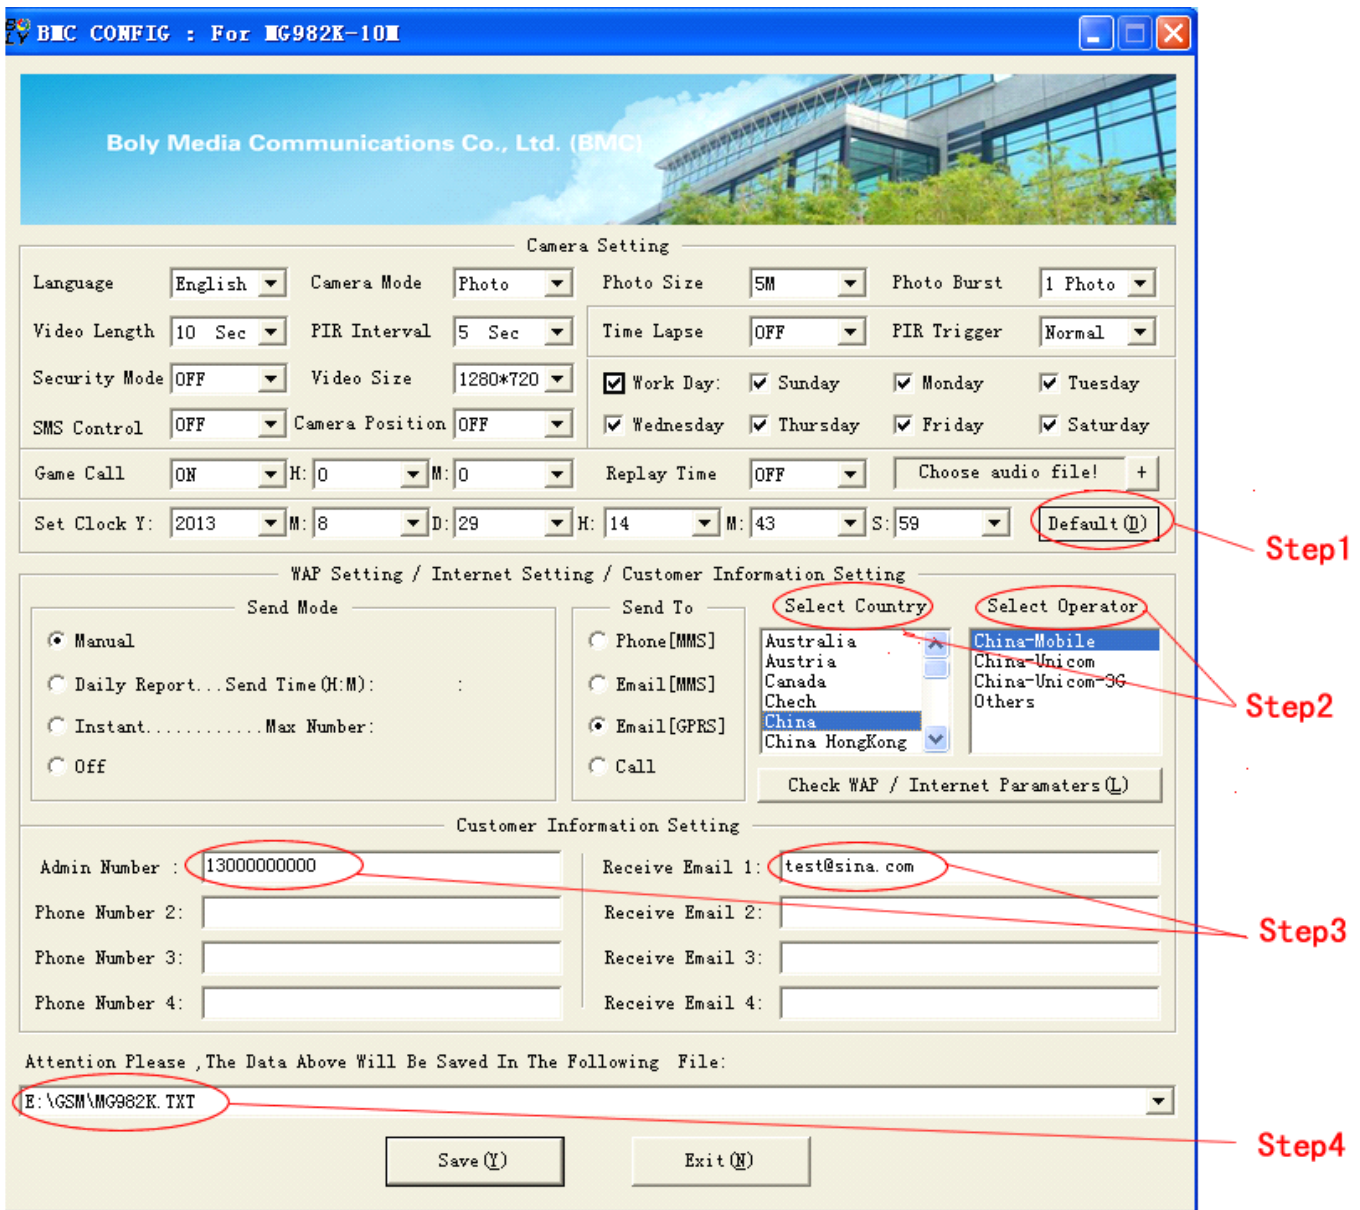

Down load the camera set up software from our website.  
*The specified website is written in the last page of the manual.*

- 1) Open the software and select camera model:

- 2) Set the camera parameters

For first time use, we suggest you to use default settings (step1). Then select your country and carriers (step2) according to your SIM card and input your receive phone number in “administrator number” and receive e-mail address in ”Receive Email 1” (step3).

After finish settings, please **save the GSM folder** to the root directory of your SD card (step4).

### 3.4 Manually Send a MMS or GPRS Photo

After you generate a setting file in your SD card, please slip

the power switch to SETUP position. After the camera acquires the signal and the SIM card icon  appears, target an object and press **“SHOT”** to take a photo manually.

Then press **“OK”** to playback the photos, press **“▲”** and **“▼”** to switch to previous or next photo. Press **“MENU”** and you can see a **send Phone [MMS]** interface, press **“OK”** to send out the MMS.

After a few seconds, you will receive a MMS in your phone.

### 3.5 Enter Work Mode

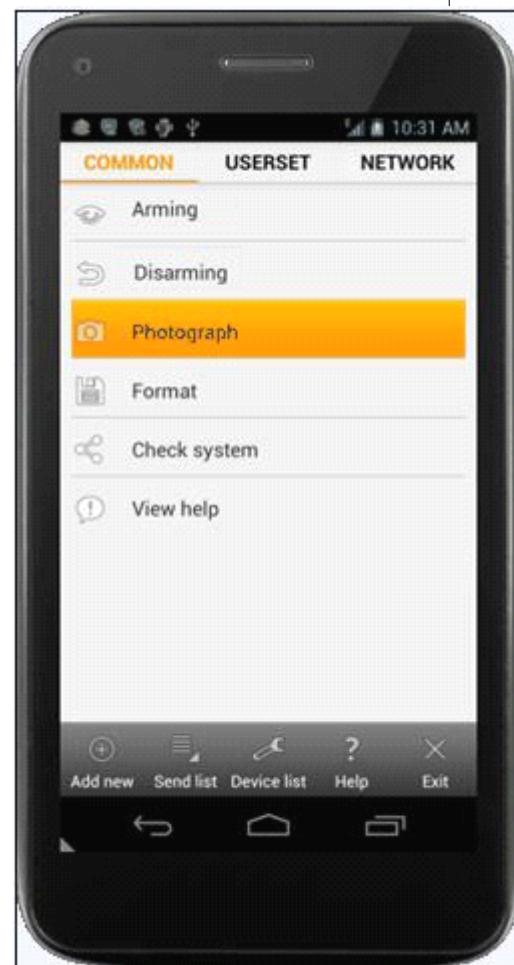

For hunting use, you need to slide the power switch to ON position to let the camera start to work.

For security use, you need to click **“MENU”** in Setup mode to enter security mode.

### 3.6 SMS Control

When the camera is armed, you can send text message **“#T#”** to your camera’s SIM card number to get an on spot image or use our Android application tools.

Down load the Android control software from our website. *The specified website is written in the last page of the manual.*

## 4 Advanced Operations

This chapter explains the advanced operations for customizing the camera settings.

