User's Guides and where do I find it?

Which manual?	What's in it?	Where is it?
Safety and Legal	Read this Guide first. Please read the Safety Instructions before you set up your machine. See this Guide for trademarks and legal limitations.	For Chinese: Printed / In the box For Chinese English: PDF file / Documentation CD-ROM / In the box
Quick Setup Guide	Follow the instructions for setting up your machine and installing the drivers and software for the operating system and connection type you are using.	
Basic User's Guide	Learn the basic Fax, Copy and Scan operations and how to replace consumables. See troubleshooting tips.	
Advanced User's Guide	Learn more advanced operations: Fax, Copy, security features, printing reports, and performing routine maintenance.	PDF file / Documentation CD-ROM / In the Box
Software User's Guide	Follow these instructions for Printing, Scanning, Network Scanning, Remote Setup, PC-Fax, and using the Brother ControlCenter utility.	
Network Glossary	This Guide provides basic information about advanced network features of Brother machines along with explanations about general networking and common terms.	
Network User's Guide	This Guide provides useful information about wired and wireless network settings and security settings using the Brother machine. You can also find supported protocol information for your machine and detailed troubleshooting tips.	

Table of Contents
(BASIC USER'S GUIDE)

Table of Contents
(ADVANCED USER'S GUIDE)

The Advanced User's Guide explains the following features and operations. You can view the Advanced User's Guide on the Documentation CD-ROM.

1 General information

Using the documentation

Thank you for buying a Brother machine!
Reading the documentation will help you
make the most of your machine.

Symbols and conventions used in the documentation

The following symbols and conventions are
used throughout the documentation.

Bold	Bold style identifies keys on the machine control panel or computer screen.
Italics	Italicized style emphasizes an important point or refers you to a related topic.
Courier New	Courier New font identifies the messages shown on the LCD of the machine.

⚠ WARNING

<u>WARNING</u> indicates a potentially
hazardous situation which, if not avoided,
could result in death or serious injuries.

⚠ CAUTION

<u>CAUTION</u> indicates a potentially hazardous
situation which, if not avoided, may result in
minor or moderate injuries.

❶ IMPORTANT

<u>IMPORTANT</u> indicates a potentially
hazardous situation which, if not avoided,
may result in damage to property or loss of
product functionality.

⚡	Electrical Hazard icons alert you to a possible electrical shock.
🔥	Hot Surface icons warn you not to touch machine parts that are hot.
📝	Notes tell you how you should respond to a situation that may arise or give tips about how the current operation works with other features.

Accessing the Advanced User's Guide, Software User's Guide and Network User's Guide

This Basic User's Guide does not contain all the information about the machine such as how to use the advanced features for Fax, Copy, Printer, Scanner, PC-Fax and Network. When you are ready to learn detailed information about these operations, read the **Advanced User's Guide**, **Software User's Guide**, **Network Glossary** [1] and **Network User's Guide** [1] that are on the Documentation CD-ROM.

[1] Network models only

Viewing Documentation

1 Turn on your computer. Insert the Documentation CD-ROM into your CD-ROM drive. For Windows® users, go to step **3**.

Note

(Windows® users) If the screen does not appear automatically, go to **My Computer** (**Computer**), double-click the CD-ROM icon, and then double-click **index.html**.

2 (Macintosh users) Double-click the Documentation CD-ROM icon, and then double-click **index.html**.

3 Click your country.

4 Point to your language, point to **View Guide**, and then click the guide you want to read.

2
📝 Note

- (Windows® users only) Your Web browser may display a yellow bar at the top of the page that contains a security warning about Active X controls. For the page to display correctly you must click on the bar, click **Allow Blocked Content**, then click **Yes** in the Security Warning dialog box.

- (Windows® users only) [1] For faster access, you can copy all user documentation in PDF format to a local folder on your computer. Point to your language, then click **Copy to local disk**.

    [1] Microsoft® Internet Explorer® 6.0 or greater.

How to find Scanning instructions

There are several ways you can scan documents. You can find the instructions as follows:

Software User's Guide

- *Scanning*

- *ControlCenter*

- *Network Scanning* (Network models only)

Presto! PageManager User's Guide

📝 Note

Presto! PageManager is available as a download from
http://nj.newsoft.com.tw/download/brother/PM9SEInstaller_BR_multilang.dmg/

- The complete Presto! PageManager User's Guide can be viewed from the Help selection in the Presto! PageManager application.

How to find Network setup instructions

(Network models only)

Your machine can be connected to a wireless or wired network. You can find basic setup instructions in the *Quick Setup Guide*. If your wireless access point or router supports Wi-Fi Protected Setup or AOSS™, you can also follow the steps in the *Quick Setup Guide*. For more information about network setup, please see the *Network User's Guide*.

Accessing Brother Support (Windows®)

You can find all the contacts you will need, such as Web support (Brother Solutions Center) on the Installation CD-ROM.

■ Click **Brother Support** on the main menu. The following screen will appear:

■ To access our Web site (http://www.brother.com/) click **Brother Home Page**.

■ For the latest news and product support information (http://solutions.brother.com/), click **Brother Solutions Center**.

■ To visit our Web site for genuine Brother supplies (http://www.brother.com/original/), click **Supplies Information**.

■ To access the Brother CreativeCenter (http://www.brother.com/creativecenter/) for FREE photo projects and printable downloads, click **Brother CreativeCenter**.

To return to the main page, click **Back**.

Or, if you have finished, click **Exit**.

Accessing Brother Support (Macintosh)

You can find all the contacts you will need, such as Web support (Brother Solutions Center) on the Installation CD-ROM.

■ Double-click the **Brother Support** icon. The following screen will appear:
■ To download and install Presto! PageManager, click **Presto! PageManager**.

■ To register your machine from the Brother Product Register Page (http://www.brother.com/registration/), click **On-Line Registration**.

■ For the latest news and product support information (http://solutions.brother.com/), click **Brother Solutions Center**.

■ To visit our Web site for genuine Brother Supplies (http://www.brother.com/original/), click **Supplies Information**.

Control panel overview

MFC-7460DN and MFC-7860DW have the same keys.

MFC-7360

1
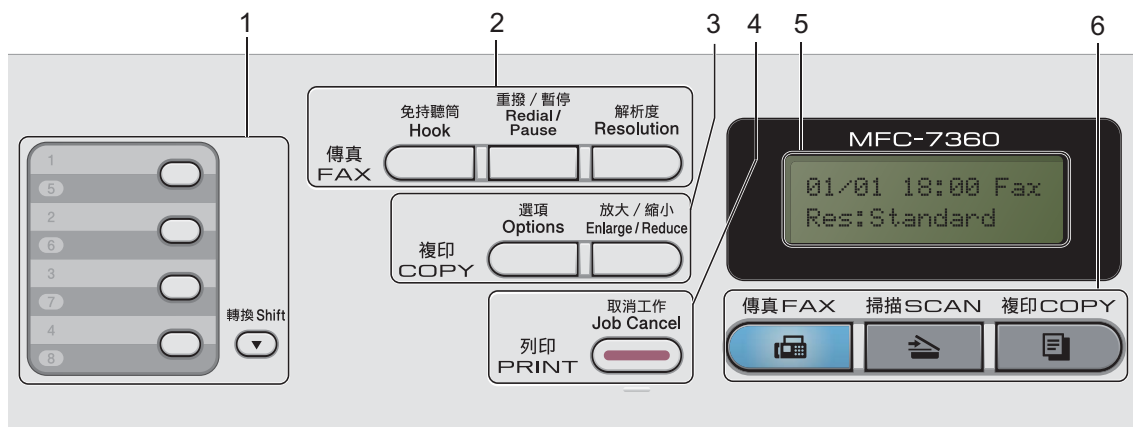

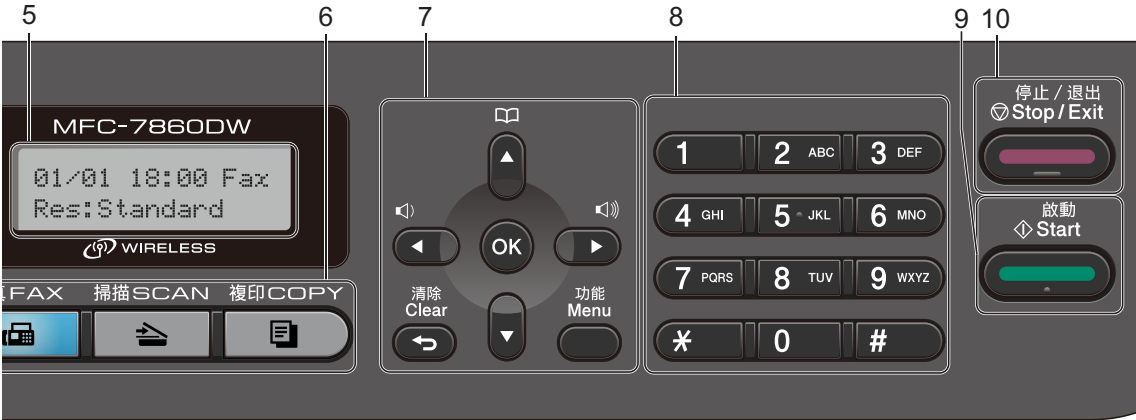

1 One Touch keys

These 4 keys give you instant access to 8 previously stored numbers.

Shift

Lets you access One Touch numbers 5 to 8 when held down.

2 FAX keys:

Hook

Press before dialing if you want to make sure a fax machine will answer, and then press **Start**. Also, press this key after you pick up the handset of an external telephone during the F/T ring (pseudo double-rings).

Redial/Pause

Redials the last number called. It also inserts a pause when programming quick dial numbers or when dialing a number manually.

Resolution

Sets the resolution when sending a fax.

3 COPY keys:

Options

You can quickly and easily choose temporary settings for copying.

Enlarge/Reduce

Reduces or enlarges copies.

Duplex
(For MFC-7460DN and MFC-7860DW)

You can choose Duplex to copy on both sides of the paper.

4 PRINT keys:

Secure
(For MFC-7460DN and MFC-7860DW)

You can print data saved in the memory when you enter your four-digit password. (For details about using the Secure key, see the *Software User's Guide*.)

When using Secure Function Lock, you can switch restricted users by holding down **Shift** as you press **Secure**. (See *Secure Function Lock 2.0* in *Chapter 2* of the *Advanced User's Guide*.)

Job Cancel

Cancels a programmed print job and clears it from the machine's memory. To cancel multiple print jobs, hold down this key until the LCD shows `Job Cancel (All)`.

5 LCD

Displays messages to help you set up and use your machine.

(MFC-7860DW)
In FAX mode and SCAN mode a four level indicator shows the current wireless signal strength if you are using a wireless connection.

0   Max

6 Mode keys:

📠 **FAX**

Puts the machine in Fax mode.

📄 **SCAN**

Puts the machine in Scan mode.

📋 **COPY**

Puts the machine in Copy mode.

7 Menu keys:

Clear

Deletes entered data or lets you cancel the current setting.

Menu

Lets you access the Menu to program your settings in this machine.

OK

Lets you store your settings in the machine.

Volume keys:

◁) ◀ or ▶ ◁))
Press to scroll backwards or forwards through menu selections. Press to change the volume when in fax or standby mode.

▲ or ▼

Press to scroll through the menus and options.

📖**Address Book**
▲

Let you access speed dial numbers directly.

8 Dial pad

Use these keys to dial telephone and fax numbers and as a keyboard for entering information into the machine.

9 Start

Lets you start sending faxes or making copies.

10 Stop/Exit

Stops an operation or exits from a menu.

2 **Loading paper**

Loading paper and print media

The machine can feed paper from the standard paper tray or manual feed slot.

When you put paper into the paper tray, note the following:

■ If your application software supports paper size selection on the print menu, you can select it through the software. If your application software does not support it, you can set the paper size in the printer driver or by using the control panel buttons.

Loading paper in the standard paper tray

You can load up to 250 sheets. Paper can be loaded up to the maximum paper mark (▼ ▼ ▼) on the sliding paper with guide. (For recommended paper to use, see *Paper capacity of the paper trays* on page 18.)

Printing on plain paper, thin paper or recycled paper from the standard paper tray
a Pull the paper tray completely out of the machine.

b While pressing the green paper-guide release lever, slide the paper guides to fit the paper size you are loading in the tray. Make sure that the guides are firmly in the slots.
Note

For Legal or Folio size paper, press the release button in the bottom of the paper tray and then pull out the back of the paper tray.
c Fan the stack of paper well to avoid paper jams and misfeeds.
d Put paper in the tray and make sure:

■ The paper is below the maximum paper mark (▼ ▼ ▼) (1).

Overfilling the paper tray will cause paper jams.

■ The side to be printed on must be *face down*.

■ The paper guides touch the sides of the paper so it will feed properly.

5 Put the paper tray firmly back in the machine. Make sure that it is completely inserted into the machine.

6 Unfold the support flap (1) to prevent paper from sliding off the face-down output tray.
Loading paper in the manual feed slot

You can load envelopes and special print media one at a time into this slot. Use the manual feed slot to print or copy on labels, envelopes or thicker paper.

Note

The machine automatically turns on the Manual Feed mode when you put paper in the manual feed slot.

Printing on plain paper, thin paper or recycled paper from the manual feed slot

1 Unfold the support flap (1) to prevent paper from sliding off the face-down output tray, or remove each page as soon as it comes out of the machine.

2 Open the manual feed slot cover.

3 Using both hands, slide the manual feed slot paper guides to the width of the paper that you are going to use.
4 Using both hands, put one sheet of paper in the manual feed slot until the front edge of the paper touches the paper feed roller. When you feel the machine pull in the paper, let go.
Printing on thick paper, bond paper, labels and envelopes

When the back output tray is pulled down, the machine has a straight paper path from the manual feed slot through to the back of the machine. Use this paper feed and output method when you want to print on thick paper, labels or envelopes.

Note

Remove each printed sheet or envelope immediately to prevent a paper jam.

a Open the back cover (back output tray).
Note

<For envelopes only>
Pull down the two green levers, one on the left-hand side and one on the right-hand side, as shown in the following illustration.

b Open the manual feed slot cover.

2

c Using both hands, slide the manual feed
slot paper guides to the width of the
paper that you are going to use.

d Using both hands, put one sheet of
paper or one envelope in the manual
feed slot until the front edge of the paper
or envelope touches the paper feed
roller. When you feel the machine pull in
the paper, let go.
Note

• Put the paper into the manual feed slot
with the side to be printed face up.

• Make sure that the print media is straight
and in the proper position on the manual
feed slot. If it is not, the paper may not be
fed properly, resulting in a skewed printout
or a paper jam.

• Do not put more than one sheet of paper
in the manual feed slot at any one time, as
it may cause a jam.

• If you put any print media in the manual
feed slot before the machine is in Ready
mode, the print media may be ejected
without being printed on.

• To easily remove a small printout from the
output tray, lift up the scanner cover by
using both hands as shown in the
illustration.
- You can still use the machine while the scanner cover is up. To close the scanner cover, push it down with both hands.
Unscannable and unprintable areas

The figures below show maximum unscannable and unprintable areas. The unscannable and unprintable areas may vary depending on the paper size or settings in the application you are using.
Usage	Document Size	Top (1) Bottom (1)	Left (2) Right (2)
Fax (Send)	Letter	3 mm	4 mm
	A4	3 mm	3 mm
Copy *a single copy or a 1 in 1 copy	Letter	3 mm	4 mm
	A4	3 mm	3 mm
Scan	Letter	3 mm	3 mm
	A4	3 mm	3 mm
Print	Letter	6 mm	6.35 mm
	A4	6 mm	6.35 mm

Paper settings

Paper Type

Set up the machine for the type of paper you are using. This will give you the best print quality.

① Press **Menu**, **1**, **2**, **1**.

```
Paper
1.Paper Type
```

② Press ▲ or ▼ to choose Thin, Plain, Thick, Thicker, Recycled Paper or Label.
Press **OK**.

③ Press **Stop/Exit**.

Paper Size

You can use several different sizes of paper for printing copies: Letter, Legal, Executive, A4, A5, A5L, A6, B5, B6, and Folio.

When you change the size of paper in the tray, you will also need to change the setting for paper size at the same time so your machine can fit the document or an incoming fax on the page.

① Press **Menu**, **1**, **2**, **2**.

```
Paper
2.Paper Size
```

② Press ▲ or ▼ to choose A4, Letter, Legal, Executive, A5, A5 L, A6, B5, B6, or Folio.
Press **OK**.

③ Press **Stop/Exit**.

Acceptable paper and other print media

Print quality may vary according to the type of paper you are using.

You can use the following types of print media: thin paper, plain paper, thick paper, bond paper, recycled paper, labels or envelopes.

For best results, follow the instructions below:

- DO NOT put different types of paper in the paper tray at the same time because it may cause paper jams or misfeeds.

- For proper printing, you must choose the same paper size from your software application as the paper in the tray.

- Avoid touching the printed surface of the paper immediately after printing.

- Before you buy a lot of paper, test a small quantity to make sure the paper is suitable.

Type and size of paper

The machine loads paper from the installed standard paper tray or manual feed slot.

