	Alarm
	Battery level : high -> low 
	USB charging.
	Shortcut to access TV
	microSD card
	Shortcut to access Application

2 Getting started

Dimension : 106.5(L) x 45(W) x 12.5(H) mm

Weight(include battery) : 75g

Battery: 900 Ah

Note: In this manual, some functions are only for “UIM card” and not available for non-UIM card phone .

Note: Always switch off the power and disconnect the charger and any other device before removing the cover. Avoid touching electronic components while changing the cover. Always store and use the device with the cover attached

2.1 Install and remove UIM card

(function only for UIM card phone)

Turn off the phone, remove the back cover and battery, and then insert the UIM card. Make sure the UIM card is properly inserted and the golden contact area of the card is facing the connectors on the device and that without the beveled corner is facing the top of the device.

To remove the UIM card, put out the UIM card lightly.

NOTE: Please be aware of operations on UIM card, rubbing or bending will damage your UIM card.

2.2 Install and remove battery

Turn off the phone, remove the cover, position the battery with the contacts aligned to the golden contacts of the phone. Insert the battery into the battery slot. To remove the battery, insert your finger into the finger grip and lift the battery from its compartment.

Note: Always switch the device off and disconnect the charger before removing the battery.

2.3 Headset and MicroSD card

■ Headset

Plug the headset connector into the Port connector at the bottom of your phone. Position the headset on your ear. With the headset connected, you can make, answer, and end calls as usual.

■ MicroSD card

Remove back cover and battery; SD card slot is beside UIM card slot. Insert the memory card in the slot. Make sure that the contact area is facing the connectors on the device. Push the card in until it locks into place. To remove SD card, pull out the SD card lightly

NOTE: Do not remove the memory card during any operation when the card is being accessed. This would damage the memory card and the device, and corrupt data stored in the card.

2.4 Charging

➤ **USB Charging**

The USB cable connects to computer and your mobile phone interface. When charging, the battery level icon will display the status. If your mobile phone connected to computer in power on status, it can be treated as a U-Flash disk

➤ **Charger Charging**

Charger can charge the battery by your mobile phone. When charging, assembling your battery:

1. Connect through the USB interface by data cable.
2. Insert the cable to your mobile phone's interface.
3. Insert the charger to the proper power socket.
4. Then charging animation will stop after charging done.

NOTE: If the battery is not enough to power on your mobile phone, it takes a little bit long time to make

the charging animation play.

WARNING: To make sure the local standard voltage and frequency match up your charger's rated voltage and power.

3 Basic Function

3.1 Power on and off

To switch the phone on or off, press and hold the power key.

3.2 Standby mode

At standby mode you can quickly access your most frequently used applications, and view at a glance if you have missed calls or new messages, options as below

- Press left function key to “Menu”
- Press right function key to “Names” (contacts)
- Press dial key to call history.
- Press * key for 2 sec to turn on/ off silent function.
- Press # key for 2 sec to lock the keypad quickly
- Unlock the keypad, please press upper-right function key then press # key.

■ **Shortcut setting :**

You can change shortcuts assigned for the selection keys in the standby mode

Select Menu > Settings > Phone settings> Shortcut
>Shortcut application

1.Select one of shortcut entry

3. New call: during a call, dial another call to have a conference call with two participants.
4. End all calls: end all calls
5. Send DTMF: to send tone strings
6. Start record: start to record the phone call.

3.4 Answer / End a call

To answer an incoming call, press the Dial key. To decline the call without answering, press the End key.

4 Write text

In any user edit window, including edit phone book, messages and memo, press the # key to switch the input method editor.

4.1 Input method

Switch to uppercase or lowercase mode press # key. Press a key once to insert the first letter on the key, twice for the second letter, etc. If you pause briefly, the last letter in the display is accepted and your phone awaits the next entry

ABC indicate the uppercase

abc indicate the lowercase

123 indicates number mode

To write text with the keypad, press a number key, 2–9, repeatedly until the desired character is displayed. There are more characters available for a number key than are printed on the key. If the next letter is located on the same key as the present one, wait until the cursor is displayed, and enter the letter. To insert a number, press and hold the number key. To switch between the different character cases and modes,

4.2 Input special character

When use any kind of method, press * key to display the character list, and then press the direction key to select the item. When use any kind of method except numeric method, press "0" key to input blank

5 Messages

5.1 SMS

➤ New message

Select Memu > Messages > New message, options as below,

- Send: send this message
- Save: save this message
- Insert template : insert quick text to message
- Insert contact: insert contact
- Sending options : select emergency or delivery report

➤ Inbox

You can store your received messages here. If inbox is full, you cannot receive new messages any more. Meanwhile the idle screen will display an icon showing the inbox is full. You can receive new

messages again after you delete some messages.