### 4.1 Work Mode

**Setup mode:** to program camera or to playback the photos or video clips.

**Hunting mode:** when animal or human intrudes into the monitoring region, the camera will take pictures or videos automatically according to the previous programmed settings. After switching the camera to ON position, the motion indication LED (red) will blink for about 10 seconds. This time interval is for you to position the camera for automatic surveillance operation.

**Security mode:** similar to hunting mode, but needs more power to supply. So it's suitable for indoor use and **needs to use the power adapter**. Only in security mode you can use the remote control to easily arm or disarm.

If the power switch is in ON position and the Security Mode is ON, the camera will work in Hunting Mode.

### 4.2 Settings Menu

Press **MENU** on the remote control to enter into the menu setting. The settings menu will be shown on the LCD.

Use “▲” or “▼” key to select the sub-menu, use “▶” key to select the different options, use “◀” to change different item page. Press “**OK**” to save the settings.

## 4.2.1 Setting Items

Setting Items	Description
<b>Camera Mode</b>	There are three camera modes: <b>Photo</b> , <b>Video</b> or <b>Pic+Video</b> . You can enter the main menu to set the camera mode. If you choose <b>Pic+Video</b> mode, the camera takes a picture and a 10 seconds video.
<b>Security Mode</b>	To set if you will use security mode. Security mode is suitable for indoor use. <b>You need to use the power adapter to power supply.</b> The battery can be just a backup for emergency use. Otherwise, the battery will be quickly consumed. The remote control is available only when <b>Security Mode is ON</b> .
<b>Photo Size</b>	Choose the image size: 10 megapixels or 5 megapixels.
<b>Video Size</b>	Choose the video size: 1280x720 or 640x480.
<b>Photo Burst</b>	This parameter affects the number of pictures taken for each triggering in camera mode. It's from "1 Photo" to "6 Photos".
<b>Video Length</b>	Choose duration of recording video. It's from 10 seconds to 180 seconds.
<b>Set Clock</b>	Set camera date and time. You can change the date and time by setting this parameter when necessary, e.g., after every battery change. The date format is <b>month/day/year</b> , the time format is <b>hour: minute: second</b> .
<b>Time Lapse</b>	Time lapse means the camera can capture images or videos at a preset time interval regardless of whether motions are detected. The default parameter is <b>Off</b> , which means the timer function is disabled. Changing this parameter to a non-zero value turns on the Time Lapse mode, and camera will take photos at given time interval. <b><i>Please note that if the PIR Trigger is set to Off, then the Time Lapse can't be set to Off.</i></b>

<b>PIR Trigger</b>	<p>Choose sensitivity of the PIR. The higher sensitivity indicates that the camera is more easily triggered by motion and takes more pictures or records more videos. It is recommended to use high sensitivity in room or environment with little interference, and to use lower sensitivity for outdoor or environment with lots of interference like hot wind, smoke, near window, etc. For normal use of the camera, the <b>Normal</b> mode is recommended and is the default setting.</p>
<b>PIR Interval</b>	<p>This parameter indicates how long the PIR (Passive Infrared motion sensor) will be disabled after each triggering in ON mode. During this time the PIR of the device will not react to the motion of human (or animal).</p> <p>The minimum interval is 0 second. It means the PIR can work all the time.</p> <p>The maximum interval is 1 hour. It means the PIR will be disabled for 1 hour after each triggering.</p>
<b>Work Day</b>	<p>Choose the days of the week to let the camera work.</p> <p><b>This item is available only in Security Mode.</b></p>
<b>Send to</b>	<p>There are 4 <b>Send to</b> modes:</p> <ol style="list-style-type: none"> <li>1 Phone MMS: send images to mobile phone.</li> <li>2 Email MMS: send images to receiving e-mail address via WAP.</li> <li>3 Email GPRS: send images to an e-mail address via GPRS.</li> <li>4 Call: calling your preset phone number when the camera is triggered.</li> </ol> <p>You should set your receiving phone number or your receiving e-mail address in the APP program to function it.</p>
	<p>There are 4 MMS modes: “Manual” works in SETUP mode, “Daily” and “Instant” work in ON mode. “OFF” means to close the communicate function.</p>

<p><b>Send Mode</b></p>	<p>1. <b>“Manual”</b>:          Choose “Manual” in SETUP mode. Please ensure a SIM card is inserted properly; please note only photos can be sent in SETUP mode. Video information can’t be sent in SETUP mode.</p> <p>2. <b>“Daily”</b>:          Daily means the camera will report the summarized information at a preset time (if the preset time is, eg. 20:00 PM) on how many pictures it had taken per day. So, you will get a summarized text message with the last picture taken until 20:00 PM.          If it is on Camera mode, the camera will send a MMS at the preset time. The MMS will show you the latest photo and the total quantity of the pictures taken. If it is on Video or Pic+Video mode, the camera will send a SMS at the preset time. The SMS will show you how many video clips the camera has taken within 24 hours.          If you choose “Daily”, you need to set the daily report time: xxH, xxM.</p> <p>3. <b>“Instant”</b>:          Instant, just works in ON mode, which means the camera will send a MMS instantly after it captures a photo or a video clip. You can choose the number of pictures you want it to send out per day.          If it is on Camera mode and you choose the Instant MMS mode, and set the MAX number as 10, the camera will send 10 MMS within 24 hours. It then continues to capture photos and save them on the SD card. After 24 hours, the camera will send MMS again when it captures photos. If it is on Video mode, the Camera will send only SMS instead of MMS.          If you choose “Instant”, you need to set how many MMS you want to send for economic consideration.</p> <p>4. <b>“Off”</b>: to disable MMS function.</p>
<p><b>SMS Ctrl</b></p>	

	<p><b>SMS Control</b> can enable two way communication function. It means if you choose <b>SMS Ctrl</b> as <b>ON</b>, this camera can receive and respond your SMS command. Also you can retrieve live pictures any time. But the power consumption will be a little bigger than normal hunting status.</p> <p><b>Please note this item is available only in Hunting Mode.</b></p>
<b>Game Call</b>	<p>It means this camera can play <b>WAV</b> format audio file at a preset time clock for preset times.</p> <p><b>The audio file must save in the directory of \DCIM\100BMCIM\.</b> Also you need to set the game call as on mode and choose the audio file in <b>Windows APP</b>.</p> <p>Please note this item is available only in Hunting Mode.</p>
<b>Study Code</b>	<p>It means to pair the camera with normal 433MHz wireless device, such as infrared body sensor, wireless door magnet, wireless smoke detector, etc. The normal wireless sensor can be set as part of the alarm system.</p> <p>All device should be paired with this camera first. Please see 4.5 to find the method to connect or remove a wireless sensor.</p> <p><b>Please note this item is available only in Security Mode.</b></p>
<b>Language</b>	Display the supported languages.
<b>Beep Sound</b>	Enable or disable the beep sound.
<b>Camera Posit</b>	You can set A-Z position for your camera, so that you can distinguish which photo is taken by which camera.
<b>Format SD</b>	Format the SD card. All images and videos in the SD card will be deleted.
<b>Default Set</b>	Restore all customer settings to default values.
<b>Version</b>	Version information

## 4.2.2 Default Set

<b>Setting Items</b>	<b>Default</b>	<b>Options</b>	<b>Description</b>
Camera Mode	Photo	Video, Pic+Video	
Security Mode	Off	On	Two way communication
Photo Size	5MP	10MP	
Video Size	1280x720	640x480	
Photo Burst	1 Photo	2-6 Photos	
Video Length	10 Sec.	20-180 Sec.	
Set Clock	Enter		Adjust Clock
Time Lapse	OFF	5Min-8H	
PIR Trigger	Normal	High, Low	
PIR Interval	5 Sec	0-55 Sec, 1-60 Min	
Work Day	Enter		
Send to	Phone MMS	Email GPRS, Call, E-mail MMS,	
Send Mode	Manual	Daily, Instant, Off	
SMS Ctrl	Off	On	Two way communication in Hunting Mode
Game Call	Off	On	Set the time and

			frequency of audio playback
Study Code	Enter		RCH(wireless control), Zone1-Zone7
Language	English		
Beep Sound	On	Off	
Camera Posit	Off	A to Z Position	
Format SD	Enter		Yes, No
Default Set	Save		
Version	Enter		

### 4.3 Use the Remote Control

When it's in **Security Mode**, you can use the remote control to easily arm (button A) or disarm (button D). Also you can dial the emergency numbers via button C in case of emergency. Press button B can open or close the laser (you can easily mount the camera with the help of the laser pointer).

- Button A: Arm the camera;
- Button D: Disarm the camera
- Button C: Emergency call button

## Button B: Laser pointer

**Setup status**

**Study Code Menu**

**Study Code Menu**

Method to add remote control(s) to the camera:

Enter the Setup status, press **Menu** and enter the **Study Code** submenu. Choose “**RCH,**” press **OK** button, then press button **A** of the remote control. When it's successful, there will be a "√" before **RCH**.

### 4.4 Load or Remove a Wireless Sensor

Any 433 MHz wireless sensor, such as infrared body sensor, wireless door magnet, wireless smoke detector, etc, can be set as an alarm sensor of the camera.

#### Method to load or remove a wireless sensor:

1. Power on the wireless sensor.
2. Enter the Setup status, press **Menu** and enter into the **Study Code** submenu. Choose a zone, for example Zone1, press **OK** button, then trigger the wireless sensor to check if the sensor is loaded successfully. When it's successful, there will be a "√" after the zone number.

For example, to load a infrared body sensor :

1. Choose a zone to start study code.

2. Power on or trigger the wireless sensor to study code.

3. When you want to remove the wireless sensor, please enter the study code menu, press “◀” or “▶” button to cancel the “√.”

Please note that the wireless sensors just can be used in **Security Mode**. In Hunting Mode, the wireless sensors will not function.

#### **4.5 Change the Settings via Android APP or SMS**

When you are far away from your house, you can get spot photos or change camera settings via our android application tools or SMS.

Down load the Android APP from our website.

The specified website is written in the last page of the manual.

### 4.5.1 User Level

There are two user levels: administrator and normal users. Each user has a different authorization level:

Functions	User Level
Set administrator phone number	Only administrator's password
Set administrator's password	administrator
Set camera parameters	administrator
Set normal user	administrator
Receive emergency calling	administrator, normal user
Send SMS for on spot picture	administrator, normal user
Call the camera to listen in live voice	administrator, normal user
Receive MMS when triggered	administrator, normal user
Check camera status	administrator, normal user
Get help information	administrator, normal user

### 4.5.2 Set Administrator Phone Number

You should set a administrator's phone number to receive MMS or change settings when you first use this camera.

Send **#MG982K#0000#administrator's phone number#** to your camera's SIM card.

The following chart shows the meaning of each field.

Here the “**0000**” is the original administrator’s password. Please change the password ASAP.

Note: there is a “#” at the end of the command.

If successful, reply SMS: **Dear administrator, your number is 13800138000.**

If failed, reply SMS: **Please check the password.**

### 4.5.3 Get On Spot Photo

**Method:** send SMS command:

Edit SMS **#T#** send to your camera’s SIM card.

If successful, the camera will take an on-spot picture and send to your mobile phone.

If failed, reply SMS: **Photo error: xx, Settings error: xx, MMS error: xx** or **Time out!**

### 4.5.4 Use Android APP

It’s easy to use the Android APP to communicate with the camera, so you don’t need to edit the SMS. You just need to click the button to finish the operation.

### 4.5.5 SMS Command List

If you can't use the Android APP for easy operation, the list below shows all the SMS commands for you. You can control your camera via SMS.

<b>A. Set GSM Parameter</b>		
<b>No</b>	<b>Function</b>	<b>SMS Command</b>
1	Set Administrator Number	#mg982k#0000#13800138000#
2	Set Normal Users Phone Number	#n#13800138001#13800138002#13800138003#
3	Set MMS Parameters	#m#http://mmsc.cingular.com#66.209.11.32#8080#wap.cingular#account#password# (The example parameters are for the carrier of AT&T)
4	Set Email Parameters	#s#bmcctest123@sina.com#bmc123#25#cmnet#smtp.sina.com#name#password#
5	Set Receive E-mail Address	#r#mail1@163.com #mail2@163.com#mail3@163.com #mail4@163.com#
<b>B. Normal Control</b>		
<b>No</b>	<b>Function</b>	<b>SMS Command</b>

1	Get On Spot Photo	#T#
2	Arm	#A#
3	Disarm	#D#
4	Check Camera Settings	#L#
5	Format TF Card	#F#
6	Set Administrator's Password	#P#0000# (It's suggested that the administrators password be changed at the beginning)
7	Help	#H#

**C. Set Menu Parameter**

No	Function	SMS Command
1	Change Camera Mode	#e#cp# (photo mode) or #e#cv# (video mode) or #e#ct#(pic+video)
2	Change Photo Size	#e#s5# (5mp) or #e#s10# (10mp)
3	Change Photo Burst	#e#b1# (1~6 photos)
4	Change Video Size	#e#fh#(720p) or #E#fl#(VGA)
5	Change Video Length	#e#v10# or #E#v30# (the number after V is seconds)
6	Change Date Time	#e#t# (adjustment the time)
7	Change Time Lapse	#e#l1h# (1 hour) or #e#l5m# (5 min)
8	Change PIR Trigger	#e#po# (Off) or #e#ph# (High) or #e#pn# (Normal) or #e#pl# (Low)
10	Change PIR Interval	#e#i30m# (30min) or #e#i30s# (30sec)
11	Change Work Day	#e#d1111111# (0000000~1111111 means Sunday to Saturday)
12	Change Send To	#e#mp# (phone) or #e#me# (email) or #e#mc# (call) or #e#mg# (e-mail gprs)
13	Change Send Mode	#e#ed# (daily) or #e#ei10# (to set instant mode and the max number per day) or #e#eo# (off) or #e#em#(Manual)
14	Change Game	#e#gon18:00[5]# or #e#goff#

15	Call Change SMS Ctrl	#e#zon# or #e#zoff#
16	Change Camera Position	#e#oa# (a~z) to set the camera position function #e#ooff# to off the camera position function

## 5 Trouble Shooting

### 1 **There is something in front of the camera lens. Is the camera broken?**

Figure 5 IR-cut filter

A: The camera is not broken. It's an IR-cut filter. When the camera is powered on, the IR-cut will be reset and cover the lens. Only when the camera is powered off, the IR-cut will be at a random place.

### 2 **The camera controller is not working anymore.**

A: Most likely, no SD card has been inserted in the camera when it is turned on. Please make sure a working SD card has been inserted in the camera before it is turned on.

### 3 **The display screen is suddenly black.**

A: To reduce power consumption, **the camera will shut down automatically after 3 minutes if no operation is done.** Please turn on the power again if you want to continue to work with the control.

### 4 **Why my phone can't receive MMS?**

A: MMS/GPRS function needs the SIM cards in both your camera and phone to have enough balance and to be opened to data business.

## Appendix I: PIR Detection Zone

Figure 6 shows the detection range in different detection angle. When the detection angle is  $35^\circ$ , the detection range is 50ft (15m). When the detection angle is  $52^\circ$ , the detection range is 30ft (9m).

Figure 6 PIR Detection Zone

The PIR detection angle ( $\alpha$ ) is just barely larger than the field of view angle ( $\beta$ ). The advantage of this design is to avoid empty pictures and get more available pictures.

Figure 7 Detection angle vs. FOV angle

This camera has a new design of PIR and the new PIR is patented. The new patented PIR’s detection range is ultra-long. Figure 8 shows the compared detection zone between normal PIR and the new patented PIR.

Figure 8 Comparison of Detection Zones of new and existing PIRs

## Appendix II: Error Code

Code	Meaning	Description
3915	Non-existent address	<p><b>Possible cause:</b></p> <ol style="list-style-type: none"> <li>1. The user forgets to input the receiving cellphone number.</li> <li>2. The user forgets to input the receiving E-mail address.</li> </ol> <p><b>Suggestion:</b></p> <ol style="list-style-type: none"> <li>1. Check the MMS settings, input all the necessary parameters.</li> </ol>
3919	File not found	<p><b>Possible cause:</b></p> <ol style="list-style-type: none"> <li>1. The file means the image file. It shows that the system can't find the image file when sending the MMS. Just when the system is unstable, it will happen (very small probability).</li> </ol> <p><b>Suggestion:</b></p> <ol style="list-style-type: none"> <li>1. When the GSM and GPRS signal are both OK, please resend again.</li> <li>2. When the GSM and GPRS signal are poor, please change a place to try again;</li> <li>3. If 1 and 2 do not work and the error code 3919 always appears, please send the camera back for repairs.</li> </ol>
3926 3927 3928	MMS busy; Sending MMS stopped; Sending MMS busy	<p><b>Possible cause:</b></p> <p>When start a new MMS sending procedure, the previous MMS sending is not finished, so it will show these information. This is a inner use error, we have the correct programmer design, so it won't happen in the consumer's side.</p> <p><b>Suggestion:</b></p> <p>If it always shows 3926,3927 or 3928, maybe there is a hardware defect. Please send camera back for repair (very small probability).</p>

