From: Carl Pinto
Subject: AutoDesk Change to BIMobject®

We recently received notice from Autodesk® that all Autodesk® Seek's BIM Content has moved to the BIMobjectC Cloud.

With this change, we've modified all former Autodesk® references and links on www.bradfordwhite.com to BIMobject®. Visitors to our site who are seeking Revit® drawings and other related documents will find an excellent presentation of [Bradford White products on BIMobject®](#). Access to BIMobject® is free and we encourage you to sign up today so you are familiar with the site's structure and available Bradford White content.

According to Autodesk:

"Autodesk wants to encourage a thriving and healthy ecosystem that provides high-quality BIM content for the AEC industry. This market is currently served by several companies that are dedicated to the segment and are providing innovative solutions for customers. As such, Autodesk has partnered with many of these industry players to foster an open, evolving market, and does not consider the Autodesk Seek service to be strategic to our core business at this time."

[Complete Autodesk Q&A](#)

Please note that the migration of info from Autodesk® to BIMobject® also applies to [products from Laars® Heating Systems](#).

If you have any questions regarding this change, please contact me or any member of the [Product Department](#).

Thanks!