The name for the paper trays in the printer driver in this Guide are as follows:

Tray and optional unit	Name
Standard paper tray	Tray 1
Manual feed slot	Manual

Paper capacity of the paper trays

	Paper size	Paper types	No. of sheets
Paper Tray (Tray 1)	A4, Letter, B5, Executive, A5, A5 (Long Edge), A6, B6, Folio [1], Legal, 16K (195 mm x 270 mm), 16K (184 mm x 260 mm), 16K (197 mm x 273 mm)	Plain paper, Thin paper and Recycled paper	up to 250 (80 g/m^2)
Manual feed slot (Manual)	Width: 76.2 to 216 mm Length: 116 to 406.4 mm	Plain paper, Thin paper, Thick paper, Bond paper, Recycled paper, Envelopes and Labels	Single sheet (80 g/m^2)

[1] Folio size is 215.9 mm x 330.2 mm

Recommended paper specifications

The following paper specifications are suitable for this machine.

Basis weight	75-90 g/m^2
Thickness	80-110 μm
Roughness	Higher than 20 sec.
Stiffness	90-150 cm^3/100
Grain direction	Long grain
Volume resistivity	10e^9-10e^{11} ohm
Surface resistivity	10e^9-10e^{12} ohm-cm
Filler	CaCO$_3$ (Neutral)
Ash content	Below 23 wt%
Brightness	Higher than 80%
Opacity	Higher than 85%

■ Use paper made for plain paper copying.

■ Use paper that is 75 to 90 g/m^2.

■ Use long grain paper with a neutral Ph value, and a moisture content of approx. 5%.

■ This machine can use recycled paper that meets DIN 19309 specifications.

Handling and using special paper

The machine is designed to work well with most types of xerographic and bond paper. However, some paper variables may have an effect on print quality or handling reliability. Always test samples of paper before purchasing to ensure desirable performance. Store paper in its original packaging and keep it sealed. Keep the paper flat and away from moisture, direct sunlight and heat.

Some important guidelines when selecting paper are:

■ DO NOT use inkjet paper because it may cause a paper jam or damage your machine.

■ Preprinted paper must use ink that can withstand the temperature of the machine's fusing process 392 degrees Fahrenheit (200 degrees centigrade).

■ If you use bond paper, paper having a rough surface or paper that is wrinkled or creased, the paper may exhibit degraded performance.

Types of paper to avoid

⚠ IMPORTANT

Some types of paper may not perform well or may cause damage to your machine.

DO NOT use paper:

- that is highly textured
- that is extremely smooth or shiny
- that is curled or warped
1 A curl of 2 mm or greater may cause jams to occur.

- that is coated or has a chemical finish
- that is damaged, creased or folded
- that exceeds the recommended weight specification in this guide
- with tabs and staples
- with letterheads using low temperature dyes or thermography
- that is multipart or carbonless
- that is designed for inkjet printing

If you use any of the types of paper listed above, they may damage your machine. This damage is not covered under any Brother warranty or service agreement.

Envelopes

Most envelopes designed for laser printers will be suitable for your machine. However, some envelopes may have feed and print-quality problems because of the way they have been made. A suitable envelope should have edges with straight, well-creased folds and the leading edge should not be thicker than two sheets of paper. The envelope should lie flat and not be of baggy or flimsy construction. You should buy quality envelopes from a supplier who understands that you will be using the envelopes in a laser machine.

Envelopes can be fed from the manual feed slot one at a time. We recommend that you print a test envelope to make sure the print results are what you want before you print or purchase a large quantity of envelopes.

Types of envelopes to avoid

◑ IMPORTANT

DO NOT use envelopes:

- that are damaged, curled, wrinkled or an unusual shape
- that are extremely shiny or textured
- with clasps, staples, snaps or tie strings
- with self-adhesive closures
- that are of a baggy construction
- that are not sharply creased
- that are embossed (have raised writing on them)
- that were previously printed by a laser machine
- that are pre-printed on the inside
- that cannot be arranged neatly when stacked
- that are made of paper that weighs more than the paper weight specifications for the machine

- with edges that are not straight or consistently square
- with windows, holes, cut-outs or perforations
- with glue on surface as shown in figure below
- with double flaps as shown in figure below
- with sealing flaps that are not folded down when purchased
- with sealing flaps as shown in figure below
- with each side folded as shown in figure below
If you use any of the types of envelopes listed above, they may damage your machine. This damage may not be covered under any Brother warranty or service agreement.

Labels

The machine will print on most types of labels designed for use with a laser machine. Labels should have an adhesive that is acrylic-based since this material is more stable at the high temperatures in the fuser unit. Adhesives should not come in contact with any part of the machine, because the label stock may stick to the drum unit or rollers and cause jams and print quality problems. No adhesive should be exposed between the labels. Labels should be arranged so that they cover the entire length and width of the sheet. Using labels with spaces may result in labels peeling off and causing serious jams or print problems.

All labels used in this machine must be able to withstand a temperature of 392 degrees Fahrenheit (200 degrees centigrade) for a period of 0.1 seconds.

Do not feed a label sheet through the machine more than one time.

Types of labels to avoid

Do not use labels that are damaged, curled, wrinkled or an unusual shape.
! IMPORTANT

- Avoid feeding labels with the carrier sheet exposed because your machine will be damaged.

- Label sheets should not exceed the paper weight specifications described in this User's Guide. Labels exceeding this specification may not feed or print properly and may cause damage to your machine.

- DO NOT reuse or insert labels that have previously been used or are missing few labels on the sheet.

3

Loading documents

How to load documents

You can send a fax, make copies, and scan from the ADF (Automatic Document Feeder) and the scanner glass.

Using the automatic document feeder (ADF)

The ADF can hold up to 35 pages and feeds each sheet individually. Use standard 80 g/m^2 paper and always fan the pages before putting them in the ADF.

Document Sizes Supported

Length:	147.3 to 355.6 mm
Width:	147.3 to 215.9 mm
Weight:	64 to 90 g/m^2

❶ IMPORTANT

- DO NOT use paper that is curled, wrinkled, folded, ripped, stapled, paper-clipped, pasted or taped.

- DO NOT use cardboard, newspaper or fabric.

- To avoid damaging your machine while using the ADF, DO NOT pull on the document while it is feeding.

✎ Note

- To scan documents that are not suitable for the ADF, see *Using the scanner glass* on page 23.

- It is easier to use the ADF if you are loading a multiple page document.

- Make sure documents with correction fluid or written with ink are completely dry.

How to load documents

1. Lift up and unfold the ADF document output support flap (1). Unfold the ADF document support (2).
2. Fan the pages well.

c Stagger the pages of your document *face up top edge first*, in the ADF until the LCD display message changes and you feel it touch the feed rollers.
d Adjust the paper guides (1) to fit the width of your document.

IMPORTANT

To avoid damaging your machine while using the ADF, DO NOT pull on the document while it is feeding.

Using the scanner glass

You can use the scanner glass to fax, copy or scan pages of a book one page at a time.

Document Sizes Supported

Length:	Up to 297 mm
Width:	Up to 215.9 mm
Weight:	Up to 2 kg

IMPORTANT

DO NOT leave thick documents on the scanner glass. If you do this, the ADF may jam.

How to load documents

Note

To use the scanner glass, the ADF must be empty.

1 Lift the document cover.

2 Using the document guidelines on the left and top, place the document *face down* in the upper left corner of the scanner glass.
3 Close the document cover.

❶ IMPORTANT

If the document is a book or is thick do not slam the cover or press on it.

4 Sending a fax

How to send a fax

The following steps show how to send a fax.

a When you want to send a fax, or change fax send or receive settings, press the (**FAX**) key to illuminate it in blue.
傳真FAX   ➡   傳真FAX

b Do one of the following to load your document:

■ Place the document *face up* in the ADF. (See *Using the automatic document feeder (ADF)* on page 22.)

■ Load your document *face down* on the scanner glass. (See *Using the scanner glass* on page 23.)

c Set the scanner glass size, fax resolution or contrast if you want to change them.
For more advanced fax sending operations and settings, see *Sending a fax* in *Chapter 3* of the *Advanced User's Guide:*

■ Broadcast
■ Delayed Fax
■ Batch TX
■ Real Time TX
■ Polled TX
■ Overseas Mode
■ Fax Resolution
■ Contrast
■ Coverpg Setup
■ Coverpage Msg

d Enter the fax number using the dial pad, a One touch key or **(Address Book)** and enter three-digit number.

e Press **Start**.

Faxing from the ADF

■ The machine starts scanning the document.

Faxing from the scanner glass

■ If you press **Start**, the machine starts scanning the first page.

Do one of the following:

• To send a single page, press **2** to choose No(Send) (or press **Start** again). The machine starts sending the document.

• To send more than one page, press **1** to choose Yes and place the next page on the scanner glass. Press **OK**. The machine starts scanning the page. (Repeat this step for each additional page.)
If you press **Start**, the machine starts sending the document.
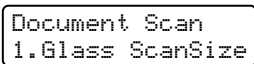

Note

To cancel, press **Stop/Exit**.

Faxing Letter size documents from the scanner glass

When faxing Letter size documents, you will need to set the scan glass size to Letter; otherwise, a portion of your faxes will be missing.

a Make sure you are in Fax mode 📠.

b (MFC-7360)
Press **Menu**, **1**, **7**.
(MFC-7460DN and MFC-7860DW)
Press **Menu**, **1**, **7**, **1**.

```
Document Scan
1.Glass ScanSize
```

c Press ▲ or ▼ to choose Letter.
Press **OK**.

d Press **Stop/Exit**.

Canceling a fax in progress

Press **Stop/Exit** to cancel the fax. If you press **Stop/Exit** while the machine is dialing or sending, the LCD will show as below:

```
Dialing #XXX
1.Clear   2.Exit
```

```
Sending_#XXX_PXX
1.Clear   2.Exit
```
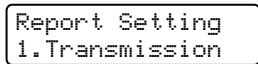

Press **1** to cancel the fax.

Transmission verification report

You can use the Transmission Verification Report as proof that you sent a fax. This report lists the receiving party's name or fax number, the time and date of transmission, duration of transmission, number of pages sent, and whether or not the transmission was successful.

There are several settings available for the Transmission Verification Report:

- On: Prints a report after every fax you send.
- On+Image: Prints a report after every fax you send. A portion of the fax's first page appears on the report.
- Off: Prints a report if your fax is unsuccessful due to a transmission error. Off is the default setting.
- Off+Image: Prints a report if your fax is unsuccessful due to a transmission error. A portion of the fax's first page appears on the report.

a Press **Menu**, **2**, **4**, **1**.

```
Report Setting
1.Transmission
```

b Press ▲ or ▼ to choose On, On+Image, Off or Off+Image.
Press **OK**.

c Press **Stop/Exit**.

Note

- If you choose On+Image or Off+Image, the image will only appear on the Transmission Verification Report if Real Time Transmission is set to Off. (See *Real Time Transmission* in *Chapter 3* of the *Advanced User's Guide*.)

- If your transmission is successful, OK will appear next to RESULT on the Transmission Verification Report. If transmission is not successful, NG will appear next to RESULT.

5 Receiving a fax

Receive modes

Choose the correct Receive Mode

The correct Receive Mode is determined by the external devices and telephone subscriber services (Voice Mail, Distinctive Ring, etc.) you have (or will be using) on the same line as the Brother machine.

Will you be using a Distinctive Ring number for receiving faxes?

Brother uses the term 'Distinctive Ring' but different telephone companies may have other names for this service such as Custom Ringing, RingMaster, Personalized Ring, Teen Ring, Ident-A-Ring, Ident-A-Call, Data Ident-A-Call, Smart Ring and SimpleBiz Fax & Alternate Number Ringing. (See *Distinctive Ring* on page 32 for instructions on setting up your machine using this feature.)

Will you be using Voice Mail on the same telephone line as your Brother machine?

If you have Voice Mail on the same telephone line as your Brother machine, there is a strong possibility that Voice Mail and the Brother machine will conflict with each other when receiving incoming calls. (See *Voice Mail* on page 32 for instructions on setting up your machine using this service.)

Will you be using a Telephone Answering Device on the same telephone line as your Brother machine?

Your external telephone answering device (TAD) will automatically answer every call. Voice messages are stored on the external TAD and fax messages are printed. Choose External TAD as your receive mode. (See *Connecting an external TAD (telephone answering device)* on page 35.)

Will you be using your Brother machine on a dedicated fax line?

Your machine automatically answers every call as a fax. Choose Fax Only as your receive mode. (See *Fax Only* on page 29.)

Will you be using your Brother machine on the same line as your telephone?

Do you want to receive voice calls and faxes automatically?

The Fax/Tel receive mode is used when sharing the Brother machine and your telephone on the same line. Choose Fax/Tel as your receive mode. (See *Fax/Tel* on page 29.)
Important Note: You can not receive voice messages on either Voice Mail or an answering machine when choosing the Fax/Tel mode.

Do you expect to receive very few faxes?

Choose Manual as your receive mode. You control the telephone line and must answer every call yourself. (See *Manual* on page 29.)

To set the receive mode follow the instructions below:

1 Press **Menu**, **0**, **1**.

```
Initial Setup
1.Receive Mode
```

2 Press ▲ or ▼ to choose the receive mode.
Press **OK**.

3 Press **Stop/Exit**.

The LCD will display the current receive mode.

Using receive modes

Some receive modes answer automatically (Fax Only and Fax/Tel). You may want to change the Ring Delay before using these modes. (See *Ring Delay* on page 30.)

Fax Only

Fax Only mode will automatically answer every call as a fax.

Fax/Tel

Fax/Tel mode helps you automatically manage incoming calls, by recognizing whether they are fax or voice calls and handling them in one of the following ways:

■ Faxes will be automatically received.

■ Voice calls will start the F/T ring to tell you to pick up the line. The F/T ring is a fast double-ring made by your machine.

(Also see *Ring Delay* on page 30 and *F/T Ring Time (Fax/Tel mode only)* on page 30.)

Manual

Manual mode turns off all automatic answering functions unless you are using the Distinctive Ring Receive feature.

To receive a fax in Manual mode lift the handset of the external telephone or press **Hook**. When you hear fax tones (short repeating beeps), press **Start**, and then press **2** to receive a fax. You can also use the Easy Receive feature to receive faxes by lifting a handset on the same line as the machine.

(Also see *Easy Receive* on page 31.)

External TAD

External TAD mode lets an external answering device manage your incoming calls. Incoming calls will be handled in the following ways:

■ Faxes will be automatically received.

■ Voice callers can record a message on the external TAD.

(For more information, see *Connecting an external TAD (telephone answering device)* on page 35.)

Receive Mode settings

Ring Delay

The Ring Delay setting sets the number of times the machine rings before it answers in Fax Only and Fax/Tel modes.

If you have external or extension telephones on the same line as the machine, keep the Ring Delay setting of 2. (See *Easy Receive* on page 31.)

1. Make sure you are in Fax mode 📠.

2. Press **Menu**, **2**, **1**, **1**.

   ```
   Setup Receive
   1.Ring Delay
   ```

3. Press ▲ or ▼ to choose 00, 01 or 02 for how many times the line rings before the machine answers.
   Press **OK**.

   Note

   If you choose 00, the machine will answer immediately and the line will not ring at all.

4. Press **Stop/Exit**.

F/T Ring Time (Fax/Tel mode only)

When somebody calls your machine, you and your caller will hear the normal telephone ring sound. The number of rings is set by the Ring Delay setting.

If the call is a fax, then your machine will receive it; however, if it is a voice call the machine will sound the F/T ring (a fast double-ring) for the time you have set in the F/T Ring Time setting. If you hear the F/T ring it means that you have a voice caller on the line.

Because the F/T ring is made by the machine, extension and external telephones will *not* ring; however, you can still answer the call on any telephone. (For more information, see *Using Remote Codes* on page 38.)

1. Make sure you are in Fax mode 📠.

2. Press **Menu**, **2**, **1**, **2**.

   ```
   Setup Receive
   2.F/T Ring Time
   ```

3. Press ▲ or ▼ to choose how long the machine will ring to alert you that you have a voice call (20, 30, 40 or 70 seconds).
   Press **OK**.

4. Press **Stop/Exit**.

Easy Receive

If Easy Receive is **On**:

The machine can receive a fax automatically, even if you answer the call. When you see Receiving on the LCD or hear a click on the phone line through the handset you are using, just replace the handset. Your machine will do the rest.

If Easy Receive is **Off**:

If you are at the machine and answer a fax call first by lifting the external handset, then press **Start**, and then press **2** to receive.

If you answered at an extension telephone press ✳**51**.

Note

- If this feature is set to On, but your machine does not connect a fax call when you lift an extension telephone handset, press the fax receive code ✳**51**.

- If you send faxes from a computer on the same telephone line and the machine intercepts them, set Easy Receive to Off.

1 Make sure you are in Fax mode 🔲.

2 Press **Menu**, **2**, **1**, **3**.

```
Setup Receive
3.Easy Receive
```

3 Press ▲ or ▼ to choose On or Off.
Press **OK**.

4 Press **Stop/Exit**.

6

Telephone services and external devices

Telephone line services

Voice Mail

If you have Voice Mail on the same telephone line as your Brother machine, Voice Mail and the Brother machine will conflict with each other when receiving incoming calls.

For example, if your Voice Mail is set to answer after 4 rings and your Brother machine is set to answer after 2 rings, then your Brother machine will answer first. This will prevent callers from being able to leave a message in your Voice Mail.

Similarly, if your Brother machine is set to answer after 4 rings and your Voice Mail is set to answer after 2 rings, then your Voice Mail will answer first. This will prevent your Brother machine from being able to receive an incoming fax, since Voice Mail cannot transfer the incoming fax back to the Brother machine.