<p>3939 3941 3942</p>	<p>Failed to open network; Network not deactivated; Network error</p>	<p><b>Possible cause:</b></p> <ol style="list-style-type: none"> <li>1. The GSM network is not good or not well covered with the GPRS network.</li> <li>2. The instability in signal transmission leads to some MMS setting parameters missing when the GSM base station do the data analysis. If for the incorrect transmission reason, the camera may show various error code.</li> </ol> <p><b>Suggestion:</b></p> <ol style="list-style-type: none"> <li>1. Contact the network provider if the GPRS network is well covered in that area.</li> <li>2. Change a place to try again. It's better to try in a public place, where there is always good signal.</li> <li>3. If the provider said there is GPRS signal covered but the signal is weak, you can try to use a enhanced antenna that is SMA type with antenna gain of 10db.</li> </ol>
<p>-85</p>	<p>Not enough balance in SIM card; MMS setting error;</p>	<p><b>Possible cause:</b></p> <ol style="list-style-type: none"> <li>1. The SIM card is not enough balance.</li> <li>2. Not correct settings.</li> <li>3.The GSM network is not good leading to a timeout problem (very small probability).</li> </ol> <p><b>Suggestion:</b></p> <ol style="list-style-type: none"> <li>1.Please check to make sure your SIM card has enough balance.</li> <li>2. Please check the MMS settings.</li> </ol>
<p>Other error code</p>		<p>Many codes in the list are used for debugging in the product design phase. Most of them will not be shown to consumers, so please ignore the other error codes and contract us directly. Thanks.</p>

## Appendix III: Technical Specifications

<b>Image Sensor</b>	5MP Color CMOS, 10MP Interpolation
<b>Lens</b>	F/NO=3.0 FOV (Field of View)=52°
<b>PIR Detection Range</b>	30M/100F
<b>Display Screen</b>	3" LCD
<b>Memory Card</b>	From 8 MB to 32 GB
<b>Picture Resolution</b>	10MP = 3648×2736 5MP = 2560×1920
<b>Video Resolution</b>	720P HD (1280×720)(30fps) VGA (640×480) (30fps)
<b>PIR Sensor</b>	Multi-zone
<b>PIR Sensitivity</b>	Adjustable (High / Normal / Low)
<b>Trigger Time</b>	1 sec.
<b>Weight</b>	0.30 kg
<b>Operation/Storage Temperature</b>	-20 - +40°C / -30 - +50°C
<b>PIR Interval</b>	0 sec. – 60 min.
<b>Photo Burst</b>	1–6
<b>Video Length</b>	10–180 sec.
<b>Power Supply</b>	8×AA or 4×AA
<b>Stand-by Current</b>	< 0.25 mA (<6mAh / Day)
<b>Power Consumption</b>	400 videos (interval=5 min, video length=10 sec) >500 MMS (use 8*AA batteries)
<b>Display Screen</b>	LCD display on camera
<b>Sound Recording</b>	Available
<b>Network Bands</b>	850MHz, 900MHz, 1800MHz and 1900MHz
<b>Mounting</b>	Rope / Belt / Python lock
<b>Dimensions</b>	140 x87 x55 mm
<b>Operation Humidity</b>	5 % - 90 %
<b>Security Authentication</b>	FCC, CE, RoHS

\*without battery

## Appendix IV: Parts List

<b>Part Name</b>	<b>Quantity</b>
Digital Camera	One
Wireless Remote Control	Two
USB Cable	One
Belt	One
User's Manual	One
Antenna	One

## **Declaration of Conformity**

We declare on our sole responsibility that this equipment complies with the essential requirements of the Radio and Telecommunications Terminal Equipment Directive, 1999/5/EC, and that any applicable Essential Test Suite measurements have been performed.

**C € 0700**

CE versions of the BG500 which display the CE symbol on the product label, comply with the essential requirements of the European Radio and Telecommunication Terminal Directive 1999/5/CE.

**1.CAUTION : RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.**

**2. In order to meet RF exposure, the product should be used at least 25cm apart from user body.**

**FCC Statement**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**FCC RF Radiation Exposure Statement**

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 25 centimeters between the radiator and your body.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
