

Product Change Notice

Date: 10/15/2018
To: All Manufacturer Representatives
From: The Bradford White Product Department
Subject: Brute Deluxe – BMT2V0200-400 Model Number Changes

Effective immediately, Bradford White will be building Brute Deluxe volume water heaters BMT2V 200-400 models with a revised control system that is similar to what is used on the BMT2V 500-2000. While the existing control system provides adequate DHW performance, this revision replaces the existing control with Honeywell bulb-type controllers that are more suitable for volume water heater/ storage tank systems. This change does not affect BMT2H boilers, or any BMT2V 500-2000 units.

To keep track of this change, the revision character in the BMT2V 200-400 water heater model number will be changed to "3". The BMT2H boiler model number will not change. The new model nomenclature is shown below.

Prices will not change, and orders placed for units that will be built on or after October 15th will be built with the new model number. Please be aware that there are some models still in inventory, which will be shipped until all have been depleted.

The Pricebook has been updated on [Rep Connect](#) accordingly.

If you have any questions, or require additional information, please contact the Product Department at 1-844-235-4958.