To avoid conflicts between your Brother machine and your Voice Mail service, do one of the following:

Get the Distinctive Ring service from your telephone company. Distinctive Ring is a feature of your Brother machine that allows a person with one line to receive fax and voice calls through two different telephone numbers on that one line. Brother uses the term 'Distinctive Ring', but telephone companies market the service under a variety of names, such as Custom Ringing, Personalized Ring, Smart Ring, RingMaster, Ident-A-Ring, Ident-A-Call, Data Ident-A-Call,

Teen Ring, and SimpleBiz Fax & Alternate Number Ringing. This service establishes a second telephone number on the same line as your existing telephone number, and each number has its own ring pattern. Typically, the original number rings with the standard ring pattern and is used for receiving voice calls, and the second number rings with a different ring pattern and is used for receiving faxes. (See *Distinctive Ring* on page 32.)

OR

Set your Brother machine's Receive Mode to "Manual". Manual Mode requires that you answer every incoming call if you want to be able to receive a fax. If the incoming call is a telephone call, then complete the call as you normally would. If you hear fax sending tones you must transfer the call to the Brother machine. (See *Using external and extension telephones* on page 37.) Unanswered fax and voice calls will go to your Voice Mail. (To set the machine in **MANUAL** Mode, see *Choose the correct Receive Mode* on page 27.)

Distinctive Ring

Distinctive Ring is a function of your Brother machine that allows a person with one line to receive fax and voice calls through two different phone numbers on that one line. Brother uses the term 'Distinctive Ring', but telephone companies market the service under a variety of names, such as Smart Ring, Ring Master or Ident-a-Ring. This service establishes a second telephone number on the same line as your existing telephone number, and each number has its own ring pattern. Typically, the original number rings with the standard ring pattern and is used for receiving voice calls, and the second number rings with a different ring pattern and is used for receiving faxes.

📝 Note

• You must pay for your telephone company's Distinctive Ring service before you program the machine to work with it.

• Please call your telephone company for availability and rates.

What does your telephone company's 'Distinctive Ring' do?

Your telephone company's Distinctive Ring service allows you to have more than one number on the same telephone line. **If you need more than one telephone number, it is cheaper than paying for an extra line.** Each telephone number has its own Distinctive Ring pattern, so you will know which telephone number is ringing. This is one way you can have a separate telephone number for your machine.

📝 Note

Please call your telephone company for availability and rates.

What does Brother's 'Distinctive Ring' do?

The Brother machine has a Distinctive Ring feature that allows you to use your machine to take full advantage of the telephone company's Distinctive Ring service. The new telephone number on your line can just receive faxes.

📝 Note

You must pay for your telephone company's Distinctive Ring service before you program the machine to work with it.

Do you have Voice Mail?

If you have Voice Mail on the telephone line that you will install your new machine on, *there is a strong possibility that Voice Mail and the machine will conflict with each other while receiving incoming calls.* **However, the Distinctive Ring feature allows you to use more than one number on your line, so both Voice Mail and the machine can work together without any problems.** If each one has a separate telephone number, neither will interfere with the other's operations.

If you decide to get the Distinctive Ring service from the telephone company, you will need to follow the directions below to 'register' the new Distinctive Ring pattern they give you. This is so your machine can recognize its incoming calls.

📝 Note

You can change or cancel the Distinctive Ring pattern at any time. You can switch it off temporarily, and turn it back on later. When you get a new fax number, make sure you reset this feature.

Before you choose the ring pattern to register

You can only register one Distinctive Ring pattern with the machine. Some ring patterns cannot be registered. The ring patterns below are supported by your Brother machine. Register the one your telephone company gives you.

Ring Pattern	Rings	
1	long-long	
2	short-long-short	
3	short-short-long	
4	very long (normal pattern)	

Note

- Ring Pattern #1 is often called Short-Short and is the most commonly used.

- If the ring pattern you received is not on this chart, **please call your telephone company and ask for one that is shown**.

■ The machine will only answer calls to its registered number.

■ The first two rings are silent on the machine. This is because the fax must <<listen>> to the ring pattern (to compare it to the pattern that was 'registered'). (Other telephones on the same line will ring.)

■ If you program the machine properly, it will recognize the registered ring pattern of the 'fax number' within 2 ring patterns and then answer with a fax tone. When the 'voice number' is called, the machine will not answer.

Registering the Distinctive Ring pattern Very important!

After you have set the Distinctive Ring feature to On, your Distinctive Ring number will receive faxes automatically. The receive mode is automatically set to Manual and you cannot change it to another receive mode while Distinctive Ring is set to On. This ensures the Brother machine will only answer the Distinctive Ring number and not interfere when your main telephone number is called.

a Press **Menu**, **2**, **0**, **2**.

    Miscellaneous
    2.Distinctive

b Press ▲ or ▼ to choose Set.

c Press **OK**.

d Press ▲ or ▼ to choose the prestored ring pattern you want to use.
Press **OK**.
(You will hear each pattern as you scroll through the four patterns. Make sure you choose the pattern that the telephone company gave you.)

e Press **Stop/Exit**.
Distinctive Ring is now set to On.

Turning off Distinctive Ring

a Press **Menu**, **2**, **0**, **2**.

    Miscellaneous
    2.Distinctive

b Press ▲ or ▼ to choose Off.
Press **OK**.

c Press **Stop/Exit**.

Note

If you do not want to receive faxes on your Distinctive Ring number, you can turn off Distinctive Ring. The machine will stay in Manual receive mode so you will need to set the Receive Mode again. (See *Choose the correct Receive Mode* on page 27.)

Connecting an external TAD (telephone answering device)

You can connect an external Telephone Answering Device (TAD) to the same line as your machine. When the TAD answers a call, your machine will "listen" for the CNG (fax calling) tones sent by a sending fax machine. If it hears them it will take over the call and receive the fax. If it does not hear them, it will let your TAD take a voice message and the display will show Telephone.

The external TAD must answer within four rings (we recommend you set it to two rings). This is because your machine cannot hear the CNG tones until the external TAD has picked up the call. The sending machine will send CNG tones for only eight to ten seconds longer. We do not recommend using the toll saver feature on your external TAD if it needs more than four rings to activate it.

Unless you are using Distinctive Ring, the TAD must be connected to the EXT. jack of the machine.

Before you connect an external TAD (telephone answering device), remove the protective cap (2) from the EXT. jack on the machine.
1 **TAD**
2 **Protective Cap**

> 📝 **Note**
>
> If you have problems receiving faxes, reduce the ring delay setting on your external TAD.

Connections

The external TAD must be plugged into the back of the machine, into the jack labeled EXT. Your machine cannot work properly if you plug the TAD into a wall jack (unless you are using Distinctive Ring).

1. Plug the telephone line cord from the telephone wall jack into the back of the machine, in the jack labeled LINE.

2. Plug the telephone line cord from your external TAD into the back of the machine, in the jack labeled EXT. (Make sure this cord is connected to the TAD at the TAD's telephone line jack, and not its handset jack.)

3. Set your external TAD to four rings or less. (The machine's Ring Delay setting does not apply.)

4. Record the outgoing message on your external TAD.

5. Set the TAD to answer calls.

6. Set the Receive Mode to External TAD. (See *Choose the correct Receive Mode* on page 27.)

6

Recording an outgoing message (OGM)

① Record 5 seconds of silence at the beginning of your message. This allows your machine time to listen for fax tones.

② Limit your speaking to 20 seconds.

③ End your 20-second message by giving your Fax Receive Code for people sending manual faxes. For example: "After the beep, leave a message or press ✳**51** and **Start** to send a fax."

Note

We recommend beginning your OGM with an initial 5 second silence because the machine cannot hear fax tones over a loud voice. You may try leaving out this pause, but if your machine has trouble receiving, then you should re-record the OGM to include it.

Multi-line connections (PBX)

We suggest you ask the company who installed your PBX to connect your machine. If you have a multi line system we suggest you ask the installer to connect the unit to the last line on the system. This prevents the machine being activated each time the system receives telephone calls. If all incoming calls will be answered by a switchboard operator we recommend that you set the Receive Mode to Manual.

We cannot guarantee that your machine will operate properly under all circumstances when connected to a PBX. Any difficulties with sending or receiving faxes should be reported first to the company who handles your PBX.

External and extension telephones

Connecting an external or extension telephone

You can connect a separate telephone directly to your machine as shown in the diagram below.

Connect the telephone line cord to the jack labeled EXT.

Before you connect an external telephone, remove the protective cap (3) from the EXT. jack on the machine.
1 Extension telephone

2 External telephone

3 Protective Cap

When you are using an external telephone, the LCD shows Telephone.

Using external and extension telephones

Using extension telephones

If you answer a fax call at an extension telephone, you can make your machine receive the fax by pressing the Fax Receive Code *51.

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at an extension telephone by pressing the Telephone Answer Code **#51**. (See *F/T Ring Time (Fax/Tel mode only)* on page 30.)

Using an external telephone (Connected to the EXT. jack of the machine)

If you answer a fax call at the external telephone connected to the EXT jack of the machine, you can make the machine receive the fax by pressing **Start** and choosing Receive.

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at the external telephone by pressing **Hook**.

If you answer a call and no one is on the line:

You should assume that you're receiving a manual fax.

Press *51 and wait for the chirp or until the LCD shows Receiving, and then hang up.

📝 Note

You can also use the Easy Receive feature to make your machine automatically take the call. (See *Easy Receive* on page 31.)

Using a non-Brother cordless external handset

If your non-Brother cordless telephone is connected to the EXT. jack of the machine (see *Connecting an external or extension telephone* on page 36) and you typically carry the cordless handset elsewhere, it is easier to answer calls during the Ring Delay.

If you let the machine answer first, you will have to go to the machine so you can press **Hook** to transfer the call to the cordless handset.

6

Using Remote Codes

Fax Receive Code

If you answer a fax call on an extension telephone, you can tell your machine to receive it by pressing the Fax Receive Code ∗**51**. Wait for the chirping sounds then replace the handset. (See *Easy Receive* on page 31.)

If you answer a fax call at the external telephone, you can make the machine receive the fax by pressing **Start**.

Telephone Answer Code

If you receive a voice call and the machine is in F/T mode, it will start to sound the F/T (double-ring) after the initial ring delay. If you pick up the call on an extension telephone you can turn the F/T ring off by pressing **#51** (make sure you press this *between* the rings).

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at the external telephone by pressing **Hook**.

Changing the Remote Codes

The preset Fax Receive Code is ∗**51**. The preset Telephone Answer Code is **#51**. If you are always disconnected when accessing your External TAD, try changing the three-digit remote codes, for example **###** and 999.

1 Make sure you are in Fax mode 📠.

2 Press **Menu**, **2**, **1**, **4**.

> Setup Receive
> 4.Remote Codes

3 Press ▲ or ▼ to choose On (or Off).
Press **OK**.

4 If you chose On in step **3**, enter the new Fax Receive Code.
Press **OK**.

5 Enter the new Telephone Answer Code.
Press **OK**.

6 Press **Stop/Exit**.

7

Dialing and storing numbers

How to dial

You can dial in any of the following ways.

Manual dialing

Use the dial pad to enter all the digits of the telephone or fax number.

One touch dialing

Press the One Touch key that stores the number you want to call. (See *Storing One Touch Dial numbers* on page 42.)
To dial One Touch numbers 5 to 8, hold down **Shift** as you press the One Touch key.

Speed Dialing

Press 📖 **(Address Book)** and enter the three digit Speed Dial number. (See *Storing Speed Dial numbers* on page 44.)

Three-digit number

Note

If the LCD shows `Register Now?` when you enter a One Touch or a Speed Dial number, it means that a number is not stored there.

Search

You can search alphabetically for names you have stored in the One Touch and Speed Dial memories. (See *Storing One Touch Dial numbers* on page 42 and *Storing Speed Dial numbers* on page 44.)

a Press 🔖 **(Address Book)** twice.

b Press the dial pad key for the first few letters of the name. (Use the chart on *Entering text* on page 126 to help you enter letters.)
Press **OK**.

c Press ▲ or ▼ to scroll until you find the name you are looking for.
Press **OK**.

d Press **Start**.

Note

• If you do not enter a letter and press **OK** in step ❷, all registered names will appear. Press ▲ or ▼ to scroll until you find the name you are looking for.

• If the LCD shows No Contact Found when you enter the first few letters of the name, it means that a name for the letter is not stored.

Fax redial

If you are sending a fax manually and the line is busy, press **Redial/Pause** and try it again. You can call the last number dialed by pressing **Redial/Pause**.
Redial/Pause only works if you dialed from the control panel.

If you are sending a fax automatically and the line is busy, the machine will automatically redial one time after five minutes.

Storing numbers

You can set up your machine to do the following types of easy dialing: One Touch, Speed Dial and Groups for Broadcasting faxes. You can also specify the default resolution for each One Touch and Speed Dial number. When you dial a quick dial number, the LCD shows the name, if you stored it, or the number. A scan profile can also be stored along with the fax number.

If you lose electrical power, the quick dial numbers stored in the memory will not be lost.

A scan profile is the resolution and other scan settings that you choose when you store a number. For example, you will be asked to select Standard, Fine, or Photo if you have selected the I-FAX option. Or, you will be asked to select B&W TIFF, B&W PDF, Gray JPG, Gray PDF, Gray XPS, Color JPG, Color PDF or Color XPS if you selected the E-Mail option. (I-FAX and E-mail options are available as a download for MFC-7460DN and MFC-7860DW only.)

One Touch and Speed Dial Options

The following chart shows the options for storing One Touch or Speed Dial numbers after you download the IFAX and E-mail options for MFC-7460DN and MFC-7860DW.

Step 1 Enter One Touch or Speed Dial Location	Step 2 Select Registration Type	Step 3 Enter Number or E-mail Address	Step 4 Enter Name	Step 5 Select Resolution	Step 6 Select File Type
One Touch or Speed Dial	`Fax/Tel`	Fax Number or Tel Number	(Name) Press **OK**.	`Std`, `Fine`, `S.Fine`, `Photo`	—
	`IFAX`	E-mail Address		`Std`, `Fine`, `Photo`	—
	`Email Color PDF`			`100dpi`, `200dpi`, `300dpi`, `600dpi`	`PDF`, `SPDF`
	`Email Color JPG`			`100dpi`, `200dpi`, `300dpi`, `600dpi`	—
	`Email Color XPS`			`100dpi`, `200dpi`, `300dpi`, `600dpi`	—
	`Email Gray PDF`			`100dpi`, `200dpi`, `300dpi`	`PDF`, `SPDF`
	`Email Gray JPG`			`100dpi`, `200dpi`, `300dpi`	—
	`Email Gray XPS`			`100dpi`, `200dpi`, `300dpi`	—
	`Email B&W PDF`			`200dpi`, `200x100dpi`	`PDF`, `SPDF`
	`Email B&W TIFF`			`200dpi`, `200x100dpi`	—

7

Storing a pause

Press **Redial/Pause** to insert a 3.5-second pause between numbers. You can press **Redial/Pause** as many times as needed to increase the length of the pause.

Storing One Touch Dial numbers

Your machine has 4 One Touch keys where you can store 8 fax or telephone numbers for automatic dialing. To access numbers 5 to 8, hold down **Shift** as you press the One Touch key.
a Press the One Touch key where you want to store the number.
If a number is not stored there, the LCD shows Register Now? Press **1** to choose Yes.

b Enter the telephone or fax number (up to 20 characters).
Press **OK**.

c Choose one of the following:

■ Enter the name using the dial pad (up to 15 characters). Use the chart on *Entering text* on page 126 to help you enter letters.

Press **OK**.

■ Press **OK** to store the number without a name.

d (For MFC-7460DN/7860DW)
If you want to save a fax resolution along with the number, choose one of the following:

■ To store the fax resolution, press ▲ or ▼ to select Std, Fine, S.Fine or Photo.

Press **OK**.

■ Press **OK** if you do not want to change the default resolution.

If you downloaded I-FAX and E-mail options
(For MFC-7460DN and MFC-7860DW)

a Press the One Touch key where you want to store the number.
If a number is not stored there, the LCD shows Register Now?.
Press **1** to choose Yes.

b Press ▲ or ▼ to select one of the following:
Fax/Tel
IFAX
Email Color PDF
Email Color JPG
Email Color XPS
Email Gray PDF
Email Gray JPG
Email Gray XPS
Email B&W PDF
Email B&W TIFF
Press **OK**.

c Enter the telephone, fax number (up to 20 characters) or E-mail address (up to 60 characters each). Use the chart on *Entering text* on page 126 to help you enter letters.
Press **OK**.

Note

• If you selected an E-Mail Registration Type in step b and save the E-mail address, you can only use the E-mail address when you are in Scan mode.

• If you selected the IFAX Registration Type in step ❷ and save the E-mail address, you can only use the E-mail address when you are in Fax mode.

d Do one of the following:

■ Enter the name using the dial pad (up to 15 characters).

Press **OK**.

■ Press **OK** to store the number without a name.

e Do one of the following:

■ If you want to save a fax/scan resolution along with the number, go to the appropriate step as shown in the following table:

■ If you do not want to change the default resolution, press **OK**, then go to step ⓬.

Option selected in step ❷	Go to step
Fax/Tel	❻
IFAX	❼
Email Color PDF	❽
Email Color JPG	
Email Color XPS	
Email Gray PDF	❾
Email Gray JPG	
Email Gray XPS	
Email B&W PDF	❿
Email B&W TIFF	

Note

• When you do a broadcast and you have saved a scan profile along with the number or E-mail address, the scan profile of the One Touch, Speed Dial or Group number you choose first will be applied to the broadcast.

• You can also store the number by pressing **Menu**, **2**, **3**, **1**.

• For details about the file format, see the *Software User's Guide*

f Press ▲ or ▼ to select Std, Fine, S.Fine or Photo. Press **OK** and go to step ⓬.

g Press ▲ or ▼ to select Std, Fine or Photo. Press **OK** and go to step ⓬.

h Press ▲ or ▼ to select 100dpi, 200dpi, 300dpi or 600dpi. Press **OK**.

■ If you chose Email Color PDF, go to step ⓫.

■ If you chose Email Color JPG or Email Color XPS, go to step ⓬.

i Press ▲ or ▼ to select 100dpi, 200dpi or 300dpi. Press **OK**.

■ If you chose Email Gray PDF, go to step ⓫.

■ If you chose Email Gray JPG or Email Gray XPS, go to step ⓬.

j Press ▲ or ▼ to select 200x100dpi or 200dpi. Press **OK**.

■ If you chose Email B&W PDF, go to step ⓫.

■ If you chose Email B&W TIFF, go to step ⓬.

k Select the PDF type from PDF or SPDF (Secure PDF) that will be used to send to your PC. Press **OK** and then go to step ⓬.

l Press **Stop/Exit**.

7

Storing Speed Dial numbers

You can store your frequently used numbers as Speed Dial numbers, so that when you dial you will only have to press a few keys (⊞ **(Address Book)**, the three-digit number and **Start**). The machine can store 200 Speed Dial numbers (001 - 200).

a Press ⊞ **(Address Book)** and enter a three-digit Speed Dial location number (001-200). If a number is not stored there, the LCD shows Register Now? Press **1** to choose Yes.

b Enter the telephone or fax number (up to 20 characters). Use the chart on *Entering text* on page 126 to help you enter letters.
Press **OK**.

c Do one of the following:

■ Enter the name using the dial pad (up to 15 characters).

Press **OK**.

■ Press **OK** to store the number without a name.

d (For MFC-7460DN/7860DW)
If you want to save a fax resolution along with the number, do one of the following:

■ To store the fax resolution, press ▲ or ▼ to select Std, Fine, S.Fine or Photo.

Press **OK**.

■ Press **OK** if you do not want to change the default resolution.

**If you downloaded IFAX and E-mail options
(For MFC-7460DN and MFC-7860DW)**

a Press ⊞ **(Address Book)** and enter a three-digit Speed Dial location number (001-200).
If a number is not stored there, the LCD shows Register Now?
Press **1** to choose Yes.

b Press ▲ or ▼ to select one of the following:
Fax/Tel
IFAX
Email Color PDF
Email Color JPG
Email Color XPS
Email Gray PDF
Email Gray JPG
Email Gray XPS
Email B&W PDF
Email B&W TIFF
Press **OK**.

c Enter the telephone, fax number (up to 20 characters each) or E-mail address (up to 60 characters each). Use the chart on *Entering text* on page 126 to help you enter letters.
Press **OK**.

Note

• If you selected an E-Mail Registration Type in step **b** and save the E-mail address, you can only use the E-mail address when you are in Scan mode.

• If you selected the IFAX Registration Type in step **b** and save the E-mail address, you can only use the E-mail address when you are in Fax mode.

d Do one of the following:

■ Enter the name using the dial pad (up to 15 characters).

Press **OK**.

■ Press **OK** to store the number without a name.

5 Do one of the following:

■ If you want to save a fax/scan resolution along with the number, go to the appropriate step as shown in the following table:

■ If you do not want to change the default resolution, press **OK**, then go to step ⑫.

■ If you chose Email B&W TIFF, go to step ⑫.

⑪ Select the PDF type from PDF or SPDF (Secure PDF) that will be used to send to your PC. Press **OK** and then go to step ⑫.

⑫ Press **Stop/Exit**.

7

Changing One Touch and Speed Dial numbers

If you try to change an existing One Touch or Speed Dial number, the LCD will show the name or number already stored there. If the existing One Touch or Speed Dial number you are trying to change has a schedule job or has been set to a fax forwarding number, the LCD will ask you if you want to change the name or number.

a Do one of the following:

■ To change a stored One Touch number, press **Menu**, **2**, **3**, **1**.

```
Address Book
1.One Touch Dial
```

Press the One Touch key number you want to change.

■ To change a stored Speed Dial number, press **Menu**, **2**, **3**, **2**.

```
Address Book
2.Speed Dial
```

Enter the Speed Dial number you want to change, then press **OK**.

b Do one of the following:

■ To change the stored data, press **1**. Go to step c.

■ To exit without making a change, press **Stop/Exit**.

```
#005:MIKE
1.Change 2.Clear
```

c Edit the number and name by the following the instruction. When you are finished editing, press **OK**.

■ To edit the stored name or number, press ◀ or ▶ to position the cursor under the character you want to change and press **Clear**. Then enter the correct character.

d (For MFC-7460DN/7860DW)
If you want to save a fax resolution along with the number, do one of the following:

■ To store the fax resolution, press ▲ or ▼ to select Std, Fine, S.Fine or Photo.

Press **OK**.

■ Press **OK** if you do not want to change the default resolution.

e Press **Stop/Exit**.

If you downloaded I-FAX and E-mail options
(For MFC-7460DN and MFC-7860DW)

a Do one of the following:

■ To change a stored One Touch number, press **Menu**, **2**, **3**, **1**.

```
One Touch Dial
Select One Touch
```

Choose the One Touch number you want to change.

■ To change a stored Speed Dial number, press **Menu**, **2**, **3**, **2**.

```
Speed Dial
Speed Dial? #
```

Choose the Speed Dial number you want to change, then press **OK**.

b Do one of the following:

■ To change the stored number, press **1**.

■ To exit without making a change, press **Stop/Exit**.

```
#005:MIKE
1.Change 2.Clear
```

c Press ▲ or ▼ to select one of the following:
```
Fax/Tel
IFAX
Email Color PDF
Email Color JPG
Email Color XPS
Email Gray PDF
Email Gray JPG
Email Gray XPS
Email B&W PDF
Email B&W TIFF
```
Press **OK**.

d Press ◀ or ▶ to position the cursor under the character you want to change, and then press **Clear** to delete it. Repeat for each character you want to delete. Enter a new number or character. Press **OK**.

e Follow the directions beginning in step **d** in Storing One-Touch dial numbers and Storing Speed-Dial numbers. (See *Storing One Touch Dial numbers* on page 42 and *Storing Speed Dial numbers* on page 44.)

f Press **Stop/Exit**.

Deleting One Touch and Speed Dial numbers

If you try to delete an existing One Touch or Speed Dial number, the LCD will show the name or number already stored there. If the existing One Touch or Speed Dial number you are trying to change has a schedule job or has been set to a fax forwarding number, the LCD will ask you if you want to change the name or number.

a Do one of the following:

■ To delete a stored One Touch number, press **Menu**, **2**, **3**, **1**.

```
Address Book
1.One Touch Dial
```

Press the One Touch key number you want to delete.

■ To delete a stored Speed Dial number, press **Menu**, **2**, **3**, **2**.

```
Address Book
2.Speed Dial
```

Enter the Speed Dial number you want to delete then press **OK**.

b To delete the stored data, press **2**.

```
#005:MIKE
1.Change 2.Clear
```

c Do one of the following:

■ To delete the stored data, press **1**.

■ To exit without deleting the stored data, press **2**.

```
Erase This Data?
1.Yes 2.No
```
d Press **Stop/Exit**.

8 Making copies

How to copy

The following steps show the basic copy operation. For details about each option, see the *Advanced User's Guide* on the CD-ROM.

1. When you want to make a copy, press (**COPY**) to illuminate it in blue.

   ■ Make sure you are in Copy mode.

   複印COPY ➡ 複印COPY

   ■ The LCD shows:

   ```
   Stack   Copies:01
   100%   □□■□□ Auto
   ```

   Note

   The default setting is Fax mode. You can change the amount of time that the machine stays in Copy mode after the last copy operation. (See *Mode Timer* in *Chapter 1* of the *Advanced User's Guide)*

2. Do one of the following to load your document:

   ■ Place the document *face up* in the ADF. (See *Using the automatic document feeder (ADF)* on page 22.)

   ■ Load your document *face down* on the scanner glass. (See *Using the scanner glass* on page 23.)

3. Press **Start**.

Stop copying

To stop copying, press **Stop/Exit**.

Copy settings

Press the temporary **Copy** keys. You can use **Options**, **Enlarge/Reduce** or **Duplex** [1].

For details about changing the copy settings, see *Copy settings* in *Chapter 7* of the *Advanced User's Guide.*

You can change the following copy settings:

■ Enlarge/Reduce

■ Quality

■ Stack/Sort

■ Brightness

■ Contrast

■ Page Layout

■ Duplex [1]

[1] Duplex Copying (1-sided to 2-sided) for MFC-7460DN and MFC-7860DW

9 How to print from a computer

Printing a document

The machine can receive data from your computer and print it. To print from a computer, install the printer driver. (See *Printing* for Windows® or *Printing and Faxing* for Macintosh in *Software User's Guide* for details about the print settings.)

a Install the Brother printer driver on the Installation CD-ROM. (See the *Quick Setup Guide*.)

b From your application, choose the Print command.

c Choose the name of your machine in the **Print** dialog box and click **Properties**.

d Choose the settings you want in the **Properties** dialog box.

- **Paper Size**
- **Orientation**
- **Copies**
- **Media Type**
- **Resolution**
- **Print Settings**
- **Multiple Page**
- **Duplex / Booklet**
- **Paper Source**

e Click **OK** to begin printing.

9

10 How to scan to a computer

Scanning a document as PDF file using ControlCenter4 (Windows®)

(For Macintosh users) See *Scanning* in the *Software User's Guide*.

Note

The screens on your PC may vary depending on your model.

ControlCenter4 is a software utility that lets you quickly and easily access the applications you use most often. Using ControlCenter4 eliminates the need to manually launch specific applications. You can use ControlCenter4 on your computer.

1. Load your document. (See *How to load documents* on page 22.)

2. Open ControlCenter4 by clicking **start/All Programs/Brother/XXX-XXXX** (where XXX-XXXX is your model name)/**ControlCenter4**. The ControlCenter4 application will open.

3. Choose **Home Mode** or **Advanced Mode** before you use ControlCenter4.
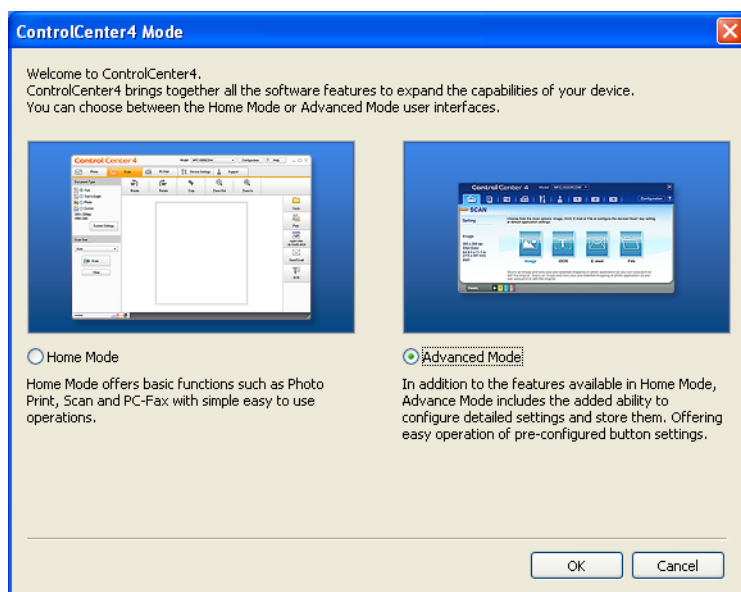

4. Make sure the machine you want to use is selected from the **Model** pull-down list.

e Set the file type for saving to a folder. By default, the scanned data is saved as **JPEG (*.jpg)**. Click **Configuration**, and then select **Button settings**, **Scan** and **File**.
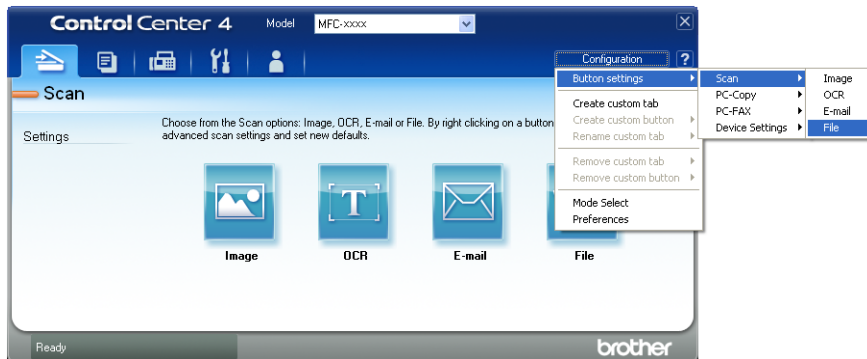

The configuration dialog box appears. You can change the default settings.
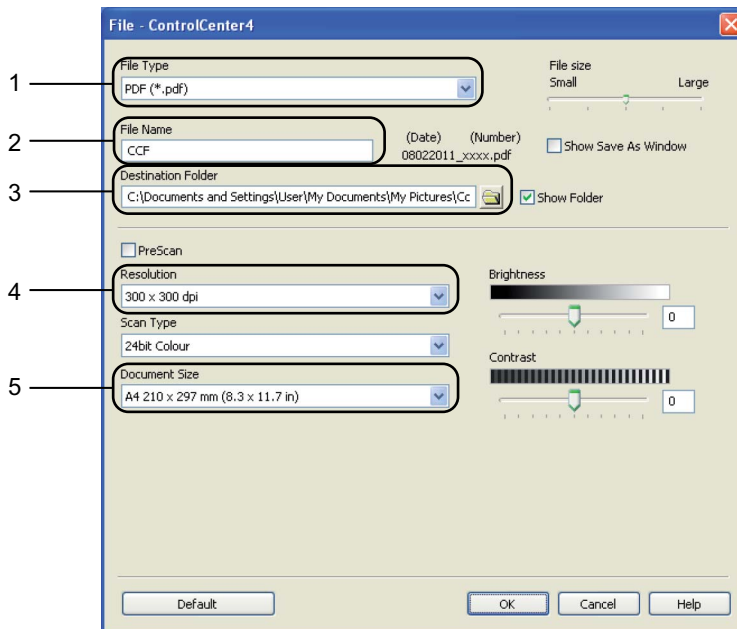

1 Choose **PDF (*.pdf)** from the **File Type** pull-down list.

2 You can enter the file name you want to use for the document.

3 You can save the file to the default folder, or choose your preferred folder by clicking the

     Browse button.

4 You can choose a scanning resolution from the **Resolution** pull-down list.

5 You can choose the document size from the pull-down list.

f Click **OK**.

10

7 Click **File**.
The machine starts the scanning process. The folder where the scanned data is saved will open automatically.
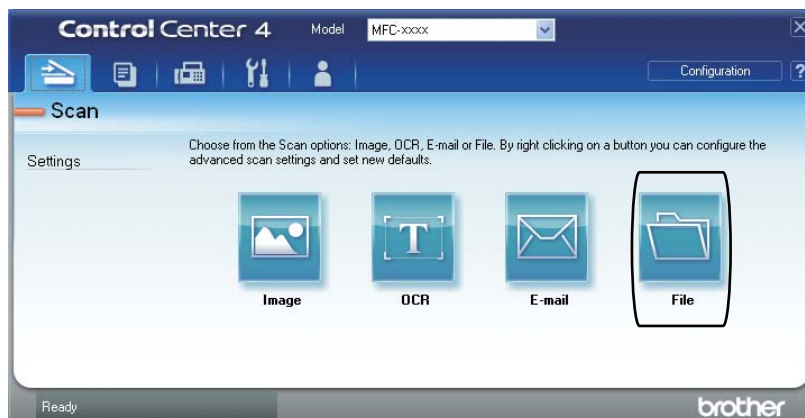

Changing the SCAN key settings

Before scanning

To use the machine as a scanner, install a scanner driver. If the machine is on a network, configure it with a TCP/IP address.

- Install the scanner drivers on the Installation CD-ROM. (See the *Quick Setup Guide*.)
- Configure the machine with a TCP/IP address if network scanning does not work. (See *Configuring Network Scanning* in the *Software User's Guide*.)

SCAN key settings

You can change your machine's **SCAN** key settings using ControlCenter4.

1. Open ControlCenter4 by clicking **start**/**All Programs**/**Brother**/**XXX-XXXX** (where XXX-XXXX is your model name)/**ControlCenter4**. The ControlCenter4 application will open.

2. Make sure the machine you want to use is selected from the **Model** pull-down list.

3. Click the **Device Settings** tab.

4. Click **Device Scan Settings**.

10
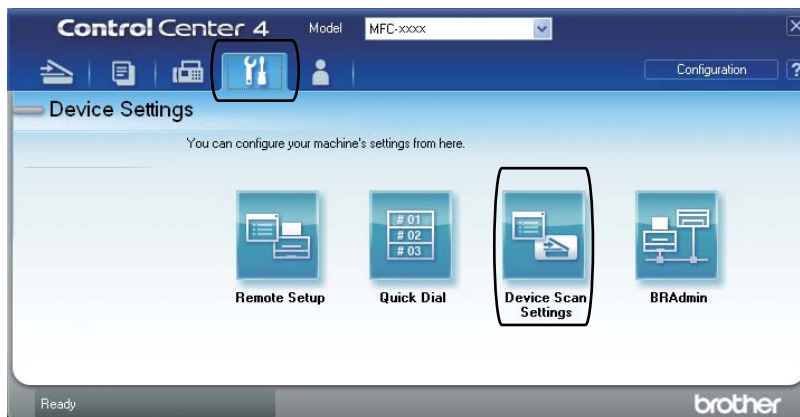

5 Choose the **File** tab. You can change the default settings.
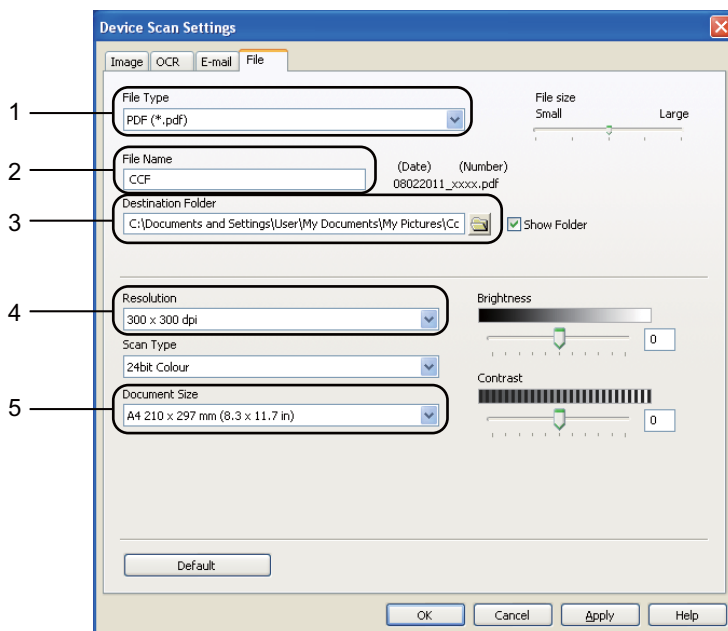

1 You can choose the file type from the pull-down list.

2 You can enter the file name you want to use for the document.

3 You can save the file to the default folder, or choose your preferred folder by clicking the

  Browse button.

4 You can choose a scanning resolution from the **Resolution** pull-down list.

5 You can choose the document size from the pull-down list.

6 Click **OK**.

Scanning using the SCAN key

1. Load your document. (See *How to load documents* on page 22.)

2. Press ⬚ (**SCAN**).

3. Press ▲ or ▼ to choose Scan to PC.
   Press **OK**.

4. Press ▲ or ▼ to choose File.
   Press **OK**.

5. (For Network users)
   Press ▲ or ▼ to choose the destination computer you want to send to.
   Press **OK**.
   If the LCD prompts you to enter a PIN number, enter the 4-digit PIN number for the destination computer using the dial pad on the control panel.
   Press **OK**.

6. Press **Start**.
   The machine starts the scanning process.

Note

Choose the scan mode you want.

Scan to:

- FTP [1]
- E-mail (Scan to PC)
- Image (Scan to PC)
- OCR (Scan to PC)
- File (Scan to PC)
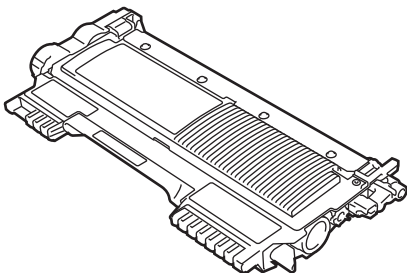

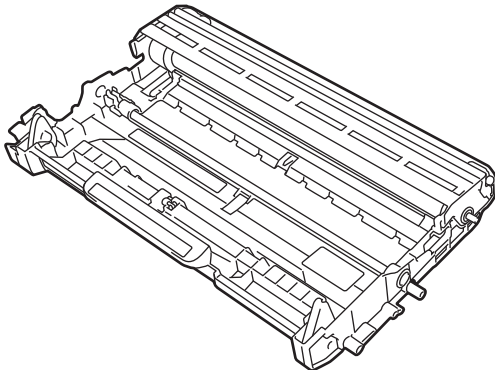

[1] For MFC-7460DN and MFC-7860DW

10

A Routine maintenance

Replacing the consumable items

The machine will indicate when it is time to replace the consumable items. (See *Replacing the toner cartridge* on page 57 and *Replacing the drum unit* on page 63.)

Toner cartridge	Drum unit
See *Replacing the toner cartridge* on page 57.	See *Replacing the drum unit* on page 63.
Order No. TN-420, TN-450	Order No. DR-420

✎ Note

• Discard used consumable according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office.

• We recommend placing used consumable items on a piece of paper to prevent accidentally spilling or scattering the material inside.

• If you use paper that is not a direct equivalent for the recommended paper, the life of consumable items and machine parts may be reduced.

• The projected life of the toner cartridges is based on ISO/IEC 19752. Frequency of replacement will vary depending on the complexity of printed pages, percentage of coverage and type of media used.

Replacing the toner cartridge

Order Number: For the order numbers of toner cartridges, see *Replacing the consumable items* on page 56.

The Standard toner cartridge can print approximately 1,200 pages [1]. The High Yield toner cartridge can print approximately 2,600 pages [1]. Actual page count will vary depending on your average type of document. When a toner cartridge is running low, the LCD shows Toner Low.

The toner cartridge that comes supplied with the machine is a Starter toner cartridge that will need to be replaced after approximately 700 pages [1].

[1] Approx. cartridge yield is declared in accordance with ISO/IEC 19752.

Note

- It is a good idea to keep a new toner cartridge ready for use when you see the Toner Low warning.

- To ensure high quality printing, we recommend that you use only Genuine Brother Brand toner cartridges. When you want to buy toner cartridges, please call Brother Customer Service.

- We recommend that you clean the machine when you replace the toner cartridge. See *Cleaning the machine* in *Appendix A* of the *Advanced User's Guide*.

- If you change the print density setting for lighter or darker printing, the amount of toner used will change.

- Wait to unpack the toner cartridge until immediately before you put it into the machine.

Toner Low

```
Toner Low
```

If the LCD shows Toner Low, buy a new toner cartridge and have it ready before you get a Replace Toner message.

Replace Toner

When the following message appears on the LCD, you need to replace the toner cartridge:

```
Replace Toner
```

The machine will stop printing until you replace the toner cartridge. A new and unused genuine Brother toner cartridge will reset the Replace Toner mode.

Note

To force the machine to continue printing after the LCD shows Replace Toner, set the machine to Continue mode (**Menu**, **1**, **8**, and choose Continue). The machine will continue printing until the LCD shows Toner Ended. (For details about the Toner settings, see *Toner Settings* in *Chapter 1* of the *Advanced User's Guide*.)

Toner Ended

When the following message appears on the LCD, you need to replace the toner cartridge:

```
Toner Ended
```

The machine stops printing until you replace the toner cartridge with a new one. (See *Replacing the toner cartridge* on page 57.)

Replacing the toner cartridge

1. Make sure that the machine is turned on.
A

b Open the front cover and leave the machine turned on for 10 minutes to cool down.
c Take out the drum unit and toner cartridge assembly.

d Push down the green lock lever and take the toner cartridge out of the drum unit.

⚠ WARNING

DO NOT put a toner cartridge into a fire. It could explode, resulting in injuries.

DO NOT use cleaning materials that contain ammonia, alcohol, any type of spray or any type of flammable substance to clean the inside or outside of the machine. Doing this may cause a fire or electrical shock.
See *To use the product safely* in the *Safety and Legal booklet* for how to clean the machine.

Be careful not to inhale toner.

❶ IMPORTANT

- We recommend that you place the drum unit and/or the toner cartridge on a clean, flat, level, stable surface with a sheet of disposable paper or cloth underneath it in case you accidentally spill or scatter toner.

- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.

- To avoid print quality problems, DO NOT touch the shaded parts shown in the illustration.
Note

- Be sure to seal up the toner cartridge tightly in a suitable bag so that toner powder does not spill out of the cartridge.

- Discard used consumable according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office.

5 Unpack the new toner cartridge. Hold the cartridge level with both hands and gently shake it from side to side several times to spread the toner evenly inside the cartridge.
IMPORTANT

- Wait to unpack the new toner cartridge until immediately before you put it in the machine. If a toner cartridge is left unpacked for a long time, the toner life will be shortened.

- Brother strongly recommends that you DO NOT refill the toner cartridge provided with your machine. We also strongly recommend that you continue to use only Genuine Brother Brand replacement toner cartridges. Use or attempted use of potentially incompatible toner and/or cartridges in the Brother machine may cause damage to the machine and/or may result in unsatisfactory print quality. Our warranty coverage does not apply to any problem that is caused by the use of unauthorized third-party toner and/or cartridges. To protect your investment and obtain premium performance from the Brother machine, we strongly recommend the use of Genuine Brother Supplies.

6 Pull off the protective cover.
IMPORTANT

Put the toner cartridge in the drum unit immediately after you have removed the protective cover. To prevent any degradation to the print quality, DO NOT touch the shaded parts shown in the illustrations.
g Put the new toner cartridge firmly into the drum unit until you hear it lock into place. If you put it in properly, the green lock lever will lift automatically.
Note

Make sure that you put in the toner cartridge properly or it may separate from the drum unit.

h Clean the corona wire inside the drum unit by gently sliding the green tab from left to right and right to left several times.

1

Note

Be sure to return the tab to the home position (▲) (1). If you do not, printed pages may have a vertical stripe.

i Put the drum unit and toner cartridge assembly back into the machine. Close the front cover.

A
After replacing the toner cartridge, DO
NOT turn off the machine's power switch
or open the front cover until the LCD
clears the Please Wait message and
returns to Ready mode.

Cleaning the corona wire

If you have print quality problems, clean the
corona wire as follows:

1 Open the front cover and leave the
machine turned on for 10 minutes to
cool down.
⚠ **WARNING**

⚠ **HOT SURFACE**

After you have just used the machine, some
internal parts of the machine will be
extremely hot. Wait for the machine to cool
down before you touch the internal parts of
the machine.
2 Slowly take out the drum unit and toner
cartridge assembly.
⚠ **CAUTION**

We recommend that you place the drum
unit and toner cartridge assembly on a
clean, flat surface with a sheet of
disposable paper or cloth underneath it in
case you accidentally spill or scatter toner.

Handle the toner cartridge carefully. If toner
scatters on your hands or clothes,
immediately wipe or wash it off with cold
water.

To prevent damage to the machine caused by static electricity, DO NOT touch the electrodes shown in the illustration.
c Clean the corona wire inside the drum unit by gently sliding the green tab from right to left and left to right several times.
1

Note

Be sure to return the tab to the home position (▲) (1). If you do not, printed pages may have a vertical stripe.

d Put the drum unit and toner cartridge assembly back into the machine. Close the front cover.
Replacing the drum unit

Order No. DR-420

A new drum unit can print approximately 12,000 Letter or A4 size single-sided pages.

Note

• There are many factors that determine the actual drum life, such as the temperature, humidity, type of paper, type of toner used and so on. Under ideal conditions, the average drum life is estimated at approximately 12,000 pages. The actual number of pages that your drum will print may be significantly less than this estimate. Because we have no control over the many factors that determine the actual drum life, we cannot guarantee a minimum number of pages that will be printed by your drum.

• For best performance, use only genuine Brother toner. The machine should be used only in a clean, dust-free environment with adequate ventilation.

A

• Printing with a non Brother drum unit may reduce not only the print quality but also the quality and life of the machine itself. Warranty coverage does not apply to problems caused by the use of a non Brother drum unit.

Drum Error

```
Drum Error
```

The corona wire has become dirty. Clean the corona wire in the drum unit. (See *Cleaning the corona wire* on page 62.)

If you cleaned the corona wire and Drum Error was not cleared, replace the drum unit with a new one.

Replace Drum

```
Replace Drum
```

Please replace the drum unit with a new one. We recommend a genuine Brother drum unit be installed at this time.

After replacement, reset the drum counter by following the instructions included with the new drum unit.

Drum Stop

```
Drum Stop
```

We cannot guarantee the print quality. Please replace the drum unit with a new one. We recommend a genuine Brother drum unit be installed at this time.

After replacement, reset the drum counter by following the instructions included with the new drum unit.

Replacing the drum unit

❶ IMPORTANT

• While removing the drum unit, handle it carefully because it may contain toner. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.

• Every time you replace the drum unit, clean the inside of the machine. (See *Cleaning the machine* in *Appendix A* of the *Advanced User's Guide*.)

1 Make sure that the machine is turned on.

2 Open the front cover and leave the machine turned on for 10 minutes to cool down.

⚠ WARNING

⚠ HOT SURFACE

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

c Take out the drum unit and toner cartridge assembly.

d Push down the green lock lever and take the toner cartridge out of the drum unit.

<table>
<tr><td>⚠</td><td>**WARNING**</td></tr>
</table>
DO NOT put a toner cartridge into a fire. It could explode, resulting in injuries.

DO NOT use cleaning materials that contain ammonia, alcohol, any type of spray, or any type of flammable substance to clean the outside or inside of the machine. Doing this may cause a fire or electrical shock.

See *To use the product safely* in the *Safety and Legal booklet* for how to clean the machine.

Be careful not to inhale toner.

A

- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.
- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.

- We recommend that you place the drum unit and/or the toner cartridge on a clean, flat surface with a sheet of disposable paper or cloth underneath it in case you accidentally spill or scatter toner.

- To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.
Note

- Be sure to seal up the used drum unit tightly in a bag so that toner powder does not spill out of the unit.

- Discard used consumable according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office.

5 Unpack the new drum unit.

IMPORTANT

- To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.
- Wait to unpack the new drum unit until immediately before you put it in the machine. Exposure to direct sunlight or room light may damage the drum unit.

f Put the toner cartridge firmly into the new drum unit until you hear it lock into place. If you put the cartridge in properly, the green lock lever will lift automatically.
Note

Make sure that you put in the toner cartridge properly or it may separate from the drum unit.

g Clean the corona wire of the drum unit by gently sliding the green tab from left to right and right to left several times.
Note

Be sure to return the green tab to the home position (▲) (1). If you do not, printed pages may have a vertical stripe.

h Put the new drum unit and toner cartridge assembly in the machine.

Resetting the drum counter

When you replace the drum unit with a new one, you need to reset the drum counter by completing the following steps:

a Press **Clear**.
To confirm you are installing a new drum unit, press **1**.

b When the LCD shows Accepted, close the front cover.

A

B Troubleshooting

Error and maintenance messages

As with any sophisticated office product, errors may occur and consumable items may need to be replaced. If this happens, your machine identifies the error or required routine maintenance and shows the appropriate message. The most common error and maintenance messages are shown below.

You can correct most errors and perform routine maintenance by yourself. If you need more help, the Brother Solutions Center offers the latest FAQs and troubleshooting tips:

Visit us at http://solutions.brother.com/.

Error Message	Cause	Action
`Access Denied`	The function you want to use is restricted by Secure Function Lock.	Contact your administrator to check your Secure Function Lock Settings.
`Cartridge Error`	The toner cartridge is not installed properly.	Pull out the drum unit and remove the toner cartridge, then re-install the toner cartridge in the drum unit.
`Comm.Error`	Poor telephone line quality caused a communication error.	Send the fax again or connect the machine to another telephone line. If the problem continues, call the telephone company and ask them to check your telephone line.
`Connection Fail`	You tried to poll a fax machine that is not in Polled Waiting mode.	Check the other fax machine's polling setup.
`Cooling Down` `Wait for a while`	The temperature of the drum unit or toner cartridge is too hot. The machine will pause its current print job and go into cooling down mode. During the cooling down mode, you will hear the cooling fan running while the LCD shows `Cooling Down`, and `Wait for a while`.	Make sure that you can hear the fan in the machine spinning and that the exhaust outlet is not blocked by something. If the fan is spinning, remove any obstacles that surround the exhaust outlet, and then leave the machine turned on but do not use it for several minutes. If the fan is not spinning do one of the following: (For MFC-7360 and MFC-7460DN) See *Transferring your faxes or Fax Journal report* on page 73 before disconnecting the machine so you will not lose any important messages. Then, disconnect the machine from the power for several minutes and then reconnect it. (For MFC-7860DW) Disconnect the machine from the AC power outlet for several minutes, then reconnect it.

Error Message	Cause	Action
Cover is Open	The front cover is not completely closed.	Close the front cover of the machine.
Cover is Open	The ADF cover is not completely closed.	Close the ADF cover of the machine.
	The ADF is open while loading a document.	Close the ADF cover of the machine, then press **Stop/Exit**.
Cover is Open	The fuser cover is not completely closed or paper was jammed in the back of the machine when you turned on the power.	■ Close the fuser cover of the machine. ■ Make sure paper is not jammed inside the back of the machine, and then close the fuser cover and press **Start**.
Disconnected	The other person or other person's fax machine stopped the call.	Try to send or receive again.
Document Jam	The document was not inserted or fed properly, or the document scanned from the ADF was too long.	See *Document is jammed in the top of the ADF unit* on page 74 or *Using the automatic document feeder (ADF)* on page 22.
DR Mode in Use	The machine is set to Distinctive Ring mode. You cannot change the Receive Mode from Manual to another mode.	Set Distinctive Ring to Off. (See *Turning off Distinctive Ring* on page 34.)
Drum Error	The corona wire on the drum unit needs to be cleaned.	Clean the corona wire on the drum unit. (See *Cleaning the corona wire* on page 62.)
Drum Stop	It is time to replace the drum unit.	Replace the drum unit. (See *Replacing the drum unit* on page 63.)
Duplex Disabled	The duplex tray is removed or is not properly installed.	Carefully put the duplex tray into the machine until it clicks into place.
	The back of the machine is not closed completely.	Close the back cover of the machine.
EL Error	The machine has a mechanical problem.	Open the front cover and close it again.
Fuser Error	The temperature of the fuser unit does not rise to a specified temperature within the specified time.	(For MFC-7360 and MFC-7460DN) Received fax messages still in memory will be lost when the machine is turned off. See *Transferring your faxes or Fax Journal report* on page 73 before disconnecting the machine so you will not lose any important messages. Then, turn the power switch off, wait a few seconds, and then turn it on again. Leave the machine for 15 minutes with the power on.
	The fuser unit is too hot.	(For MFC-7860DW) Turn the power switch off, wait a few seconds, and then turn it on again. Leave the machine for 15 minutes with the power on.

B

Error Message	Cause	Action
Init Unable XX	The machine has a mechanical problem.	■ (For MFC-7360 and MFC-7460DN) Received fax messages still in memory will be lost when the machine is turned off. See *Transferring your faxes or Fax Journal report* on page 73 before disconnecting the machine so you will not lose any important messages. Then, disconnect the machine from the power for several minutes and then reconnect it. (For MFC-7860DW) Disconnect the machine from the power for several minutes, then reconnect it. ■ If the problem continues, call Brother Customer Service.
Jam Duplex	The paper is jammed in the duplex tray at the back of the machine.	(See *Paper is jammed in the Duplex Tray (MFC-7460DN and MFC-7860DW)* on page 84.)
Jam Inside	The paper is jammed inside the machine.	(See *Paper is jammed inside the machine* on page 79.)
Jam Rear	The paper is jammed in the back of the machine.	(See *Paper is jammed at the back of the machine* on page 77.)
Jam Tray	The paper is jammed in the paper tray of the machine.	(See *Paper is jammed in the standard paper tray* on page 76.)
Limit Exceeded	The Page Limit set in Secure Function Lock 2.0 for your ID was reached.	Contact your administrator to check your Secure Function Lock Settings.
Manual Feed	**Manual Feed** was selected as the paper source when there was no paper in the manual feed slot.	Place a sheet of paper in the manual feed slot. (See *Loading paper in the manual feed slot* on page 11.)
No Paper	The machine is out of paper or paper is not properly loaded in the paper tray.	Do one of the following: ■ Refill the paper in the paper tray and press **Start**. ■ Remove the paper and load it again. Then press **Start**. ■ If the problem is not resolved, the paper pick-up roller may need to be cleaned. Clean the paper pick-up roller. (See *Cleaning the paper pick-up rollers* in *Appendix A* of the *Advanced User's Guide*.)
No Response/Busy	The number you dialed does not answer or is busy.	Verify the number and try again.
No Toner	The toner cartridge is not installed correctly.	Pull out the drum unit. Take out the toner cartridge and then put it back into the drum unit.

Error Message	Cause	Action
`Not Available`	The requested function is not permitted to all IDs by Secure Function Lock 2.0.	Contact your administrator to check your Secure Function Lock Settings.
`Out of Memory`	The machine's memory is full.	**Fax sending or copy operation in progress** Do one of the following: ■ Press **Start** to send or copy the scanned pages. ■ Press **Stop/Exit** and wait until the other operations in progress finish, and then try again. ■ Clear the faxes from the memory. Print the faxes that are stored in the memory to restore the memory to 100%. Then turn off Fax Storage to avoid storing more faxes in the memory. (See *Printing a fax from the memory* in *Chapter 4* of the *Advanced User's Guide* and *Fax Storage* in *Chapter 4* of the *Advanced User's Guide*.) **Print operation in process** Do one of the following: ■ Reduce the print resolution. (See *Basic tab* in the *Software User's Guide*.) ■ Clear the faxes from the memory. (See the above explanation.)
`Print Unable XX`	The machine has a mechanical problem.	Do one of the following: ■ (For MFC-7360 and MFC-7460DN) *Transferring your faxes or Fax Journal report* on page 73 before disconnecting the machine so you will not lose any important messages. Then, disconnect the machine from the power for several minutes and then reconnect it. (For MFC-7860DW) Disconnect the machine from the power for several minutes, then reconnect it. ■ If the problem continues, call Brother Customer Service.
`Replace Drum`	It is time to replace the drum unit.	Replace the drum unit. (See *Replacing the drum unit* on page 63.)
	The drum unit counter was not reset when a new drum was installed.	Reset the drum unit counter. (See *Replacing the drum unit* on page 64.)

B

Error Message	Cause	Action
Replace Toner	The machine will stop printing until you replace the toner cartridge.	If you have set the Toner setting to Stop, replace the toner cartridge with a new and unused original Brother toner cartridge. This will reset the Replace Toner mode. (See *Replacing the toner cartridge* on page 57.) If you have set the Toner setting to Continue, the machine will continue to print data until the LCD shows Toner Ended. For how to operate the machine in Continue mode, see *Toner Settings* in *Chapter 1* of the *Advanced User's Guide*.
Scan Unable XX	The machine has a mechanical problem.	■ (For MFC-7360 and MFC-7460DN) See *Transferring your faxes or Fax Journal report* on page 73 before disconnecting the machine so you will not lose any important messages. Then, disconnect the machine from the power for several minutes and then reconnect it. (For MFC-7860DW) Disconnect the machine from the power for several minutes, then reconnect it. ■ If the problem continues, call Brother Customer Service.
Size Error DX	The paper in the tray is not a suitable size for automatic duplex printing.	Load A4 paper for automatic duplex printing, and then press **Start**. (See *Print media* on page 131.)
Size mismatch	The paper in the tray is not a correct size.	Load an appropriate size of paper in the tray, and re-set the "Paper Size" (**Menu**, **1**, **2**, **2**). (See *Paper Size* on page 17.)
Toner Ended	It is time to replace the toner cartridge.	Replace the toner cartridge with a new one. (See *Replacing the toner cartridge* on page 57.)
Toner Low	The toner is low.	Buy a new toner cartridge before you get a Replace Toner message.

Transferring your faxes or Fax Journal report

If the LCD shows:

■ Init Unable XX

■ Print Unable XX

■ Scan Unable XX

(MFC-7360 and MFC-7460DN)
If it is necessary to disconnect the machine from the AC power outlet, we recommend transferring your faxes to another fax machine or to your PC before you unplug the machine. (See *Transferring faxes to another fax machine* on page 73 or *Transferring faxes to your PC* on page 73.)

You can also transfer the Fax Journal report to see if there are any faxes you need to transfer. (See *Transferring Fax Journal report to another fax machine* on page 73.)

Note

If there is an error message on the machine's LCD, after the faxes have been transferred, disconnect the machine from the power source for several minutes, and then reconnect it.

Transferring faxes to another fax machine

If you have not set up your Station ID, you cannot enter fax transfer mode. (See *Set your station ID* in the *Quick Setup Guide*.)

a Press **Menu**, **9**, **0**, **1**.

b Do one of the following:

■ If the LCD shows No Data, there are no faxes left in the machine's memory. Press **Stop/Exit**.

■ Enter the fax number to which faxes will be forwarded.

c Press **Start**.

Transferring faxes to your PC

You can transfer the faxes from your machine's memory to your PC.

a Make sure that you have installed **MFL-Pro Suite** on your PC, and then turn on **PC-Fax Receiving** on the PC. (For details about PC-Fax Receive, see *PC-FAX receiving* in the *Software User's Guide*.)

b Make sure that you have set PC Fax Receive on the machine. (See *PC-Fax Receive* in *Chapter 4* of the *Advanced User's Guide*.)
If faxes are in the machine's memory when you set up PC-Fax Receive, the LCD will ask if you want to transfer the faxes to your PC.

c Do one of the following:

■ To transfer all faxes to your PC, press **1**. You will be asked if you want a backup print.

■ To exit and leave the faxes in the memory, press **2**.

d Press **Stop/Exit**.

Transferring Fax Journal report to another fax machine

If you have not set up your Station ID, you cannot enter fax transfer mode. (See *Set your station ID* in the *Quick Setup Guide*.)

a Press **Menu**, **9**, **0**, **2**.

b Enter the fax number to which the Fax Journal report will be forwarded.

c Press **Start**.

B

Document Jams

Document is jammed in the top of the ADF unit

1. Take out any paper from the ADF that is not jammed.

2. Open the ADF cover.

3. Pull the jammed document out to the left.
4. Close the ADF cover.

5. Press **Stop/Exit**.

Document is jammed under the document cover

1. Take out any paper from the ADF that is not jammed.

2. Lift the document cover.

3. Pull the jammed document out to the right.
4. Close the document cover.

5. Press **Stop/Exit**.

Removing small documents jammed in the ADF

1. Lift the document cover.

2. Insert a piece of stiff paper, such as cardstock, into the ADF to push any small paper scraps through.
3. Close the document cover.

4. Press **Stop/Exit**.

Document is jammed at the output tray

1. Take out any paper from the ADF that is not jammed.

2. Pull the jammed document out to the right.

3. Press **Stop/Exit**.

B
Paper Jams

Paper is jammed in the standard paper tray

If the LCD shows Jam Tray, follow these steps:

1 Pull the paper tray completely out of the machine.
2 Use both hands to slowly pull out the jammed paper.
Note

Pulling out the jammed paper downwards allows you to remove the paper more easily.

3 Make sure the paper is below the maximum paper mark (▼ ▼ ▼) (1) of the paper tray. While pressing the green paper-guide release lever, slide the paper guides to fit the paper size. Make sure that the guides are firmly in the slots. (See *Loading paper in the standard paper tray* on page 9.)
4 Put the paper tray firmly back in the machine.

76

Paper is jammed at the back of the machine

If the LCD shows Jam Rear, a paper jam occurred behind the back cover. Follow these steps:

1 Open the front cover. Leave the machine turned on for 10 minutes to cool down.
⚠ WARNING

⚠ HOT SURFACE

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

2 Slowly take out the drum unit and toner cartridge assembly.

B
• We recommend that you place the drum unit and the toner cartridge on a clean, flat surface with a sheet of disposable paper or cloth underneath it in case you accidentally spill or scatter toner.

• To prevent damage to the machine caused by static electricity, DO NOT touch the electrodes shown in the illustration.
③ Open the back cover (face-up output tray).
④ Pull down the tabs at the left and right hand sides to open the fuser cover (1).
e Using both hands, gently pull the jammed paper out of the fuser unit.
f Close the fuser cover and the back cover (face-up output tray).

g Put the drum unit and toner cartridge assembly back into the machine.
h Close the front cover. If the machine does not start printing automatically, press **Start**.

Paper is jammed inside the machine

If the LCD shows Jam Inside, follow these steps:

a Open the front cover. Leave the machine turned on for 10 minutes to cool down.

B

WARNING

⚠ HOT SURFACE

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

b Slowly take out the drum unit and toner cartridge assembly. The jammed paper may be pulled out with the drum unit and toner cartridge assembly, or this may release the paper so you can pull it out inside of the machine.
❶ IMPORTANT

- We recommend that you put the drum unit and toner cartridge assembly on a piece of disposable paper or cloth in case you accidentally spill or scatter toner.

- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.
③ Push down the green lock lever and take the toner cartridge out of the drum unit. Clear the jammed paper if there is any inside the drum unit.
❶ IMPORTANT

- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.

- To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

B

81
d Put the toner cartridge back into the drum unit until you hear it lock into place. If you put the cartridge properly, the green lock lever will lift automatically.
e Do one of the following:

- If you were able to remove the drum unit and toner cartridge assembly and the jammed paper, then go to step j.

- If you can not remove the drum unit and toner cartridge assembly easily, do not use extra force. Instead, lift the scanner cover.
Use both hands to carefully pull the jammed paper up and out of the output tray opening.
f Close the scanner cover.

g If you could not pull the jammed paper out of the inside of the machine as shown in the step ⑤, take the paper tray completely out of the machine.
h Pull the jammed paper out of the paper tray opening.
i Put the paper tray back in the machine.

j Put the drum unit and toner cartridge assembly back in the machine.
k Close the front cover of the machine. If the machine does not start printing automatically, press **Start**.

Note

If you turn off the machine while the LCD shows Jam Inside, the machine will print incomplete data from your computer.

B

Paper is jammed in the Duplex Tray (MFC-7460DN and MFC-7860DW)

If the LCD shows Jam Duplex, follow these steps:

1 Leave the machine turned on for 10 minutes to cool down.

⚠ WARNING

⚠ HOT SURFACE

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

2 Pull the duplex tray completely out of the machine.
c Pull the jammed paper out of the machine or the duplex tray.
d Make sure that the jammed paper does not remain under the machine from static electricity.
e Put the duplex tray back in the machine.

B

If you are having difficulty with your machine

ⓞ IMPORTANT

For technical help, you must call the country where you bought the machine. Calls must be made *from within* that country.

If you think there is a problem, check the chart below and follow the troubleshooting tips. You can solve most problems by yourself.

If you need additional help, the Brother Solutions Center offers the latest FAQs and troubleshooting tips.

Visit us at http://solutions.brother.com/.

Printing or printing received faxes

Difficulties	Suggestions
■ Condensed print ■ Horizontal streaks ■ Top and bottom sentences are cut off ■ Missing lines	Usually this is caused by a poor telephone connection. If your copy looks good, you probably had a bad connection, with static or interference on the telephone line. Ask the other party to send the fax again.
Poor print quality	See *Improving the print quality* on page 96.
Vertical black lines when receiving	The corona wire for printing may be dirty. Clean the corona wire on the drum unit. (See *Cleaning the corona wire* on page 62.)
	The sender's scanner may be dirty. Ask the sender to make a copy to see if the problem is with the sending machine. Try receiving from another fax machine.
	If the problem continues, call Brother Customer Service.
Received faxes appear as split or blank pages.	If the received faxes are divided and printed on two pages or if you get an extra blank page, your paper size setting may not be correct for the paper you are using. (See *Paper Size* on page 17.)
	Turn on Auto Reduction. (See *Printing a reduced incoming fax* in *Chapter 4* of the *Advanced User's Guide*.)

Telephone line or connections

| Difficulties	Suggestions
Dialing does not work.	Check for a dial tone.
	Check all line cord connections.
	Check that the machine is plugged in and switched on.
	Send a manual fax by pressing **Hook** or by lifting the handset of the external telephone and dialing the number. Wait to hear fax receiving tones before pressing **Start**.
The machine does not answer when called.	Make sure the machine is in the correct receive mode for your setup. (See *Receive Mode settings* on page 30.) Check for a dial tone. If possible, call your machine to hear it answer. If there is still no answer, check the telephone line cord connection. If you do not hear ringing when you call your machine, ask your telephone company to check the line.

Receiving Faxes

Difficulties	Suggestions
Cannot receive a fax.	Make sure your machine has a dial tone by pressing the **Hook** key. If you hear static or interference on your fax line, please contact your local telephone company.
	Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. If you subscribe to DSL or VoIP services, please contact your service provider for connection instructions.
	Make sure the machine is in the correct Receive Mode. This is determined by the external devices and telephone subscriber services you have on the same line as the Brother machine. (See *Receive Mode settings* on page 30.)
	If you have a dedicated fax line and want your Brother machine to automatically answer all incoming faxes, you should select Fax Only mode.
	If your Brother machine shares a line with an external answering machine, you should select the External TAD mode. In External TAD mode, your Brother machine will automatically receive incoming faxes and voice callers will be able to leave a message on your answering machine.
	If your Brother machine shares the line with a Voice Mail subscriber service, please see *Voice Mail* on page 32.
	If your Brother machine is on a line with the Distinctive Ring subscriber service, please see *Distinctive Ring* on page 32.
	If your Brother machine shares a line with other telephones and you want it to automatically answer all incoming faxes, you should select the Fax/Tel mode. In Fax/Tel mode, your Brother machine will automatically receive faxes and produce a pseudo/double-ring to alert you to answer voice calls.
	If you do not want your Brother machine to automatically answer any incoming faxes, you should select the Manual mode. In Manual mode, you must answer every incoming call and activate the machine to receive faxes.
	Another device or service at your location may be answering the call before your Brother machine answers. To test this, lower the ring delay setting: ■ If the answer mode is set to Fax Only or Fax/Tel, reduce the ring delay to 1 ring. (See *Ring Delay* on page 30.) ■ If the answer mode is set to External TAD, reduce the number of rings programmed on your answering machine to 2. ■ If the answer mode is set to Manual, DO NOT adjust the ring delay setting. Have someone send you a test fax: ■ If you received the test fax successfully, your machine is operating properly. Remember to reset your ring delay or answering machine setting back to your original setting. If receiving problems recur after resetting the ring delay, then a person, device, or subscriber service is answering the fax call before the machine has a chance to answer. ■ If you were not able to receive the fax, then another device or subscriber service may be interfering with your fax reception or there may be a problem with your fax line.

B

Receiving Faxes (continued)

Difficulties	Suggestions

Cannot receive a fax.
 	
(continued)
	If you are using a telephone answering machine (`External TAD` mode) on the same line as the Brother machine, make sure your answering machine is set up correctly. (See *Connecting an external TAD (telephone answering device)* on page 35.)
	
	1 Plug the telephone line cord directly from the wall telephone jack to your Brother machine's LINE jack.
	
	2 Remove the protective cap from your Brother machine's EXT jack, and then plug the telephone line cord from your answering machine into the EXT jack.
	
	3 Set your answering machine to answer within 4 rings.
	
	     If you are having problems receiving faxes or voice messages, set your answering machine to answer within 2 or 3 rings.
	
	4 Record the outgoing message on your answering machine.
	
	    ■ Record five seconds of silence at the beginning of your outgoing message.
	
	    ■ Limit your speaking to 20 seconds.
	
	    ■ End your outgoing message with your Fax Receive Code for people sending manual faxes. For example: "After the beep, leave a message or press *51 and Start to send a fax."
	
	5 Set your answering machine to answer calls.
	
	6 Set your Brother machine's Receive Mode to `External TAD`. (See *Receive Mode settings* on page 30.)

	Make sure your Brother machine's Easy Receive feature is turned On. Easy Receive is a feature that allows you to receive a fax even if you have answered the call on an external or extension telephone. (See *Easy Receive* on page 31.)
	If you often get transmission errors due to possible interference on the telephone line, try changing the Compatibility setting to `Basic(for VoIP)`. (See *Telephone line interference* on page 95.)
	(For MFC-7860DW) Contact your administrator to check your Secure Function Lock Settings.

Sending faxes

Difficulties	Suggestions
Poor sending quality.	Try changing your resolution to `Fine` or `S.Fine`. Make a copy to check your machine's scanner operation. If the copy quality is not good, clean the scanner. (See *Cleaning the scanner* in *Appendix A* of the *Advanced User's Guide*.)
Transmission Verification Report says `RESULT:NG`.	There is probably temporary noise or static on the line. Try sending the fax again. If you are sending a PC-Fax message and get `RESULT:NG` on the Transmission Verification Report, your machine may be out of memory. To free up extra memory, you can turn off fax storage (see *Changing Remote Fax Options* in *Chapter 4* of the *Advanced User's Guide*), print fax messages in memory (see *Printing a fax from the memory* in *Chapter 4* of the *Advanced User's Guide*) or cancel a delayed fax or polling job (see *Checking and canceling waiting jobs* in *Chapter 3* of the *Advanced User's Guide*). If the problem continues, ask the telephone company to check your telephone line.
	If you often get transmission errors due to possible interference on the telephone line, try changing the Compatibility setting to `Basic(for VoIP)`. (See *Telephone line interference* on page 95.)
Sent faxes are blank.	Make sure you are loading the document properly. (See *Loading documents* on page 22.)
Vertical black lines when sending.	Black vertical lines on faxes you send are typically caused by dirt or correction fluid on the glass strip. (See *Cleaning the scanner* in *Appendix A* of the *Advanced User's Guide*.)
Cannot send a fax.	(For MFC-7860DW) Contact your administrator to check your Secure Function Lock Settings.

Handling incoming calls

Difficulties	Suggestions
The machine 'hears' a voice as a CNG tone.	If Easy Receive is set to On, your machine is more sensitive to sounds. It may mistakenly interpret certain voices or music on the line as a fax machine calling and respond with fax receiving tones. Deactivate the machine by pressing **Stop/Exit**. Try avoiding this problem by turning Easy Receive to Off. (See *Easy Receive* on page 31.)
Sending a fax call to the machine.	If you answered on an external or extension telephone, press your Fax Receive Code (default setting is ∗51). When your machine answers, hang up.
Custom features on a single line.	If you have Call Waiting, Call Waiting/Caller ID, Caller ID, RingMaster, Voice Mail, an answering machine, an alarm system or other custom feature on a single telephone line with your machine, it may create a problem sending or receiving faxes.
	For Example: If you subscribe to Call Waiting or some other custom service and its signal comes through the line while your machine is sending or receiving a fax, the signal can temporarily interrupt or disrupt the faxes. Brother's ECM feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a single, shared line with custom features. If avoiding a slight interruption is crucial to your business, a separate line with no custom features is recommended.

B

Menu access difficulties

Difficulties	Suggestions
The machine beeps when you try to access the Setup Receive and Setup Send menus.	If **FAX** (🔲) is not illuminated, press it to turn on Fax mode. The Setup Receive settings (**Menu**, **2**, **1**) and Setup Send settings (**Menu**, **2**, **2**) are available only when the machine is in Fax mode.

Copy difficulties

Difficulties	Suggestions
Cannot make a copy.	■ Make sure that **COPY** (🔲) is illuminated. (See *How to copy* on page 48.) ■ (For MFC-7860DW) Contact your administrator to check your Secure Function Lock Settings.
Vertical black line appears in copies.	Black vertical lines on copies are typically caused by dirt or correction fluid on the glass strip, or the corona wire is dirty. (See *Cleaning the scanner* in *Appendix A* of the *Advanced User's Guide* and *Cleaning the corona wire* on page 62.)
Copies are blank.	Make sure you are loading the document properly. (See *Using the automatic document feeder (ADF)* on page 22 or *Using the scanner glass* on page 23.)

Printing difficulties

Difficulties	Suggestions
No printout.	■ Check that the machine is plugged in and the power switch is turned on. ■ Check that the toner cartridge and drum unit are installed properly. (See *Replacing the drum unit* on page 63.) ■ Check the interface cable connection on both the machine and your computer. (See the *Quick Setup Guide*.) ■ Check that the correct printer driver has been installed and chosen. ■ Check to see if the LCD is showing an error message. (See *Error and maintenance messages* on page 68.) ■ Check that the machine is online: (Windows® 7 and Windows Server® 2008 R2) Click the **Start** button and **Devices and Printers**. Right-click **Brother MFC-XXXX Printer**. Make sure that **Use Printer Offline** is unchecked. (Windows Vista®) Click the **Start** button, **Control Panel**, **Hardware and Sound**, and then **Printers**. Right-click **Brother MFC-XXXX Printer**. Make sure that **Use Printer Offline** is unchecked. (Windows® XP and Windows Server® 2003/2008) Click the **Start** button and choose **Printers and Faxes**. Right-click **Brother MFC-XXXX Printer**. Make sure that **Use Printer Offline** is unchecked. (Windows® 2000) Click the **Start** button and choose **Settings** and then **Printers**. Right-click **Brother MFC-XXXX Printer**. Make sure that **Use Printer Offline** is unchecked. ■ (For MFC-7860DW) Contact your administrator to check your Secure Function Lock settings.

Printing difficulties (continued)

Difficulties	Suggestions
The machine prints unexpectedly or it prints garbage.	■ Press **Job Cancel** to cancel print jobs. ■ Check the settings in your application to make sure it is set up to work with your machine. ■ Pull out the paper tray and wait until the machine stops printing. Then turn off the machine's power switch and disconnect from the power for several minutes. (For MFC-7360 and MFC-7460DN) The faxes stored in the machine memory will be deleted. See *Transferring your faxes or Fax Journal report* on page 73 before disconnecting the machine so you will not lose any important messages.
The machine prints the first couple of pages correctly, then some pages have text missing.	■ Check the settings in your application to make sure that it is set up to work with your machine. ■ Your computer is not recognizing the machine's input buffer's full signal. Make sure that you connected the interface cable correctly. (See the *Quick Setup Guide*.)
The headers or footers appear when the document displays on the screen but they do not show up when it is printed.	There is an unprintable area on the top and bottom of the page. Adjust the top and bottom margins in your document to allow for this. (See *Unscannable and unprintable areas* on page 16.)
The machine does not print on both sides of the paper even though the printer driver setting is Duplex.	Check the paper size setting in the printer driver. You need to choose A4 (60 to 105 g/m^2).
The machine is not printing or has stopped printing.	Press **Job Cancel**. As the machine cancels the job and clears it from the memory it may produce an incomplete printout.

Scanning difficulties

Difficulties	Suggestions
TWAIN errors appear while scanning.	Make sure that the Brother TWAIN driver is chosen as the primary source. In Presto! PageManager , click **Select Source** and choose the Brother TWAIN driver.
OCR does not work.	Try increasing the scanning resolution. (Macintosh users) Make sure you have downloaded and installed Presto! PageManager from http://nj.newsoft.com.tw/download/brother/PM9SEInstaller_BR_multilang.dmg
Network scanning does not work.	See *Network difficulties (Network models only)* on page 93.
Cannot scan.	(For MFC-7860DW) Contact your administrator to check your Secure Function Lock Settings.

B

Software difficulties

Difficulties	Suggestions
Cannot install software or print.	**(Windows® only)** Run the **Repair MFL-Pro Suite** program on the installation CD-ROM. This program will repair and reinstall the software.
Cannot perform '2 in 1' or '4 in 1' printing.	Check that the paper size setting in the application and in the printer driver are the same.
The machine does not print from Adobe® Illustrator®.	Try to reduce the print resolution. (See *Basic tab* in the *Software User's Guide*.)

Paper handling difficulties

Difficulties	Suggestions
The machine does not feed paper. The LCD shows No Paper or a Paper Jam message.	■ If there is no paper, load a new stack of paper into the paper tray. ■ If there is paper in the paper tray, make sure it is straight. If the paper is curled, you should straighten it. Sometimes it is helpful to remove the paper, turn the stack over and put it back into the paper tray. ■ Reduce the amount of paper in the paper tray, and then try again. ■ Make sure that manual feed mode is not chosen in the printer driver. ■ Clean the paper pick-up roller. See *Cleaning the paper pick-up rollers* in *Appendix A* of the *Advanced User's Guide*. ■ If the LCD shows the Paper Jam message and you still have a problem, see *Error and maintenance messages* on page 68.
How do I print on envelopes?	You can load envelopes from the manual feed slot. Your application must be set up to print the envelope size you are using. This is usually done in the Page Setup or Document Setup menu of your application.
What paper can I use?	You can use thin paper, plain paper, bond paper, recycled paper, envelopes and labels that are made for laser machines. (For details, see *Acceptable paper and other print media* on page 17.) You can load envelopes from the manual feed slot.
There is a paper jam.	Clear the jammed paper. (See *Paper Jams* on page 76.)

Print quality difficulties

Difficulties	Suggestions
Printed pages are curled.	■ Low quality thin or thick paper or not printing on the recommended side of the paper could cause this problem. Try turning over the stack of paper in the paper tray. ■ Make sure that you choose the Paper Type that suits the print media type you are using. (See *Acceptable paper and other print media* on page 17.)
Printed pages are smeared.	The Paper Type setting may be incorrect for the type of print media you are using, or the print media may be too thick or have a rough surface. (See *Acceptable paper and other print media* on page 17 and *Basic tab* in the *Software User's Guide*.)
Printouts are too light.	■ If this problem occurs when making copies or printing received faxes, turn Toner Save mode to Off in the machine menu settings. (See *Toner Save* in *Chapter 1* of the *Advanced User's Guide*.) ■ Set Toner Save mode to Off in the **Advanced** tab in the printer driver. (See *Advanced tab* in the *Software User's Guide*.)

Network difficulties (Network models only)

Difficulties	Suggestions
Cannot print over a wired network.	If you are having network problems see the *Network User's Guide* for more information. Make sure your machine is powered on and is on-line and in Ready mode. Print the Network Configuration list to see your current network settings. (See *Reports* in *Chapter 6* of the *Advanced User's Guide*.) Reconnect the LAN cable to the hub to verify that the cable and network connections are good. If possible, try connecting the machine to a different port on your hub using a different cable. You can check the current wired network status from the Network control panel menu.
The network scanning feature does not work.	**(Windows®)** It is necessary to set the third-party Security/Firewall Software to allow Network scanning. To add port 54925 for Network scanning, enter the information below: ■ In Name: Enter any description, for example Brother NetScan. ■ In Port number: Enter 54925. ■ In Protocol: UDP is selected. Please refer to the instruction manual that came with your third-party Security/Firewall Software or contact the software manufacturer. For more details, you can read FAQs and troubleshooting suggestions at http://solutions.brother.com/. **(Macintosh)** ■ The network scanning feature may not work due to the firewall settings. Change or disable the firewall settings. If you are using a third-party personal Firewall software, see the User's Guide for your software or contact the software manufacturer. ■ Re-select your machine in the **Device Selector** application located in **Macintosh HD**/**Library**/**Printers**/**Brother**/**Utilities**/**Device Selector** or from the model list in **ControlCenter2**.
The network PC-Fax Receive feature does not work.	**(Windows® only)** It is necessary to set the third-party Security/Firewall Software to allow PC-FAX Rx. To add port 54926 for Network PC-FAX Rx, enter the information below: ■ In Name: Enter any description, for example Brother PC-FAX Rx. ■ In Port number: Enter 54926. ■ In Protocol: UDP is selected. Please refer to the instruction manual that came with your third-party Security/Firewall Software or contact the software manufacturer. For more details, you can read FAQs and troubleshooting suggestions at http://solutions.brother.com/.

B

Network difficulties (Network models only) (continued)

Difficulties	Suggestions
Your computer cannot find your machine.	**(Windows®)**
	The firewall setting on your PC may be rejecting the necessary network connection. (For details, see the instructions above.)
	(Macintosh)
	■ The computer may be unable to detect the machine due to the firewall settings. Change or disable the firewall settings. If you are using a third-party personal Firewall software, see the User's Guide for your software or contact the software manufacturer.
	■ Re-select your machine in the **Device Selector** application located in **Macintosh HD**/**Library**/**Printers**/**Brother**/**Utilities**/**Device Selector** or from the model list in **ControlCenter2**.
Cannot connect to wireless network. (MFC-7860DW)	Investigate the problem using the `WLAN Report`. Press **Menu**, **5**, **7**. and then press **Start**. For more details, see the *Quick Setup Guide*.

Other

Difficulties	Suggestions
The machine will not turn on.	Adverse conditions on the power connection (such as lightning or a power surge) may have triggered the machine's internal safety mechanisms. Turn the machine off and unplug the power cord. Wait for ten minutes, then plug in the power cord and turn the machine on.
	If the problem is not solved, turn off the machine. Plug the power cord into a different known working outlet and turn on the machine.

Setting Dial Tone detection

Setting the Dial Tone to Detection will shorten the Dial Tone detect pause.

a Press **Menu**, **0**, **4**.

```
Initial Setup
4.Dial Tone
```

b Press ▲ or ▼ to choose Detection or No Detection.
Press **OK**.

c Press **Stop/Exit**.

Telephone line interference

If you are having difficulty sending or receiving a fax due to possible interference on the telephone line, we recommend that you adjust the Equalization for compatibility to reduce the modem speed for fax operations.

a Press **Menu**, **2**, **0**, **1**.

```
Miscellaneous
1.Compatibility
```

b Press ▲ or ▼ to choose Basic(for VoIP), Normal or High (MFC-7860DW).

■ Basic(for VoIP) reduces the modem speed to 9600 bps and turns the error correction mode (ECM) off.

For a standard telephone line: If you regularly experience interference on your standard telephone line try this setting.

If you are using VoIP: VoIP service providers offer fax support using various standards. If you regularly experience fax transmission errors try this setting.

■ Normal sets the modem speed at 14400 bps.

■ High sets the modem speed at 33600 bps (MFC-7860DW only).

Press **OK**.

c Press **Stop/Exit**.

Note

When you change the Compatibility to Basic(for VoIP), the ECM feature is only available for fax sending.

Improving the print quality

If you have a print quality problem, print a test page first (**Menu**, **4**, **2**, **3**). If the printout looks good, the problem is probably not the machine. Check the interface cable connections or try printing a different document. If the printout or test page printed from the machine has a quality problem, check the following steps first. And then, if you still have a print quality problem, check the chart below and follow the recommendations.
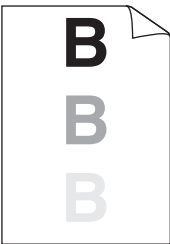

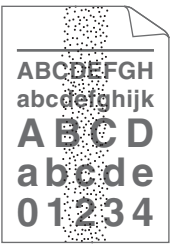

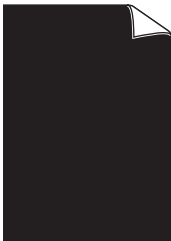

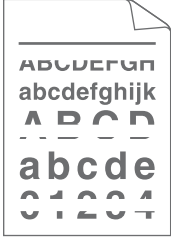

Note
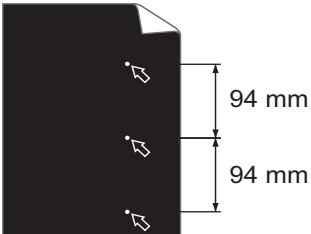

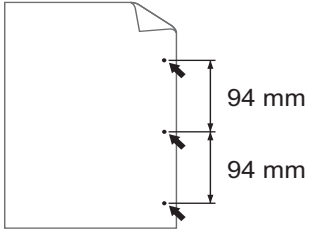

Using non-Brother supplies may affect the print quality, hardware performance, and machine reliability.
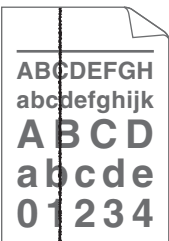

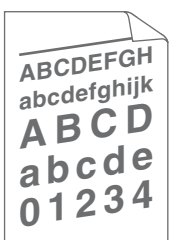

1 To get the best print quality, we suggest using the recommended paper. Check that you use paper that meets our specifications. (See *Acceptable paper and other print media* on page 17.)

2 Check that the drum unit and toner cartridges are installed properly.
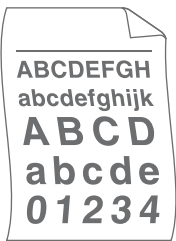

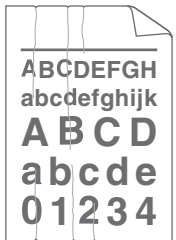

Examples of poor print quality	Recommendation
ABCDEFGH abcdefghijk **A B C D** **a b c d e** **0 1 2 3 4** **Faint**	■ Take out the drum unit and toner cartridge assembly. Hold the assembly level with both hands and gently shake it from side to side several times to spread the toner evenly inside the cartridge. ■ Check if the Toner Settings of Replace Toner is Continue (Continue mode) by pressing **Menu**, **1**, **8**. (See *Toner settings* in *Chapter 1* of the *Advanced User's Guide*.) ■ Check the machine's environment. Conditions such as humidity, high temperatures, and so on, may cause this print fault. (See *Safety and Legal booklet*.) ■ If the whole page is too light, Toner Save mode may be on. Turn off Toner Save mode in the machine menu settings or **Toner Save** mode in the printer **Properties** of the driver. (See *Toner save* in *Chapter 1* of the *Advanced User's Guide* or *Advanced tab* in the *Software User's Guide*.) ■ Clean the corona wire of the drum unit. (See *Cleaning the corona wire* on page 62.) ■ Put in a new toner cartridge. (See *Replacing the toner cartridge* on page 57.) ■ Put in a new drum unit. (See *Replacing the drum unit* on page 63.)

Examples of poor print quality	Recommendation
ABCDEFGH **abcdefghijk** **A B C D** **a b c d e** **0 1 2 3 4** **Gray background**	■ Make sure that you use paper that meets our specifications. (See *Acceptable paper and other print media* on page 17.) ■ Check the machine's environment. Conditions such as high temperatures and high humidity can increase the amount of background shading. (See *Safety and Legal booklet*.) ■ Put in a new toner cartridge. (See *Replacing the toner cartridge* on page 57.) ■ Put in a new drum unit. (See *Replacing the drum unit* on page 63.)
B **B** **B** **B** **Ghost**	■ Make sure that you use paper that meets our specifications. Rough-surfaced paper or thick print media may cause this problem. (See *Acceptable paper and other print media* on page 17.) ■ Make sure that you choose the proper media type in the printer driver or in the machine's Paper Type menu setting. (See *Acceptable paper and other print media* on page 17 and *Basic tab* in the *Software User's Guide*.) ■ Choose **Reduce Ghosting** mode in the printer driver. (See *Ghost Reduction Setting* in the *Software User's Guide*.) ■ Put in a new toner cartridge. (See *Replacing the toner cartridge* on page 57.) ■ Put in a new drum unit. (See *Replacing the drum unit* on page 63.) ■ The fuser unit may be contaminated. Call Brother Customer Service.
ABCDEFGH **abcdefghijk** **A B C D** **a b c d e** **0 1 2 3 4** **Toner specks**	■ Make sure that you use paper that meets our specifications. Rough-surfaced paper may cause the problem. (See *Acceptable paper and other print media* on page 17.) ■ Clean the corona wire and the drum unit. (See *Cleaning the corona wire* on page 62 and *Cleaning the drum unit* in *Appendix A* of the *Advanced User's Guide*.) ■ The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 63.) ■ The fuser unit may be contaminated. Call Brother Customer Service.
B **Hollow print**	■ Make sure that you use paper that meets our specifications. (See *Acceptable paper and other print media* on page 17.) ■ Choose **Thick Paper** mode in the printer driver, choose Thick in the machine's Paper Type menu setting or use thinner paper than you are currently using. (See *Paper Type* on page 17 and *Basic tab* in the *Software User's Guide*.) ■ Check the machine's environment. Conditions such as high humidity can cause hollow print. (See *Safety and Legal booklet*.) ■ The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 63.)

B
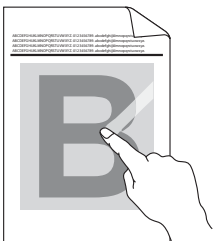

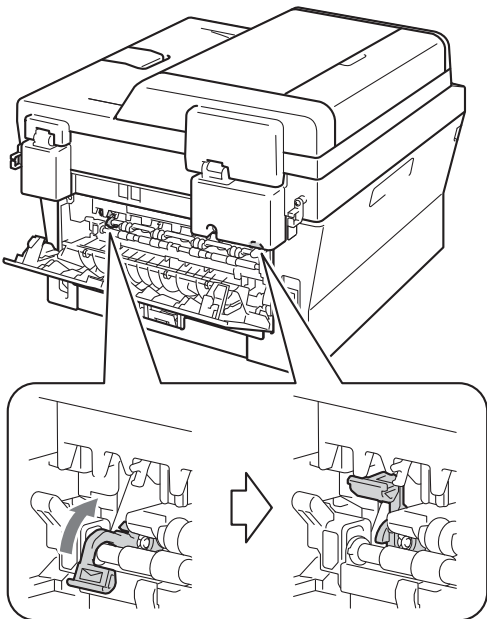

Examples of poor print quality	Recommendation
All black	■ Clean the corona wire inside the drum unit by sliding the green tab. Be sure to return the green tab to the home position (▲). (See *Cleaning the corona wire* on page 62.) ■ The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 63.) ■ The fuser unit may be contaminated. Call Brother Customer Service.
ABCDEFGH abcdefghijk **A B C D** **a b c d e** **0 1 2 3 4** **White lines across the page**	■ Make sure that you use paper that meets our specifications. A rough surfaced paper or thick print media can cause problems. ■ Make sure that you choose the appropriate media type in the printer driver or in the machine's Paper Type menu setting. (See *Acceptable paper and other print media* on page 17 and *Basic tab* in the *Software User's Guide*.) ■ The problem may disappear by itself. Print multiple pages to clear this problem, especially if the machine has not been used for a long time. ■ The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 63.)
ABCDEFGH abcdefghijk A B C D a b c d e 0 1 2 3 4 **Lines across the page**	■ Clean the corona wire of the drum unit. (See *Cleaning the corona wire* on page 62.) ■ The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 63.)
ABCDEFGH abcdefghijk A B C D a b c d e 0 1 2 3 4 **White lines, bands or ribbing across the page**	■ Check the machine's environment. Conditions such as high humidity and high temperatures may cause this print quality problem. ■ If the problem is not solved after printing a few pages, put in a new drum unit. (See *Replacing the drum unit* on page 63.)

Examples of poor print quality	Recommendation
White Spots on black text and graphics at 94 mm intervals Black Spots at 94 mm intervals	■ Make ten copies of a blank, white sheet of paper. (See *How to copy* on page 48.) If the problem is not solved, the drum unit may have glue from a label stuck on the OPC drum surface. Clean the drum unit. (See *Cleaning the drum unit* in *Appendix A* of the *Advanced User's Guide*.) ■ The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 63.)
Black toner marks across the page	■ If you use label sheets for laser printers, the glue from the sheets may sometimes stick to the OPC drum surface. Clean the drum unit. (See *Cleaning the drum unit* in *Appendix A* of the *Advanced User's Guide*.) ■ Make sure that you use paper that meets our specifications. (See *Acceptable paper and other print media* on page 17.) ■ Do not use paper that has clips or staples because they will scratch the surface of the drum. ■ If the unpacked drum unit is in direct sunlight or room light, the unit may be damaged. ■ The toner cartridge may be damaged. Put in a new toner cartridge. (See *Replacing the toner cartridge* on page 57.) ■ The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 63.)

B

Examples of poor print quality	Recommendation
Black lines down the page Printed pages have toner stains down the page.	■ Clean the corona wire inside the drum unit by sliding the green tab. (See *Cleaning the corona wire* on page 62.) ■ Make sure the green tab of the corona wire is at the home position (▲). ■ The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 63.) ■ The toner cartridge may be damaged. Put in a new toner cartridge. (See *Replacing the toner cartridge* on page 57.) ■ The fuser unit may be contaminated. Call Brother Customer Service.
White lines down the page	■ The toner cartridge may be damaged. Put in a new toner cartridge. (See *Replacing the toner cartridge* on page 57.) ■ The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 63.) ■ Check if the Toner Settings of Replace Toner is Continue (Continue mode), by pressing **Menu**, **1**, **8**. (See *Toner settings* in *Chapter 1* of the *Advanced User's Guide*.) ■ Make sure that a torn piece of paper is not stuck inside the machine blocking the scanner.
Page skewed	■ Make sure that the paper or other print media is loaded properly in the paper tray and that the guides are not too tight or too loose against the paper stack. ■ Set the paper guides correctly. (See *Loading paper* on page 9.) ■ If you are using the manual feed slot, see *Loading paper in the manual feed slot* on page 11. ■ The paper tray may be too full. (See *Loading paper* on page 9.) ■ Check the paper type and quality. (See *Acceptable paper and other print media* on page 17.) ■ Check for loose objects such as torn paper inside the machine. ■ Verify that the two green envelope levers inside the back cover are set to the same position. ■ Verify that the two gray Anti-Curl Levers inside the back cover are set to the same position. ■ If the problem only occurs during duplex printing, check for torn paper in the duplex tray, verify that the duplex tray is inserted completely and verify that the back cover is closed completely.

Examples of poor print quality	Recommendation
ABCDEFGH **abcdefghijk** **A B C D** **a b c d e** **0 1 2 3 4** **Curled or wavy**	■ Check the paper type and quality. High temperatures and high humidity will cause paper to curl. (See *Acceptable paper and other print media* on page 17.) ■ If you do not use the machine often, the paper may have been in the paper tray too long. Turn over the stack of paper in the paper tray. Also, fan the paper stack and then rotate the paper 180° in the paper tray. ■ Open the back cover (face-up output tray) for the machine to eject printed pages onto the face-up output tray. ■ Choose **Reduce Paper Curl** mode in the printer driver when you do not use our recommended paper. (See *Other Print Options* (for Windows®) or *Print Settings* (For Macintosh) in the *Software User's Guide*.)
ABCDEFGH **abcdefghijk** **A B C D** **a b c d e** **0 1 2 3 4** **Wrinkles or creases**	■ Make sure that the paper is loaded properly. (See *Loading paper* on page 9.) ■ Check the paper type and quality. (See *Acceptable paper and other print media* on page 17.) ■ Turn over the stack of paper in the tray or try rotating the paper 180° in the input tray.

B

Examples of poor print quality	Recommendation
Envelope creases	■ Make sure that the two green envelope levers inside the back cover are pulled down when you print the envelope. **✍ Note** When you have finished printing, open the back cover and reset the two green levers back to their original position.

Examples of poor print quality	Recommendation
Poor fixing	■ Open the back cover and make sure that the two green envelope levers on the left and right hand sides are in the up position. ■ Choose **Improve Toner Fixing** mode in the printer driver. (See *Other Print Options* (for Windows®) or *Print Settings* (For Macintosh) in the *Software User's Guide*.) If this selection does not provide enough improvement, select **Thicker Paper** in **Media Type** settings.

Examples of poor print quality	Recommendation
ABCDEFGH abcdefghijk ABCD abcde 01234 **Curled**	■ Choose **Reduce Paper Curl** mode in the printer driver when you do not use our recommended paper. (See *Other Print Options* (for Windows®) or *Print Settings* (For Macintosh) in the *Software User's Guide*.) ■ Turn the paper over in the paper tray, and print again. (Excluding letterhead paper) If the problems remains, switch the Anti-Curl Levers as follows: 1 Open the back cover. 2 Lift the lever (1) and slide the two gray levers (2) in the direction of the arrow.

Examples of poor print quality	Recommendation
ABCDEFGH abcdefghijk **A B C D** **abcde** **01234** **Curled**	■ Lift up the output tray support flap.

Machine Information

Checking the Serial Number

You can see the machine's Serial Number on the LCD.

1 For MFC-7360 and MFC-7460DN, press **Menu**, **6**, **1**.
For MFC-7860DW, press **Menu**, **7**, **1**.

```
Machine Info.
1.Serial No.
```

2 The machine will display the machine's Serial Number on the LCD.

3 Press **Stop/Exit**.

Reset functions

The following reset functions are available:

1 (Network models only) `Network`

You can reset the internal print server back to its default factory settings such as the password and IP address information.

2 `Address & Fax`

Address & Fax resets the following settings:

■ Address Book

(One Touch Dial/Speed Dial/Setup Groups)

■ Programmed fax jobs in the memory

(Polled TX, Delayed Fax)

■ Station ID

(name and number)

■ Coverpage Msg

(comments)

■ Remote Fax Options

(Remote Access Code, Fax Storage, Fax Forwarding, Paging and PC-Fax)

■ Report settings

(Transmission Verification Report/ Tel Index List/Fax Journal)

■ Setting Lock password

3 `All Settings`

You can reset all the machine settings back to the settings that were set at the factory.

Brother strongly recommends you perform this operation when you dispose of the machine.

Note

Unplug the interface cable before you choose `Network` or `All Settings`.

How to reset the machine

1. Press **Menu**, **0**.

2. Press ▲ or ▼ to display Reset.
   Press **OK**.

3. Press ▲ or ▼ to choose the reset function you want to use.
   Press **OK**.

4. Do one of the following:

   ■ To reset the settings, press **1** and go to step ❺.

   ■ To exit without making changes, press **2** and go to step ❻.

5. You will be asked to reset the machine.
   Do one of the following:

   ■ To reset the machine press **1**. The machine will begin the reset.

   ■ To exit without resetting the machine, press **2**. Go to step ❻.

6. Press **Stop/Exit**.

Note

You can also reset the Network settings.

- For MFC-7460DN, press **Menu**, **5**, **0**.

- For MFC-7860DW, press **Menu**, **6**, **0**.

B

C Menu and features

On-screen programming

Your machine has been designed to be easy to use. The LCD provides on-screen programming using the menu keys.

We have created step by step on-screen instructions to help you program your machine. Simply follow the steps as they guide you through the menu selections and programming options.

Menu table

You can program your machine by using the *Menu table* on page 109. These pages list the menu selections and options. Press **Menu** followed by the menu numbers to program your machine. For example, to set Beeper volume to Low:

1. Press **Menu**, **1**, **3**, **2**.

2. Press ▲ or ▼ to choose Low.

3. Press **OK**.

How to access the menu mode

1. Press **Menu**.

2. Choose an option.
   - Press **1** for General Setup menu.
   - Press **2** for Fax menu.
   - Press **3** for Copy menu.

   (MFC-7860DW)
   - Press **4** for Printer menu.
   - Press **5** for Print Reports menu.
   - Press **6** for Network menu.
   - Press **7** for Machine Info. menu.

(MFC-7460DN)
- Press **4** for Print Reports menu.
- Press **5** for Network menu.
- Press **6** for Machine Info. menu.

(MFC-7360)
- Press **4** for Print Reports menu.
- Press **5** for Machine Info. menu.
- Press **9** for Service menu. [1]
- Press **0** for Initial Setup menu.

[1] This will appear only when the LCD shows an error message.

You can also scroll through each menu level by pressing ▲ or ▼ for the direction you want.

3. Press **OK** when the option you want appears on the LCD.
   The LCD will then show the next menu level.

4. Press ▲ or ▼ to scroll to your next menu selection.

5. Press **OK**.
   When you have finished setting an option, the LCD will show Accepted.

6. Press **Stop/Exit** to exit Menu mode.

C

Entering text

When setting certain menu selections, such as the Station ID, you will need to type text characters. The dial pad keys have letters printed on them. The keys: **0**, **#** and ✶ do *not* have printed letters because they are used for special characters.

Press the appropriate dial pad key the number of times shown in this reference table to access the character you want.

Press Key	one time	two times	three times	four times	five times	six times	seven times	eight times	nine times
1	@	.	/	1	@	.	/	1	@
2	a	b	c	A	B	C	2	a	b
3	d	e	f	D	E	F	3	d	e
4	g	h	i	G	H	I	4	g	h
5	j	k	l	J	K	L	5	j	k
6	m	n	o	M	N	O	6	m	n
7	p	q	r	s	P	Q	R	S	7
8	t	u	v	T	U	V	8	t	u
9	w	x	y	z	W	X	Y	Z	9

For menu selections that do not allow lower case character selection, please use this reference table.

Press Key	one time	two times	three times	four times	five times
2	A	B	C	2	A
3	D	E	F	3	D
4	G	H	I	4	G
5	J	K	L	5	J
6	M	N	O	6	M
7	P	Q	R	S	7
8	T	U	V	8	T
9	W	X	Y	Z	9

Inserting spaces

To enter a space in a fax number, press ▶ once between numbers. To enter a space in a name, press ▶ twice between characters.

Making corrections

If you entered a letter incorrectly and want to change it, press ◀ or ▶ to move the cursor to the incorrect character, and then press **Clear**.

Repeating letters

To enter a character on the same key as the previous character, press ▶ to move the cursor right before pressing the key again.

Special characters and symbols

Press *, **#** or **0**, then press ◀ or ▶ to move the cursor to the symbol or character you want. Press **OK** to choose it. The symbols and characters below will appear depending on your menu selection.

Press *	for	(space) ! " # $ % & ' ( ) * + , - . / €
Press **#**	for	: ; < = > ? @ [ ] ^ _ \ ~ ' | { }
Press **0**	for	É À È Ê Î Ç Ë Ö 0

D Specifications

General

Printer Type	Laser
Print Method	Electrophotography by semiconductor laser beam scanning
Memory Capacity	(MFC-7360) 16 MB
	(MFC-7460DN/MFC-7860DW) 32 MB
LCD (liquid crystal display)	16 characters × 2 lines
Power Source	110 - 120 V AC 50/60 Hz
Power Consumption [1]	Peak: 1080 W

Copying: [2]	Approx. 445 W at 25 °C
Ready:	Approx. 55 W at 25 °C

For Wireless models

(WLAN: On) Sleep:	Approx. 3.9 W
(WLAN: Off) Deep Sleep:	Approx. 1.7 W

For non-Wireless models
Deep Sleep:	Approx. 1.5 W

Note

All figures stated above (except Peak) are average figures.