Select Menu > Messages > Inbox , options as below

- Reply: replay message
- Reply MMS: replay multimedia message
- Call back: use message number to call back
- Delete: erase messages
- Use detail: use number, URL detail
- Move: move to archive
- Forward: forward messages
- Lock: lock and unlock messages
- Copy to UIM: copy message to UIM card
- Mark: mark messages
- Mark all: mark all messages
- Detail info: view detail information

➤ **Outbox / Sentbox/ Draft**

Outbox: store failed sent messages.

Sentbox: store sent messages

Drafts: store the messages without sending for reediting

You can save txt format files (E-book) into the microSD card, E-BOOK folder. Select one of eBook to reader text.

12 eSurfing

➤ WAP

Base on the network provider's UIM card services, you can use the services here. If your UIM card and/or network provider do not support the service, this function is disabled. More details, please contact your network provider

WAP user can visit surf homepage, display existed bookmarks, save the website you have visited recently, store the information sent from the service provider and setting WAP.

- Home: browse the home page
- Bookmark: page bookmark as mark page or favorites
- History: select visit, details, delete, delete all
- Save this page: enter title and save current web page
- View saved pages: view saved pages in the folder open, rename, delete, delete all and create a new folder
- Reload: reload current network page
- Go to URL: add new URL or select one URL, select options as visit, edit, mark page, delete, delete all.
- Visit control: select back or forward page

- **Advanced:** advanced function such as push message, save items, show URL, clear Cache, clear cookies and about WAP information.
- **Settings:** to set HTTP proxy, Push setting, Cache setting, Cookie setting, SSL3.2 setting, view certificates, restore setting.
- **Exit:** exit network ,

➤ UTK

UTK is operator service. You may get detailed information from your local operator company.

13 Safe information

Battery

- Your device is powered by a rechargeable battery.
- The battery can be charged and discharged hundreds of times but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, please buy a new battery.
- Use only the approved batteries, and recharge your battery only with approved chargers designated for this device.
- Unplug the charger from the electrical plug and the device when not in use. Do not leave the battery connected to a charger. Overcharging may shorten its lifetime. If left unused, a fully

charged battery will lose its charge over time.

Safe information

- Remember to follow special regulations in any area and always switch off your device when its use is prohibited or when it may cause interference or danger. Use the device only in its normal operating positions. Do not keep the device near credit cards and other magnetism medium, some accessories can bring magnetism that may be delete the data.
- Pacemaker manufacturers recommend that a minimum separation of 6in (20cm) should be maintained between a wireless phone and a pacemaker to avoid potential interference¹ with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. To minimize the potential interference, persons with pacemakers should do as below:
 - Always keep the device more than 6 in (20 cm) from their pacemaker when the device is switched on.
 - Not carry the device in a breast pocket. Hold the device to the ear opposite the pacemaker
 - If you have any reason to suspect that interference is taking place, switch off your device immediately.

Hearing aids

Some digital wireless devices may interfere with some hearing

Other medical devices

Operation of any radio transmitting equipment, including wireless phones, may interfere with the functionality of inadequately protected medical devices. Switch off your phone in health care facilities when any regulations are posted in these areas instructing you to

14 Care and maintenance

Your device is a product of superior design and craftsmanship and should be treated with care. The following suggestions will help you protect your warranty coverage.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, remove the battery, and allow the device to dry completely before replacing it.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic

components can be damaged.

- Do not store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards.
- Do not attempt to open the device other than as instructed in this guide.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.
- Do not paint the device. Paint can clog the moving parts and prevent proper operation.
- Use a soft, clean, dry cloth to clean any lenses, such as camera, proximity sensor, and light sensor lenses.
- Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the device and may violate regulations governing radio devices.
- Use chargers indoors.
- Always create a backup of data you want to

keep, such as contacts and calendar notes.

- To reset the device from time to time for optimum performance, power off the device and remove the battery.

IMPORTANT NOTE:

Federal Communication Commission (FCC) Radiation Exposure Statement

This EUT is compliance with SAR for general population/uncontrolled exposure limits in ANSI/IEEE C95.1-1999 and had been tested in accordance with the measurement methods and procedures specified in OET Bulletin 65 Supplement C. This equipment should be installed and operated with minimum distance **1.5cm** between the radiator & your body.

FCC Warning statement

a. for FCC 15b devices

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

b. FCC Part 15.21 information for user

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

b-1. FCC Part 15.19 (若 EUT 太小時無法放入 label 上時, 則須加入使用手冊內)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation
